```

Sounds like the reason that resistor is unlabled is so that the designer can choose
one in which the desired result is obtained at correct frequency. Looks suspiciously like an excercise question
straight out of the text book.

Sorry, chaps. That unlabeled one shouldn't be there at all so please
mentally delete it (I've attempted to do this in the above ammended
diagram).
I think the load resistors simplify to just one 10k, but my mental
arithmetic's pretty hopeless.
So anyway, what's the answer?

On Sat, 29 Mar 2003 01:20:08 GMT, "Tweetldee" <dgmason99@att99.net>
opined thusly:

>The answer is "impossible". Several reasons why:
>(1) The voltage divider created by the 10K and 30K resistors limit the
>voltage to 75% of Vin, no matter what the frequency.
>(2) The equivalent value of the load is 10K, and disregarding the capacitor,
>the 30K resistor and the unlabeled component, the voltage divider created by
>the 10K load and the 10K input resistor limits the maximum voltage at the
>load to 50% of Vin.

Please ignore the unlabeled resistor - it shouldn't be there.
Let me rephrase as the original post was unclear:

"What is the lowest frequency for which 90% of the voltage that
appears across the 30k resistor will appear across the three furthest
right resistors?"

substituting R1 for the cap,

   E1
   |
  [R1]
   |
   +--->E2
   |
  [R2]
   |
  GND
```

Solve for the resistance which will result in E2 being 90% of E1:

R1 = R2(E1-E2)/E2 = 10k(1-0.9)/0.9 ~ 1111 ohms

Putting the cap back in:

```
   E1
   |
  [C1]
   |
   +--->E2
   |
  [R2]
   |
  GND
```

Solve for the frequency where 10�F looks like 1111 ohms:

f = 1/2*pi*Xc*C = 1/2*3.14*1111*10E-6 = 14.325Hz.

The answer is no frequency. Vin is divided to 0.75 by the 10K-30K and any impedance in parallel with the 30K will only make the division less of a fraction to be further divided by the load resistors.

Are you sure, John? Simulation gave me about 3.6 Hz

Well I can see what you're getting at here, but John Fields arrived at
a credible answer via a (prima facie) credible method, SFAICS. So I'm
confused, really. If Win Hill (or any other God-like authority) is
reading this perhaps they will be kind enough to adjudicate!

> So anyway, what's the answer?
```

Yes, 1/(1/20k +1/40k+1/40k)=10k.

And the source side can be replaced with its Thevenin equivalent of a voltage source 3/4 of Vin with a series resistor of 1/(1/10k +1/30k)=7.5k. So the easier to analyze circuit is:

```
              ___     || 10 uf
 (3/4)*Vin  -|___|----||---+ Vout
              7.5K    ||   |
                          .-.
                          | | 10k
                          | |
                          '-'
                           |
```

GND

At high frequencies, where the cap can be considered to be a short, the output voltage
will approach 10k/(7.5K+10K)*(3/4)*Vin=.4285*Vin.

So I am assuming the goal is to determine the frequency at which Vout is:

0.9*.4285*Vin=.3857*Vin.

Treating the above as a voltage divider that now also contains a capacitive impedance, Zc, the above equation becomes: (where ABS means absolute value or magnitude)

ABS(10k/(7.5K+Zc+10K))*(3/4)=.3857, but Zc has to be expressed in imaginary form (1/(i*2*pi*f*10^-5), and the equation has to be solved with complex math.

ABS(10K/17.5K+1/(i*2*pi*f*10^-5))*(3/4)=.3857

I get a value of 1.887 Hz for the frequency that satisfies this equation. Since the capacitive drop is a small part of the total divider drop (the cap will not produce anything near a full 90 degree phase shift between input and output), a quick test for reasonableness is to calculate the frequency where the response is down 3 db, and the capacitor is producing a net 45 degree phase shift. This will occur when the capacitive reactance is equal to the total resistance in series with it, and should be quite a bit lower than this frequency.

Xc=17.5K=1/(2*pi*f*10^-5)
f=.9095 Hz, which is about half of the above frequency, which feels about right.

As per my reply to John Fields, I got about 3.6 Hz using simulation.

It sounds like I may have got a factor of 2 missing somewhere.
Can you find it?

wrong with my simulation or my interpretation of it. I have to go out
shortly, but will check tomorrow and then post an illustration if
necessary.

Anyone else with a simulation? (Where are the LTSpicers when you need
them?)

Hi Paul et al,

> "What is the lowest frequency for which 90% of the voltage that
> appears across the 30k resistor will appear across the three furthest
> right resistors?"

Why I do like these little 'teasers' - other people's problems are so much more fun than one's own!

I make it 3.29Hz, as below, and v. roughly checked by simulation, and seems to tie in with Terry's value of 3.6 too:

Let voltage into cap be Vi; voltage other side is Vo. The 10u cap and 10k (equivalent) resistor are just a simple potential divider, i.e. Vo = Vi*10^4(1/(j*w*10^{-5})+10^4). Jiggle around a bit gives
Vo/Vi = j*w*0.1/(1+j*w*0.1). Want value of w for which absolute value of this = 0.9, so take absolute values and square to make it easier:
0.01*w^2/(1+0.01*w^2)=0.9^2, more jiggling: 0.01*w^2(1-0.81) = 0.81, i.e. w = sqrt(81/0.19). Now divide by 2 pi, gives f = 3.29Hz.

Can anybody else concur with this?

Tim

<terrypinDELETE@dial.pipexTHIS.com> opined thusly:

>Are you sure, John? Simulation gave me about 3.6 Hz

LT Spice comes out at 3.324Hz. But it's the method of arriving at the
correct answer I'm concerned with and of course the simulators don't
give this.

See my other reply, Terry. I got 3.324Hz from LTSspice, but that's assuming 10% off any given voltage is the same as 0.9dB down.
But my notes from 1980 give workings that show a hand analysis result of 9.09hz which is exactly a factor of ten out from someone else's result elsewhere in the thread. It seems a lot of us are making stoopid errors resulting in our answers differing by various low integer multiples! I guess it must come down to undue haste and carelessness.

has anyone come up with a *definitive* answer yet, showing the math, that most folks are agreed is correct?

```

Geez, this is second-quarter EE, "AC circuits analysis". I didn't get a degree, but I sure remember the content of that class. You can't do much worthwhile with electronics without knowing this stuff and getting the right answers. I've done this for loudspeaker crossovers (I wrote a Basic program on an Apple /// to show frequency response to each driver of a three-way crossover - this was a couple decades ago), filters, capacitor-coupled amplifiers...

OTOH, the different answers could be the result of different interpretations of the question.

I'm going to redefine Vin to be the voltage at the left of the 7.5k. The actual Vin and the 3/4 factor are irrelevant to the answer.

At high frequencies, Vout is
10/(7.5+10)=0.571428571428571428571428571428571 * Vin
What frequency is Vout 9/10 that, or
0.514285714285714285714285714285714 Vin?

Forget that - I can reword the question, and just manipulate symbols for a while.

What frequency is Vout 9/10 of that at high frequencies?

At high frequencies, Vout is
10k/(7.5k+10k) * Vin

At lower frequencies, Vout is
10k/(7.5k+Xc+10k) * Vin

The equation is:

10k/(7.5k+Xc+10k) = 0.9 * 10k/(7.5k+10k)

Solve for Xc, then F for C=10uF.

1/(7.5k+Xc+10k) = .9 / (7.5k+10k)
1/(7.5k+Xc+10k) = .9 / (7.5k+10k)
7.5k+Xc+10k = (7.5k+10k)/.9
7.5k+Xc+10k = (7.5k+10k)/.9

17.5k+Xc = 17.5k/.9
17.5k+Xc = 17.5k/.9

Since Vout is a magnitude, and it even has zero phase angle (it's the voltage developed across a resistor to ground, so the current and voltage are in phase), what we really want is the magnitude of the complex number on the left, using Pythagoras' right-triangle equation:

sqrt(17.5k^2+Xc^2) = 17.5k/.9
17.5k^2+Xc^2 = (17.5k/.9)^2
Xc = (17.5k/.9)^2 - 17.5k^2
Xc = 8475.63683466242079601635385750481 ohms

Xc = 1/(2*pi*F*C)
F = 1/(2*pi*Xc*C)
F = 1/ (2*pi*8475.63683466242079601635385750481 * 10e-6)
F = 1.87779332923995410360441674162563 Hz.

I recall the professor wanting 4 significant figures, they saidn that even in the slide-rule days they wanted 4 significant figures:

F = 1.878 Hz

Yes, I think so.

The correct equation results in:

```
  f = 1 / (2*PI*R1*C1*SQRT(1/(.9^2) - 1)) = 3.286138 Hz
```

Do you see why?

Jon

Okay. Here's some drawn out logic, without getting directly
into complex numbers (which means I'll stay with a phaser
approach.)

Here's the set up which I think we all agree with, as a Thevenin
equivalent:

```
                R_2=  7.5k
              >----/\/\/-----x------------>  V_2
                             |
              ^              |
              |             --- C_1= 10u
              |             ---
              |              |
                             x------------>  V_1
     V_t= 0.75*Vin           |
                             /
              |              \ R_1= 10k
              |              /
              v              |
                             |
              >--------------x
                             |
                            gnd
```

(I'm using underscores here to imply substripting.)

The magnitude value of Z_t (total impedance) is simply

The voltage across R_1 is simply:

```
   V_1 = (R_1 / Z_t) * V_t
```

The voltage at V_2 requires a complex impedance made up of C_1 and R_1 (which I'll call Z_rc below), so that:

```
   V_2 = (Z_rc / Z_t) * V_t
```

We also know that V_1 is related to V_2, as in:

```
   V_1 = 0.9 * V_2
```

So, combining the above:

```
   (R_1 / Z_t) * V_t  = 0.9 * (Z_rc / Z_t) * V_t
```

We can cancel out Z_t and V_t in the above to get:

```
   R_1 = 0.9 * Z_rc
```

Pretty basic, I suppose. Now we need Z_rc, which is:

```
   Z_rc = SQRT(R_1^2 + X_c^2)
```

So,

```
   R_1 = 0.9 * SQRT(R_1^2 + X_c^2)
   R_1^2 = 0.9^2 * (R_1^2 + X_c^2)
   R_1^2 / (0.9^2) = R_1^2 + X_c^2
   R_1^2 / (0.9^2) - R_1^2 = X_c^2
   R_1^2 * (1 / (0.9^2) - 1) = X_c^2
   SQRT(R_1^2 * (1 / (0.9^2) - 1)) = X_c
   R_1 * SQRT(1 / (0.9^2) - 1) = X_c
```

We also know that X_c is:

```
   X_c = 1 / (2*PI*f*C_1)
```

So,

```
   1 / (2*PI*f*C_1) = R_1 * SQRT(1 / (0.9^2) - 1)
```

Or,

```
   1 / (2*PI*R_1*C_1) = f * SQRT(1 / (0.9^2) - 1)
   f = 1 / (2*PI*R_1*C_1*SQRT(1 / (0.9^2) - 1))
```

Which calculates out as:

```
   f = 1 / (2*PI*10k*10u*SQRT(1 / (0.9^2) - 1))
     = 3.286 Hz
```

Jon

Very nice work. But has Paul clarified if this is what he means by
"the output is 90% of the input? With V1 changing with frequency as
well as V2, I don't see why he would use this definition, unless he
was taking the ratio of both those voltages, elsewhere, and he didn't

mention using V1 as an output. I can't read his mind, however, and I will suspend judgment till he clears this up. I assumed the 90% referred to V2 at some low end of a frequency band relative to the ultimate output voltage well up in the band. but maybe this is just the way I think of frequency response specs. Change the definition of 90% and you shift the frequency.

In my engineering classes they told us to consider the tolerance of the parts in the circuit when deciding how many significant digits to carry.

This is uneeded in all modern tranceivers. The offset is built in. You don't need or even want to be zero beat. All you want to do is tune to a comfortable pitch which will usually be in the 500-900 hz range. When you switch to CW, the offset is already built in. So if you zero beat someone to where you can't hear them, they likely won't hear you either as you will probably be zero beat to them also. To sum, just tune to the most comfortable pitch. The rest is automatic. MK

Still doesn't matter. Tune for best pitch. As an example, my 706 can reverse the CW from USB to LSB. It can work either way. You still just tune to the most comfortable pitch either way. MK

Not directly, as far as I've seen. But I did notice this, from
him:

This simulated estimate of "3.324Hz" strongly *suggests* that
whatever it is he feels he means (as evidenced by whatever it
was he was doing LT Spice) is congruent in some fashion with
what I feel he means. Strengthens my hope, anyway.

Hehe. It's possible you only imagine you aren't sure about what
you thought you read, but I may imagine what you imagine as more
similar in some way than you imagine it is. :P

Jon

Okay, let me further clarify with a simplified diagram and phrasing
that should allow for no misinterpretation:

```
              10k              10u
              ___              ||
        o----|___|------o-----o||o----o----------o
                        |      ||     |           Vout (0.9v P-P)
Vin (1v P-P)            o             o
                       .-.           .-.
                       | |30k        | |10k
                       | |           | |
                       '|'           '|'
        o---------------o-------------o-----------o
                               |
                              ===
                              GND
```

View the above in Courier font or similar.
created by Andy�s ASCII-Circuit v1.22.310103 Beta www.tech-chat.de

The question is:
"Vin" is a sine wave input signal voltage. At what frequency of the
signal source "Vin" does the circuit shown above give the required
"Vout" level of 0.9v peak-to-peak?

That's an awesome calculator Ben's got there, by the look of it. :-)
What are you using, Ben? A Cray III? ;-)

<jkirwan@easystreet.com> opined thusly:

>This simulated estimate of "3.324Hz" strongly *suggests* that
>whatever it is he feels he means (as evidenced by whatever it

>was he was doing LT Spice) is congruent in some fashion with
>what I feel he means. Strengthens my hope, anyway.

Not really, Jon. My own hand analysis gives a result of 9.09Hz. See
the clarified diagram on my new posting under this topic.

That is much easier that what we have been assuming. There is no frequency for which the output will be 90% of the input.

Even at frequencies so high that the capacitor has an insignificant impedance, the resistors will form a divider that knocks the input voltage by a factor of 7.5/17.5=3D42.9% There is no hope of getting 90% out.

Please rethink the question.

>
>What happened to the square root of the right side when you took the
>square root of Xc^2?

You caught me. That line should be:
Xc^2 = (17.5k/.9)^2 - 17.5k^2
followed by:
Xc = sqrt((17.5k/.9)^2 - 17.5k^2)

But I KNEW what I was doing :) ... I did it again to see if I
actually did the calculation right - I DID take the square root to get
this:

>> Xc = 8475.63683466242079601635385750481 ohms

Now on to the next post:

In sci.electronics.design, Paul Burridge
<redscar@spamfree.notformail!> wrote:

>That's an awesome calculator Ben's got there, by the look of it. :-)
>What are you using, Ben? A Cray III? ;-)

Actually it's the calculator application that comes with Windows
98. I've used it a good bit for calculations. You can actually
copy-and-paste things to and from it, though I didn't use the
copy-to-calculator feature in the above, only the copy-from-calculator
and into my newsreader. Here's a quick example:
1/127=
[select these six characters, copy, toggle (alt-tab) over to
calculator, paste (it 'executes' the keystrokes), copy, toggle back to
newsreader, paste]
0.00787401574803149606299212598425197
I just looked up sqrt, it's the @ symbol, but I often do key sequences
such as: 5y2r= which is 5 to the power of (2 reciprocal). I like the

old HP calculators from way back, but in recent years I've actually
learned this stupid thing. If a calculation is too complicated to
easily handle on it, I do a spreadsheet.

>
>   V_2 = (Z_rc / Z_t) * V_t

   I agree with all this so far, except I'm wondering why you're
calculating V_2 - apparently you see it as part of the problem/path to
the solution, whereas I don't...

>We also know that V_1 is related to V_2, as in:
>
>   V_1 = 0.9 * V_2

   This is a DIFFERENT interpretation of the problem than the one I
solved. I read the problem to be:
   Measure the voltage V_1 with an 'arbitrarily high' frequency so
that the reactance of C_1 is effectively zero. Now the frequency is
lowered (with amplitude constant, of course) - at what frequency will
V_1 drop to 0.9 times its original value?
```

My reading of the problem has nothing to do with V_2, so if you use V_2 of course there will be a different answer.

> ...
>
>   f = 1 / (2*PI*10k*10u*SQRT(1 / (0.9^2) - 1))
>   = 3.286 Hz

I didn't check it, but I presume that's the correct value for YOUR understanding of the problem. I think the "CORRECT" understanding of the problem is still in dispute...now if Paul can clear it up...

opined thusly:

>First of all, what is the brand/model number of the
>Signal Generator you have available?
>
Oh dear. First setback. It turns out to be only a 30Mhz one. Of course
I could take the first harmonic of 20 with a suitable doubler hooked
on, but I'd have to knock one up. OTOH, I could easily knock up a
40Mhz LC oscillator. Or there again, I could use the GDO I've recently
completed as a signal source. What's my best bet, John?

>Is your RC set AM or FM?

FM.

>What is the brand/ model number?
>Maybe it is on the web so that we can see it.

It's a Sanwa VG600 6 channel "digital proportional system" (whatever
that is supposed to mean). ISTR the RX for it is a single conversion
job.

```

Dear people,

I have a few questions about the Uniden Bearcat 50XL handscanner, and I hope that at least some of you can anwser them.

First of all, I'll give you the statistics of this scanner, because some asked these in their posts:

Freq. coverage: 66 - 88 MHz, 136 - 174 MHz and 406 - 512 MHz NFM.
Memory: 10 Ch.
Scanspeed: 16 ch/p/s
Programming is easy: stop manualy at a channel, unlock the keypad, enter the frequencie and end by pressing E.

Now my questions:

Does anybody know the sensitivity of this scanner (in uV) in the various bands? And does anybody have a manual (online??)? And does anybody have some modifications for this receiver in terms of expanding frequencie coverage or expanding memory capacity? Or if you have anything else that you think could be something for me, than please tell me by sending me an e-mail at rick2910@lycos.nl

Hopefully someone does know some of the things that I want to know.

Yours faithfully,

Rick.

Very likely.

In New England, there is a master list of Hamfests posted on the Web
and various other places like club newsletters, and ham shops.

Google, or ask around one of the local radio clubs, to find the
equivalent for NJ. I would be very surprised if there wasn't one.

Happy trails,
Gary (net.yogi.bear)

To extend John's suggestion a little, put ferrite beads on the coax
from the bulkhead connector to your Rx. This helps to break the
potential ground loop at RF, forcing the return path to actually
be the coax outer.

Ideally, you would use a bulkhead BNC to SMA adaptor, with
a semirigid cable to your Rx, but that's a bit OTT ;-)

Regards
    Ian

I would like to control my 545 RX via my PC and im after a diagram to build a cable myself ,does anyone know the exact pinouts to achieve this? (DB25M > DB9F)

I have searched the net for several hours but only turned up one site to which i followed the instructions but to no avail.

Any help appreciated.

What actually is an RF "ground loop" and why is it important to
minimise it?

I'll try...
More WMD have been destroyed through using a plan,
than all the indiscriminate killing with bombs America
has done to our World as the bad guys.

The 'regime change' argument requires Saddam to pose some threat to world peace by being in posession of WMD. Now, to rid the world of such threats, weapon inspectors have been granted full open access, while carrying public allegations by the bushmob largely unsubstantiated and about to be proven near false with Iraqi paper work and destruction sites. If WMD is the threat, then the most effective method of reducing the risk is to not lower the odds. Again, FULL, OPEN ACCESS is already offered to inspectors who require no American Soldier life sacrifices as worthless without meaning.
(Americans are often shokingly stupid as bushwhores eh?)

Now, if bush wasn't the antiChrist, he would encourage the completion of the successful process, acknowledge Saddam for treating US People better than bush's evil war partners the Northern Alliance, Uzbeckistan, Saudi Arabia and Kuwait. Then finally, demon bush would arrest himself for being a traitor and completely incompetent...

--

Truth, as is justice and freedom, are shared values with all of creation in a dream called forever answering not home. So I suppose, I rely partly in faith that we shall prevail as sure as life is by communicating something...

Example:

Have you heard demon bush recently talk on how he would work to prosecute Saddam's forces if they should attack Iraqi infrastructure as war criminals, but neglected to mention that is precisely what dimwit american nazi forces did last time targeting specifically Iraqi people by hitting water treatment plants, and then further on with irrational sanctions on food and medicine? Our Mr. bush Jr., the antiChrist, is now condemning himself as traitor to American values openly, as evil is the decieved disguised. Wow! What a show!

>
> > > > > Why murder people (who could Just as sure be YOU) for bush when we don't need to sacrifice our families for such evil stupidity? If inspectors have unfettered access, and bush has no evidence to substaniate his demon allegations, why then must ALL America side to be war criminals? Is it not more effective to go anywhere without firing a shot, than it would be to kill people as innocent to increase the terrorist threat? How can warring Iraq be better at destroying hidden anywhere WMD, than methodically seeking out weapons that no one has a basis in fact as existing today? Mr. bush jr.'s dad sold Saddam Anrathax up untill 1992, and anthrax doesn't have a shelf life of a decade. What about following the criminal leads for the last American anthrax attack, before we blame Saddam on that too as powell has proscibed?
> > >
>
> Look, over 400 of the world's top economists, along with no less than 10 Nobel prize winners, tell US, bush's 'stimulus' package, is an act of treason to destroy the great American nation's prosperity, but do we hear our concerns on CNN or CNBC? Or even regarding traitor bush as American cop killer heroin dealer?
>
> Small nukes?, and depleted uranium?
>

--

But tell anyone, how is it better to bomb Iraq people to rid ourselves of WMD, than it is currently to go anywhere unfettered? How is it possible to improve a senario that is as open as possible already? How will American soldiers eating bullets improve the search and dissarm technique? What ever happened to evidence being a requirment to convince US who is evil? Oh yeah, bush as the American cop killing antiChrist doesn't like American principles.

--

BUT LISTEN!!!

Okay, how is it MORE EFFECTIVE to send 800 cruise missiles and thousands of bombs onto more than 3000 targets, with an included, urban war conflict to rid Iraq of WMD, than it is now to go ANYWHERE unfettered by inspectors? (Again, how is that an improvement?) How does a criminal war improve the bushmob's stated goal of seeking out these weapons when people under attack will attack back naturally, and the WMD can fit in anyone's back pocket last year? How does spreading Uranium to kill humans for 4.5 million years, blowing up infrastructure, denying food, clean water, and vacines to US people as the unrepresented and innocent, while American soldiers eat bullets as criminal invaders like in Afghanistan but bigger, inprove the living conditions of ourselves who live in Iraq to suffer unjustly at the hands of the demon antiChrist, American cop killer, Our Mr. bush Jr.? (Our Mr. bush Jr., who demands Justice no longer be the found principle to protect American Freedom? (Like following the criminal leads for 9/11?)) How does Saddam, the secular leader who represents more than 750,000 Christians in Iraq, pose more of a funder of idealog zealot terrorist groups, than, say, Saudia Arabia, or Kuwait?, where women can't vote, drive, or learn from the internet? How does a plan of liberation sell to a nation that is more progressive than any of it's neighbors? How come American Soldiers don't demand bush make his case with ACTUAL evidence to substantiate his American allegations regarding the weapons sold illegally (an act of Treason against America) to Saddam up until 1992 by the bush Sr. administration to kill American service personel during the first Gulf war syndrome bombing campain? Why? Brain damage that's why. See, Anthrax doesn't have a shelf life of a decade, and American soldiers are dumber than the average American who holds already, (according to Blizter) the world's title of lowest literacy rates of the developed semi-developed world while currenting further regressing. Americans are cowardly, and too weak and dumb to even protect themselves now. Pitiful.

Johnny Wizard

whatreallyhappened.com

--

Agreed. But we are effected by suggestion, so, I thought it might be a better tactic than the slowly reviving, sleepy heads going, "Oh, wow

I'm dreaming!" for twenty years, while bush day by day, really, actually, robs and murders Americans who know not of the sound principles of Justice to protect our freedoms as godlike is a human thing..

--

Ya! Freedom for all through Justice indivisable. All People are created equal, as is, self evident to those in the know. Our blind faith is not in bush as he demands without evidence to persecute US as the innocent not heard from dying for nothing unjustly. Demon bush must be tried and convicted for treason against God, being of US all, including the Atheists especially.

Johnny Wizard
--

Why murder people for bush when we don't need to sacrifice our families for such evil stupidity? If inspectors have unfettered access, and bush has no evidence to substaniate his demon allegations, why then must ALL America side to be war criminals? Is it not more effective to go anywhere without firing a shot, than it would be to kill people as innocent to increase the terrorist threat? How can warring Iraq be better at destroying hidden anywhere WMD, than methodically seeking out weapons that no one has a basis in fact as existing today? Mr. bush jr.'s dad sold Saddam Anrathax up untill 1992, and anthrax doesn't have a shelf life of a decade. What about following the criminal leads for the last American anthrax attack, before we blame Saddam on that too as powell as proscibed?

--

We don't buy corporate America's assault with ignorance however. Just look at all the anti-hate, anti-crime, anti-bush posts. It is the corporate, time bitten media whores, the irrational cultists, that won't allow open, honest discussion of the facts as publicly recognized, that leaves US compelled to scream for Justice above the censorship parading as Our apathy.

--
>
> Ya... a pirate terrorist bush is, who leverages the ignorance
> of the masses to believing, he, actually as American cop killer,
> believes in the return of Christ as God's Man to set the world
> straight on Justice, and the true meaning of being a Patriot, as
> committed to
> Freedom for all as God's Constitution.

--
> > Mentoring Roman orphans.
>

> Huh ?

I Think maybe he was referring to the children left parentless, to watch CNN programing for further blind sacrifices of forgotten American values. But let US not forget, american nazi cowardice as the bush whore corporate products, will as evil pirates of the Constitution, promote traitor tommy franks to lead the nazi soldiers to run death squads against them also as the innocent.

Your busted.

--

One More Thing

So, that demon bush, the American cop killer and his cohorts, are continuing to work destroying Humanity's gains in civility, by evilly dividing Our humanity with their blatantly open criminal intent to murder untold millions as US innocent, and as of yet, have not been executed by American Patriots for mass murder of God's Family in New York City. Traitors to US all on 9/11 without contention, for Our truth speaks as Ourselves, and witnessing just CNN's silence on General Ahmad, speaks volumes on their contempt for US as worthy of Justice. Refusing to do what is good for Humanity by offering the central facts as publicly recognized by Our Police Agencies to be actually documented. According to the FBI: the vacationing General Ahmad financed the alleged 9/11 mastermind, Atta, and also developed the criminal war strategy against Afghanistan with the bush administration, to boost the heroin trade, and save Enron to commit further frauds against American soldier families, while murdering over a hundred thousand American flag wavers, and then leaving US for further ruin with plans to continue on against 59 more countries in the same deceitful illegal manner against all Churches, as an evil nothing short of eternally crowning Our Mr. bush Jr., the super evil anti-Christ, the most hated and despised parasitic murderer in the entire annals of Humanity's History. Cool eh? Kill bush now! Why?

The bushmob have done nothing short of confessing to the entire terror event, but for jokes on our strained credulity to publicly press for further stalls. With the rights of kissinger left to be a public investigation official? (Gee, thanks for highlighting your partner like that for US bush, you nazi dumfuk.) Mr. bush Jr.'s america destroys themselves without Love for wisdom, or respect for intelligence as a Peace plan initiative. We publicly witness the blind and tormented dying bushmob slave whore charade, of contempt for living free in Our names. The two evil doers, bush and sadistic nazi rotten rumsfeld, are known publicly as documented, to continue leveraging the ignorance of the CNN ready to be broadcasted repeatedly, tranced dimwit marines, the true dumfuks of this world as weak and pathetic cowards to themselves as their own brothers they watch murdered for bush helplessly, communicated in CNN's un-American false image as the evil bush nation hiding in falsehoods as death squad recruiters against the practically defenseless as unarmed children, nazi vermin criminals, being unbiased as Blitzer about protecting your freedom Patriot, to lose your real life savings reader, truly too weak and stupid to stand up in protection for the flag as the living American Dream for anyone. Because witness again, CNN keeps not saying Justice is important as principle to hold our reflections.(CrossFire is getting better though.) Fortified behind locked doors in their bombed out bunkers, Blitzer and Hemmer sit rooted for the evil side to lose further to themselves by continuing to not respond to our communication know how. America, the People, rarely gain press time coverage as should be top priority always, while being paraded publicly as sold out as not deliberated, corporately represented as privately principled to stay ignorant of Justice to protect living personally, as actually worth something to the bottom line. Yours. Brought down Hell bound as cheated by corporate news america's valueless interest in the price of your living to continue on our behalves. What does CNN think of 2% Social Security? cheating a Soldier's Grandmother to pay tithes to the bush demon as criminal dictator?, american nazi death squads?, insider stock trades?, arming bush's heroin partners?, rotten rumsfeld and bush murdering devout corporate cultists like a would be, still silent Hemmer?, no opinion? Or the working for the People in our names OFFICIALLY, as the FBI and CIA officers actually involved in uncovering the evil bushmob deeds, like the warrant sabotage, Odigo, stolen passports of alive so called highjackers as once American trained as still Saudi pilots, or Anthrax made to look Muslimized, is not failure to connect the dots ever, or insufficient funding then is not less payment for our law enforcement now to nab the prime suspects. As Mueller, or mueller has not publicly commented of, but to say, he hasn't seen or heard anything of this police work, leaving the FBI unrepresented publicly as a threat by himself as a terrorist supporter, an devout member of the bushmob cartel. Why?, we must investigate Mueller if we should have him arrested for publicly obstructing the FBI asking the important questions. IT IS THE FBI, not pissant mueller, WHO CONCURES THE BUSHMOB'S AHMAD FUNDED ATTA. Or how about the dumb ass Ashcroft assault against every American to save his embarrassment of being completely unqualified and never elected?, no concern to mention on this either? Who suffers for CNN's refusal to demand Enron give back the billions that were criminally stolen from all American Families still sitting in the Cayman Islands? My God.

Somebody call the cops.. again!

I have personally spoken to hundreds, and written thousands regarding bush's guilt, and we can't seem to find any fault with what I am saying... How about You? Check out usenet group, "us.military.army" on the internet to see for US all, what questions if any are asked. Know also, CBC and CNN management staff will not contribute their disagreement as none present, but for continuing disregard for Your interests during Our news cast of the facts. THINK. I tell gun clubs, police officers, Biker gangs, and the general public to kill bush today for 9/11 and his death squads, against the helpless and undefended while arming heroin dealers and selling terrorist handbooks, with all the evidence one would need or asks for, and CNN with CBC corporate management does not, to my knowledge, call Our Police agencies to complain about my free speech capabilities, or will allow US public discussions with Our History as documented. Why? Those nazi bastards, Walter Issacson, Robert Habinovitch, and the two Coast to Coast godless vermin parasites know personally, they propagandize our communities with deceit to keep us divided as the plundered and murdered for the private banker buildings who sell weapons in bush's name to kill the innocent as ourselves unheard from. I can barely survive watching US ignore them as King to this World, my sweetie baby sugar dumpling, but, I think it's time to let Arron Brown in on a little secret... Johnny wants a word with his living responsibility to Americans on Patriotism. Instead of what we currently witness, a reluctance to not relentlessly pursue the truth to provide US the facts, (Look, it's true, Johnny has an ass.) but a censorship of control to falsely prop up the unelected nazi war mongering criminal, Our Mr. bush Jr., a terrorist of tyranny through criminal impropriety in violation with the American Constitution as a death bringer heroin dealer, at a seating that truly holds no vacancy, nor a Buddha, but a deception to plainly hide, the actual, got to be for real, super evil anti-Christ of all religion ever mentioned. Wow eh, even gentle jolly Buddha wants bush squashed! Seriously, please kill the bush demon to save US as victims friend. Justice must prevail as is truth eternal, that of what will be as God is.. just how many more as Humanity will be sacrificed in cowardice for the evil bush demon, before an American Patriot kills the mortal nazi dictator for treason as an American cop killer, and betrayer to all of our Humanities? Don't let tomorrow's news story be about Your murder as another, no longer heard from bush victim. For, my reason is as evidenced to actually be known, easily, while the CNN corporate cult product lies to themselves as Our public fact finders to leverage more ignorance than is found now.. as Our public voice to suffer by criminal dictates to destroy God as life giver. Fuk you america.

Heaven is on the Horizon.

We can teach ourselves as the uninformed by CNN standards to misinform and ignore. CNN's continuing silence on Ahmad, bush and rotten rumsfeld, only supports further our claim in their contempt for American Soldiers, and Our Families as not represented as worthy business investment. God, don't you just love me? Hemmer?

Mr. bush's publicized war strategy of no evidence requirement to hold American convictions for murdering Ourselves is evil all around everywhere, as understood without question to every honest Cop, the most serious of all criminal behaviors, of which, they carry guns for in just this sort of political development to halt reoccurrences. But bush, the anti-Christ, as america, says no for ALL Americans, they can no longer hold onto Justice as their own with him in their charging everyone as the enemy bush refraction. Just like, "bomb wherever" tommy franks would do with his own American family death squaded, like he did intentionally to our children, as his contempt for America will never stifle our voice with his silence regarding our aimed veracity to seek out and destroy the evil nazi bushmob fuks individually with God as Justice Supreme. The True American Way, for, the rare and few Marines, the one or two, are with US loyally to know so. See, there was a time when the Marines were taught diligently, so much so it was proudly ingrained as the moral fiber of their character, that an American Soldier's responsibility to America was to defend the Constitution as the Freedom to be America, with their lives if need be to protect their soul brothers as family, for the greater good by God, (just like the Taliban Rule Man) while today, Ashcroft, albeit muted, murmurs as rotten rumsfeld chuckles, Americans must instead as slaves give their lives unthinkingly as cowardly evil war criminals to protect the unelected bush mobster from criminal arrest for mass murders in New York City, and stealing that 50 billion, seeing that that stupid Justice thing in the American Constitution and Bill of Rights idea has now got to go instead of evil bush as demon traitor war monger, terrorist recruiting false god anti-Christ, but that aside... There is a guide book for leadership in the American Marines entitled, "Guidebook for MARINES", and inside, it contains 14 principles to strive for as an American Soldier wanting to be a True Patriot as leader of Soldiers prepared to die for love of country, and our fellow man as friend or stranger, and here they are:

Integrity, Knowledge, Courage, decisiveness, Dependability, Initiative, Tact, Justice, Enthusiasm, Bearing, Endurance, Unselfishness, Loyalty, and Judgement.

For integrity it states:

"1. Integrity. The stakes of combat are too high to gamble leadership on a dishonest man. Would you accept a report from a patrol leader who had been known to lie? Of course you wouldn't. All your statements, official or unofficial, are concidered by your men to be plain, unadorned fact. Make sure they are. When you give your word, keep it. There are people depending on you to come through with the goods."

Now, I could go on further about what kind of lifeless degenerate a lawless cowardly mute soldier in bush's nazi death squads would have to be, to serve under bush as slave and traitor to home and family, as against God, the Flag, and all that we represent as equals through Justice, but I won't.

Mr. bush's america is uncontrollable by anyone. CNN figures if they never mention US, we'll never know who was invited as participators. (Example: CIA officers have had to PUBLICLY contact British News Services as the CIA, (Never done that I know of likewise before), regarding American interests in apprehending the TRUE 9/11 culprits ignored by american corporate dictates, and tenant also. One should remember, bush and rumsfeld would want to secretly murder any persons involved in 9/11 to clean up the huge crime scene, and tenant, is no brave and True Christ like figure as a living person, so what can we expect in all reality? Tenant will pay dearly if the evidence further indicates, as his continuing silence does label him already a willing traitor to all America, as too, his personal meeting with 9/11's Ahmad just prior seems suspicious also as not mentioned by himself in defense, along with his refusal to disclose the insider stock trades while leaving the fine CIA officers personally involved in the dark, as abandoned American Patriots, armed and ready to defend America as they should immediately for themselves, by executing bush and rumsfeld as terrorist cop killer, drug running freedom haters.)

America's false deity, the super evil anti-Christ, Our Mr. Bush Jr., doesn't think for me to be sacrificed without opinion by John, for I am free to act for my own beliefs as understanding, as I live in defense for living as all things created I am of honestly, simply amazing God is. However, I, as any truly living person would, can't help hate Our Mr. bush Jr. to death for what he and rotten rumsfeld is criminally doing, and further proposing against Our living in my name as unheard from dying without cause as murdered, but for bush's criminal contempt for my Awesomeness to beg once again friends, someone out there please, for the Love of Yourself and God, help US destroy Our Mr. bush Jr. quickly before he kills more as Ourselves unrepresented by corporate values in our commitments to freedom for living through Justice for all persons. Our Mr. bush Jr. has indiscriminately murdered more than 100,000 innocent souls with only a contemptuous smirk to his credit, while fully committed to more robbing and heroin dealing by blaming Laden for whatever without any evidence. Leaving Our true willingness silenced by corporate demands to propagandize and censor our truths, allowing bush, the dumfuk traitor, to continue demonizing America into a hell hole of ignorance through his hatred for life, Science and Nature. CNN's silence for America regarding the bushmob publicly stealing from their Own Family their freedom of Rights to be living, while committing Americans to a dictatorial crime ridden government, that bush and rumsfeld proclaim, is no longer applicable to the Law of any Land, is an abomination against Christ as living is Ourselves Being. America isn't America anymore, it's the bushmobbed universe of injustice and blind self hatred against all of Humanity, committed to leave none to survive but as slaves to be terrorized for the dummy bush demon as their false deity, a traitor in my midst, disguised to no one but himself as personally expendable. Again, where are the American Patriots we all hear so much about in the big screen to take down the seriously anti-American demon bush monster cop killer heroin pusher for treason, as all understood widely now factually with evidence and everything? Kill the war criminal evil doers, bush and rumsfeld today and be loved by yourself to be of Human Nature, or hunker to hell as a coward and betrayer to yourself and your own family, while watching the bushmob openly rob and murder further from our World, and on all of which we stand strong united. Justice for You.

This living plan of mine empowers others to learn their

Rights as eternally established to be Kings and Queens on equal footing to be as all in all of gods forever dreaming, while demon bush intends the destruction of individual freedoms while robbing and murdering Americans from the inside, like sharon with US Jews does, as underrepresented, a condemning onslaught on Your better Judgement as reasoned on anything factual they figure blindly to be spinable, without your word contested. Your God Given Living Rights my friend. Without a rule of Law principled in the fashion of Justice for all to be sought as measured, bush's nazi amerika will continue to suffer ourselves needlessly for their corporatized self contempt in Our living Humanity as censored, without a thought for Justice, or the American Bill of Rights as God acting out eternally for prophets to wonder endlessly. See, I came up with this wacky Idea one day to make all my equal as self created to be so normally, in this Universe as we exist for Happiness ultimately as eternal, so, You or i will work this challenge to speak out for ourselves as Creation about bush's america, and it's responsibility as publicly advertised, to gather the facts on who suffers for bush's criminal misdeeds, and overall ignorance on everything. Mr. bush's irresponsible tax scam for example, is to put America's public money into the hands of private bankers, as the extremely rich already, while taking money away from those who spend the highest percentage of their paycheck on basic necessities as a gambled to be advertised, "stimulation package". HOW? The HOW is never explained with understanding as clearly regressive like the bush rule is, because.. Who spends MORE in taxes as investment at the grocery store to pay the cashier for his babysitter: 20,000 volunteer Janitors all named Rich, who ride the bus for convenience, or a mechanical billionaire private bank machine operator, who doesn't earn any nation's moola by working something for it?, and couldn't eat 20,000 cans of re-fried beans at one cruise lining to timbucks three without losing themselves, havening his tax manner over take in YOUR luxury. See, when America prints more money at the Treasury to give Greenspan to loan BACK to the Government illogically, the dollar value falls for everyone as investor, inflation, let alone the incurred bogus debt owed with real sweat as labor. Clearly, to every informed citizen not as democratic. Of course, National corporate news America, is genuinely not trying as capable by themselves to commit The living interest in Government as ourselves with oversight to manage US fiscally responsible, (like CNN regarding Justice and the Congress, or no Chomsky ever, E. Ann Clark as geneticist, or just research for experts as example), so, we do indeed, live in trying times due to ignorance as corporate america's disrespect for wisdom saught as yearning. It's like private bankers don't want the public to think about what we are doing as worthwhile knowing, eh? Or, I'm the only one on this planet who can almost read my own writing as the, one of a kind, good boy God freak. Anyway, the bushmobster scam leaves less finite wealth for all as taxable exchanges, while suggesting disposing of what dwindling national resource can be obtained, be given to create further debt by devolving into a military apparatus to make more enemies. Our Mr. bush Jr. is just plain stupid as destructive to everyone, but especially Americans to not stand up in defense of Ourselves. (Officially, rotten rumsfeld's criminal plan, "P2OG", is to encourage terrorist acts against Your Family, but you guessed it, not up to CNN's standard to report US as viable news material.) It's like saying fewer people educated, will keep us stupid enough as a Nation to blame the weak and poor as ourselves deprived till death as murdered, and, bush says makes sense secretly, as the all knowing for the blind and ignorant to faith in without thinking about what money is either. Our Governments should always be working to make the poor richer as a successful representation of our will as the public to improving our living condition, but the dumb and ignorant, talentless and monosyllabic, believe, someone else must be cheated and devalued, divided and murdered, in their universe for them to succeed without effort, or skill whatsoever.. Especially defense. Have you ever heard of the rock solid certainty of Universal "inverse variation" constants? (Canadian High School.) This is why in America, in a time where the nation was more literate as informed, Corporations were taxed at 85% and were happy about it for themselves as American citizens. It's understanding also, most as almost all of the most wealthy multi-nationals competing from military dictatorships against American minimums, run in continuous private bank debt, (your savings and pension as leveraged weaker being the entire Nations) but gross billions in profits. 99.9% of every private bank building in the Western World is mortgaged, not however in Iraq, or the Muslim World where interest is not charged on good standing loans made in Our names. (Sideline: Now recollect bush's puppet forcing Afghanistan to borrow from the World Bank for terrorist handbooks and heroin junkets, but not food, shelter or clothing, while spending in addition, 4-5 billion a month in godless bushfuked american Patriot Dollars, American Celeb Dollars, American TAX PAYER Dollars, to run deaths squads with tommy franks against teachers and children.) It's a strange idea to the dying to be corporately driven without thinking because, you wouldn't automatically think it could be more profitable to stay in cheaper as serviceable debt being a brick building, but it is by private banker swindle with National inflation succeeding personal interest rates. We lose personal wealth to the pirate banker fees without even privately using their/OUR National currency services, because truly, we can't go somewheres else. As of course in america, an Enron can always be pulled, where it goes bankrupt as a toxic non-living entity, but leave richer as crooks than they did before calling an end to paybacks, with the People stuck to take the loss together for sure as the victims. While bush, says corporating America, his america, should learn for next time, maybe, while the CRIMINALLY STOLEN money is still siting in the Cayman Islands!!! See the Depression, a Canadian High Schooler, or watch bush act in direct opposition to his word almost consistently as American death harborer terrorist psychopath. Then ask yourself, why can none of our defenses be publicly discussed as important deliberations?

Love Justice by allowing others to read this paper, to judge the truth for themselves as worth something for all persons, and I will be truly grateful you cared to believe in a better future, for together, we could find a new hope for freedom, as happiness and prosperity for Yourself included. We only need believe in ourselves as unstoppablly stupid, and the Universe is ours as God is now testifier.

I am my word,
and make believe King to this world I call home,

Yours forever,

Johnny Wizard

My Divine Right

Destroy bush and rumsfeld now American Patriot soldiers, fire fighters, and NRA members. We all notice CNN and CBC management refuse to allow open discussions on the documented facts outlining the cop killers, bush and rumsfeld treasonous behavior against the great American people, deliberately forestalling their criminal arrests for the mass murders of US as innocent in America. (Or even the recent broken elections in Florida.) Again, I repeat, I've spoken to corporate cult Americans, Leon Harris, Bill Hemmer, Daryn Kagan, Sid Beddington, and

Walter Issacson, just to name a few at CNN. All forementioned cowards, who would watch Americans be robbed and murdered, and do nothing to protect ourselves, are personally aware the bushmob was warned of the terrorist plot specifically, the fact that Laden investigations were blocked by the WhiteHouse, while the bushmob in Enron interests, developed a war plan with General Ahmad to invade Afghanistan, for an oil pipe line on a premise of blaming Laden for whatever without evidence as US innocent, a documented truth that existed also just prior to 9/11, a strategy confessed to fully implemented, demanding the bushmob not follow the criminal leads, that point to themselves as traitors. Like the bad bush act on 9/11. (emperors-clothes.com) No arguments are given against what I have spoken on, nor am I even being adressed by our corporate standards as inter-nationally responsible. Why? Largely, because, we are adressing what is as documented to be true, irrespective of ourselves as opinion, Justice infinite as indivisable, like the stars in the sky, while the corporate news machine is refusing to be our own as legit. Mr. bush, the anti-Christ, and rumsfeld did 9/11 to kill ourselves to steal Constitutional American values, with their silence only further implicating themselves to the doubters. Neat eh? (I'm also playing the Creator, who just wants to be at peace with ourselves as equals.) As for Iraq, it was the American administration that removed the inspectors from doing their, going very successful job, not Saddam, while the corporate media continues to allow cheney, the evil nazi fascist bastard, to keep intentionally lying to American soldiers regarding the facts, like US Air Force Response, so the bush regime can throw away their lives as worthless, without meaning. (Agreed, on general terms, American soldiers are deeply ignorant and cowardly as cheney continually attests, but they are still preparing for death, and I understand many can read human, and haven't been hiding in a undisclosed location without a television, or newspaper these last few months.) The Senate Committee on Banking, Housing and Urban Affairs, found corporate America sold Iraq anthrax, VX nerve gas, West Nile fever germs and botulism, right up until March 1992, on hopes apparently, to risk further American soldier causalities, who were at that present time engaged in battle with poisoning themselves mostly. 250,000 troops are planned to criminally invade YOUR humanity, against now near SIXTY countries, representing around 2,083,093,468 people and counting, (that also includes freedom fighters, bikers, the Mob, and Jack), US, clearly aware of bush and tommy franks nazi plans, like in Afghanistan. To kill indiscriminately, while running death squads murdering innocent families, including your children. As for Saddam gassing the two guerilla groups called Kurds, who were fighting to murder in a war on behalf of Iran in 1988, labeled by American murdering nazi savage bush, Saddam's "own people", here is what the most definitive document on the issue states. It's a 1990 Pentagon report, published just prior to the invasion of Kuwait. Its authors are Stephen C. Pelletiere, Douglas V. Johnson II, and Leif R. Rosenberger, of the Strategic Studies Institute of the U.S. War College at Carlisle, Pennsylvania.

...

Iraqi Power and U.S. Security in the Middle East

Excerpt, Chapter 5

U.S. SECURITY AND IRAQI POWER

Having looked at all of the evidence that was available to us, we find it impossible to confirm the State Department's claim that gas was used in this instance. To begin with there were never any victims produced. International relief organizations who examined the Kurds -- in Turkey where they had gone for asylum -- failed to discover any. Nor were there ever any found inside Iraq. The claim rests solely on testimony of the Kurds who had crossed the border into Turkey, where they were interviewed by staffers of the Senate Foreign Relations Committee.

We would have expected, in a matter as serious as this, that the Congress would have exercised some care. However, passage of the sanctions measure through the Congress was unusually swift -- at least in the Senate where a unanimous vote was secured within 24 hours. Further, the proposed sanctions were quite draconian (and will be discussed in detail below). Fortunately for the future of Iraqi-U.S. ties, the sanctions measure failed to pass on a bureaucratic technicality (it was attached as a rider to a bill that died before adjournment).

It appears that in seeking to punish Iraq, the Congress was influenced by another incident that occurred five months earlier in another Iraqi-Kurdish city, Halabjah. In March 1988, the Kurds at Halabjah were bombarded with chemical weapons, producing a great many deaths. Photographs of the Kurdish victims were widely disseminated in the international media. Iraq was blamed for the Halabjah attack, even though it was subsequently brought out that Iran too had used chemicals in this operation, and it seemed likely that it was the Iranian bombardment that had actually killed the Kurds.

From another American government report:

"Blood agents [i.e., cyanogen chloride] were allegedly responsible for the most infamous use of chemicals in the war--the killing of Kurds at Halabjah. Since the Iraqis have no history of using these two agents--and the Iranians do--we conclude that the Iranians perpetrated this attack."

...

The New York Times reported on corporate America's war project SHAD, where during the Vietnam war, 4000 U.S. sailors were gassed deliberately by Republicans with gruesome biological toxins, including sarin.

As for proving that something is not secretly hidden by a nation as millions.. practically impossible! You can't ever conclusively prove that something isn't secretly hidden from perception by variables admittingly, unknowable. (For whom would be there to secretly watch the watchers?) When, and under what madness of bush tyranny as enslavement of our human species, would anyone be able to try standing up in Iraq or elsewheres and state, there is no Anthrax anywhere hidden secretly to kill bush, the false deity super evil anti-Christ with? Never I declare as the Son of Man, will evil bush escape the wrath of our fury as this Universe is, however, it is the supporters of bush's irrationality with our poltical will unchallenged by corporate standards, as these nazi monster, lawless American cop killers wish to use to terrorize 60 nations of almost 2 billion innocents without any evidence with. With an intent to use a paultry 250,000 criminal nazi soldiers mindlessly stupid on drugs probably, while corporate America won't give anyone two minutes nationally to speak on the clear strong factual evidence implicating bush and rumsfeld for murdering over 3,000 AMERICAN flag wavers in Yew York City? Destroy American traitor bush now!!! The sanctions against the poorest of poor in Iraq are also irrational. The Republicans state the innocent people of Iraq must be denied food and medicine to starve and die because, they are practically politically powerless to change their state to be attacked as the unrepresented, while stating Saddam, if he could, wouldn't help them survive as a nation as the Republican justification to terrorize millions, while cheney skirts U.N. sanctions to sell Saddam whatever supplies privately in secret? So the suffering of Iraqis, is rightly attributed on American terrorist activity by all Iraqis, as the direct cause, working directly against the Republicans publicly stated purpose to commit such criminal intent. Example: If a well spoken father who may not like the policies of Saddam should go to the hospital with his child, he is told the bush clan wish his family death and suffering by American will for being born to our world in Iraq as human. The oil for food program however, is intelligently based, but it's purpose is defeated with the Republican atrocities to blindly murder US with. The demands for the betterment of the Iraq people through national oil sales, would make sense, if they weren't directly suffering under assault by the same terrorist network cancer cell that denies themselves inalienable rights to life as our own. Like pathetically weak as unrepresented American cowardly soldiers, who were provided no evidence to back up the evil bushmob's criminal allegations, then went murdering tens of thousands of innocent people in Afghanistan on the brink of starvation, instead of killing the documented child killer, heroin pusher, tommy franks, or bush and rumsfeld for 9/11 in America. Just on bush's behavior on the day in question, being left unreported by CNN dictates, should say much to everyone.

Joint Chiefs of Staff Chairman General Richard Myers told reporters at the National Press Club about Iraq's enormous unknown stockpiles of !secret! corporate american warfare weapons, "It does not take a lot of space for some of this work to go on. It can be done in a very, very small location," he said. "The fact that you can put it on wheels makes it a lot easier to hide from people who might be looking for it. So, yes we have evidence." Evidence of what? Nations with trucks should be nuked? Richard Myers is a nazi warmongering irrational fukhead, who wishes the murder of countless thousands, if not millions in AMERICA, who should be fired today. You see the nazi bastard, you fire him, do you hear me People? AMERICA? Johnny...? Mr. Myers, your fired!

While we now learn from public disclosures on Connie Chung, apparently, George Tenant, had only 3 CIA officers investigating Laden just prior to 9/11. While I remember last year it was alledged on PBS, the CIA had taxed the American public nearly 10 billion on those investigations regarding Laden over the previous year, but, hmmm, bush forbade police agencies, the pursuit of such investigations with his secret W199i directive. Guardian Wednesday 7, 2001 - "FBI claims bin Laden inquiry was frustrated"

George Tenant must be questioned on these matters, and his relationship to General Ahmad, then arrested regarding his inaction on the insider stock traders for 9/11. If neither happen in a timely fashion, he too, will be destroyed by US American Patriots for treason.

Excerpt From:

NY Newsday
U.S. Hypocritical on Human-Rights Abuses
by Marie Cocco

...
America's new business partner, Uzbekistan's president is brutal, and very bad.

The State Department human rights report says the former Soviet republic now "is an authoritarian state with limited civil rights ... Both police and the National Security Services routinely tortured, beat and otherwise mistreated detainees to obtain confessions ... Police also used suffocation, electric shock, rape and other sexual abuse. Neither the severity nor frequency of torture appeared to have decreased during the year."

What increased was American aid. It tripled to $160 million, the payoff for allowing U.S. military staging areas for the war in neighboring Afghanistan. President Islam Karimov was welcomed to the White House. In July, Treasury Secretary Paul O'Neill traveled to Tashkent and praised Karimov's "efficient leadership."

Bush has singled out one despot for removal.

He says he has many reasons for invading Iraq. Without a look at some secret new evidence the administration may or may not have about Saddam Hussein's arsenal, it is not possible to find truth. That is how the White House wants it.

From a smart thinking, great commenting archive sifting site somewhere titled,

Print Think

...
Bush planned Iraq 'regime change' before becoming President
By Neil Mackay, Sunday Herald

A SECRET blueprint for US global domination reveals that President Bush and his cabinet were planning a premeditated attack on Iraq to secure 'regime change' even before he took power in January 2001.

The blueprint, uncovered by the Sunday Herald, for the creation of a 'global Pax Americana' was drawn up for Dick Cheney (now vice- president), Donald Rumsfeld (defence secretary), Paul Wolfowitz (Rumsfeld's deputy), George W Bush's younger brother Jeb and Lewis Libby (Cheney's chief of staff). The document, entitled Rebuilding America's Defences: Strategies, Forces And Resources For A New Century, was written in September 2000 by the neo-conservative think-tank Project for the New American Century (PNAC).

The plan shows Bush's cabinet intended to take military control of the Gulf region whether or not Saddam Hussein was in power.

(snip)

The PNAC report also:

(snip)

- hints that, despite threatening war against Iraq for developing weapons of mass destruction, the US may consider developing biological weapons -- which the nation has banned -- in decades to come. It says: 'New methods of attack -- electronic, 'non-lethal', biological -- will be more widely available ... combat likely will take place in new dimensions, in space, cyberspace, and perhaps the world of microbes ... advanced forms of biological warfare that can 'target' specific genotypes may transform biological warfare from the realm of terror to a politically useful tool'

Now, as for the corporate world telling US, we believe Laden is guity without evidence: A reasonable person doesn't have the justification to believe the unsubstantiated verdict. This is why the fascists at CNN propagandized, TERRORIZED, the American public by falsely alledging that Laden threatened to nuke America, or that he stated to murder any or all Americans like a bush would. Laden, like Saddam, or Arafat never was actually quoted to be that ignorantly stupid as a leader trying to communicate to the People, but for by CNN, and the sharon types regarding "Palestinians", as a lie to themselves to excuse their responsibility to ourselves as the humans. But EVEN IF TRUE, wouldn't make Laden responsible for every wrong doings the bushmob was actually responsible for, like robbing all Americans of their livelyhoods, unreported by CNN of course, to leave ourselves to fall victim by the bush regime as shysters pirating America, by shredding the Holy Constitution. However, Laden has skated near with the label "Jew", to be of the criminal, intolerant, offensive, fascist, bigoted jewish Israeli government, that imprisons or murders real Jews for being JUST that. Rabbi Hillel would be jailed by sharon in the israel of today. Wise Muhammad teachings cover this dumb Jew Christian thing well, as us all suffering by the illiterate evil dumbfuks who ignore ourselves, to steal our established values, while CNN, like Art Bell, forbids debate on their irrational falsehoods, refusing to protect the FBI, or the American flag through practicing censorship, while advocating murder, as Art Bell, the traitor, does almost daily, while hanging up every human caller. Next, CNN will be blaming ALL the poor and starving in the third world, for secret Pentagon frauds through the removal of the False Claims Act. As, the American nation contributes the least to the world in aid, in relation to the GNP. (The give and take.) 5 billion a month to not feed, but murder innocent people in Afghanistan? Destroy bush now, and be loved by all as God.

Hey, great! You've actually read this far. Say, listen... Google, for one reason or another censors my, and who knows who elses, posts for fear from the bushmob. The bushmob through Google 'Groups' has no problem with posts encouraging war crimes by bigots, but my rational posts regarding the nature of Justice, they have determined for US, is inappropriate, while bush prepares to criminally war our world to actually do so as an unelected mass murdering nazi savage. So I ask you to have faith in living, and give us your thoughts on this for yourself. When it's reposted, it makes it far more difficult to disect from public viewing, and gives the likely good people at Google, a viable excuse to not continuing to do so against our better interests. To comment this post with whatever position you may have regarding these important subjects, doesn't mean you agree that we are God, or I'm simply Johnny Wizard, but for open free communications regarding the true political state of ourselves worth being heard from. Murdering innocent people for evil bush and rumsfeld to steal from ourselves, is a sacrifice in cowadice, I for one, refuse to stand for as the living. How about you? Public rebutals regarding my supreme stupidity are found in alt.sercurity.terrorism.

Thanks friend,

Johnny Wizard

All Wrapped Up

CBC as managed has deliberately with intent, worked to misinform and propagandize our community on what is as, documented provable fact, regarding Mr. bush's complicity to the murder of US as the innocent in New York City. CBC has refused to live up to our responsibility to protect our democracy, and in silence, has pirated our names to murder those understood to be innocent of the accused offence. CBC has refused to allow ourselves as the public to understand, Mr. bush forbade the FBI from pursuing bin Laden investigations, just prior to 9/11 with secret Presidential directive W199I (199I WF213589), which had John O'Neil, the anti-terrorism head for the FBI publicly protest by resigning over. This W199I directive was put into place after the administration had been warned by the BND, and several other legitimate intelligence agencies, of an impending terrorist plot involving the high-jacking of American airplanes to be used as weapons and flown into land marks. In addition to these unreported top priority political issues that stand to be true as documented factually, the bush administration had also secretly put together a sinister war strategy, that was revealed to ourselves as the public, by Canada's own Jim Miklaszewski at MSNBC, to have existed without any doubt as Presidential Directive documents, two days prior to 9/11 at the WhiteHouse. A planned strategy to invade specifically Afghanistan, by blaming bin Laden for a crime, but providing no evidence to back up the allegations. That's right. The super evil criminal bush dictatorship had a plan in place to not follow the actual evidence to arrest the true culprits for a crime that hadn't even yet taken place, but that they were prepared for to close investigations on, as an opportunity to invade specifically Afghanistan, propping up the Northern Alliance who still practice the barbarity of sharia law, with the bush bonuses of selling heroin to our world, and most importantly, building a liquefied natural gas pipe line for bush and his Enron friends, to rob even more further from us all. Legitimate FBI officers unrepresented by Mueller claim

General Amad was the principle terrorist funder of Muhammad Atta, responsible for a wire transfer of $100,000, who, incidentally was in unusual meetings, the General was, with the bush administration a week prior to 9/11, who also not only participated in meetings with several top officials in the Senate Intelligence Committee, but also, was reported to participate in building the war strategy of invading Afghanistan, as the reported desperate excuse offered for the General being there just prior to 9/11, and also, was personally responsible for negotiating the non-surrender of bin Laden, of which the ISI claimed, the General advised the Taliban not to do so because, no evidence would be offered, nor public trial for an offence bin claimed he played no part of.

We are all in agreement, in truth we rise, evil is just the deceived disguised. Boo!

The case is wrapped up, and bush and rumsfeld need to be immediately arrested for 9/11, for murdering countless thousands for stolen gain, at the losses to our humanity, that show through every putrid utterance of scum bucket bush, as contempt for our living as humanity through Law. Where a person accused of a criminal offence without any evidence is clearly innocent. For why I ask you reader, would any unjustified leader of US people blame someone for a crime who wasn't linked to the offense, while working to close investigations, and not follow through with the ample clues to capture the true evil doers? Just how cowardly stupid can soldier families be taken without conviction as themselves worth fighting for?

Justice for all, and glory be to godly.

RITTER PUTS HOLES IN CHENEY'S ALUMINUM TUBES STORY

Posted By: Rosalinda
Date: Tuesday, 10 September 2002, 11:50 a.m.

[source: CNN, Sept. 9]

RITTER PUTS HOLES IN CHENEY'S `ALUMINUM TUBES' STORY AND

OTHER LEAKY EXCUSES. In an interview iwth CNN today, former UN Weapons Inspector Scott Ritter ridiculed the latest concoctions of the Mega crowd to justify an attack on Iraq. Excerpts follow:

PAULA ZAHN (CNN): I want to have, hear your reaction to the whole range of Bush Administration officials yesterday who said .. that Saddam Hussein has been trying to obtain materials to build nuclear weapons, particularly trying to buy thousands of aluminum pipes that could be used in the manufacture of a centrifuge and ultimately used to manufacture weapons.
What do you make of that?

RITTER: What an absurd statement. Thousands of aluminum pipes, and we're going to go to war over thousands of aluminum pipes? Even the IISS report that you cite says that if Iraq was to have trying to do uranium enrichment, it would take them many years before they could do it. This is patently ridiculous. These are aluminum pipes coming in for civilian use. They are not being transferred to a covert nuclear processing plant or any covert nuclear activity whatsoever.

But the best way to figure this out is to send the weapons inspectors in. If they, if the United States has this evidence that Iraq has these pipes, why not, heck, give me the data. I'll come to Iraq, hunt it down and we'll bring it to a close. That would save us going to war, killing thousands of people and destroying our reputation in the international community.
We cannot go to war because Vice President Cheney's worried about some aluminum pipes. This is ridiculous....

ZAHN: Let's talk more about what some say is the only independent voice in this whole argument, and that is the International Institute for Strategic Studies.... In this report, it suggests ... that Iraq could make a nuclear weapon in months if it had foreign help.

Let me read to you what the conclusion was, that, "War sanctions and inspections have reversed and retarded but not eliminated Iraq's nuclear, biological and chemical weapons and long range missile capabilities, nor removed Baghdad's enduring interest in developing these capabilities."

RITTER: Paula, what do we have here? Rhetoric? Where's the facts? "Enduring interest" in weapons capability? What does that mean? What evidence do they cite for this "enduring interest"? You know, ballistic missiles. They say he has 12. What, did they grow? Where are they? They didn't have 12 when I was a weapons inspector.

Chemical weapons? Biological weapons? They talk about bulk agent in terms of Iraq's biological weapons program. What bulk agent? Where did they make it? A bulk agent has a three-year lifetime in terms of storage in ideal conditions. The last time

Iraq was known to have produced bulk agent was in 1990. That stuff, even if they held onto it, is no longer viable. So to have bulk agent today, Iraq would have had to reconstitute a manufacturing base in biological weapons. Where is it?

This report is absurd. It has zero factual basis. It's all rhetoric. It's all speculative and, frankly speaking, it's meaningless without, you know, with the sad exception that hawks in the Bush administration are going to point to this as justification for war....

ZAHN: What makes you think that if UN weapons inspectors went in now, after not being on the ground for four years, it would be any different than the last time around, when Richard Butler, who was the chief UN weapon inspector, said the Iraqis often moved stuff when they knew you guys were going to be on the ground?

RITTER: I had been there since 1991 working under Ralph Ekeus, when the vast majority of the actual disarmament took place. By the time Richard Butler came, we had already destroyed Iraq's weapons programs. We were hunting down for, you know, missing items, you know, a piece of metal here, some documents there.

And, yes, Iraq could have moved them, but this does not constitute a weapons program. It's illegal, and this is what inspectors need to do, come back here, finish the job so that Iraq can get on with rebuilding its economy, etc. But, you know, Richard Butler knows for darned sure that the Iraqis were not moving weapons from his weapons inspectors.

The weapons inspectors were trying to get into some of the most sensitive facilities in Iraq that dealt with presidential security. I was the guy leading these inspections and Richard knows that he allowed the United States to use my inspections to spy on Iraq, which is why they don't trust the inspection process.

So let's not bring up Richard Butler. Frankly speaking, he has no credibility on this issue.

ZAHN: I still don't understand why you think the inspections will be any different this time around. The administration seems convinced that if Iraq had nothing to hide, they wouldn't have broken all these UN regulations and they would have allowed inspectors in over the last four years.

RITTER: Come on, Paula, let's be fair. The administration knows that the Central Intelligence Agency used the weapons inspection program as a Trojan horse to insert intelligence collection capabilities to go after Saddam Hussein....

You know, I know that inspections did work. We achieved a 90 to 95 percent level of verified, absolutely certain accountability for Iraq's weapons program, including all the factories and associated production equipment. This is why I'm just amazed when I hear reports coming from the IISS that Iraq suddenly has the capability. Where did it come from? Did they suddenly grow factories? ...

... Let's get the inspectors back in, let's get them to find out what the ultimate disposition of these weapons programs are and if Iraq has no weapons of mass destruction program, thank goodness, we just diffused a war. And I think that's a good thing worth trying to do.

From the well recomended document:

US Intelligence and the Terrorists: Pre-9-11

... June 6, 2001. German intelligence warned CIA.

(A) The German intelligence agency, the BND, warned both the CIA and Israel that Middle Eastern terrorists were ``planning to hijack commercial aircraft to use as weapons to attack important symbols of American and Israeli culture.'' This intelligence reportedly came from Echelon, a high-tech electronic surveillance system used by the intelligence agencies of several nations to glean through electronic communications for certain keywords. It was first reported by the German daily newspaper, Frankfurter Algemeine Zeitung on September 13. Its sources were reportedly from the BND itself. (Gembeimdienste 6-6-2001; Stafford 9-13-2001; Ruppert 11-2-2001; Ruppert 11-27-2001; Ruppert 4-22-2002; Martin 1-5-2002; Martin 1-16-2002; Thomas 5-21-2002)

According to Gordon Thomas (5-21-2002) of Global - Intel, the original source of information actually came from Israeli Mossad agents operating in the U.S. who had infiltrated al Qaeda. According to his account the Mossad also informed British and Russian intelligence about the attacks, who then in turn notified the CIA. Thomas's sources are allegedly informants within the Mossad itself.

As of April 22, 2002, no challenges to this information has been reported. ...

Also, it has also been alledged that the German

embassador Ischinger, On Monday 6, August, 2001, had met bush personally, and during that meeting, the Bundesamt fur Verfassungsschutz [German domestic secret service] and BND [Bundesnachreichtendienst, German foreign secret service] finding was once again reiterated in person.

From below:

"Mr. bush you nazi vermin, you attack my America, you attack US all. American soldiers will not sit back as cowards entirely, and watch you sacrifice our lives as worthless without meaning."

I think I love you too much

Wow, your amazing! So, what your saying is bush the nazi tyrant, the unelected mass murdering fascist dictator, has no interest following the ample criminal leads, because they lead to him, rumsfeld, and cheney likely too, right? And, when that evil monster told us instead he would rely on secret evidence, but couldn't tell us why, as too the FBI or CIA, it turned out to be nothing but another wicked evil deception against the great American people, Tony Blair, bin Laden, and law enforcement officers everywhere, to even further give him cause to close investigations into 9/11 as Reuters told us, and rob directly from American soldier families, their lives, pensions, life savings, and blind faith, in bush, the false diety, super evil anti-Christ.

Johnny Wizard is my Hero.

Weak Pathetic Coward Nazi Bastards

American soldiers are weak pathetic coward nazi bastards. The recorded evidence stands before all of our humanity, while CNN silently pleads ignorance on what is clearly established as documented fact, regarding Mr. bush and rumsfelds' complicity to murdering thousands of American citizens, stealing from all Americans the principles of which the American flag once represented, now unprotected by corporate dictates. Encouraging American soldiers to further sacrifice their dying rights, to murder potentially hundreds of thousands more for bushs' nazi conquests against ourselves further unprotected by nazi traitors at blitzer's war room. ("War Room" is the term used by nazi CNN nosearch big pay do squat staff who routinely work to keep America uninformed with their secret from no one, refusals to protect Americans for the bush regime, like in the case of "The False Claims Act", or evidence requirement to convince US who is evil.) You do five minutes research on the Anthrax suspect, and you come up with Dr. Phillip Zack, but what does CNN do to protect the American people? Nothing but mention Hatfill, not even still a suspect according to REAL FBI sources, who, you'll notice, Mueller or Ashcroft never if ever mentions, like point number six of Coleen Rowley in Time regarding treason at the highest level. Mr. tommy franks, the nazi traitor heroin pusher, runs death squads in Afghanistan, executing countless children as our own, but what does CNN say on behalf of our families?

http://www.theithacajournal.com/news/stories/20020525/topstories/380284.html

Nothing, but to refuse a voice to those they know murdrered in their names as nazi facists, refusing to allow open honest discussions on the true political state of the Union. Publicly advocating to be accessories to the murder of ourselves, refusing to make any attempt to stop bush from continuing to murder their our own families, and stealing from our nations the concept of Justice for ourselves, (Never mind America's own life savings STILL sitting in the Cayman Islands. (Thomas White.)) while advocating even more murders and thefts against the innocent, because soldiers are too weak as colateral damaged disfunctional illiterates, to stand up proud for the American people as equals. Under the Bill of Rights, as justice for US all, truly brave and strong, as the saviours of ourselves to be free as individuals, humanity, WE will never surrender as slaves to the false diety, anti-Christ, Our Mr. bush Jr.. The lawless nazi facists mass murdering tyrants, Mr. bush, bogus cheney, and rumsfeld, are the ememies of America as the free world, who as WE, will no longer except lying down to the continuing corporate silence of surrender, to take us as dead and forgotten, as not worth our time of day, to stand for yourself, as a living breathing human.

Johnny has spoken to several hundred at CBC and CNN including the CEO's of both, regarding the evidence that no one has yet, suggested they find any contention with. Destroy bush and rumsfeld American Patriot Soldiers, and be loved by all as family.

Hi, all. Can anyone tell me if JRC is still producing HF rigs for the U.S.A. market? Just a few years ago, they made an HF rig, and an HF rig with 6 meters. Now, I cannot find any amateur radio company that sells them. Though I do not know much about this particular brand of radio, many, many, people have told me they are superb in both receive and transmit.
Thanks.

Your RF signal passes down the wire you have connected between
the bulkhead connector and your receiver. There must be an exactly
equal signal return flowing back through some path to the outer shield
of the bulkhead connector. You want the area enclosed by the total
forward and return path to be as small as possible, otherwise you have
created an aerial which will inject crud into your receiver. Just
using
the metal box as return is not good, as you have not controlled the
path, and the resulting loop area can be large. Using a coax is good,
as long as the RF return is forced to use the coax outer. Putting
ferrite beads on the coax increases the impedance in the loop from
connector via metal box to Rx ground connection and back along the
coax braid, while not affecting the signal path (go and return are in
```

opposite sense, so no net magnetising of the bead, so no effect).

Regards
    Ian

Thanks, Ian. I just assumed - wrongly it seems - as it was enclosed in
an earthed metal box it'd be adequately crud-proofed.
An aside here to John C. if you're reading this, John, I've got a
mil-spec sig-gen on order which should be here by the weekend, God
willing!

Hello Paul,
good news on the Sig Gen. Just make sure it does what
 you want before parting with your money.
Covers 40 Mhz, FM/AM with good switched attenuator.
What brand and model number is it?

In the mean time you have to find a circuit diagram
for your Rx so that you know where to monitor the
audio output. You are going to have to pester your
local hobby shops that sell Sanwa vg600 gear.
They have the info, you will have to twist their arms. :-)

You could try this mob also
http://www.airtronics.net/
http://www.airtronics.net/Manuals.htm
I think Airtronics is the American badge engineered
name for Sanwa.
Tell us if the Airtronics vg600 is your Sanwa vg600.
The Airtronics vg600 manual is just an operators manual.
Paul, you may have to do some serious begging to get
a circuit out of this mob, but have a go anyway.   :-)

If you can't find a diagram then look at the IC part
numbers in your Rx and try and find data sheets
off the net. Google the part numbers.

For monitoring the audio signal, you can safely
poke around with "high impedance" headphones
using a series capacitor to block DC.
Or use a small audio amplifier/signal tracer type gadget.
Or just use your oscilloscope.

Your are looking for the demodulated audio tone from
your Sig Generator.
 (Set the deviation on the Sig Gen to about 3Khz.or less
 until we find out more about your Rx)
Once you find that audio monitoring test point, (just before
the decoder section) might be useful to bring it out on to
 terminals on the die cast box.

Do not connect your servos to the Rx when testing
with the Sig Gen. They will go beserko.

Later on when you get better organised, you can
build an encoder unit similar to your transmitter's
encoder and use that to externally modulate your
Signal Generator so that the servos will work.
I have just noticed on the VG 600 operators
manual that there is a Master/Trainer facility.
The encoder from your transmitter can be accessed
easily and used to modulate your Sig Gen.
The RF from your transmitter is of course switched
off temporarily while you use the Sig Gen. Removing
the Tx xtal is usually an easy way to kill the RF out.

Once you get properly set up with your bench testing
you can build all the filters you want to your hearts content.
You will need a frequency meter and graph paper.
An FM modulation meter would be handy to measure the
deviation on your transmitter so that the deviation control on
the sig gen can be set similarly. You did say test equipment
 was the least of your problems in an earlier post!
 I was surprised at that comment because I am always
struggling and hankering after nice test gear. heh heh heh...
Anyway Paul, looking forward to hearing of your progress,
Regards,
John Crighton
New South Wales

Hello Ian,
I notice that your e-mail address contains the word
Agilent. I am wondering if you can help me with
converting HP IC part numbers to ordinary industry
standard part numbers. I have an old HP frequency
meter 5325A and a mate of mine has an old 1970's
computer/calculator machine that uses what
appears to be HP's own ICs. I am sure there must
be equivalents to most of them. I am looking for
a table or list showing what is equivalent to what.
Do you have anything like that in your workplace.
Regards,
John Crighton
New South Wales

What a fucking brilliant observation.
Give us some examples of "indiscrimate killing..."
You are a fucking idiot.

> The 'regime change' argument requires Saddam to pose some threat to
> world peace by being in posession of WMD. Now, to rid the world of
> such threats, weapon inspectors have been granted full open access,

I have been wondering if there might be someone who is stupid
enough to think the "inspections" are something more than a joke.
I see that you're stupid enough to believe just about anything,
as long as it's totally fucking dumb.

> while carrying public allegations by the bushmob largely
> unsubstantiated and about to be proven near false with Iraqi paper
> work and destruction sites.

Uh-huh. I overestimated you. The fucking idiots are
lots more astute than you are. Your idol, Saddam Hussein,
has already "authorized" use of mass murder weapons against
an invasion. If that happens, you'll be told to claim that
he hastily went to Oregon and bought them when the shit
hit the fan. (That's just a guess. Find out where Oregon
is, just in case it all happens.)

>If WMD is the threat, then the most
> effective method of reducing the risk is to not lower the odds. Again,

> arrest himself for being a traitor and completely incompetent...

I wonder how many fucking idiots think the president is a cop.

You're lucky you've found your niche in life. Without enough
brain cells for an occasional interaction among them, forwarding
the protest industry's idiotic, naive propaganda is just the
thing for you.

Announcing the PSKfest 2003 Certificate winners. For this year's event the 070 Club is awarding certificates to the top three scores in each category/continent. See < http://hometown.aol.com/n3dqu/2003_pskfest_results.htm > for the final results.

This year we had 121 entries in the PSKfest, a very nice turnout. Special recognition to 070 Club member N8PSK for TOP DOG score of 25,434 points, fb job Chris! Also special mention to SWL member F-16527 who logged 378 QSO's in the contest!
Congratulations to the certificate winners and many thanks to all who played in the PSKFest, especially them crazy QRPer's :o) A well deserved attaboy also to Contest Manager Steve N6YIH/7 for taking care of all the logs and scoring (Tnx om, couldn't have done it without ya!). Will be looking for you all in the next one....73 de Jay N3DQU.

*** post for FREE via your newsreader at post.newsfeed.com ***

Looking for some ideas for installing mobile radios in the Nissan Pathfinder
(mine is a '99). Either control head only (icom 706xxxx) or small mobile.
Also, any info available on safe spots to come thru the firewall?

>What brand and model number is it?

Suddenly I'm spoiled for choice! I've lined two particular ones up for
picking up on Saturday, a Schumberger and an AVO, plus there's a radio
fair, equipment sale & swap meet on at the appropriately-named
Crystal Palace on the same day. So I should definitely come away with
something of use, whatever. I don't have the model numbers of the
Sclum and AVO to hand, at present, but will wait until I'm sure what
I've settled on before posting any particularities re specific models.

>In the mean time you have to find a circuit diagram

>They have the info, you will have to twist their arms. :-)

Okay. I'm personally lost without a schematic, so this is a must-have
for me. I've a couple of sources in mind that may assist me in this.

[relevant bits snipped and saved elsewhere]

>the sig gen can be set similarly. You did say test equipment
> was the least of your problems in an earlier post!

Thanks for the tip. It's nice to have it in good time, for once rather than 'after the event' as so often happens IME. I'll be keeping an eye open for a mod meter at the fair. I've already got a frequency counter. It works fine but is 20 years old now and 'only' goes up to 200Mhz, which is a bit low by today's standards. I just wish the hell I hadn't parted with my spectrum analyser a couple of months back. No sooner had it gone than I suddenly found myself in need of it again!
It's not as if they're easy to come by, either. :-(
Mind you, I might just stumble on a nice vector network analyser for a couple of hundred quid! Not very likely, though!

Hello Paul,
that is good luck in being able to go to a radio fair. Do you live
near London? If the swap meets over there are anything like
Australian ones, you had better get there early. The swap meet
I was telling you about a few weeks ago in NSW turned out
to be a near wash out. The drought broke that week which
is great, but it was sad seeing all the peoples stalls of junk
for sale, drenched. Some of the stalls were under cover
but most was out in the open. Catching up with all the
electronic geeks and weirdos that I haven't seen for years
is all part of the fun for me at these radio field days.
Have a great time! Don't take too much money with you. :-)
Regards,
John Crighton

i have a setup of 2 circuits.
one to transmit an 800Hz pulse triggered by a momentary push button,
encoded by a PIC programmed chip through a Laipac 433.92 Hz (TLP433A)
transmitter module
and the other to receive the signal, decode it through another
programmed chip that sends a logic high (on receiving the pulse) to a
4053 switcher which is hooked up so that it switches an audio input
between:
      �flowing through an out/in loop (for a guitar pedal effect) then
on to the audio output
                              ******OR******
      �the loop is bypassed (audio in directly to audio out).
i hope i described it clearly enough.

this works like a charm. the problem is that there is a lot of slow
static (pops and clicks) that the Laipac receiver module (RLP433A) is
picking up that is somehow being transferred to the audio output.
all floating connections are grounded through 100K resistors.
when i connect the encoder chip's (on the 1st circuit) output signal
DIRECTLY to the decoder chip's (2nd circuit) signal input by wire

bypassing the wireless Laipac modules completely....no noise at all.
absolutely clean.
help.

im building a simple circuit where i send a signal from an HT12E
encoder chip to a Laipac transmitter (TLP433A), then have the receiver
(RLP433A) data out pin go to the HT12D decoder chip's data in pin.
once this works the data output goes to a 4053 switcher.
i cannot get the HT12D to respond at all. i even hooked up a speaker
to the data in pin in parallel to the output of the Laipac RLP433A
receiver and i hear the signal very strongly so the TX/RX is working.
ive even bypassed that just in case (wired connection from HT12E out
to HT12D in) and still nothing.
on both chips i have all the address pins left open. pin 9 to ground
(Vss). pin 18 to Vdd. on the encoder im using a 1M ohm resistor and on
the decoder a 51k resistor. according to the specs, this should give
me the 50 to 1 frequency ratio needed for them to talk to each other.
on one of the holtek diagrams, i see a whole bunch of diodes used but
on the Laipac example sheet, there are no diodes. im not using diodes

presently.
do i need to hook up the VT pin on the decoder?
on the encoder i have pin 10 (data out pin) to ground. i have the
corresponding pin on the decoder connected to an LED through a 1k
resistor just to monitor it and i cant seem to get it to work.
everything is connected to +5V where Vdd is indicated.
now, im new to all this and im getting really frustrated.
my friend burnt 2 chips for me that did the encoding decoding thing
AND counted with 2 bits. that works beautifully. the Laipac stuff
works and i use the LSB as a toggle to send to my 4053 switcher.
it would be nice not to have to go through a JK toggle chip to latch
the data outputs and i hear holtek DOES make some chips with that
built in. i cant seem to find them. any help directing me towards
these would be greatly appreciated.
but 1st... i really need these holtek chips to work. it seems so
simple to do. WHY IS IT NOT WORKING? i HAVE the right oscillator
resistors. the address bits match and so does the ground data pin on
the encoder and the chosen data out pin on the decoder (pin 10 on
both). power is going to the right places. ground to the right places.
data out (encoder) to data in (decoder) directly by wire and a
momentary push button between TE (encoder) and ground. and i know it
IS sending the signal cause i can hear it on the receiving breadboard.
i also have the 1M resistor on the encoder and the 51k resistor on the
decoder in case u were wondering.

thanks for any light u can shed on this.

I own a legal copy of this software. The authors have provided no useful information.

I am trying to install this software onto a laptop with no floppy drive . This means a network conenction or an external CDROM.

The software is protected and needs to be installed from an original diskette. I have the diskette. Copying from an installed version doesn't work.

Could someone please offer advice on how to get around this?

Thanks in advance.

This software uses a simple form of protection where it purposely writes bad sectors to the floppy disk. When you copy the disk it does not copy these bad sectors across and so it will not load and run if it does not see these at the start.

You need to copy the disk using a program such as exact disk copy, which does as the title suggests, it makes an exact copy of the disk - bad sectors and all.

Kev

cut them to fit and paint  them to match from hardware 3/8" bolt which size
to that thread dimension.

I cut mine with a 3/8 x 24   die
on steel rod stock and felt like an idjit learning I could'a cut up a 75
cent carriage bolt

Yodar

Which does nothing for the original question of how do you install the software when you *don't* have a floppy drive on your computer. I had to put one (floppy drive) in my computer to install this software - didn't make me all that happy. I too would like to know how to get the software off of the floppy and runnable on a CDRom.

Nothing to do with the stupid copy protection scheme or the lack of
authors lack of responsiveness.

Thanks for that. At least some of the mystery is solved.

This is a throwback to the days or laser holes in floppies, of 15 years ago. Where is that copy of zerodisk....

Hi,

I realize this might sound juvenile, but I get quite a kick from connecting BC108s directly across hi-capacity lead-acid batteries and seeing how much of a *bang* I can get out of them. It's one of my few remaining pleasures at my time of life, actually. Is anyone else into this and are there any discussion groups devoted to this stress-busting pursuit?

p.

Paul, I used to charge up BIG computer grade electrolytics and short out
the terminals with a screwdriver.
Very nice spark show.
This amused me for a while, until I started plugging electrolytics to the
mains. BOOM. Very fun.
Then, I started planting model rocket motors nozzle-up into the ground and
firing them.
People once called the cops on me, I talked to the cop nicely, showed him
the Canadian Gov't (Energy, mines and resources Canada) handbook on model
rocketry, showed him there's really no law that says rockets have to go up.
He was satisfied, actually started him in model rocketry.
(Actually the real reason was a bad batch of B6-5s that I was using to
launch my rocket camera, they would blow up on launch, destroying my
rocket, so I decided to get rid of the rest of them. I could have gotten a
refund and a new rocket instead...)
Needless to say, the people who called the cops were livid. Quite funny
really. These were the same people who were flying big kites near a cycle
path, and one day a cyclist nearly got garotted from a kite string, but
I'm the one who's dangerous.... Some people...
But the biggest stress relieving activity is 'driving' my RC plane around
with no wing on it. It's quite fast on the straight away, but with no
brakes and tilt steering, this gets dangerous.

I survived my first electronics class by messing around with the
largest capacitors I could find. I'd charge them up - then discharge
them on the wall plates. Some of the capacitors were large enough to
leave actual holes in the plates. Others just left small dents. Also,
if you short a capacitor with solder - the solder will melt. Kinda
cool...

If it's for a VX5, have you thought about using EVE software instead? It
works quite well on my vx5.

Just a thought

I am interested in crossband repeat operation, but I can't find much information on the subject. I have a Yaesu FT-100D and Icom 2600H mobiles and a Yaesu VX-7R HT. Can any combination of this equipment be used for crossband repeat? Where can I find information on setting it up?

Don't know about your particular radios, but two primers on cross band repeating can be found at URL:
http://ac6v.com/repeaters.htm#cross

I just picked up a Kenwood TM-642A, which comes with 2m/220 and has the option
to add a third band. I need a recommendation as to which band to add.  I am
torn between 440 and 1200 (1.2 Gig).

I know that in the past, 440 had only closed repeaters, though I don't know
what the situation is like now...Don't know if 1.2 is any better...What do you
recommend?

Thanks,
Ed NI6S

Well here in San Diego, there is very little 1.2 GHz activity (LA too I suspect), compared to 440 MHz which is loaded. For So Cal activity, See URL:
http://rptrlist.w6jpl.ampr.org/
There you will note many open 440 repeaters.

Here in SD, several 440 machines (some open) will get you into IRLP and the long range intertie systems. LA also I suspect. And 440 MHz is used a lot for crossband repeating.

Here in San Diego, I have 1.2GHz capability and can only access 2 repeaters and they have very few users. But hey if you want an essentially "private QSO" spot - 1.2GHz SSB will get close to total privacy - but some one is always listening.

But for 440 MHz, several dozen repeaters are available.

I once had access to a supply of neon indicators with no built-in
limiting resistor and which had the same bayonet base as the standard
U.K. light bulb. I'm sure you can guess the rest.

ok so i ripped down everything and started over.
im using the HT12E /HT12D pair.
im getting the 2 IC's to talk to each other based on the address bits set.
im also getting the VT pin to go high indicating a valid transmission.
but for nothing would the data pins work!

any ideas?

Adrian

Hi fellows
I bought a used Mutek TVVF144a (28->144) xverter but i found some burned
```

component inside.
The reception is something amazing but those component ar on the tx side. I need the schematic of it and the Mutek didn't reply yet. I sent them 3 email but in 2 weeks no answer yet.
Please help me to fix this fantastic xverter.

73 de Max IW0GXY

Won't the 642 take a 6 Meter module too? I think so. Maybe not. I'd think on that or 440. Not much 23cm activity, except in certain areas.

I am looking for the operating manual for an old radio, a KDK FM-2033.

On the other hand, I would appreciate it if someone could tell me how to operate it if he/she knows how and can relate to me by e-mail.

Thanks.

>Very nice spark show.

Oh yes indeed. I did the same thing -- with about 0.5 farad worth of computer electrolytics tied in parallel with heavy (8 ga?) copper wire. The caps were 65v rated, so I charged them to about 50-60v and discharged through a piece of 12 ga Romex to a large aluminum heat sink. Burning aluminum makes very pretty sparks.

I learned not to do this unless I was covered head-to-toe.

I had one of those. Piece of junk, especially where noise rejection
matters. Get something newer.

I think I'll go with 440 since there seems to be much more activity there...I
have 1.2 here at home and I'll listen more to determine whether I need that
band...Thanks for your help.

Can anyone tell me where the battery is located on the Kenwood TR-751A.  Would
also like the battery number if possible.

Many thanks,

I once spent an amusing weekend playing with exploding wires (Take a
TO3 mosfet, cut open, connect a low esr photoflash cap across fet,
charge to a few hundred volts then take the gate up to +15V), Bang!
Then I got to thinking that it would be fun to cast a plug of ammonium
nitrate into the fet can and see if I could detonate it! It can be done,
but it is not a reliable way to detonate this explosive (very low
sensitivity, PETN may have worked better).
It is amazing the things we think are fun before the age of 13.....

I fear that in the current climate this sort of thing would get me
arrested.

Regards, Dan (Who still has 8 fingers and 2 thumbs)!

Things you shouldn't do when you're bored:

Overcharge a largish Mylar capacitor and keep the current flowing.
Little flaming chunks blow off with machine gun repetition.

Force about 20W into a 1/2W HeNe bulb. It glows a beautiful purple
before the electrodes melt.

Discharge a 1KV capacitor of a few MF into a household light bulb. A brilliant arc runs over the filament.

Drive a piezo beeper element with a few hundred volts AC and watch the sparks dance as it breaks up.

Connect a TO-220 transistor to a strong power supply in series with a big 10 gauge inductor. Turn the transistor on.

Apply a high enough voltage to a glass fuse that it arcs. The arc will move into the glass and cause it to glow. As soon as you cut the power, the glass will fill with cracks.

Connect jumper cables to a car battery. Crimp one cable end onto a thick steel cup filled with dry salt. Connect the other end to a carbon rod extracted from a "C" cell. Push the rod through the salt into the metal. When it's yellow hot, slowly lift it. White hot molten salt will maintain the current flow. Bonus: Do you have the balls to melt the carbon rod? Drip flaming carbon onto various objects and see how far it melts through.

Microwave: uncured epoxy, CD, cassette tape, egg, mostly empty water bottle, ring clip, circuit board, steel wool

Heat a new (electroplated) US penny with a torch until it sags like a teardrop. Drop it and the liquid metal inside will flash on exposure to air.

Run 150 VDC into a Tyco track. Pull the throttle in gradually so the permanent magnets don't degauss until the car is going fast enough to put on a good show.

Cut open a glowstick and pack it full of firecrackers. Detonate it on a moonless night.

Play with thermite.

Pick up a big old hard drive by it's power cord while it's on so it spins like a gyroscope.

Connect the 10A jacks of a Radio Shack DVM to a car battery.

How about steel wool sprinkled with saltpeter? That's pretty too.

But, what about bush?, the unellected war criminal, American cop killing heroin
dealer... Right? Just ask a evil dumbfuk bushwhore, (if you can
hunt one down) why was it wrong for Saddam to try liberating Kuwait?
Or, why should antiChrist bush openly steal from American families,
their life savings and police protections, to be slaughtered as

willing victims?

--

Thanks man. Ya, it's true, there are very few actual bushwhore cowards whom publicly, or in secret, support that American cop killer bush Jr..
I try often to locate mind-numbed CNN'ed soldiers also, portrayed as too affraid to protect their own families from the criminal bushmob pillaging program, whom instead, as cowards, run death squads intentionally to murder innocent women and children like they (10th mountian division fort Drum) did under tommy franks the traitor in the Anaconda missions. Nobody doubts nazi american soldiers are weak and stupid, but are they now life asks, worth sacrificing their lives as worthless without meaning?

http://www.theithacajournal.com/news/stories/20020525/topstories/380284.html

We have 100 percent access to Iraq for ridding the threat of WMD as alledged, currently without needing to sacrifice one American soldier for bush and cheney's personal greed and hatred for American founding principles.

More WMD have been destroyed through using a plan,
than all the indiscriminate killing with bombs America
has done to our World as the bad guys.

The 'regime change' argument requires Saddam to pose some threat to world peace by being in posession of WMD. Now, to rid the world of such threats, weapon inspectors have been granted full open access, while carrying public allegations by the bushmob largely unsubstantiated and about to be proven near false with Iraqi paper work and destruction sites. If WMD is the threat, then the most effective method of reducing the risk is to not lower the odds. Again, FULL, OPEN ACCESS is already offered to inspectors who require no American Soldier life sacrifices as worthless without meaning. (Americans are often shokingly stupid as bushwhores eh?)

Now, if bush wasn't the antiChrist, he would encourage the completion of the successful process, acknowledge Saddam for treating US People better than bush's evil war partners the Northern Alliance, Uzbeckistan, Saudi Arabia and Kuwait. Then finally, demon bush would arrest himself for being a traitor and completely incompetent...

--

Truth, as is justice and freedom, are shared values with all of creation in a dream called forever answering not home. So I suppose, I rely partly in faith
that we shall prevail as sure as life is by communicating something...

Example:

Have you heard demon bush recently talk on how he would work to prosecute Saddam's forces if they should attack Iraqi infrastructure as war criminals, but neglected to mention that is precisely what dimwit american nazi forces did last time targeting specifically Iraqi people by hitting water treatment plants, and then further on with irrational sanctions on food and medicine? Our Mr. bush Jr., the antiChrist, is now condemning himself as traitor to American values openly, as evil is the decieved disguised. Wow! What a show!

>
> > > > > Why murder people (who could Just as sure be YOU) for bush when we

--

But tell anyone, how is it better to bomb Iraq people to rid ourselves of WMD, than it is currently to go anywhere unfettered? How is it possible to improve a senario that is as open as possible already? How will American soldiers eating bullets improve the search and dissarm technique? What ever happened to evidence being a requirment to convince US who is evil? Oh yeah, bush as the American cop killing antiChrist doesn't like American principles.

--

BUT LISTEN!!!

Okay, how is it MORE EFFECTIVE to send 800 cruise missiles and thousands of bombs onto more than 3000 targets, with an included, urban war conflict to rid Iraq of WMD, than it is now to go ANYWHERE unfettered by inspectors? (Again, how is that an improvement?) How does a criminal war improve the bushmob's stated goal of seeking out these weapons when people under attack will attack back naturally, and the WMD can fit in anyone's back pocket last year? How does spreading Uranium to kill humans for 4.5 million years, blowing up infrastructure, denying food, clean water, and vacines to US people as the unrepresented and innocent, while American soldiers eat bullets as criminal invaders like in Afghanistan but bigger, inprove the living conditions of ourselves who live in Iraq to suffer unjustly at the hands of the demon antiChrist, American cop killer, Our Mr. bush Jr.? (Our Mr. bush Jr., who demands Justice no longer be the found principle to protect American Freedom? (Like following the criminal leads for 9/11?)) How does Saddam, the secular leader who represents more than 750,000 Christians in Iraq, pose more of a funder of idealog zealot terrorist groups, than, say, Saudia Arabia, or Kuwait?, where women can't vote, drive, or learn from the internet? How does a plan of liberation sell to a nation that is more progressive than any of it's neighbors? How come American Soldiers don't demand bush make his case with ACTUAL evidence to substantiate his American allegations regarding the weapons sold illegally (an act of Treason against America) to Saddam up until 1992 by the bush Sr. administration to kill American service personel during the first Gulf war syndrome bombing campain? Why? Brain damage that's why. See, Anthrax doesn't have a shelf life of a decade, and American soldiers are dumber than the average American who holds already, (according to Blizter) the world's title of lowest literacy rates of the developed semi-developed world while currenting further regressing. Americans are cowardly, and too weak and dumb to even protect themselves now. Pitiful.

Look, American soldier..

You now should know, bush and rumsfeld murdered Americans in New York City, and as consequence, have no interest in acknowledging as pursued the criminal investigations. CNN holds no responsibility, as we witness repeatedly, to American soldiers, but to harbor those who pirate our rights to openly steal real lives. If bush makes no mention of himself stealing 50 billion dollars, murdering American police officers, sabotaging the weapons inspections process, funding israeli atrocities against the God loving, and warring our world as the anti-Christ by running death squads against the innocent, well, CNN, the american success, sure ain't gonna be speaking out for your stolen freedoms dying comrads. For what benefit in market share would there be to work for your living, dirt bagged? CNN is so colorfully excited about selling the glossy bush war to kill the poor stupid people, but for what american fascist weak binded bushmobbed soldier without principles? Again, how stupidly dunce does a poor cowardly american soldier have to be to not believe? Nobody but a cult corporatized illiterate fascist nazi vermin parasite, just like Jew hater ariel sharon would support the murder of American soldiers for a criminal conflict that doesn't serve to protect. But if it, as bush nazi evil does with little struggle over the masses complaining, and america marches off to criminally war the third world as the bad guys, our World, indeed this Universe will then know the absolute true cowardice of american soldiers, as premised upon the weakness of america's army to not uphold America's own rule of Law for freedom as themselves included. It only takes One Soldier to turn this tide to destroy bush Jr., and that Soldier is where in America partner? Who American soldier, do you think bush as traitor does steal from as the duped General public as corporately represented to be unawares? Do american soldiers have to convince themselves their families are not worth fighting for, and instead, lay their lives down in sacrifice to the bush demon who would also steal from their graves as the lifeless to speak out for themselves ever? Ever? Did you know American Soldier, the Pentagon, after receiving complaints from surviving soldier families, (some of like the over a thousand documented American troops slaughtered in Afghanistan) that taps wasn't being played because of so little real talent present in american military affairs, and that now, when a cowardly American nazi soldier dies for the bushmob, the mock national guard will hold a horn to his lips and act out the part to your grieving as stolen from family, while secretly pressing a hidden button, that will play a cheaper recording? But shhhh...

The fact that you don't see this post, or others nearly like it at american military internet sites, exemplifies their fear and weakness to stand as a force worth reconing with. (Look, we destroy bush and rumsfeld, stop funding the drug trade and sharon, and begin the public trials, all in three simple steps.) No, to be an american soldier in bush's america today, you have to hide from your cowardice like the 9/11 evidence, and be something corporate news america is not. Involved.
Just go ahead and die for nothing american soldier, but for to be unaccounted as hidden without value, while the bushmob robs from your grand parents as unprotected.
Tis' true it does further seem, american soldiers, on general terms, are super dumb ass nazi scums, who hold little of no conviction to protect the America I remember. Why? Because the unelected war criminal, American traitor, mass murderer, cop killer bush is

still spewing his blind hatred for the progress of our
civilizations, instilled through law as a function to
gain justice for people. People who are suffering and
dying for bush's contempt for the American dream.

Destroy traitor bush and rumsfeld for escaping to
recommit murder today, and be actually caring for your
world tomorrow, or not, and deem yourself unworthy by
your own admission to play fair as the eternal standing
proud, strong, and free.

Free to be living justly for yourself
truly as caring to know this as everything.

Whew...

Now, how about the Koran?

Johnny Wizard

--
Christ I'm Actually Rising!

Destroy the traitors to our humanity, the unelected lawless dictator Mr. bush, and rotten rumsfeld the sadistic savage now American Patriot Soldiers. Stand up for your country, and live for your family. The corporate TV news professionals show you, as an American Soldier a concern for your life as unworthy of discussion, actively censoring the political reality on bush's america, while encouraging soldiers to commit crimes against our being, by keeping us all uninformed as the sacrificial sheeple. The bushmob have actively worked to not arrest themselves for 9/11, and in so doing, are purposefully ignoring the public evidence that is freely available. Mr. Tenant and Mueller would have you believe the officers of America, who have completed the criminal investigations outlining the cop killer bush, are unworthy as American Patriots serving the cause for freedom and liberty to not be publicly acknowledged, while blaming Laden for every terrorist crime that happens before an police investigation even begins! See? Evil deceived. What do you think? Is not a list of all supporters of the bushmob in Congress, who voted to dismantle the Constitution, and wage a criminal war, as without just cause to murder Soldier families for stolen Human values, a good list to be broadcast? Or shall we sit in doubt while these talentless demon monsters murder millions of US as innocent cowards? Who isn't a freedom fighting al-Qaida member according to the evil tommy franks dum fuk's conclusion? How stupid can an American Soldier be, to be asked by rumsfeld and CNN, to destroy their own principles, and to sacrifice their lives for such cowardice in whoreship to the evil dictates of the anti-Christ, Our Mr. bush Jr.? And, to the still groggy, without the payoffs of corporate america's holy Larry King even!, or the anti-semitic fascist Saturday Night Live troop to boot your stupid carcass to the front line as entertainment? BA HA HA HA (like SNL's new, it's all so hillarious audience, paid for likely because the degrading intolerant bigoted news crew, have so little real talent performing to the robbed and dying to be devalued and murdered by their inaction to even joke about it. Why? No money in contributing to the poor stupid people without TV contracts, or TVs, electicity, or running water now that the clouds are being privatized.) $155,000 is the base pay of bush's now anti-American criminal congressmen, and that's before corporate bribes, oops, I mean corporate BRIBES to urge YOUR "willed" sacrifice in corporate america's "democracy", now that bush's america is convinced evidence is no longer a requirement to convince US, who is truly an evil doer, or who actually wins elections on behalf of the People. You ask yourself, again, who are you dying for American Patriot Soldier? Know that this paper, like all the rest, will reach the CNN and Coast to Coast network staff under one name or another, and yet, they'll continue to turn against the interests of American soldiers by not addressing our present top priority concerns regarding the facts on your schedule for departure. Only broadcasting the popular, bush contempt for all American lives as too much trouble, as unworthy the free time to openly discuss things before "they" die, all those nasty evil powerless People. I dare you American, to be a Soldier and email this to your brothers and sisters, to convince them with tough Love, how you wouldn't want to see them die unjustly for Mr. bush Jr., Art Bell, or even me as the Wizard. Or spew instead, how you would as a traitor to yourself, your family, your country, and God too, sacrifice your worthless self as unfactored, but for to be a pitiful coward, falling to die by your own sword on stupid evil bush's corporate command over your rights to be represented fairly. Be your own Saviour!

Big G is cool, or not. You decide Holy.

The truly most as the living god King of all as Creator, your servant and trying to be friend, a wizard and Thor, the Secret Flower and Odin, Allah, Omega, Adam, Alpha, Krishna, Shiva, Mithra, Mahdi, Anu and Yahweh. And even a blade of grass, a snake and a elephant, a lion, rat, monkey, giraffe, spider, shark, wolf, and bat, Lucifer Morningstar, Jesus Christ, Oberon, an all mighty nobody kinda even all ready.

P.S. Don't miss the awesome magic Johnny Wizard papers, "Let Love Rule", or "Strange is Strange", slowly now disappearing from your nearest search engine dealer! Get your free copy now, before they're all gone to the slave owners who truly have know power anyway... Weee!!!

George Bush Plans High Crimes and Misdemeanors:
Why We Are Marching on October 26th

By Carl Messineo and Mara Verheyden-Hilliard

The authors, attorneys and co-founders of the Partnership for Civil Justice ~ LDEF, are members of the national steering committee of the A.N.S.W.E.R. (Act Now to Stop War & End Racism) Coalition

George W. Bush has declared his intention to wage a "preemptive" war against Iraq and is now seeking to strong-arm the international community, the U.N., and the Congress into support and submission. As members of Congress rush to show their obedience and member states of the U.N. line up to receive the anticipated spoils of war, the administration is now waging a campaign to convince the people of the United States to fall into step and finance with money and blood this war brought for conquest on behalf of the corporate and oil interests that make up Bush's true constituency.

Bush's preemptive war is a war of aggression. The U.S. policy supporting the war is not the rule of law, but the rule of force.

But no U.N. resolution and no Congressional resolution can legalize an illegal war. With pen to paper and votes of support, they can only commit to wilful ratification, complicity and responsibility for illegal acts by endorsing a criminal enterprise.

A war of aggression violates the United States Constitution, the United Nations Charter, and the principles of the Nuremberg Tribunal. It violates the collective law of humanity that recognizes the immeasurable harm and unconscionable human suffering when a country engages in wars of aggression to advance its government's perceived national interests.

The National Security Strategy: Blueprint for Global Empire

On September 20, 2002, the Bush Administration issued its blueprint for global domination and ceaseless military interventions, in its comprehensive policy statement entitled "The National Security Strategy of the United States."

The National Security Strategy sets forth the U.S. military-industrial complex's ambition for the U.S. to remain the world's superpower with global political, economic and military dominance. The stated policy of the U.S. is "dissuading military competition"1 and preventing any other world entity or union of states "from pursuing a military build-up in hopes of surpassing, or equaling, the power of the United States."2

The strategic plan elevates free trade and free markets to be "a moral principle. . . real freedom"3 and endorses a comprehensive global conquest strategy utilizing the World Trade Organization, the Free Trade Act of the Americas, the International Monetary Fund, the World Bank, among other mechanisms.

The Washington Post reports that the National Security Strategy gives the United States "a nearly messianic role" in its quest for global dominance.4

The National Security Strategy confirms and elaborates what was reflected in the January 2002 Nuclear Posture Review, that the Bush Administration maintains a policy of preemptive warfare contemplating the use of non-conventional weapons of mass destruction as a first strike measure.5

Turning Logic on Its Head

Bush's preemptive war policy is a war without just cause. Under international law and centuries of common legal usage, a preemptive war may be justified as an act of self defense only where there exists a genuine and imminent threat of physical attack.

Bush's preemptive war against Iraq doesn't even purport to preempt a physical attack. It purports to preempt a threat that is neither issued nor posed. Iraq is not issuing threats of attack against the United States. It is only the United States which threatens war.

It is not a war for disarmament. It is the U.S. which has stockpiled nuclear, biological and chemical weapons. It is the U.S. which is directly threatening to use these weapons against another country. It is the U.S. which has bombed Iraq relentlessly for more than ten years, killing scores of innocent civilians.

The Bush Administration turns logic on its head, twisting reality in order to create the pretext for its war of aggression. The Administration claims that the necessary prerequisite of an imminent threat of attack can be found in the fact that there is no evidence of an imminent threat, and therefore the threat is even more sinister as a hidden threat. The lack of a threat becomes the threat, which becomes cause for war.

By the U.S. Government's own claims, it destroyed 80% of Iraq's weapons capability in the earlier Gulf War, and subsequently destroyed 90% of the remaining capacity through the weapons inspections process. There has been no evidence that Iraq is capable of an attack on the U.S., let alone possessing the intention of carrying out such an attack.

Bush's Proposed War and Current Threats Violate the U.S. Constitution, the U.N. Charter and International Law

Bush's preemptive war policy and proposed attack on Iraq cannot be justified under any form of established law.

The preemptive war policy and Bush's threatened new military assault on Iraq violates U.S. domestic law and international law. The warmongering, preparations for war, and threats of violence coming from Bush, Cheney, Rumsfeld, Rice and other White House and Pentagon hawks, are in and of themselves violations of international law and constitute crimes against peace.

Article VI of the U.S. Constitution establishes that ratified treaties, such as the U.N. Charter, are the "supreme law of the land."

The Article 1 of the U.N. Charter establishes

"The purposes of the United Nations are. . . To maintain international peace and sovereignty, and to that end: to take effective collective measures for the prevention and removals of threats to the peace, and for the suppression of acts of aggression or other breaches of the peace and to bring about by peaceful means, and in conformity with the principles of justice and international law, adjustment or settlement of international disputes or situations which might lead to a breach of the peace. . . ."

Article 2 states that all member states "shall act in accordance with the following Principles"

"...All members shall settle their international disputes by peaceful means in such a manner that international peace and security, and justice, are not endangered.

"All members shall refrain in their international relations from the threat or use of force against the territorial integrity or political independence of any state, or in any other manner inconsistent with the Purposes of the United Nations...."

Under this framework, acts of aggression, such as Bush's threatened attack, are to be suppressed and force is used only as a last and unavoidable resort.

The U.N. Charter was enacted in 1945 in the aftermath of the devastation and suffering of World War II. The Charter was enacted to bring an end to acts of aggression, "to save succeeding generations from the scourge of war, which twice in our lifetime has brought untold sorrow to mankind."

Disputes which might lead to a breach of the peace are required to be resolved by peaceful means.

Chapter VI of the U.N. Charter, "Pacific Settlement of Disputes," requires countries to "first of all, seek a resolution by negotiation, enquiry, mediation, conciliation, arbitration, judicial settlement, resort to regional agencies or arrangements, or other peaceful means of their own choice."

No Resolution by the U.N. Security Council can Legalize a Preemptive War or First Strike Plan

Bush has asked the U.N. Security Council to support execution of Bush's policy of a potentially nuclear "preemptive" war, as if that Council could endorse a war of aggression. The Security Council lacks the legal authority to grant such permission. The Security Council, by affirmative vote or by acquiescence to U.S. policy, cannot abrogate its own mandate. No collective action by the fifteen permanent and temporary members of the Security Council can lawfully violate the Charter which is the sole source of their collective authority.

This is made clear in the U.N. Charter itself, which provides in Article 24, that "In discharging these duties the Security Council shall act in accordance with the Purposes and Principles of the United Nations."

While there are, of course, procedures by which collective use of force may be authorized by the Security Council to maintain or restore international peace and security (Articles 41 and 42) those procedures may not be used to endorse aggression in violation of the primary purposes of the U.N. Charter. Article 51 of the U.N. Charter acknowledges the right to self-defense "if an armed attack occurs against a Member of the United Nations until the Security Council has taken measures necessary to maintain international peace and security." None of the provisions allow for authorization for Bush's war plans and first strike strategies. Any resolution authorizing a preemptive war of aggression is ultra vires, or null and void as beyond the authority of the Council to enact.

The very issuance of the Bush doctrine of preemptive warfare and also the threat to wage war against Iraq are, each, a violation of international law as a crime against peace, which is defined in the Nuremberg Charter as the "Planning, preparation, initiation or waging of a war of aggression or a war in violation of international treaties, agreements or assurances."

Responsibility for War Crimes

Neither Congress nor the President has the right to engage the U.S. in a war of aggression and any vote of endorsement, far from legalizing or legitimizing global war plans, serves only as ratification of war crimes. Under the principles of universal accountability established at Nuremberg, "The fact that a person who committed an act which constitutes a crime under international law acted as Head of State or responsible Government official does not relieve him from responsibility under international law."6

The execution of economic sanctions by the Bush I, Bush II and Clinton Administrations, which has caused the deaths of over one million people, primarily children and their grandparents, is likewise sanctionable as a crime against humanity under the Nuremberg Charter and under the International Criminal Court Statute as "the intentional infliction of conditions of life,. . . the deprivation of access of food to medicine, calculated to bring about the destruction of a part of a population."7

The Bush Administration has rejected the International Criminal Court treaty signed by over 130 countries. This rejection is an admission of the administration's consciousness of guilt and of criminal intentions. The Bush administration acts with a conscious disregard of humanitarian laws and a stated intention to avoid accountability for their crimes under international law prohibiting crimes against the peace, war crimes and crimes against humanity. The National Security Strategy promulgated by the Bush administration states that the United States "will take the actions necessary to ensure that our efforts to meet our global security commitments and protect Americans are not impaired by the potential for investigations, inquiry or prosecution by the International Criminal Court (ICC), whose jurisdiction does not extend to Americans and which we do not accept."8

Endless War, Aggression and Terror

Once this policy of preemptive wars of aggression is invoked by the Bush Administration to justify unprovoked attacks against the centers of population in Iraq, the doctrine will be used by the hawks in the administration time and time again, and will also be adopted by nations and individuals internationally as a justification for the preemptive use of catastrophic violence against centers of population worldwide. The legitimization of preemptive wars of aggression will be used to justify attacks against U.S. centers of population, and will bring greater violent retribution upon the cities and people of the United States for actions that the government is taking in their names, without their informed consent.

The risk of suffering harm because of this doctrine is, of course, not distributed equally among all residents of the United States. Those who will lose their lives fighting in wars of aggression will be the young, disproportionately persons of color, and those who must enlist in the U.S. military because of bleak economic opportunity. Those who derive their wealth and security from the transactions of war, from increased oil profits caused by global instability or conquest of oil rich regions, and from the constant re-building and re-arming necessary to conduct endless wars against countless peoples premised on imperceptible threats - - they will have the means to acquire seclusion, protection and greater safety.

Preemptive war will not stop with Iraq. Constant military interventions worldwide are necessary to enforce Bush's stated policy of global economic, political and military domination. Just four days after the September 11th attacks, the CIA presented its "Worldwide Attack Matrix" identifying scores of countries that the CIA wanted permission to attack. Bush approved the CIA wish list, and authorized immediate covert and lethal CIA operations in over sixty nations.9

Taking to the Streets

As the U.S. moves at breakneck pace in execution of its stated policy of global domination and over military interventions, the need for the people to take action is urgent.

Congress will not stop this policy of aggressive warfare and global domination. Many in Congress are well served with the tithing of the war profiteers and their corporate sponsors who see U.S. military domination as a way to enforce their interests, to exploit human labor at starvation wages overseas and to drive down wages domestically, to mine vast sources of environmental resources globally, and to impose and expand the reach of their "free" markets.

The U.S. Constitutional framework provides that, regardless of who temporarily holds office, all power remains in the hands of the people. It is time now for the people to take the reins of power back from those who have stated their intention to act in violation of all laws that humankind has struggled to create to end global conflagration and prohibit wars of aggression.

When law will not restrain the government, the people must. We must take to the streets in mass numbers in organized and spontaneous acts of resistance. The message must be clearly conveyed that if the Bush administration refuses to be accountable to U.S. domestic law, to the U.N. Charter, to international law, to all known standards of just conduct, then the people of conscience within the United States will rise up to demand accountability. And the message must be sent that the people of the U.S. will not allow the Bush administration to spend the blood of the people of the United States and the people of Iraq who are not our enemies, in a needless war for oil.

September, 2002

The authors, Carl Messineo and Mara Verheyden-Hilliard, constitutional law and human rights lawyers, are the co-founders of the Partnership for Civil Justice Legal Defense and Education Fund, a public interest legal organization in Washington, D.C., and authors of the forthcoming book "Empire at Home: George W. Bush and John Ashcroft v. the Bill of Rights"

My Divine Right

Destroy bush and rumsfeld now American Patriot soldiers, fire fighters, and NRA members. We all notice CNN and CBC management refuse to allow open discussions on the documented facts outlining the cop killers, bush and rumsfeld treasonous behavior against the great American people, deliberately forestalling their criminal arrests for the mass murders of US as innocent in America. (Or even the recent broken elections in Florida.) Again, I repeat, I've spoken to corporate cult Americans, Leon Harris, Bill Hemmer, Daryn Kagan, Sid Beddington, and Walter Issacson, just to name a few at CNN. All forementioned cowards, who would watch Americans be robbed and murdered, and do nothing to protect ourselves, are personally aware the bushmob was warned of the terrorist plot specifically, the fact that Laden investigations were blocked by the WhiteHouse, while the bushmob in Enron interests, developed a war plan with General Ahmad to invade Afghanistan, for an oil pipe line on a premise of blaming Laden for whatever without evidence as US innocent, a documented truth that existed also just prior to 9/11, a strategy confessed to fully implemented, demanding the bushmob not follow the criminal leads, that point to themselves as traitors. Like the bad bush act on 9/11. (emperors-clothes.com) No arguments are given against what I have spoken on, nor am I even being adressed by our corporate standards as inter-nationally responsible. Why? Largely, because, we are adressing what is as documented to be true, irrespective of ourselves as opinion, Justice infinite as indivisable, like the stars in the sky, while the corporate news machine is refusing to be our own as legit. Mr. bush, the anti-Christ, and rumsfeld did 9/11 to kill ourselves to steal Constitutional American values, with their silence only further implicating themselves to the doubters. Neat eh? (I'm also playing the Creator, who just wants to be at peace with ourselves as equals.) As for Iraq, it was the American administration that removed the inspectors from doing their, going very successful job, not Saddam, while the corporate media continues to allow cheney, the evil nazi fascist bassturd, to keep intentionally lying to American soldiers regarding the facts, like US Air Force Response, so the bush regime can throw away their lives as worthless, without meaning. (Agreed, on general terms, American soldiers are deeply ignorant and cowardly as cheney continually attests, but they are still preparing for death, and I understand many can read human, and haven't been hiding in a undisclosed location without a television, or newspaper these last few months.) The Senate Committee on Banking, Housing and Urban Affairs, found corporate America sold Iraq anthrax, VX nerve gas, West Nile fever germs and botulism, right up until March 1992, on hopes apparently, to risk further American soldier causalities, who were at that present time engaged in battle with poisoning themselves mostly. 250,000 troops are planned to criminally invade YOUR humanity, against now near SIXTY countries, representing around 2,083,093,468 people and counting, (that also includes freedom fighters, bikers, the Mob, and Jack), US, clearly aware of bush and tommy franks nazi plans, like in Afghanistan. To kill indiscriminately, while running death squads murdering innocent families, including your children. As for Saddam gassing the two guerilla groups called Kurds, who were fighting to murder in a war on behalf of Iran in 1988, labeled by American murdering nazi savage bush, Saddam's "own people", here is what the most definitive document on the issue states. It's a 1990 Pentagon report, published just prior to the invasion of Kuwait. Its authors are Stephen C. Pelletiere, Douglas V. Johnson II, and Leif R. Rosenberger, of the Strategic Studies Institute of the U.S. War College at Carlisle, Pennsylvania.

Iraqi Power and U.S. Security in the Middle East

Excerpt, Chapter 5

U.S. SECURITY AND IRAQI POWER

Having looked at all of the evidence that was available to us, we find it impossible to confirm the State Department's claim that gas was used in this instance. To begin with there were never any victims produced. International relief organizations who examined the Kurds -- in Turkey where they had gone for asylum -- failed to discover any. Nor were there ever any found inside Iraq. The claim rests solely on testimony of the Kurds who had crossed the border into Turkey, where they were interviewed by staffers of the Senate Foreign Relations Committee.

We would have expected, in a matter as serious as this, that the Congress would have exercised some care. However, passage of the sanctions measure through the Congress was unusually swift -- at least in the Senate where a unanimous vote was secured within 24 hours. Further, the proposed sanctions were quite draconian (and will be discussed in detail below). Fortunately for the future of Iraqi-U.S. ties, the sanctions measure failed to pass on a bureaucratic technicality (it was attached as a rider to a bill that died before adjournment).

It appears that in seeking to punish Iraq, the Congress was influenced by another incident that occurred five months earlier in another Iraqi-Kurdish city, Halabjah. In March 1988, the Kurds at Halabjah were bombarded with chemical weapons, producing a great many deaths. Photographs of the Kurdish victims were widely disseminated in the international media. Iraq was blamed for the Halabjah attack, even though it was subsequently brought out that Iran too had used chemicals in this operation, and it seemed likely that it was the Iranian bombardment that had actually killed the Kurds.

From another American government report:

"Blood agents [i.e., cyanogen chloride] were allegedly responsible for the most infamous use of chemicals in the war--the killing of Kurds at Halabjah. Since the Iraqis have no history of using these two agents--and the Iranians do--we conclude that the Iranians perpetrated this attack."

--

The New York Times reported on corporate America's war project SHAD, where during the Vietnam war, 4000 U.S. sailors were gassed deliberately by Republicans with gruesome biological toxins, including sarin.

As for proving that something is not secretly hidden by a nation as millions.. practically impossible! You can't ever conclusively prove that something isn't secretly hidden from perception by variables admittingly, unknowable. (For whom would be there to secretly watch the watchers?) When, and under what madness of bush tyranny as enslavement of our human species, would anyone be able to try standing up in Iraq or elsewheres and state, there is no Anthrax anywhere hidden secretly to kill bush, the false deity super evil anti-Christ with? Never I declare as the Son of Man, will evil bush escape the wrath of our fury as this Universe is, however, it is the supporters of bush's irrationality with our poltical will unchallenged by corporate standards, as these nazi monster, lawless American cop killers wish to use to terrorize 60 nations of almost 2 billion innocents without any evidence with. With an intent to use a paultry 250,000 criminal nazi soldiers mindlessly stupid on drugs probably, while corporate America won't give anyone two minutes nationally to speak on the clear strong factual evidence implicating bush and rumsfeld for murdering over 3,000 AMERICAN flag wavers in Yew York City? Destroy American traitor bush now!!! The sanctions against the poorest of poor in Iraq are also irrational. The Republicans state the innocent people of Iraq must be denied food and medicine to starve and die because, they are practically politically powerless to change their state to be attacked as the unrepresented, while stating Saddam, if he could, wouldn't help them survive as a nation as the Republican justification to terrorize millions, while cheney skirts U.N. sanctions to sell Saddam whatever supplies privately in secret? So the suffering of Iraqis, is rightly attributed on American terrorist activity by all Iraqis, as the direct cause, working directly against the Republicans publicly stated purpose to commit such criminal intent. Example: If a well spoken father who may not like the policies of Saddam should go to the hospital with his child, he is told the bush clan wish his family death and suffering by American will for being born to our world in Iraq as human. The oil for food program however, is intelligently based, but it's purpose is defeated with the Republican atrocities to blindly murder US with. The demands for the betterment of the Iraq people through national oil sales, would make sense, if they weren't directly suffering under assault by the same terrorist network cancer cell that denies themselves inalienable rights to life as our own. Like pathetically weak as unrepresented American cowardly soldiers, who were provided no evidence to back up the evil bushmob's criminal allegations, then went murdering tens of thousands of innocent people in Afghanistan on the brink of starvation, instead of killing the documented child killer, heroin pusher, tommy franks, or bush and rumsfeld for 9/11 in America. Just on bush's behavior on the day in question, being left unreported by CNN dictates, should say much to everyone.

Joint Chiefs of Staff Chairman General Richard Myers told reporters at the National Press Club about Iraq's enormous unknown stockpiles of !secret! corporate american warfare weapons, "It does not take a lot of space for some of this work to go on. It can be done in a very, very small location," he said. "The fact that you can put it on wheels makes it a lot easier to hide from people who might be looking for it. So, yes we have evidence." Evidence of what? Nations with trucks should be nuked? Richard Myers is a nazi warmongering irrational fukhead, who wishes the murder of countless thousands, if not millions in AMERICA, who should be fired today. You see the nazi bassturd, you fire him, do you hear me People? AMERICA? Johnny...? Mr. Myers, your fired!

--

While we now learn from public disclosures on Connie Chung, apparently, George Tenant, had only 3 CIA officers investigating Laden just prior to 9/11. While I remember last year it was alledged on PBS, the CIA had taxed the American public nearly 10 billion on those investigations regarding Laden over the previous year, but, hmmm, bush forbade police agencies, the pursuit of such investigations with his secret W199i directive. Guardian Wednesday 7, 2001 - "FBI claims bin Laden inquiry was frustrated"

George Tenant must be questioned on these matters, and his relationship to General Ahmad, then arrested regarding his inaction on the insider stock traders for 9/11. If neither happen in a timely fashion, he too, will be destroyed by US American Patriots for treason.

Excerpt From:

NY Newsday
U.S. Hypocritical on Human-Rights Abuses
by Marie Cocco

...
America's new business partner, Uzbekistan's president is brutal, and very bad.

The State Department human rights report says the former Soviet republic now "is an authoritarian state with limited civil rights ... Both police and the National Security Services routinely tortured, beat and otherwise mistreated detainees to obtain confessions ... Police also used suffocation, electric shock, rape and other sexual abuse. Neither the severity nor frequency of torture appeared to have decreased during the year."

What increased was American aid. It tripled to $160 million, the payoff for allowing U.S. military staging areas for the war in neighboring Afghanistan. President Islam Karimov was welcomed to the White House. In July, Treasury Secretary Paul O'Neill traveled to Tashkent and praised Karimov's "efficient leadership."

Bush has singled out one despot for removal.

He says he has many reasons for invading Iraq. Without a look at some secret new evidence the administration may or may not have about Saddam Hussein's arsenal, it is not possible to find truth. That is how the White House wants it.

Bush planned Iraq 'regime change' before becoming President
By Neil Mackay, Sunday Herald

A SECRET blueprint for US global domination reveals that President Bush and his cabinet were planning a premeditated attack on Iraq to secure 'regime change' even before he took power in January 2001.

The blueprint, uncovered by the Sunday Herald, for the creation of a 'global Pax Americana' was drawn up for Dick Cheney (now vice- president), Donald Rumsfeld (defence secretary), Paul Wolfowitz (Rumsfeld's deputy), George W Bush's younger brother Jeb and Lewis Libby (Cheney's chief of staff). The document, entitled Rebuilding America's Defences: Strategies, Forces And Resources For A New Century, was written in September 2000 by the neo-conservative think-tank Project for the New American Century (PNAC).

The plan shows Bush's cabinet intended to take military control of the Gulf region whether or not Saddam Hussein was in power.

(snip)

The PNAC report also:

(snip)

- hints that, despite threatening war against Iraq for developing weapons of mass destruction, the US may consider developing biological weapons -- which the nation has banned -- in decades to come. It says: 'New methods of attack -- electronic, 'non-lethal', biological -- will be more widely available ...

combat likely will take place in new dimensions, in space, cyberspace, and perhaps the world of microbes ... advanced forms of biological warfare that can 'target' specific genotypes may transform biological warfare from the realm of terror to a politically useful tool'

--

Now, as for the corporate world telling US, we believe Laden is guity without evidence: A reasonable person doesn't have the justification to believe the unsubstantiated verdict. This is why the fascists at CNN propagandized, TERRORIZED, the American public by falsely alledging that Laden threatened to nuke America, or that he stated to murder any or all Americans like a bush would. Laden, like Saddam, or Arafat never was actually quoted to be that ignorantly stupid as a leader trying to communicate to the People, but for by CNN, and the sharon types regarding "Palestinians", as a lie to themselves to excuse their responsibility to ourselves as the humans. But EVEN IF TRUE, wouldn't make Laden responsible for every wrong doings the bushmob was actually responsible for, like robbing all Americans of their livelyhoods, unreported by CNN of course, to leave ourselves to fall victim by the bush regime as shysters pirating America, by shredding the Holy Constitution. However, Laden has skated near with the label "Jew", to be of the criminal, intolerant, offensive, fascist, bigoted jewish Israeli government, that imprisons or murders real Jews for being JUST that. Rabbi Hillel would be jailed by sharon in the israel of today. Wise Muhammad teachings cover this dumb Jew Christian thing well, as us all suffering by the illiterate evil dumbfuks who ignore ourselves, to steal our established values, while CNN, like Art Bell, forbids debate on their irrational falsehoods, refusing to protect the FBI, or the American flag through practicing censorship, while advocating murder, as Art Bell, the traitor, does almost daily, while hanging up every human caller.
Next, CNN will be blaming ALL the poor and starving in the third world, for secret Pentagon frauds through the removal of the False Claims Act. As, the American nation contributes the least to the world in aid, in relation to the GNP. (The give and take.) 5 billion a month to not feed, but murder innocent people in Afghanistan?
Destroy bush now, and be loved by all as God.

(snpd)
Public rebutals regarding my supreme stupidity are found in alt.sercurity.terrorism.

Thanks friend,

Johnny Wizard

--
Man, Mr. bush Jr. sure is wicked evil eh?

Look, Americans... You, as a individual, to escape the wrath of hell, must find strength within yourselves to protect America from Mr. bush's further criminal acts, otherwise bush will easily have you all wiped out really, as unworthy to join the Universal Nations peace process. Murdering those understood to be innocent without reason but for to rob from is just wrong, and abdicating your rights as a living American to not demand Justice for your own self as the nation, will surely have all Americans pay the consequences for truly being so. God, who is kidding who? You, as an American, must find the will to preserve your own nation from further bushmob atrocities, and not standing up like corporate america portrays continually, while bush tells us he is going to pirate American rights to further rob and murder for the likes of Enron or rumsfeld for decades, should to a real American, find them looking for the quickest way to Washington. CNN is not reporting on the reality of bush's crime wave, nor is showing little responsibility to represent soldiers lives as being risked for as worthless for the anti-Christ. Again, the public evidence freely available for 9/11 demands bush and rumsfeld be immediately executed for escaping public trial, as the prime suspects for the WTC terrorist act, and guilty as war criminals completely for blaming Afghanistan without evidence to substantiate their accusation. The Taliban rule of Justice for Freedom, was, and is, the American ideal. They though had some bad laws, that they were communicative regarding, and had brought much needed as good stability to the People, who would have told you, like the State Department, but CNN's Walter Isaccson forbids the truth to be broadcast. Destroy bush today American Patriot Soldier, and be loved by your commrads bush would see fall dead for dummy cowardice.

White House 'exaggerating Iraqi threat'

Bush's televised address attacked by US intelligence

Julian Borger in Washington

Wednesday October 9, 2002
The Guardian

President Bush's case against Saddam Hussein, outlined in a televised address to the nation on Monday night, relied on a slanted and sometimes entirely false reading of the available US intelligence, government officials and analysts claimed yesterday.

Officials in the CIA, FBI and energy department are being put under intense pressure to produce reports which back the administration's line, the Guardian has learned. In response, some are complying, some are resisting and some are choosing to remain silent.

"Basically, cooked information is working its way into high-level pronouncements and there's a lot of unhappiness about it in intelligence, especially among analysts at the CIA," said Vincent Cannistraro, the CIA's former head of counter-intelligence.

In his address, the president reassured Americans that military action was not "imminent or unavoidable", but he made the most detailed case to date for the use of force, should it become necessary.

But some of the key allegations against the Iraqi regime were not supported by intelligence currently available to the administration. Mr Bush repeated a claim already made by senior members of his administration that Iraq has attempted to import hardened aluminium tubes "for gas centrifuges, which are used to enrich uranium for nuclear weapons". The tubes were also mentioned by Tony Blair in his dossier of evidence presented to parliament last month.

However, US government experts on nuclear weapons and centrifuges have suggested that they were more likely to be used for making conventional weapons.

"I would just say there is not much support for that [nuclear] theory around here," said a department of energy specialist.

David Albright, a physicist and former UN weapons inspector who was consulted on the purpose of the aluminium tubes, said it was far from clear that the tubes were intended for a uranium centrifuge.

Mr Albright, who heads the Institute for Science and International Security, a Washington thinktank, said: "There's a catfight going on about this right now. On one side you have most of the experts on gas centrifuges. On the other you have one guy sitting in the CIA."

Mr Albright said sceptics at the energy department's Lawrence Livermore national laboratory in California had been ordered to keep their doubts to themselves. He quoted a colleague at the laboratory as saying: "The administration can say what it wants and we are expected to remain silent."

There is already considerable scepticism among US intelligence officials about Mr Bush's claims of links between Iraq and al-Qaida. In his speech on Monday, Mr Bush referred to a "very senior al-Qaida leader who received medical treatment in Baghdad this year".

An intelligence source said the man the president was referring to was Abu Musab Zarqawi, who was arrested in Jordan in 2001 for his part in the "millennium plot" to bomb tourist sites there. He was subsequently released and eventually made his way to Iraq in search of treatment. However, intercepted telephone calls did not mention any cooperation with the Iraqi government.

There is also profound scepticism among US intelligence experts about the president's claim that "Iraq has trained al-Qaida members in bomb-making and poisons and deadly gases".

Bob Baer, a former CIA agent who tracked al-Qaida's rise, said that there were contacts between Osama bin Laden and the Iraqi government in Sudan in the early 1990s and in 1998: "But there is no evidence that a strategic partnership came out of it. I'm unaware of any evidence of Saddam pursuing terrorism against the United States."

A source familiar with the September 11 investigation said: "The FBI has been pounded on to make this link."

In making his case on Monday, Mr Bush made a startling claim that the Iraqi regime was developing drones, or unmanned aerial vehicles (UAVs), which "could be used to disperse chemical or biological weapons across broad areas".

"We're concerned that Iraq is exploring ways of using these UAVs for missions targeting the United States," he warned.

US military experts confirmed that Iraq had been converting eastern European trainer jets, known as L-29s, into drones, but said that with a maximum range of a few hundred miles they were no threat to targets in the US.

"It doesn't make any sense to me if he meant United States territory," said Stephen Baker, a retired US navy rear admiral who assesses Iraqi military capabilities at the Washington-based Centre for Defence Information.

Mr Cannistraro said the flow of intelligence to the top levels of the administration had been deliberately skewed by hawks at the Pentagon.

"CIA assessments are being put aside by the defence department in favour of intelligence they are getting from various Iraqi exiles," he said. "Machiavelli warned princes against listening to exiles. Well, that is what is happening now."

Johnny Is Marching Home

So, you know cop killer bush has no evidence to back up his allegations against Iraq, while Saddam repeatedly offers Americans to come look anywhere, and nazi bush refuses the offer, instead lies to all Americans through corporate control as US being worthless without meaning, without soul as himself, lacking purpose but for destruction of our Humanity as unworthy to hear from. Mr. bush tells US secretly, he wishes to sacrifice at minimum, hundreds of thousands of American soldiers in a criminal war against our dying Planet, 60 countries, without following evidence to substantiate his claimed to be therefor super evil allegations, nor, will he practice legal due process as a terrorist in Our names by flying the American flag as a true Patriot would. Destroy nazi bush and rumsfeld the traitors today, and be loved by every American principle of Freedom, as Justice for US all. Or be a lifeless coward to watch the bushmob steal not only from our dumb dorky soldiers to be wasted as sadistic murdering tommy frank savages, to be not defenders of the faith or the hopes for a better future, but also from our murdered sons and daughters, who could have, at one day, understood the principles of Freedom and Justice, present in the forgotten American Constitution as worth fighting for to be protected as ourselves always. Mr. bush the demon, is not my false deity, as he is irrationally insisted by the American corporate cult product schedule to be so. CBC and CNN we all witness as Humanity daily, refuse to ever cover the corporately mandated bushmob atrocities, as documented facts that steal real lives. Our Mr. bush Jr. has shown little of no concern for the living people in Afghanistan left alone without an American commitment to protect our lives, or feed their families, now prepared to waste hundreds of billions against the starving in Iraq over something planned close to thirty years by criminal occupation. Their strategy, like in Afghanistan, is to put worthless nazi slave soldiers on the front oil pipe lines only, while murdering students and teachers who would have suggested clean hydrogen is practically free nazi dum fuk scums. You think if Saddam was murdered, the rest of our Humanity the whole world over, would allow like a cowardly corporate american slave whore, Mr. bush, rumsfeld, and tommy franks, to give all of the Iraqi resources, to the murderous criminal thieving intolerant evil fascist israeli government of nazi bigot human haters, without objections from G of all beings? Holy Jewish Jihad Jesus! We notice the corporate news agenda to rob from US all, our commitment to human rights, is to never inform our communities as publicly aware, that nazi amerika, blocks food and medicine from ALL the Iraqi people, but yet will afford our time to propagandize our community with bushmob lies, left uncorrected. Has Ramsey Clark ever been offered as a legitimate voice of opposition, to clarify our positions? Does Ramsey Clark speak untruths, like bush does to kill and plunder the American People? You'd imagine, if CNN was truly American, they would tell Americans importantly, bush has no evidence to conclude OUR position, and murdered thousands in New York City, while Saddam offers the World to witness the falsehoods of the bushmob to come see for ourselves, or just simply give some attention to bush's true evilness he spouts as his own. The bushmob is tirelessly working to undermine the UN peace effort, by trying to suggest, if the World community should get the weapon inspectors in before mindless nazi forces get there to blindly murder and terrorize further, untold thousands in Iraq, slave boy Powell wants inspectors to include armed nazi soldiers, planes ready to bomb civilian targets, and openly, secret spies to be criminals! Something any legitimate inspector would appose as a ridiculous proposal, undermining of the peace initiative to be a Just cause, and the UN as an INTERNATIONAL BODY. And, as so should, motivate wimp ass Kofi to vocally detest on behalf of US people he claims to represent as a living person. Europe reports as human, while CNN as traitors to all of Humanity refuse to offer the facts. CNN sees no responsibility to protect America, or our soldiers as worthy the effort to address their real concerns regarding Our... Godly is Justice Freedom thing, or this all powerful Mr. Wizard person even. LOOK, THINK... I'm telling people around the world, Mr. bush and rumsfeld are documented to have murdered Americans at 9/11 to thwart Enron's impending CRIMINAL bankruptcy, while, I've repeatedly demanded their immediate arrest or execution by the lovers of Humanity, and don't you think that would make for a legitimate National news story? ("The Dabhol Working Group", cheney's secret energy meetings with Enron, public threats against God as Justice through the Taliban, BND, September 9 war plan, Ahmad and Ahmed, and, AMERICAN FBI and CIA investigations.) Why not? Because I am relying on the evidence like a Police Officer does, as it is related to Justice indivisible as ourselves, THE ACTUAL FACTS JACK, and CNN doesn't truly want American soldiers to know who's dying for who. Myself, as the dreamy Saviour, am open for dialog, discussions with what we can measure and what we can not, debate to put to shame any even on the Nature of truth and deception, God, and this Universe, something CNN refuses to all American Patriots as worthy of deliberation. Like with economics, or basic high school maths. I've personally contacted the CEOs of both, CBC, and CNN, who have decided with intent to ignore Our concerns. Look, one of the first things bush did when he stole the Presidency, was steal fifty billion American tax dollars from our grandmothers, and don't you think that would make for your National news interest?, as a soldier worth giving your life away to bush for? You know, Mr. bush, the super evil, false deity, anti-Christ of biblical folklore? So unbelievably vile and putrid, the Son of Man as God's only true born Son, has to come down here to defend myself as all of Creation exists for this day. Mr. bush's american whores would work to decimate the Constitution and sacrifice humanity as Jesus on the cross, and ask US why?, without listening? CNN won't allow amerika to be America, but for to be misrepresented as slaves to die by corporate command, through the evil practices of the unholy and criminal dictates of Our Mr. bush Jr., traitor to US all. The Messiah asks the American people to stand up for themselves as a nation of individuals, to demand equal access to our rights for freedom, by reaching out to our neighbors as soldiers and police officers, to break through Our international media controls at CNN headquarters, that silence our concerns as the living to be justly represented. We demand the immediate firing of Water Issacson, and Sid Beddington, and Johnny wants Our voices heard now on our Public airwaves! A word of wisdom: I wouldn't tick off our King like this for much longer bushmobsters, you don't want to see the Family, US, losing our patience by getting really wrangled up with little corporate america's false deity of hatred towards the makeitwithart living John man. Johnny'd rather have American men find courage somewhere to stand up for themselves against being robbed of their generosity, but Jesus Christ all mighty, if there is no real Manly men in corporate america, we'll just have to come down daring to make all doze men look like the weak twerpy cowards they are to be deprived so sleepy, as too afraid of their own little shadows to protect the once great American dream for Humanity. I thought I knew America, my father thought he knew America, and bush, the treasonous unelected fascist nazi mass murdering savage criminal, he don't know the America we believed we are of once.

Again, I can not stress enough to the truly proud and strong American People in the NRA, bush's criminal evil, and those who support him factually against Justice and Freedom in Congress and the Senate through the prepared before hand, unread Patriot Act, and for approving an unrepresentative blatant criminal war as clearly the evil doers, is really happening. CNN refuses to report in American survival interests, while we now know, bush and rumsfeld hold little reservation murdering American citizens or soldiers, Police Officers, Fire Fighters, if it then means they can steal further our life's purpose, and pursuit of happiness by fair play as Justice instills for all. Mr. bush openly lies as a demon to our world deliberately while smirking, counting on CNN at the National level, not correcting his treason against the entire human race, leaving US isolated as individuals, with potential doubt always ever present. But, we can indeed measure, and verify irrespective of bias or ideology. A fence that is seven feet tall, is a fence seven feet tall. And, when demon bush advocates the murder of innocent people to steal our life savings while destroying the living economy, people do actually suffer and die. Forget about my fanciful dreams to be a party King, and think about your own future and family as we exist in reality, dying unjustly at the hands of the anti-Christ through corporate cult america that sacrifices themselves even included as unworthly to what? They glorify dumminess, as an attribute for success, sacrificing our dying freedoms to be heard as the still barely living with concerns. Gee, and you wonder why they take half of life's investment to bankers as sacrifice for nothing...

I beg you, to forward this paper to all you know who should consider this for themselves.

The war criminals, Mr. bush, rumsfeld, and tommy franks, must be arrested or executed by True American Patriots immediately. The three traitors to humanity, that not only have advocated in your name, the murder of US as innocent people, but have also perpetrated the criminal acts. Leaving US to judge themselves, as they have judged, to be treated as they wish to continue treating Ourselves, or Just you alone, with Rights granted by living as freedom to be so. God or no God. Mr. bush, rumsfeld, and tommy franks will immediately be arrested, or executed by True American Patriots to stop further bloodshed of our Humanity, as their real destruction of the American Dream for all as evidenced to be criminals under the Constitution, is found to be evidenced by all who understand so.

Glory be to God in the highest order, and if I should die tomorrow, I'll know I fought to the best of my love for living in a world where accidents do happen. If my life should grow unable to win our wager, and I lose all my fortune to the anti-Christ, Our Mr. bush Jr., my wanting for a better world will have never diminished. I'll know that I accepted to do what I could to the best of my giving. I can only hope these words, were enough thought as worthy of sharing to others, who believe in themselves to read this far in agreement with me.. I make a pretty damn good King eh?

Without risk, we would have nothing to be thankful for. Do not be afraid of living for freedom my friends, for most FBI officers support freedom for America, and so too do soldiers. Those who don't are generally weak, stupid, incompetent, and very very slow without Love in their hearts, or the will to be brave. Mr. bush and rumsfeld don't want to arrest the true culprits by following the available criminal leads for 9/11, and it doesn't take much figuring to understand why. We are all angered by Mr. bush Jr., and the contempt he and rumsfeld has shown for all those fallen murdered in America and Afghanistan.

And, just recently in Indonesia, a claim that al-Qaeda would attack a civilian target like the bushmob does advocate as practiced, and Laden repeatedly condemns, is again, with not even a thread of evidence offered on CBC to conclude such a statement that was made officially, shows a contempt for the rules of Justice to be practiced rightly by the ruler, and likely, staging the criminal investigation to go nowhere. Or, conversely, this sniper killing civilians in America, being a reflection of the Nation's true american bushmobster will to innocent good people going unreported elsewheres. The sniper is only a small taste my friends of bush's america as God is my witness. Mr. bush, america's false deity that corporate america puts all of every America's blind faith into as slaves without rights through Justice, had no interest in arresting himself and rumsfeld for 9/11, instead, with corporate america backing bush's further criminal intentions, dropped over 4000 bombs on Afghanistan, including a 14 ton bomb on Kabal. (The brave Taliban, we remember, were supporting the arrest of the actual culprits responsible. A no no to the bushmob circle.) Or like tommy's death squads against Afghan children for Enron, Afghans, who bush and rumsfeld murdered close to

100,000

without CNN daily coverage, as blamed for 9/11 without following the evidence and closing investigations, practicing a war planned terrorist strategy existing at the WhiteHouse it did, two days prior without able excuse anywhere to be found. A junta dictatorship of pure evilness. How stupid and cowardly does an American soldier have to be, before they stand up as one in defense for their own family? Like the Taliban would have?

Look at the American military usenet groups to read for yourself regarding Our Mr. bush Jr., little of no disagreement is found with what I have written so far. Sure, corporate america will continue to try, by illusion, to have US all believe we are the minority to stand with conviction to protect ourselves as Humanity. However, the free communications that our internet provides, clearly indicate our truer positions as not entirely devoted to self destruction by ignorance, and criminal behavior against ourselves by dictatorship under the anti-Christ. Help destroy bush, and be loved by all as yourself to be cared for as heard from. As King, I am so much looking forward to retiring as soon as humanly possible, counting on yourself eventually to believe also, for a real better future by only simply trying to win the day for everyone.

Can somebody please help ourselves for living's sake?

Johnny Wizard

--

Bonus Track

Did you know, factually, no bull, the national debt accrued through the dilution as willed from Currency, is what is owed to the Nation, not the bankers? The creation of government debt is done by the willed devaluation of your earnings. See, it is a loan made in our names to the banker for ourselves. The public loan is actually made, when the banker is granted as doing so privately. It is not the magician banker who we must pay for nothing, it is the banker who owes the nation as the loan was to begin with to be legitimized by any national policy. Wealth taken as not earned, comes from those who work honestly getting jipped. So, I propose a private banker swindle tax, to cover the administrative costs of running openly public funded gambling enterprises, with 100% cash payouts to actually thwart our falling economies, then, maybe the corporate news industry will see a responsibility to measure how much a lottery official pays themselves secretly with our banked interests accruing. Our governments should be providing what services we want, and are willing to pay for. Stealing from the desperately poor to pay even more as servitude to our further ineptness, is not only firmly established as illegal, but also makes no sense to most anyone I'd bet. Example: VLT's payout 96% as advertized, well not truly, the math as counted says 30% before expenses, but who of the general corporate TV intellect, has our time to figure it honestly? See, it is easy to understand a criminal offence is taking place, but because the corporate mandate is to keep the public more ignorant than Our Mr. bush Jr. on everything as a monetarily rewarding experience, (Larry King is a millionaire) the corporate cult products refuse to practice the interests of Justice for our values to protect our living standards. Accordingly, bush murdered all those New Yorkers for whatever ill reason (who really cares) as the anti-Christ, and corporations refuse to follow the story as evidenced impartially. Too much work for no pay, but the expense is risked by the loss of investment in Humanity to be defended. This is why CNN won't even defend their fellow corporate cult members who lost their human lives at the World Trade Center. Who really cares?, for the value of innocent life?, Your Mr. bush Jr.???

Johnny Wizard

--

Up to You

Look, american service personnel aren't even American enough to publicly defend their treasonous behavior against the good old red, white, and blue. Why? Cowards. We all know the bushmob has tirelessly worked to steal American service personnel's pensions, savings, and lives as worthless of protection, while counting on every American Soldier as Police officer, to not arrest the bushmob ourselves for 9/11 in New York, and the war crimes committed against the innocent in Afghanistan. Mr. tommy franks, the heroin pusher, tells dumfuk soldiers to kill innocent humans, and American soldiers aren't there anywhere to protect themselves? Sadistic nazi war criminal rumsfeld tells us all openly, he wishes to persecute those he knows to be innocent as a true nazi did. With all the blessings of sharon naturally. Why do American soldiers not protect America? Or know the Constitution as Holy? Too weak, stupid and cowardly I told you Johnny. They sit terrified, unwilling to stand for their country, while demon bush and rumsfeld decimate my economy with a regressive tax swindle, and in addition, criminal thefts through the Pentagon and Social Security, while publicly planning to war two billion people of

US

for no good reason but for sacrifice to corporate america's false deity, the anti-Christ, Our Mr. bush Jr.. While we now all also know, to not only rob, but murder thousands of Americans too, as fair play by the bush backed terrorist protocol, exposes Our Mr. bush Jr. as the most heinously evil demon humanity has ever witnessed factually. All evidenced and everything. So, will Americans live up to protecting their dying rights, or will bush, the anti-Christ, succeed to further steal our God sworn, Patriotic duty to protect our own humanity? Will bush succeed in destroying civilization, or will we succeed in destroying pathetic criminal pirate nazi traitor bush, by the will of our own survival to continue as the People?

The godless corporations refuse me to speak publicly in our defence naturally, and people generally, seem to concur as stupidity, to sacrifice their own families purposefully for the banker buildings, while putting their religious faith into corporate dictates for slavery. I am not myself to be G in all worlds, nor, am I all dreams to be so undesirably. I am just a super human being as space time continuum, day tripping all alone, wondering about prospects for a world in which I can live with. I love life, and our ailing planet, but maybe, I did get this story line wrong somewhere, and got taken away too far in fantasy. Maybe, bush's humanity as it exists here in reality, is a nightmare not worth saving for yourself being.. CNN and CBC do work against our communities, documented everyday, by their continual refusal to cover our top priority issues. Corporate radio programs primarily, but not always, insist on only hiring semi-literate ignorant bigot whores as fascist degenerates, who insist on disallowing open communications, or learning to learn with the community, while advocating the murders of American service personnel and innocent civilians, as a patriotic duty to not live up to our personal responsibilities as a member of society. It is all up to ourselves to fight for peace, or be slaughtered on Coast to Coast's alter of apathy to not care so for living justly. We are not at war with ourselves, or a third of humanity as cheney and bush repeatedly claim, but with the warmongers, who wish US all harm, to steal our human values of love and understanding, good will, and compassion. With evil bush, cheney and rumsfeld figuring, there is no way for US all to stand up for yourself, under the banner of Justice as freedom for all. Well, I say, nuts. If God can do it, and I can do it, so can you true! Help yourself up please won't you do it as us living already? Or, maybe for beer?

Please do not allow the bushmob to murder millions. The fears to stand proud as Americans, are the fears to stand proud with Love as ourselves being the Universe. Boo! That wasn't so scary, was it? Again, traitors bush and rumsfeld must be immediately arrested for 9/11, and tommy franks, for war crimes in Afghanistan. Like Now.

Always forever, the one and only,

Johnny Wizard

All at Once

Nobody would want our lives or freedom stolen, by simply living to not deprive those same rights from any other.

So, Mr. bush Jr. tells you, we're either with us, or with the terrorists. Hmmm. As a member of the general public, bush, as himself, has no more rights to speak openly as the person I am, and therefor, I will except his proposal on equal grounds to communicate freely. So, I'm either with yourself as a would be, could be anyone is, or your factually documented as an unbelievably super evil, anti-American mass murdering fascist dictator, war criminal terrorist recruiter, as the, golly gee, actual, must be for real, warmongering anti-Christ from this Book by John then eh?... No? You, what do you figure Mr. bush Jr.? Can you hear humanity calling you out to publicly explain your vast stupidity? Politics has it as our mutual understanding, loyalty to life through law as living is civilization. Law, as is the only true measurement of freedom for ourselves to know so. Are you alone on this too? Ha, er... um, anyway..

Nobody would want our lives or freedom stolen, simply by living to not deprive those same rights from others. So we form Governments, and have loyal police officers to practice our will as ruled out to the best of our ability.

We need a new national news format to make for this information age approaching, that sets a high priority on ourselves as concerned about where we are going. The Constitution is not just a jumble of tossed blurbs, telling of a day when people didn't care for living as America in spirit also, the Constitutional rights of Justice stand strong through good reason, and are easily defended up at the national news desk, we're sure to say eventually, if we only had the show for something. While we wait, corporate america prepares to never have Chomsky aired, or legitimate critics as the voices for freedom by representation, to gain ourselves progress as we would normally on Watt's happinin for real man. You know, the awesome power of communication, and Chomsky, being a best seller over and over like that, or Ron Paul being a Republican citizen, committed to working for Americans as a true Patriot would under the flag? The Constitutional rights of Justice stand strong through good reason. Ashcroft is truly incompetent. His failure to grasp why a democracy would choose to treat all people fairly, as duly protected with a system of laws practiced to find governing with, leaves us instead as, the ancient bushmob vision of injustice against ourselves that he fails to confess as us innocent until understood otherwise. The crusades were a lesson we never want to be learning over, with Our Mr. bush Jr. at our wills demanding a crashed course we've done and learned from already. I think Ashcroft's personal turn to criminality for America, has to do with sabotaging that FBI investigation, and the fair play consequence of us People arriving to communicate him to justice on behalf of the Nations with questions that need immediate answers. Sabotaging the FBI was not due from insufficient funding, or failure to connect the dots ever as investigators.

Nobody would want our lives or freedom stolen, by simply living to not deprive those same rights from any other. Right? Save America for your own sake Americans! The strength is within ourselves to make this a better world for living.

As you are,

Johnny Wizard.

Is It Not True?
Questions On Iraq From A GOP Congressman

Ron Paul is an M.D. and a Republican Member of Congress from Texas

Editor's Note: Texas Republican Rep. Ron Paul read the following to the House of Representatives, September 10, 2002.

Soon we hope to have hearings on the pending war with Iraq. Here are some questions I would like answered by those who are urging us to start this war:

1. Is it not true that the reason we did not bomb the Soviet Union at the height of the Cold War was because we knew they could retaliate?

2. Is it not also true that we are willing to bomb Iraq now because we know it cannot retaliate -- which just confirms that there is no real threat?

3. Is it not true that there are those who argue that even with inspections we cannot be sure that Hussein might be hiding weapons, and at the same time imply that we can be more sure that weapons exist in the absence of inspections?

4. Is it not true that the U.N.'s International Atomic Energy Agency was able to complete its yearly verification mission to Iraq just this year with Iraqi cooperation?

5. Is it not true that the intelligence community has been unable to develop a case tying Iraq to global terrorism at all, much less the attacks on the United States last year? Does anyone remember that 15 of the 19 hijackers came from Saudi Arabia and that none came from Iraq?

6. Was former CIA counter-terrorism chief Vincent Cannistraro wrong when he recently said there is no confirmed evidence of Iraq's links to terrorism?

7. Is it not true that the CIA has concluded there is no evidence that a Prague meeting between 9/11 hijacker Atta and Iraqi intelligence took place?

8. Is it not true that northern Iraq, where the administration claimed Al Qaeda were hiding out, is in

the control of our "allies," the Kurds?

9. Is it not true that the vast majority of Al Qaeda leaders who escaped appear to have safely made their way to Pakistan, another of our so-called allies?

10. Has anyone noticed that Afghanistan is rapidly sinking into total chaos, with bombings and assassinations becoming daily occurrences; and that according to a recent U.N. report the Al Qaeda "is, by all accounts, alive and well and poised to strike again, how, when, and where it chooses?"

11. Why are we taking precious military and intelligence resources away from tracking down those who did attack the United States -- and who may again attack the United States -- and using them to invade countries that have not attacked the United States?

12. Would an attack on Iraq not just confirm the Arab world's worst suspicions about the United States? And isn't this what bin Laden wanted?

13. How can Hussein be compared to Hitler when he has no navy or air force, and now has an army one-fifth the size of 12 years ago, which even then proved totally inept at defending the country?

14. Is it not true that the constitutional power to declare war is exclusively that of the Congress? Should presidents, contrary to the Constitution, allow Congress to concur only when pressured by public opinion? Are presidents permitted to rely on the United Nations for permission to go to war?

15. Are you aware of a Pentagon report studying charges that thousands of Kurds in one village were gassed by the Iraqis, which found no conclusive evidence that Iraq was responsible, that Iran occupied the very city involved, and that evidence indicated the type of gas used was more likely controlled by Iran not Iraq?

16. Is it not true that anywhere between 100,000 and 300,000 U.S. soldiers have suffered from Persian Gulf War syndrome from the first Gulf War, and that thousands may have died?

17. Are we prepared for possibly thousands of American casualties in a war against a country that does not have the capacity to attack the United States?

18. Are we willing to bear the economic burden of a 100 billion dollar war against Iraq, with oil prices

expected to skyrocket and further rattle an already shaky American economy? How about an estimated 30 years occupation of Iraq that some have deemed necessary to "build democracy" there?

19. Iraq's alleged violations of U.N. resolutions are given as reason to initiate an attack, yet is it not true that hundreds of U.N. resolutions have been ignored by various countries without penalty?

20. Did former President Bush not cite the U.N. resolution of 1990 as the reason he could not march into Baghdad, while supporters of a new attack assert that it is the very reason we can march into Baghdad?

21. Is it not true that, contrary to current claims, the no-fly zones were set up by Britain and the United States without specific approval from the United Nations?

22. If we claim membership in the international community and conform to its rules only when it pleases us, does this not serve to undermine our position, directing animosity toward us by both friend and foe?

23. How can our declared goal of bringing democracy to Iraq be believable when we prop up dictators throughout the Middle East and support military tyrants like Musharaf in Pakistan, who overthrew a democratically elected president?

24. Are you familiar with the 1994 Senate Hearings that revealed the United States. knowingly supplied chemical and biological materials to Iraq during the Iran-Iraq war and as late as 1992 -- including after the alleged Iraqi gas attack on a Kurdish village?

25. Did we not assist Saddam Hussein's rise to power by supporting and encouraging his invasion of Iran? Is it honest to criticize Saddam now for his invasion of Iran, which at the time we actively supported?

26. Is it not true that preventive war is synonymous with an act of aggression, and has never been considered a moral or legitimate U.S. policy?

27. Why do the oil company executives strongly support this war if oil is not the real reason we plan to take over Iraq?

28. Why is it that those who never wore a uniform and are confident that they won't have to personally fight this war are more anxious for this war than our

generals?

29. What is the moral argument for attacking a nation that has not initiated aggression against us, and could not if it wanted?

30. Where does the Constitution grant us permission to wage war for any reason other than self-defense?

31. Is it not true that a war against Iraq rejects the sentiments of the time-honored Treaty of Westphalia, nearly 400 years ago, that countries should never go into another for the purpose of regime change?

32. Is it not true that the more civilized a society is, the less likely disagreements will be settled by war?

33. Is it not true that since World War II, Congress has not declared war and -- not coincidentally -- we have not since then had a clear-cut victory?

34. Is it not true that Pakistan, especially through its intelligence services, was an active supporter and key organizer of the Taliban?

35. Why don't those who want war bring a formal declaration of war resolution to the floor of Congress?

No Telling

Destroy bush and rumsfeld now! Look, the terrorist network runs out of CNN and CBC, both willingly advocate criminal intentions against our community interests, by censorship and dissin' information. (Video Lottery Terminals eat at our souls, and destroy our economy. 100% payouts must be demanded, anything less, is a perpetration that does not stand up to sound fiscal management.) The management of the networks, Walter Issacson and Sid Beddington of CNN, Israel Cinman, Robert Habinovitch, and David Cochten of CBC, are all our humanity's enemy, as the true harborers of terrorist activity, evil scum to US all. These monsters refuse to allow reporters open public discussions on the true current political state of OUR affairs, protecting their false deity, the anti-Christ, Our Mr. bush Jr. from immediate arrest or execution, for perpetrating 9/11, now getting away with open deceit as unchallenged with OUR facts, perverting America's democracy into in junta dictatorship. CBC and CNN play our nations as unworthy of deliberation, while censoring OUR ELECTED officials. Like the recent Florida election. Or those in the American government, responsible for managing to barely protect Social Security, that bush has now illegally had removed from their jurisdiction, while silently telling all Americans, he'll manage to rob from us in secret without telling anyone. Arron Brown, like Larry King, feels the Social Security of our soldiers is unimportant as newsworthy, nor their lives as worth protecting. Or how about when bush stole 50 billion tax dollars from American families, and stated, he wasn't accountable to the people as a legitimate leader? No fukin kidding! Unaccountable to no one evil nazi murderer bush thinks America will not stand up for ourselves without godless national news coverage, nor will American men be brave enough to stand strong to protect their own bereaving families. Again, the bushmob not only threatened directly the Taliban with war in July 2001, for not siding for Enron's interests, but was also caught with the 9/11 war strategy fully developed two days prior to the event in question. Why would Laden, or the Taliban give bush a justification to follow through on his evil nazi threat? How could the irrational, illogical, lawless criminal dumfuk bush, have attacked the students of Afghanistan, then let tommy franks run death squads to murder defenseless children, without 9/11 I ask you? Gee, the Taliban sided for the better pipe line contract for the interest of their nation, and turned down bribes to sell out their brethren, therefor, the bushmob as Enron can steal and murder anyone they want to because, Americans refuse to uphold their own Constitution, of which, true American Patriot Soldiers it was rumored at one time, used to actually give pledge to with their lives if necessary in protection, while crying through a salute to the flag, that bush and ashcroft now spit on deliberately, challenging US to come down there ourselves personally, because Americans, are so unbelievably cowardly! Again, the pension money stolen from American families through Enron is sitting in the Cayman Islands, and the biggest crook of them all is Thomas White, bush's Secretary of the Army. (Thomas, as Secretary, does the financial paper work for the US Army, in case you didn't know.)

As for evil dumfuk rumsfeld's statement to justify our unjustified incriminations, "The absence of evidence is not evidence of absence.", no it's not, nor is it impossible that every real man alive will destroy rumsfeld ourselves, before he continues to murder us all irrationally for possiblilities we could maybe might do. Mr. rumsfeld tells us he would without reason to claim so, steal and murder from ourselves as established innocent, of which he himself, would even contend as the criminal! To have rotten rumsfeld tell us he has a belief in our names to persecute innocent people, because he can't substantiate any evidence factually, gives himself no honest justification to hold such a position against our better interests. So goes to show, rumsfeld, the nazi, is a war criminal! Then, of course, there was the statements rotten rumsfeld made, that enrages every loyal member of the NRA when communicated clearly, where rotten rumsfeld stated, that of the Taliban prisoners held illegally at Guantanamo Bay, that even if they were honestly tried, and found innocent in an American court of Law as judged by our peers publicly, rumsfeld would still fight our humanity as a terrorist, and refuse their release as farmers with beards, or protectors of our communities. Or like ashcroft said about terrorists not deserving the same Constitutional Justice protections as everyone else, like facing their accusation in a public court of law to defend themselves against alegations made in our names. What is it then nazi bassturds, is ashcroft saying people in other nations should be terrorized, or is he saying american criminals are getting away unaprehended?

Destroy rumsfeld now American Patriots!

www.washingtonpost.com/ac2/wp-dyn/A38441-2002sep4?language=printer

To persecute our humanity for no other reason, but for rumsfeld's paranoia with what is possible, or fear of reprisals for 9/11 by real American Patriot Soldiers, would mark himself openly as a terrorist to everyone, threatening US all with murder for crimes he says he has no evidence to back up as alleged. Mr. rumsfeld, like ashcroft and bush, is a traitor to the Constitution of America, and every living soul in this Universe! While WE know, he didn't go to the NMCC on 9/11, where he knew, and was reminded, he was supposed to be. While WE know, there was no public evidence linking Laden or the Taliban secretly either according to the British Parliment, at the time he ordered the blanket killing of Afghans, (who as a Nation, like "Omar the Just" were in support of following the criminal leads to arrest the true evil doers, (true American Justice!)), as the reason offered to stop all investigations by hiding most of all the evidence that would jeopardize his, and bush's security as demons of pure nazi filth, traitors to US all as the living to be humans. Like the eight black boxes, cockpit recordings, testimony from the ATC, FAA, NORAD, the Air Force, Building Seven, the FBI (Rowley and General Ahmad) and the CIA (Insider trading on the airline companies testified to not be connected to Laden). Or like flight manifests, with the alleged high-jackers who boarded without tickets, using stolen names of people either still alive, or mostly from Saudi Arabia. Gee, why would, would be terrorists steal passports they didn't need, of American trained Saudi national pilots, if they didn't want to be discovered as American trained Saudi national pilots? Why plan to high-jack planes from faraway Boston? Why did the Ladens fly out of America at bush's request right after 9/11 from Boston too? Hmmmm. How is it possible for a terrorist to board a commercial plane without purchasing a ticket? AND, how would the two fbi officers (James Woods), and three cia officers responsible for 9/11 investigations, be able to conclude the false names of the suspects, if they weren't on the manifest? Destroy bush now and be loved by all as God!

Yours truly,

Johnny Wizard

globalresearch.ca/articles/CHI205C.html

All Wrapped Up

CBC as managed has deliberately with intent, worked to misinform and propagandize our community on what is as, documented provable fact, regarding Mr. bush's complicity to the murder of US as the innocent in New York City. CBC has refused to live up to our responsibility to protect our democracy, and in silence, has pirated our names to murder those understood to be innocent of the accused offence. CBC has refused to allow ourselves as the public to understand, Mr. bush forbade the FBI from pursuing bin Laden investigations, just prior to 9/11 with secret Presidential directive W199I (199I WF213589), which had John O'Neil, the anti-terrorism head for the FBI publicly protest by resigning over. This W199I directive was put into place after the administration had been warned by the BND, and several other legitimate intelligence agencies, of an impending terrorist plot involving the high-jacking of American airplanes to be used as weapons and flown into land marks. In addition to these unreported top priority political issues that stand to be true as documented factually, the bush administration had also secretly put together a sinister war strategy, that was revealed to ourselves as the public, by Canada's own Jim Miklaszewski at MSNBC, to have existed without any doubt as Presidential Directive documents, two days prior to 9/11 at the WhiteHouse. A planned strategy to invade specifically Afghanistan, by blaming bin Laden for a crime, but providing no evidence to back up the allegations. That's right. The super evil criminal bush dictatorship had a plan in place to not follow the actual evidence to arrest the true culprits for a crime that hadn't even yet taken place, but that they were prepared for to close investigations on, as an opportunity to invade specifically Afghanistan, propping up the Northern Alliance who still practice the barbarity of sharia law, with the bush bonuses of selling heroin to our world, and most importantly, building a liquefied natural gas pipe line for bush and his Enron friends, to rob even more further from us all. Legitimate FBI officers unrepresented by Mueller claim General Amad was the principle terrorist funder of Muhammad Atta, responsible for a wire transfer of $100,000, who, incidentally was in unusual meetings, the General was, with the bush administration a week prior to 9/11, who also not only participated in meetings with several top officials in the Senate Intelligence Committee, but also, was reported to participate in building the war strategy of invading Afghanistan, as the reported desperate excuse offered for the General being there just prior to 9/11, and also, was personally responsible for negotiating the non-surrender of bin Laden, of which the ISI claimed, the General advised the Taliban not to do so because, no evidence would be offered, nor public trial for an offence bin claimed he played no part of.

We are all in agreement, in truth we rise, evil is just the deceived disguised. Boo!

The case is wrapped up, and bush and rumsfeld need to be immediately arrested for 9/11, for murdering countless thousands for stolen gain, at the losses to our humanity, that show through every putrid utterance of scum bucket bush, as contempt for our living as humanity through Law. Where a person accused of a criminal offence without any evidence is clearly innocent. For why I ask you reader, would any unjustified leader of US people blame someone for a crime who wasn't linked to the offense, while working to close investigations, and not follow through with the ample clues to capture the true evil doers? Just how cowardly stupid can soldier families be taken without conviction as themselves worth fighting for?

Justice for all, and glory be to godly.

Johnny Wizard

Rumor Mill News Reading Room Forum

RITTER PUTS HOLES IN CHENEY'S ALUMINUM TUBES STORY

Posted By: Rosalinda
Date: Tuesday, 10 September 2002, 11:50 a.m.

[source: CNN, Sept. 9]

RITTER PUTS HOLES IN CHENEY'S `ALUMINUM TUBES' STORY AND OTHER LEAKY EXCUSES. In an interview iwth CNN today, former UN Weapons Inspector Scott Ritter ridiculed the latest concoctions of the Mega crowd to justify an attack on Iraq. Excerpts follow:

PAULA ZAHN (CNN): I want to have, hear your reaction to the whole range of Bush Administration officials yesterday who said .. that Saddam Hussein has been trying to obtain materials to build nuclear weapons, particularly trying to buy thousands of aluminum pipes that could be used in the manufacture of a centrifuge and ultimately used to manufacture weapons.
What do you make of that?

RITTER: What an absurd statement. Thousands of aluminum pipes, and we're going to go to war over thousands of aluminum pipes? Even the IISS report that you cite says that if Iraq was to have trying to do uranium enrichment, it would take them many years before they could do it. This is patently ridiculous. These are aluminum pipes coming in for civilian use. They are not being transferred to a covert nuclear processing plant or any covert nuclear activity whatsoever.

But the best way to figure this out is to send the weapons inspectors in. If they, if the United States has this evidence that Iraq has these pipes, why not, heck, give me the data. I'll come to Iraq, hunt it down and we'll bring it to a close. That would save us going to war, killing thousands of people and destroying our reputation in the international community.
We cannot go to war because Vice President Cheney's worried about some aluminum pipes. This is ridiculous....

ZAHN: Let's talk more about what some say is the only independent voice in this whole argument, and that is the International Institute for Strategic Studies.... In this report, it suggests ... that Iraq could make a nuclear weapon in months if it had foreign help.

Let me read to you what the conclusion was, that, "War sanctions and inspections have reversed and retarded but not eliminated Iraq's nuclear, biological and chemical weapons and long range missile capabilities, nor removed Baghdad's enduring interest in developing these capabilities."

RITTER: Paula, what do we have here? Rhetoric? Where's the facts? "Enduring interest" in weapons capability? What does that mean? What evidence do they cite for this "enduring interest"? You know, ballistic missiles. They say he has 12. What, did they grow? Where are they? They didn't have 12 when I was a weapons inspector.

Chemical weapons? Biological weapons? They talk about bulk agent in terms of Iraq's biological weapons program. What bulk agent? Where did they make it? A bulk agent has a three-year lifetime in terms of storage in ideal conditions. The last time Iraq was known to have produced bulk agent was in 1990. That stuff, even if they held onto it, is no longer viable. So to have bulk agent today, Iraq would have had to reconstitute a manufacturing base in biological weapons. Where is it?

This report is absurd. It has zero factual basis. It's all rhetoric. It's all speculative and, frankly speaking, it's meaningless without, you know, with the sad exception that hawks in the Bush administration are going to point to this as justification for war....

ZAHN: What makes you think that if UN weapons inspectors went in now, after not being on the ground for four years, it would be any different than the last time around, when Richard Butler, who was the chief UN weapon inspector, said the Iraqis often moved stuff when they knew you guys were going to be on the ground?

RITTER: I had been there since 1991 working under Ralph Ekeus, when the vast majority of the actual disarmament took place. By the time Richard Butler came, we had already destroyed Iraq's weapons programs. We were hunting down for, you know, missing items, you know, a piece of metal here, some documents there.

And, yes, Iraq could have moved them, but this does not constitute a weapons program. It's illegal, and this is what inspectors need to do, come back here, finish the job so that Iraq can get on with rebuilding its economy, etc. But, you know, Richard Butler knows for darned sure that the Iraqis were not moving weapons from his weapons inspectors.

The weapons inspectors were trying to get into some of the most sensitive facilities in Iraq that dealt with presidential security. I was the guy leading these inspections and Richard knows that he allowed the United States to use my inspections to spy on Iraq, which is why they don't trust the inspection process.

So let's not bring up Richard Butler. Frankly speaking, he has no credibility on this issue.

ZAHN: I still don't understand why you think the inspections will be any different this time around. The administration seems convinced that if Iraq had nothing to hide, they wouldn't have broken all these UN regulations and they would have allowed inspectors in over the last four years.

RITTER: Come on, Paula, let's be fair. The administration knows that the Central Intelligence Agency used the weapons inspection program as a Trojan horse to insert intelligence collection capabilities to go after Saddam Hussein....

You know, I know that inspections did work. We achieved a 90 to 95 percent level of verified, absolutely certain accountability for Iraq's weapons program, including all the factories and associated production equipment. This is why I'm just amazed when I hear reports coming from the IISS that Iraq suddenly has the capability. Where did it come from? Did they suddenly grow factories? ...

... Let's get the inspectors back in, let's get them to find out what the ultimate disposition of these weapons programs are and if Iraq has no weapons of mass destruction program, thank goodness, we just diffused a war. And I think that's a good thing worth trying to do.

--

From the well recomended document:

US Intelligence and the Terrorists: Pre-9-11

... June 6, 2001. German intelligence warned CIA.

(A) The German intelligence agency, the BND, warned both the CIA and Israel that Middle Eastern terrorists were ``planning to hijack commercial aircraft to use as weapons to attack important symbols of American and Israeli culture.'' This intelligence reportedly came from Echelon, a high-tech electronic surveillance system used by the intelligence agencies of several nations to glean through electronic communications for certain keywords. It was first reported by the German daily newspaper, Frankfurter Algemeine Zeitung on September 13. Its sources were reportedly from the BND itself. (Gembeimdienste 6-6-2001; Stafford 9-13-2001; Ruppert 11-2-2001; Ruppert 11-27-2001; Ruppert 4-22-2002; Martin 1-5-2002; Martin 1-16-2002; Thomas 5-21-2002)

According to Gordon Thomas (5-21-2002) of Global - Intel, the original source of information actually came from Israeli Mossad agents operating in the U.S. who had infiltrated al Qaeda. According to his account the

Mossad also informed British and Russian intelligence about the attacks, who then in turn notified the CIA. Thomas's sources are allegedly informants within the Mossad itself.

As of April 22, 2002, no challenges to this information has been reported. ...

--

Also, it has also been alledged that the German embassador Ischinger, On Monday 6, August, 2001, had met bush personally, and during that meeting, the Bundesamt fur Verfassungsschutz [German domestic secret service] and BND [Bundesnachreichtendienst, German foreign secret service] finding was once again reiterated in person.

--
snpd
 Or that bush would
dare still attempt to get away undamaged by the real men of this world, to spout his venom hatred for humanity to what must be drugged out to be so cowardly American soldiers, by lying to US as the demon of pure evilness we all witnessed, that heroin cultivation wasn't factually outlawed by the Taliban officially following Allah, leaving no position as God's will to back track politically on later? American military analysts, including the CIA and former secretary of Defense, William Cohen, claim Iraq is no threat to it's neighbors, as so too, does no nation in the region support bush's warmongering. In Congressional hearings last week, former UN arms inspector Scott Ritter courageously stated what many Americans believe, but rarely if never mentioned by corporate news standards as the will of the people, "A handful of ideologues have hijacked the national security policy of the United States for their own ambitions." Ritter insisted Iraq was no threat to the U.S. or the Mideast, and later offered that cheney be forced by Americans on mass, to offer evidence to his bogus, make believe accusations, that he wishes to use to actually murder thousands, if not millions of US REAL PEOPLE. Our axis of evil, bush rumsfeld and cheney, do not want renewed inspections of Iraq, they only want war to murder ourselves, and to create instability in our world through fear to prevent their rightful capture for 9/11, while we all are expected to sit back as corporate standard fascist cowards, to pretend bush was actually elected as President in America, because actual poll counts were forbidden to be publicized, therefor, he may have won our approval to use nukes against anyone for whatever. With CNN, the Commie Nazi Network, telling us we as the

civilized are also convicted to poll, that evidence is no longer a requirement to convince US who is criminally insane, in this nightmare of criminal bush family evilness, hell bent on destroying your world, and everything WE, as The People, have struggled so hard to protect. It would seem any world threat of terrorism, would be surely from a nation like bush's America. A cowardly nation that demands we as humanity, be deprived the guiding principles of Justice like they in weakness had abdicated as no longer their own as unfairly represented, leaving as slaves the bush regime to rob us all of our Freedoms, as a rule of Law instills such as in the Declaration of Independence, the Bill of Rights, and the American Constitution. All now trashed by Ashcroft, as clear criminal intent to obstruct Justice as the American dream for everyone.

E-mail this to somebody for Christ states,

yours truly,

Johnny Wizard

--

From below:

"Mr. bush you nazi vermin, you attack my America, you attack US all. American soldiers will not sit back as cowards entirely, and watch you sacrifice our lives as worthless without meaning."

--

I think I love you too much

Wow, your amazing! So, what your saying is bush the nazi tyrant, the unelected mass murdering fascist dictator, has no interest following the ample criminal leads, because they lead to him, rumsfeld, and cheney likely too, right? And, when that evil monster told us instead he would rely on secret evidence, but couldn't tell us why, as too the FBI or CIA, it turned out to be nothing but another wicked evil deception against the great American people, Tony Blair, bin Laden, and law enforcement officers everywhere, to even further give him cause to close investigations into 9/11 as Reuters told us, and rob directly from American soldier families, their lives, pensions, life savings, and blind faith, in bush, the false diety, super evil anti-Christ.

Johnny Wizard is my Hero.

--

Weak Pathetic Coward Nazi bassturds

American soldiers are weak pathetic coward nazi bassturds. The recorded evidence stands before all of our humanity, while CNN silently pleads ignorance on what is clearly established as documented fact, regarding Mr. bush and rumsfelds' complicity to murdering thousands of American citizens, stealing from all Americans the principles of which the American flag once represented, now unprotected by corporate dictates. Encouraging American soldiers to further sacrifice their dying rights, to murder potentially hundreds of thousands more for bushs' nazi conquests against ourselves further unprotected by nazi traitors at blitzer's war room. ("War Room" is the term used by nazi CNN nosearch big pay do squat staff who routinely work to keep America uninformed with their secret from no one, refusals to protect Americans for the bush regime, like in the case of "The False Claims Act", or evidence requirement to convince US who is evil.) You do five minutes research on the Anthrax suspect, and you come up with Dr. Phillip Zack, but what does CNN do to protect the American people? Nothing but mention Hatfill, not even still a suspect according to REAL FBI sources, who, you'll notice, Mueller or Ashcroft never if ever mentions, like point number six of Coleen Rowley in Time regarding treason at the highest level. Mr. tommy franks, the nazi traitor heroin pusher, runs death squads in Afghanistan, executing countless children as our own, but what does CNN say on behalf of our families?

www.theithacajournal.com/news/stories/20020525/topstories/380284.html

Nothing, but to refuse a voice to those they know murdrered in their names as nazi facists, refusing to allow open honest discussions on the true political state of the Union. Publicly advocating to be accessories to the murder of ourselves, refusing to make any attempt to stop bush from continuing to murder their our own families, and stealing from our nations the concept of Justice for ourselves, (Never mind America's own life savings STILL sitting in the Cayman Islands. (Thomas White.)) while advocating even more murders and thefts against the innocent, because soldiers are too weak as colateral damaged disfunctional illiterates, to stand up proud for the American people as equals. Under the Bill of Rights, as justice for US all, truly brave and strong, as the saviours of ourselves to be free as individuals, humanity, WE will never surrender as slaves to the false diety, anti-Christ, Our Mr. bush Jr.. The lawless nazi facists mass murdering tyrants, Mr. bush, bogus cheney, and rumsfeld, are the ememies of America as the free world, who as WE, will no longer except lying down to the continuing corporate silence of surrender, to take us as dead and forgotten, as not worth our time of day, to stand for yourself, as a living breathing human.

Johnny has spoken to several hundred at CBC and CNN including the CEO's of both, regarding the evidence that no one has yet, suggested they find any contention with. Destroy bush and rumsfeld American Patriot Soldiers, and be loved by all as family.

Destroying the evil doers

(snpd)

What do you know?

Hi everyone, so, what do we know? Mr. bush made plans to attack Afghanistan just prior to 9/11, for not signing a contract with CentGas, which would have given Enron access to LNG. For without, they as members of the bushmob, would face their impending criminal bankruptcy, revealing they were stealing from any as all Americans, their life savings. Without the illegal war against the struggling to be better Taliban, the bushmob would have been exposed without fear by America, and soon, we would have all faced a bright new day understanding further, the importance of Justice for humanity as ourselves deserving not to be robbed from.

None of the evidence indicated Afghanistan, and by bush running without judgement with his plan made prior, showed a willingness to not apprehend the true culprits, while warmongering a fury in bigoted corporate America, to attack our humanity without thinking, or understanding the reasons why the American Constitution holds still respect, for it's wisdom granting protections to the people as we are, individuals with rights to be represented as equals under the law, in defence against the evils of humanity, of which, our Mr. bush willingly as a demon, works to destroy US as the too weak and cowardly as terrified to know better to speak up for themselves rightly.

(snpd)
Americans, like our corporate news
services in Canada also, are expected to not report the murder of ourselves in Afghanistan, excusing their contempt for themselves as God, to name ourselves, demonized willingly trying to take you to sacifice your

rights as censored for bush to steal from our families escaping prosecution. I call news agencies, who as individuals, see no responsibility to ourselves as community. I recieve only refusals as excuses to deny ourselves equal access. Why? They, like deer caught in the headlights, or swimming in the, it feels so good to be taken banker advertising, leave us to only death to others they see not as themselves, be it thousands or millions, than allow me to enter as simply a concerned man named John to speak factually as documented, calling for the immediate arrest of bush and rumsfeld the murderers, to escape further bloodshed. Or, I'm baselessly insulted without argument, ouch, or dismissed as alarmist for screaming for the stopping of the murder of US as really dying, while my, how am I going to survive job prospects go vanishing, because of my excellent research abilities on behalf of the humans.

CBC in Washington just refuses to report as Canadians.

(snpd)

How do American soldiers feel
about sacrificing their lives to sell heroin, and steal oil, to likely pollute the region as Dutch shell would as they do murder civilian protestors with Tony in Britian harboring them? Killing for the World Bank who will pocket the paid expenses while indebting the impoverished nation? As death squads against freedom as cowards? You'd think if they were going to kill anyone in Afghanistan, it would be the terrorist leader, heroin pusher, tommy franks and his northern alliance business partner mercenaries, like the brave Taliban would have to protect us innocent all over the world, no? The truth is in while the cowards pretend. You know Dad, I'm beginning to suspect american nazis on our planet, don't actually know us too well as the humans yet...

Wide Open

All American people, police officers and soldiers hear this out please. Mr. Mueller has shown no commitment to represent the FBI. He has made no responsible public mention of the investigations regarding General Ahmed, and his connection to Mr. Atta, nor Odigo's two hour warning. He has not mentioned the investigations regarding the Israeli spy ring done by the FBI, and it has been only FOX News, the DEA, and their spokesperson Rogenc Waite, who have been able to get around Mr. Mueller's contemptuous silence for America, while bushmobster Susan Dryden, states we are all an urban myth. The FAA, NORAD (Canada's arm), Mike Vreeland, the CIA even, and several responsible military and civilian air traffic controllers, and a great many others disagree with CNN's refusal to mention our public statements against bush and rumsfeld's contentions. Never mind Police Commissioner Bernard Kerik who was handed Atta's passport by someone not named yet, of which Kerik stated "Apparently, it must have fallen into the air just as the crash occurred, surviving the almost 1000 degree heat of the fire, then came across a strong wind to blow it several blocks away." With loose papers between the pages of the passport even surviving the gusts. Now we witness the corporate cultists, desperate to contain us with the magic bullet theorists, we're expected to believe 2000 degrees actually is the only way possible, as impossible to prove scientifically. Also remember, the buildings weight were bore by interconnecting columns of steel through a central core design named "tube within a tube", not like a simple toothpick project laid out by fancy computer grapics, that neglect the actual blue print designs, as thought through since before the Roman Empire. If still so though, how then can the desperate doubters explain building Seven, or maybe Six, not struck by planes, but fell just the same without melted bricks?, of glass? As also reported, Atta actually taking the time to pack, yes that's right, pack his suicide letter is too stupid for even the average American intellect. Nevermind the sneaky suspected terrorists arguing over a parking space restricted at the airport yelling. Or, Mr. Mueller's ATM picture of a 'highjacker' who was already dead while the picture was supposedly taken. Hmmm... dead men as the terrorists named Mohammad or something like that.. Jesus! Then finding out according to James Woods, the double agent actor, bush's Mueller had secretly, only two officers responsible for following more than 30,000 selective as important leads over a crime of such magnitude. Bing bing bing bing bing bing bing bing bing bing bing bing bing bing.. Hey... Did you hear that? We see the weakness of the many stuck as bushmobsters, like possibly completely innocent Myers, and his inability as cowardice to speak out regarding his political position as responsible to America, likewise as so many others, showing no concern for the nation as US people. Typical of a usual ignorant fascist right winger sellout like bush has been his entire career to his barely living self of evilness never before witnessed. And, I could go on for twenty more pages on the motives, Enron, and the proven to be criminals at the Pentagon, with the official corporate news story failing the simplest of scrutinies.

Reminder: first tower was struck at 8:45, second, 9:03.

Airports were closed at 9:17, but the soon to be shot down flight 93 calls in at 9:50 apparently according to rumsfeld, asking for permission to do a u-turn, fly east an hour and a half, to land in WASHINGTON? (two planes don't seem to have highjackers on them, and I guess the plan got messed with the remotes somehow.) While the Bin Laden family is preparing to leave America at bush's request, to escape any questioning, regarding the soon to be blamed Holy man Bin Laden, without evidence by the Washington Post in the late edition of Sept. 11th, by the surprisingly thoughtful monster henry kissinger, while CNN reports a story unbiasedly in the forth party apparently, (heard it from a friend who heard it from a friend...) of a call just received to their private newsroom from somebody somewhere to whomever, about friendly, er.. no mean Muslims on board, pre-activating pay phone services without doing so, or so we can only guess, a falsehood truly painful to relay completely. Mr. bush and rumsfeld killed those good Americans in New York, and must not under any circumstances be allowed to continue as escaped leaving the scene, to repeat offend against ourselves, who under these circumstances, must not be taken as granted by Chris at MSNBC. I have repeatedly offered my position of responsible debate with any corporate cultists, that refuse to represent our democracies being toppled into lawless dictatorship. Why does corporate America refuse to report on elected Congressman Kucinich? Again, Mr. bush and rumsfeld need to be immediately arrested or executed as traitors by the brave and true, strong and righteous. We need to seize all available evidence that Mr. Mueller has stolen, like airport video tapes, as well as recordings done from within the airliners. Or provide me, Mr. death, to testify to the recorded gruesomeness as unbearable. Anyone in the bushmob who stands in our way to do so, must as will be also found guilty of treason by all the loyal American people. I call on all police agencies, ball clubs, loggers, swank hotel clerks and the PTA, to pull together under this banner, and make the world something better for everyone, before getting back to wrestling amongst ourselves over what have you. Mr. bush's evil is very real, in this time I, as a strange voice from the wilderness, who does not make your decisions to do the right things for yourself, plead for you to do so as you should. Get off your ass. I mean, who and for what are our soldiers still killing people for in Afghanistan? The heroin dealing puppet government of foreigners with the World Bank are in place losers, and do I understand they have already spent near a 100 million dollars of ours on things like 3 million school text books for practical terrorism from the eighties, while leaving so called heroin addict alliance forces happy to oblige without 'official' pay checks. CBC in Canada shamed the world by running a propaganda piece on school funding, but neglected to mention the 'new' books, just like the 'old' books came from the bushmobsters again, also with CBC 'pretending' to not know that the Taliban had begun girl schools in Afghanistan, a story that had already been almost correctly covered by the Washington Post, amazingly about a month ago, albeit, without the girl schools element, but Jeeze, the truth seems to be finding it's way, despite the tommy franks grouped with the northern alliance targeting youths who can read as the enemy Taliban right? Mr. bush displays a hatred expressed against our entire human race as himself, to kill us all truly as his position, that he in self contempt, refuses to acknowledge, while we further fall dying unjustly, for who I ask you? Mr. bush has actually publicly positioned himself to state he does not support effective treatments for cancer. Why? Because there is no money or ours as tax payers to steal from. Deception is an element of all living truth, and evil secretly is just being openly stupid like bush is, (you can't pretend insight as wisdom truly), leaving the biggest secret being, here is but only one, you too, as we all share nothing as no secret in silence as a reflection of all living dreams. GOD IS AMAZING. There is no spoken answer to the question of a mystery asking as forever endlessly, as life could be unbelievably fantastic at a level of real world sustainability, but you know what my friends? Nobody at corporate mind control seems to care, but only to say how wrong we all are on everything, by people who do not know any better for trying to do nothing. Do not know any better. No argument, no science, no reason, just almost as robots working for the death machines in cowardice and self loathing against ourselves not represented. I, as the make believe Creator, attempting to represent freedom of will eternal, can't help hate and despise bush, your false deity as much as any real man would, I'm sorry. News corporations refuse me a voice as the publics, and have so for years to also our acclaimed scientists, political writers, mathematicians and historians, while Mr. bush as the super dumb anti-Christ of evil incarnate, demands openly in OUR public arena, I not be allowed to live my life in unity, as an individual god seeking a potential Heaven for myself singularly, doing my own thing naturally. Mr. bush demands by threat of murder, I relinquish my equal rights, to become his willing slave. Mr. bush demands I not be permitted to protect myself in a true democracy as Justice for all. (Mr. bush, you either understand us as fairly to be equals with justice as anyone, or your threatening our freedoms as a criminal terrorist without room for argument.) Mr. bush demands I fear his murder rampages against the innocent, as would be myself, still living to say, NEVER! Never would I lie to myself like a cowardly American soldier to bomb innocent villagers to waste billions, before killing tommy franks for ordering me to do so. Never would I lie to myself like a cowardly American soldier to bomb innocent people in Bagdad to kill people, before killing tommy franks, cheney, bush, rumsfeld, or even Mr. Powell if need be. Don't like Saddam? Well, talk to him openly about freedom for ourselves then. Talk to the people of Iraq, and on what we together, can do to make life better. What is it about the functioning government in Cuba, that could be made better as measured? Why not? Because then it would be understood, bush is a savage criminal, and incompetent as wrong and seriously evil to all of US. As he clearly knows nothing about Justice and freedom, or economics as he currently is destroying the economy of America, while cashing in our real lives creating hardship, as only ideology. I mean, removing the cash from our streets, while stealing billions for himself as a degenerate man! (Our wealth is not infinite, nor do the hungry, have magically, meals mysteriously appear in front of them.) He wasn't elected, falling short by more than 600,000 votes before demanding the halt to counting, and is a nazi murdering traitor who speaks only of his stupidity, while robbing America as our world, of Justice to be free and living godly.

(snp)

Thank you for everything,

Johnny wizard

It's Nothing
snpd--

In It for US

Your either with US as equals under a rule of law as Universal Justice, or your a mindless slave whore sacrificing your soul for bush, the anti-Christ, who will as he continues, stealing and murdering from our families without any good reason, or provocations as evil incarnate he is to US all. A murdering nazi demon of evilness never before known. As he as shown, he would steal from every American, Justice, Freedom, and Liberty, while only saying, no he's not, as who knows how many are illegally arrested as disappeared, and he funnels billions of real American worker tax dollars into criminal thefts through the Pentagon. The False Claims Act. Like he has polluted ourselves in Texas, as he directly supported the murder of tens of thousands in Afghanistan without evidence, stolen tens of billions from Americans for himself, and fought against smart and healthy universal heath care as educated, and continues to support the legal inaction against Enron, who fleeced any American pensions they could get a hold on, of which the biggest criminal in the Enron debacle, outside of Ken Lay is Thomas White, who he has made no indications of arresting, or even firing, as the Secretary of the Army. Mr. bush gave his buddy Krongard the right to murder any law abiding American citizen as soldier, and escape criminal conviction, a traitor to America is our Mr. bush jr., Constitutionally, plain and simple. A nazi warmonger, who wishes to murder millions with nuclear weapons, a savage, a monster. A demon who has placed in his secret administration, those responsible for the death squads of Nicaragua, and the shipments of cocaine into America, to increase crime against every community, while his supporters support the school of the Americas, by removing free speech from those who wish to point to those Republicans ultimately responsible for harbouring real terrorism, (Mr. bush Sr.) according to Sergant Chuck Couglin of the Milwaukee Sheriff's Department. He has also said he wishes no interest in stopping his increase in the heroin trade. He, as pure evil, who holds practically no deception to ourselves if you'd only listen, has destabilized the world in his commitment to the destruction of our legal due process, by suggesting his entourage, can not be found guilty of any crimes against our humanity, of which they spout like rumsfeld in silence to torture, and murder those known by all to have committed no offense, through now military dictatorship, of which, true Americans will not allow him to take US further, I will not stand for it, nor should you as a Patriot soldier protecting the flag. I demand again, the immediate arrest of bush and rumsfeld for crimes against humanity, in New York City and Afghanistan, or their rightful execution by all free thinkers in America who own firearms, and can read of our stories not present by the corporate establishment. Mr. bush and rumsfeld expect every single human on our planet to relinquish our rights as living human beings. Mr. bush had no qualms about doing business with the Taliban in August, if they would only, by bribe, collectively sacrifice their interests in serving for their country, as bush has done to America for his entire career degenerating. Mr. rumsfeld asked our living World for the murder of "Omar the Just", for the only reason of requesting evidence. Bin Laden, as we all remember, offered his arrest to authorities upon the showing of any evidence, for a crime he stated was no part of, including all the other baseless claims made by the Clinton administration, who too, could not arrest Bin Laden then either, when he sat in jail for 47 days uncharged waiting. Which is how we know again, Mr. bush is directly involved in NYC, as would too, as have to be, rumsfeld to let the towers fall, but too stupid evil they both are, to not know the wise intentions of America's founding fathers, or myself as the Messiah, Johnny Wizard. For as we knew, all the planted evidence and otherwise, that was publicly available, pointed only to bush and rumsfeld for not seeking who was responsible, only to leave blame quickly as not possible, on a Nation accused without evidence, that had a month prior been planned to rob and murder from for Enron was desperate to hide their crimes against every American dollar. All documented. Kill bush and rumsfeld on site American soldier, and be loved by all as Saviour.

--

A Better Way

(snp)

Mr. Mueller, the head of the FBI, who meets everyday with George Tenet, the head of the CIA, stated recently after reviewing his quoted statements stated, actually they as officers of our laws have no evidence whatsoever connecting anyone but the bushmob to the terrorist acts in New York City, testifiable through the public information given by ourselves, the DEA, the CIA, and the FBI in our fields, of which Mr. Mueller seems completely absent minded of publicly speaking anyway. Look see for yourself.

''In our investigation, we have not uncovered a single piece of paper -- either here in the United States or in the treasure trove of information that has turned up in Afghanistan and elsewhere -- that mentioned any aspect of the Sept. 11 plot,''

(snp)

(snp)

The Messiah vs. sharon, bush, and rumsfeld

(snp)

Mr. bush you nazi vermin, you attack my America, you attack US all. American soldiers will not sit back as cowards entirely, and watch you sacrifice our lives as worthless without meaning. I have spoken to the Secret Service in person, and all who read this can be assured, so has mr bush scumball jr. by the date this is posted, and as he continues to pretend to not have, only further shows his contempt for your life and Justice for our communities. For bush's contempt for the American constitution as Justice and freedom is ungodly to every proud American police officer and citizen the world over. Mr. bush must be arrested for his terrorist crimes in New York City immediately, for the evidence of his and rumsfeld's criminal behavior is overwhelmingly censored by CNN and the other corporate cult cogs, who refuse to protect Americans as ourselves, the dying community falling unheard from. The patriot act will be rescinded, unless anyone can actually provide a counter argument as to it's purpose other than to destroy our freedoms, while the bushmob continues to rifle our pocket books.

(snp)

Who is Who?

(snp)

Freedom is only garnered through Justice for all equally.

"Patriotism is the last refuge of a scoundrel" wrote Samuel Johnson, and he wasn't just mixing words. Patriotism is not about mindlessly as cult slaves obeying bush the unellected nazi fascist criminal dictator, it is about protecting freedom for all as democracy demands by law. Ours. Mr. bush has said that if we, as Nations, don't agree with himself as world dictator, removing the guiding principles of constitutional Justice as freedom for all instills, while actively destroying America and murdering innocent people for no crimes who struggle now only to survive from his criminal tirades, advocating torture while declaring wars against anyone poor and unrepresented, with a complete disrespect for all human life, and our courts of Law, has clearly stuck himself to be our enemy everywhere, as being evil personified, which inextricably demands his immediate incarceration for the crimes he is committing against ourselves as a true terrorist without question, no? The bushmob desecrate the ideals of freedom, Justice and democracy garnered by truth as our own being to be individuals, and is exalted by CNN claiming to be representing ourselves while watching us be robbed and murdered as stolen from openly. Mr. Turner, you have terribly disappointed our world in this great time of need for ourselves as humanity.

Again, all relevant evidence, circumstantial and otherwise, regarding the WTC terrorist act, points to the bushmob, and rumsfeld especially. (snpd) Flight 11, all ticket sales are accounted. How did terrorists board without purchasing tickets? No, the airline industry did not take the names off the lists on Sept. 11, as too on the 12th they confirmed so with a small correction, but if they had, how then would, or could, the desperate doubter explain strange flight 77 from the same company, which does leave room for terrorists to be on board with the given total. Oh... I think I know. Two flights had duped terrorists hired by the bush wrecked state department, explaining the State Department connected money transfer discovered by the good FBI to the head terrorist, Germany's Mr. Atta, unreported by the Commi Nazi Network of course, showing a belief on Atta's part, that he would not die with the top secret arrangement he had made with the bushmob privately, explaining why the bushmob had his passport in their possession secretly, and why Atta couldn't have checked in with baggage. (Ya right, he's gonna pack a jet fuel consumption calculator and a video titled, "How to fly a jumbo jet airliner in twenty minutes for dummies" left behind of all places in baggage, explaining the secret bushmob audio tape still to be never released where Atta is heard mumbling, "Jeeze, where's my lucky shirt?" and, "Does anybody here know who's flying this thing?") The $100,000 didn't go far, and Atta clearly wasn't a devote Muslim, as in the bar he drank vodkas and flashed a huge wad of hundreds and fifties to the manager, and everyone else in yelling distance, bragging how much the bushmob had paid him stupidly to do so, for a flight he couldn't possibly have boarded as a viable pilot or passenger. Also, why need carry his passport loosely as needing to remain unnoticed, if he didn't buy a ticket, nor planned to travel anywheres, if he somehow magically just appeared on the plane in mid-flight after an all night bender with hookers? Also, none of the four flights easily indicated that they had been highjacked, while the transponders were all turned off by code from inside the locked cockpits, at roughly the same time as if by automation, with flights not changing their flight course for as long as fifteen minutes, like no passenger ticketed terrorists aboard flight 11, ("Hey Atta! check out the view!", or "You left the manual where?", or "Gee, thank God you have the final draft, suicide letter still with you for when we burst into a fireball."), as too, the 200 mile precisely aligned trajectories, without HUD, do attest something not quite normal, according to experts in the Air Force with thousands of hours flight experience and some chaos theorized war gameroom background, and elsewhere, who know of bowling a perfect game while blindfolded, using a checker. Flight 77. The planted terrorists failed to highjack due to the fact, the plane was returned to control of the real pilot who managed to use communications after a fifteen minute fight for something. Conversations that the bushmob confiscated. For after 77 changed course in the dramatic after some struggle for the controls, it then returned to it's original flight path, and okayed, but, not for long, for now they knew inside information. "No, I wanna fly this plane according to procedure while you guys fight a fair three round fight." or "You say planes have actually flown into the WTC towers?" or "Let's just pretend we're the real pilots, and maybe no one will notice?" But shut off transponder only then? was it on again, or had it never been off before? If the terrorists were subdued, or gave up by showing their red bomb boxes only contained confetti, how do they so quickly take the pilots place, (who had just been last near for calls after returning to normal), to push the codes? This is why the bushmob took the tape. CNN tells us rumsfeld says the FAA didn't contact NORAD until 9:25, while at the same time, CNN also tells us controllers who handled 77, knew it had been highjacked at 8:46. Also, explaining the now no longer strangeness of why bush desperately ran to confiscate those airline videotapes of the passengers boarding flight, not thinking to know we now know who they all were. (Maybe things didn't go exactly according to his evil nazi plan?) Truly brave American soldiers would arrest bush and rumsfeld by the end of a loaded ready to fire rifle, and any other who stand to stop us from viewing our evidence available. Why, that's called obstructing Johnny Wizard. Also, consider this, the thought to necessitate the order of the terrorists to force passengers to use cell phones as secretly planned, two flights, (Time magazine Sept. 24 - Flight 93 "We've been highjacked. They're being nice.") but make no declarations on behalf of themselves leaving no point for departure? With a communication plan not controlled from the air perchance? Ah, but not on flight 11 or 175 where terrorists weren't present, as again, every passenger accounted, but no calls? Only one not talked about, because it doesn't fit with the bushmob lies. Flight attendant Sweeny was reported as the only one I am aware of to make a cell phone call over the entire hour on flight 11, or 175, to the ATC at Boston, giving seat numbers to highjackers that were not on board as registered ticket holders, (so how did she?) nor even sitting where Meuller lies, who in so doing, disputes she made the call to know factually. Makes no sense to me also, and CNN, we can be sure, will do nothing for the Americans who lost their lives over the senseless ignorance of their corporate cult status, that perpetrates this form of dim-wittedness without helping you by interviewing anybody involved in the investigations, to rather let the bushmob continue dictating unchallenged to murder more of us, for staying unawares of our silent screaming. hmm... Any unboarded tickets? Apparently so, for it was reported all purchased tickets were used but one. Another koinkydink regarding the hooting and hollaring, drinking and carousing in the strip bar the night before of the bushmob barkers, is that nobody would PURPOSEFULLY give their lives in a collective criminal operation for CASH payments through the State Department as to go gone dead broke next day, against living life's costly riches freely would they? Did Atta from Germany even attempt to give the 100k to his wife and children for safe keeping? Bingo. Also it has recently been revealed by India's officials, and Pakistan's Foreign Secretary, Niaz Naik, that the bushmob had contacted their governments in AUGUST as himself typically idiotic, as privately to public representatives in a unreported meeting in Berlin to state, he, as the anti-Christ, would slaughter the innocent people of Afghanistan's government, who had ended the heroin trade and were protecting the country while progressing towards equal rights for women,(We will sue CNN for every dollar Turner has.) making illegal, slaves and murder, by forming national laws that five years previous didn't exist, also making it safe to travel, and started opening schools for girls while being starved for doing so good for everyone. Why would bush the demon attempt to do so? To shore up corporate banker support for Enron, who had placed a 3 billion dollar investment in Dhabol Power Company, and needed liquefied natural gas in a big hurry, what with Qatar drying up, and the tripling in price of naphtha. Stuck no longer able to garner partnership with the present pipe deal contract offer for Afghanistan agreed to as well by tribal leaders who Tommy murdered, as too, India's insistence in not being ripped off any longer, by a company the entire nation learned easily to hate over the past decade, and the laundered employee pension money unretractable in the Cayman Islands proved to be of little use apparently, and of course most importantly, also the secretly known to fellow shyster cheney, impending criminal bankruptcy, and we must also not forget bush had excepted 2 million dollars in bribes from Ken Lay, who had his own late night office suite at the White House for their private encounters, so it has been kinda reported, but difficult to believe bush manages to whore so much, but understandable, what with the way he walks so funny. See, the Taliban had excepted a deal from Bridas, a pipeline offer to help rebuild the nation, while the bushmob just threatened to murder all their families for Enron's conspiracy tied to the Republican nazi regime. Enron could never obtain investors desperately needed, to attempt with capital, to hide their crimes against all the American people, without a binding contract, investors such as from the multi-billionaires in the post WWII charity organization, World Bank, of which as unocal, being typical Republican, only offered bribes to officials from Afghanistan to hurt their nation they, as the Taliban, truly believed in working for. As a another example where these nazi vermin relate their uselessness against us all from, Mr. phil gramm lobbied for slave labour at 10 cents an hour for America, while sneaking in a bill for California to have their electricity price quadrupled, for his relatively paultry personal check of one hundred thousand, while California citizens payed billions and billions as stolen from without police protection, as companies fell going bankrupt due to gramm's assault, leaving many out of work to get swindled even further by Republican corruptions that run rampant through the entire state in other places, without me there to bask on the beaches to give an occasional cameo appearance, while flexing my muscles to the tune of some free beer, a place to crash, and maybe pretzels, hint hint. Achem. On the morning of the fast paced Sept 11th, bush was aware of something special in NYC that he would comment on as asked SPECIFICALLY he stated while leaving his hotel room, on his way unswavered directly to hear about goats from school children by nine, as it was reported his comment to be so nationally, on ABC News with Peter Jennings reporting on the terrorist highjackings. While we now know according to the FAA's official report, that at 8:20, officials were made aware of the unprecedented emergency while channelling through authorities, (the bushmob as rotten rumsfeld through CNN speaks nothing about it saying, all the FAA employees are lying, and don't keep watch professionally) and according to the criminal indictment against the bushmob filed by Ilarion Bykov and Jared Israel available at www.emperors-clothes.com, the Secret Service are kept more informed than anyone concerned with bush's safety, so, you'd figure, would have made bush aware of all four flights, since he was already familiar with one important thing going on in NYC, that he would talk to the media about directly later as massed for it, right? (Perhaps someone should ask Andy?) Bush was also reported to receive a call in his motorcade about the horrific event, with him also confirming to witness the tragedy of flailing bodies from the epicenter of disaster, you know, the WTC towers, commercial airlines thing?, school television sets we presume existed that he left only a moment to thought, as he then quickly entered smiling nonchalantly, a different world stage, the class room unshaken, without thought to think he may have been confused earlier to then attempt seeking clarity, no, he sat for 25 minutes unalarmed, chit chatting like nothing was happening, just as we rehearse, and as disturbingly deceived evil as ever to be believed, as anti-Christ he is it would seem to be. He later after tinking tried as dumb as he is, to deflect his gruesome macabre conduct, by suggesting he had learned only of the doom just prior to entering the classroom, where he immediately without thought, quickly attributed the disasters to pilot error while making a funny, while completely dismissing his concern as not even present for the loss of innocent American lives, bankers even, (then, before, and now he'd even tell you unblinking, "What?"), just like the tens of thousands as children in Afghanistan, and the terrorist crimes he advocates in Palestine, as he then pressed on to more urgent matters regarding his press op cover up. Did you see his media reaction in front of the classroom, when he heard the news for the forth time officially that morning, as again, he even admitted to actually visually witnessing some of the devastation before that moment, and that only then, had it become a serious matter to change, or not change his demeanor? Stuck he was then, with no mind to ruse, er.. time to snooze, Arg! What was the cue? Errrch... If he moves with priority interest as concerned openly honest public figure, as he knows a legitimate President would have been to first learn of such carnage, THE MONTH BEFORE IN AUGUST, why not previous before he left his Hotel room with a television? Outside the Hotel? In the motorcade? With school staff as you'd figure would have been present too laughing, no? Instead he stayed as he had been to give no orders publicly, nor attempt to make public inqiries, but to listen with such unbelievable absolute devotion, equating a beautiful child's story, as if it were Jesus from the heavens himself, speaking directly on the living Nature of our Universe... Okay, maybe we won't be able to convict him on that, but, if that isn't worth enough salt to be considered newsworthy, how about when bush said he didn't hear of the towers until he was at the school building, nixing the recorded comment reported on by John Cochrane of ABC News with Peter Jennings, that bush made a noise saying that he was importantly aware of something in NYC to speak directly on later? Or how about at the memorial, when he publicly stated it would take two whole hours to read the names of those he would without thinking, murder as innocent for Enron he told India and Pakistan in August similarly, so he would just read the titles of companies to say Grace, then would press on to more urgent matters.

"Crime is terribly revealing. Try and vary your methods as you will, your tastes, your habits, your attitude of mind, and your soul is revealed by your actions." -

Agatha Christie

--

March 11, 2002 Too many loose ends... By Barrie Zwicker

... Yet at 6:30 the evening of September 11th NBC Nightly News, along with many outlets, reported: "It was after the attack on the Pentagon that the Air Force then decided to scramble F-16s out of the DC National Guard Andrews Air Force Base to fly ... a protective cover over Washington, D.C." ...

--

quote from U.S. Attorney General Ramsey Clark in a public letter to Kofi and company

September 20, 2002

"A military attack on Iraq is obviously criminal; completely inconsistent with urgent needs of the Peoples of the United Nations; unjustifiable on any legal or moral ground; irrational in light of the known facts; out of proportion to other existing threats of war and violence; and a dangerous adventure risking continuing conflict throughout the region and far beyond for years to come. The most careful analysis must be made as to why the world is subjected to such threats of violence by its only superpower, which could so safely and importantly lead us on the road to peace, and how the UN can avoid the human tragedy of yet another major assault on Iraq and the powerful stimulus for retaliatory terrorism it would create."

On Valentines Day, my wife asked if she looked fat in her clothes. Made
mistake of giving candy that night.

I can believe it. At that time, my meager supply of saltpeter was
earmarked for ... "other" things.

Shitforbrains, I see that your goal in life is to make certain
everyone knows you're a fucking idiot, but...

Haven't you ever heard of the concept known as "overkill"?!

You've accomplished that apparent goal a dozen times over.
Your "useful" life is past. You're of virtually no value
to enemies of the United States, because you've reduced
yourself several steps below being a pure but boring clown.
You might as well kill yourself.

It could have been worse. You could have told her, "Not as fat as you look naked." Of course, we would never hear from you again if you tried that. :(

Anyone know why I should spend $300 on a RigBlaster when the MFJ1279 looks like it will do the same job at $129?

Thanks.

PA-SitRep (Pennsylvania Situation Report) is developing a group of PA-SitRep Contacts, most of whom (45) are Amateur Radio Operators. We are currently seeking additional Amateur Radio volunteers.

PA-SitRep Contacts are asked to monitor emergency situations from their local areas and post emergency situation reports to the PA-SitRep Discussion e-mail list which is used, in part, for monitoring developing emergency situations. If warranted, PA-SitRep Administrators move the emergency situation reports to our main emergency alert PA-SitRep list where the alert is distributed to over 550 subscribers throughout the state of Pennsylvania.

Our ultimate goal with PA-SitRep is to build a significant enough network of Contacts throughout Pennsylvania in order to provide timely and accurate emergency situation reports, free of charge, to those subscribed to our emergency alert e-mail distribution lists.

In addition to providing the situation reports for our own emergency alert lists, the eventual long-term goal of PA-SitRep is to provide rapid emergency situation reporting service, free of charge, to any interested served agencies, much in the same way that SKYWARN provides weather situation reports for the National Weather Service.

If you're interested in volunteering as a PA-SitRep Contact, or have any questions regarding PA-SitRep, please drop me a line at owner@pa-nospamsitrep.com (remove "nospam" from the address).

Or visit the website to learn more:
http://www.pa-sitrep.com

I've always wanted to make elemental sodium. If you do this, won't (deadly poisonous) chlorine be bubbling off one electrode?

I didn't smell any gasses other than nearby objects getting scorched from radiant heat. I don't see how you could make elemental chlorine with burning carbon and iron nearby. Elemental chlorine attacks metals vigorously even at room temperature.

>Anyone know why I should spend $300 on a RigBlaster when the MFJ1279 looks
>like it will do the same job at $129?

Perhaps you're comparing apples and oranges.... there are several models of the "Rigblaster", priced from $79 and up. MFJ also has several different models.... and there are other manufacturers seeling models for as little as $39 (tigertronics) ....The questions you need to answer are... How many bells and whistles do you want? ..Do you want it to be plug-and-play? ..Do you want a bigger or smaller package?

I've got the "Rigblaster" ($129, if I remember right), and really love it. It was "plug & play", taking less than 10 minutes to set up, load software, adjust, and get on the air!

Amateur Radio Newsline™ Report 1335 – March 14, 2003

Amateur Radio Newsline report number 1335 with a release date of Friday, March 14 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC has a new tool to keep people honest and the ARRL tries again in Congress. These stories are first on Amateur Radio Newsline report number 1335 coming your way right now.

(Billboard Cart Here)

**

RADIO RULES: FCC SAYS YOU HAVE TO TELL THE TRUTH

If you have to contact the FCC, be sure to tell the truth. This is because the Commission has revised its own rules to strengthen the requirements for the submission of truthful statements to the agency. Amateur Radio Newsline's Bruce Tennant, K6PZW, tells you who is affected and what it all means:

--

As amended, section 1.17 of the Commission's Rules prohibits written and oral statements of fact that are intentionally incorrect or misleading. It also prohibits written statements of fact that are made without a reasonable basis for believing that the statement is correct and not misleading.

In requiring that submitters of written statements in fact-based adjudications and investigations have a reasonable basis to believe that what they say is correct and not misleading, the Commission is imposing on the submitters a duty of due diligence. This includes the obligation to take appropriate affirmative steps to determine the truthfulness of what is being submitted.

The now revised section 1.17 broadens the category of persons subject to its requirements to include any applicant for, or holder of, any Commission authorization. Also subject is any person performing without Commission authorization an activity that requires Commission authorization; any recipient of a Commission citation or letter of inquiry, or any person subject to a Commission or staff investigation

Others covered include those in a proceeding to amend the FM or Television Table of Allotments, any person filing an expression of interest, and, to the extent not already covered, any cable operator or common carrier.

Perhaps the most interesting of these is any person performing without

Commission authorization an activity that requires Commission authorization. That’s a fancy, legalese way of saying bootleggers. And its telling bootleggers that lying to the Commission can bring with it some pretty hefty penalties. Consequences far more severe than just the act of unlicensed operation, itself.

The amended rule applies to all investigatory and adjudicatory matters. It does not apply to declaratory ruling or to rulemaking proceedings except for expressions of interest in proceedings to amend the FM or Television Table of Allotments, and tariff proceedings. Attorneys and engineers acting in their representational capacities are not covered by the amended rule.

Simply stated, almost everyone is now subject to the revised and enhanced section 1.17 FCC rule. This includes all of us with Amateur Radio Service callsaigns attached to our names.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, reporting.

--

The FCC claims that this new rule is a clearer, more comprehensive, and more focused articulation of the standards for truthful statements than the old rule. The Commission also said that it will enhance the effectiveness of its enforcement efforts. You can read it all at:
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-231908A1.doc and at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-45A1.doc (FCC)

**

RADIO RULES: FCC TO CONSIDER RECEIVER STANDARDS

The FCC has decided to consider on an item that it has been extremely reluctant to act on in the past. That being the setting of interference immunity performance specifications for receivers.

Specifically, the FCC says that it will consider a Notice of Inquiry concerning the possibility of incorporating receiver interference immunity performance specifications into its spectrum policy on a broader basis.

It all falls under MM Docket No. 00-39. Its titled Interference Immunity Performance Specifications for Radio Receivers; Review of the Commission's Rules and Policies Affecting the Conversion to Digital Television. You can read more on the web at the U-R-L appearing in the print edition of this weeks Amateur Radio Newsline report. Its all in cyberspace at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-231820A1.doc (CGC)

**

RADIO POLITICS: AR SPECTRUM PROTECTION ACT IN BOTH HOUSES

The ARRL Letter reports that the Amateur Radio Spectrum Protection Act of 2003 now has been introduced in both chambers of Congress. Idaho Senator Michael Crapo introduced the Senate version of the bill, S 537, on March 6. Its original cosponsors were Senators Daniel Akaka and Larry Craig. Florida Representative Michael Bilirakis put the latest House version of the bill, HR 713, into the legislative hopper on February 12th.

HR 713 and S 537 are twin ARRL initiatives aimed at ensuring the availability of spectrum to Amateur Radio operators. The legislation would protect existing Amateur Radio spectrum against reallocations to -- or sharing with -- other services unless the FCC provides equivalent replacement spectrum elsewhere.

The Amateur Radio Spectrum Protection Act legislation has already been introduced twice before Congress. League President Jim Haynie, W5JBP, believes this third time could be the proverbial charm. (ARRL)

HIGH TECH SHOWDOWN: IRAQ MAY TRY TO JAM SATS

I'm Blair Alper, KA9SEQ, with this late breaking story.

If Iraq could tries to jam U.S. military satellites during a possible invasion, it will be in for quite a surprise. This, according to a Pentagon official who hints that the United States already has countermeasures in place.

News reports say that Iraq is reportedly seeking ways to jam the Global Positioning Satellites that would be used to help guide so-called smart bombs. But Brigadier General Franklin Blaisdell who is the Air Force's space operations director says it really can’t be done these days. He says that any enemy that would depend on G-P-S jammers for their livelihood is in grave trouble.

Blaisdell says that, as it did during the 1991 Persian Gulf War, the Defense Department is buying access to commercial communications satellites. This, to help provide the massive bandwidth needed to connect all the high-tech gear a modern army uses. He adds that the military also successfully launched a broadband communications satellite on Monday the 10th.

For the Amateur Radio Newsline, Im Blair Alper, KA9SEQ, reporting.

**

RESCUE RADIO: HAM RADIO ASSISTANCE REQUESTED IN MA. PLANE CRASH

Ham radio was called out on March 3rd to help locate a missing aircracft. Amateur Radio Newsline's Norm Seeley, KI7UP, has the rest of the story:

--

John Spencer, WA1NTI, was listening to his radio club's 146.91 MHz repeater in the Pittsfiels Massachusetts area early on Monday morning March 3rd. That's when John Lindley, WA1ZHM , put out a call looking for hams who could assist in locating a downed aircraft.

According to information provided by Arthur Rowe, N1ORC, Lindley said it was the Massachusetts State Police who requested radio amateurs assist in the search. In fact it was about 4 a.m. when a Lieutenant from the State Police Task Force came knocking on WA1ZHM's door. At the time the location of the aircraft was unknown and there was a wide search area to cover. The police told Lindley that the agency needed people with radio knowledge and equipment who could help triangulate the location.

Spencer says that the operators who could help out were told to report to the Sheffield Massachusetts Police Department. There they were briefed and shown an area of Beartown State Forest where the crash site was believed to be. The hams were tasked with listening for the airplanes 121.5 MHz Emergency Locator Transmitter and trying to T-hunt its exact location.

Gary Kleinerman, K1SXA, was put in charge of the group of seven hams. The downed aircraft was located by a Search and Rescue helicopter about 3 miles in from where Kleinerman and Spencer had been assigned to search. The chopper pilot also saw that there was at least one survivor.

Due to terrain, another heavy-duty rescue helicopter was called in from Albany New York to help rescue three boys who survived the crash. Unfortunately rescuers found the boys parents and two of their siblings were dead at the scene.

And even though the ham radio operators were not the first to find the downed aircraft, those involved in organizing the search and rescue effort thought enough of the skill of radio amateurs to have them take part. That's why they knocked on WA1ZHM's door in the middle of the night.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP.

--

The three hour rescue involved police, fire and E-M-S from Massachusetts and New York. Volunteer manpower for the search came from Massachustts and Connecticut. (N1ORC)

**

ENFORCEMENT: NO AUTOMATIC CONTROL FOR YOU

On the enforcement scene, the FCC told David Price, WA6FUL, that he may not operate his repeaters under automatic control. This, while the enforcement Bureau reviews allegations of rules violations.

In a letter to Price from the FCC's Riley Hollingsworth, the Redwood City California ham was informed that these include charges of failure to identify and transmitting false call signs. Price was also warned that continued violations could lead to a fine or license revocation proceedings filed against him. (FCC)

**

ENFORCEMENT: DOJ SEIZES WEB SITE DOMAIN USED FOR ILLEGAL ACTIVITY

Sellers of allegedly illegal FM transmitters might want to take heed. Bob Gonsett's CGC Communicator reports that the government has seized a web site used to sell chips designed to circumvent electronic copyright protection. And now a Washington Post news story quotes government officials as indicatinfg that this move could be a harbinger of other such enforcement actions. Its all on-line in cyberspace at http://www.washingtonpost.com/wp-dyn/articles/A7996-2003Feb26.html (CGC)

**

RADIO RULES: FCC ADJUSTS ALLOCATIONS BELOW 28 MHZ

Also from the CGC Communicator comes word that the FCC has amended various parts of its rules. This, to implement the decisions from the World Radiocommunication Conferences regarding various frequency bands below 28 MHz.

Affected spectrum and users include the expand A M Broadcast Band, International Broadcast Stations, the Amateur Service, and continued use of 26.110, 26.130, 26.150 and 26.170 MHz by Broadcast Auxiliary Remote Pickup stations. There appeared to be no earthshaking items affecting the Amateur Radio Service. Its too is in cyberspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-39A1.doc (CGC)

**

NAMES IN THE NEWS: N1WRY BIKES THE SOUTH-EAST

Jason Baack, N1WRY, says that he will be looking for a few good contacts. This, as he bikes across the South-Eastern United States over the next few months.

The SERA Repeater Journal says that Baack will be riding through Georgia and Florida during March as part of his 400 mile trek. His bicycle is equipped with VHF FM and High Frequency SSB gear. For more information please drop by Jason's website at www.n1rwy.com (Repeater Journal)

**

HAMVENTION 2003: N8IGS REPLACES KB8OUO AS GENERAL CHAIRMAN

With only 10 weeks till the doors open on Hamvention 2003, Pat Neff, N8IGS, has swapped places with Jim Trangenstein, KB8OUO, and become the event's General Chairman. According to sources close to Hamvention, Trangenstein stepped down because he had changed jobs. This left him little time to full-fill the obligations of the Hamvention's General Chairman's post. Neff says that plans for Hamvention are on-target:

--
Pat Neff, N8IGS: "We are planning on having a great 52nd show and see interest picking up as we get closer to Hamvention 2003. And, we continue to look at ways to inprove the show and make it the Amateur Radio event that every ham should experience at least once in their lifetime."
--

Hamvention 2003 is slated for May 16th through the 18th at its longtime home at the Hara Arena in Dayton Ohio. More information is on the web at www.hamvention.org (ARNewsline™)

**

HAMVENTION 2003: 11TH ANNUAL CONTEST DINNER

Tickets are now on sale for the 11th Annual Dayton Contest Dinner. According to this years Master of Ceremonies is Tim Duffy, K3LR, this years gathnering will be held on Saturday night, May 17th, at 6:30 PM at the Crowne Plaza Hotel on 5th and Jefferson Streets in downtown Dayton. Rich Strand, KL7RA, is scheduled to be the after dinner speaker and the 2003 Contest Hall of Fame inductees will be formally announced by the CQ WorldWide Contest Director Bob Cox, K3EST.

All dinner ticket orders are handled exclusively by Craig Clark, K1QX at the Radio Bookstore up in Ringe New Hampshire. You can place your order Monday through Friday from 10 AM to 6 PM eastern by calling 1-800-457-7373. International orders must use the comopany's 603-899-6957 direct dial line. For more information please visit www.radio-ware.com on the World Wide Web (K3LR)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM RADIO IN SPACE: NASA ANNOUNCES PLANS FOR OSP

In his report last week on the future of ham radio in space Roy Neal, K6DUE, mentioned the possibility of a new vehicle to augment the space shuttle fleet. Roy is back this week with more on that part of the story:

--
Audio report only. Hear it at www.arnewsline.org
--

According to Space Daily, the Orbital Space Plane will be launched using a rocket booster and will land much like an airplane. (ARNewsline™ from news reports)

**

HAM RADIO IN SPACE: HAPPY BIRTHDAY AO-11

The OSCAR-11 ham radio satellite celebrated its 19th birthday on March 9th. Almost two decades old, this amazing bird continues to output consistent signals on its 145.826 and 2401.5 MHz. beacons. It also achieved a remarkable 100,000 orbits on October 31st, 2002. (ANS)

**

NEW FRONTIERS: THE DCC WANTS YOUR PAPERS

Technical papers are being solicited for presentation at the 22nd Annual ARRL and TAPR Digital Communications Conference. The gathering is slated for Hartford, Connecticut, from September 19th to the 21st.

These papers will also be published in the Conference Proceedings published by the ARRL. Presentation by the author at the conference is not required for publication. Information on paper submission guidelines are available on-line at www.tapr.org/dcc.

Submission of papers is due by August 5th, 2003 and should be sent to Maty Weinberg, ARRL Headquarters, 225 Main Street, Newington, Connecticut 06111 or by e-mail to maty@arrl.org   (WB8IMY, VHF Reflector)

**

INTERNATIONAL - AUSTRALIA: THE MORSECODIANS RADIO SHOW

Mark Titterington, W1EOF, says over the web that ABC Australia has a radio program available about the early history of the telegraph called "The MoreseCodians." The program traces the electric telegraph from its invention in 1832 by Samuel Morse until it became obsolete in V-K land in the early 1960s when the last line ceased to function in Australia.

The show’s full summary can be found by taking your web browser to www.abc.net.au/rn/history/hindsight, click on more summeries and then scrolling down to the link "MorseCodians." W1EOF says that he is making arrangements to make the program audio available on the hamnutz.com website. He also plans to distribute it on CD for those that don't have a fast enough internet connection. His e-mail is w1eof@hamnutz.com. (W1EOF)

**

INTERNATIONAL - WORLDWIDE: RADIOMINISTRIES.ORG

Radioministries.org is a new website dedicated to assisting missionaries in remote regions with the communications through Amateur Radio. According to the groups Director, Scott Thile, K4SET, many missionary and relief groups are working in areas without access to land based phones, cell phones, or the Internet. These groups must find alternative ways to communicate within the group, and with family, friends and supporters back home.

Thile says that only a small number can afford satellite telephone service. Others must rely on alternate channels including ham radio.

K4SET hopes the new website will be of assistance to those in the missionary field. For more information visit http:// radioministries.org. You can contact Thile by e-mail to k4set@radioministries.org (K4SET)

**

DX

In D-X, Peter McKay, G3WQU, who has been active for a couple of years as CN2PM and S07PM from Morocco and the Western Sahara, will be moving to East Timor at the end of March. He operates almost exclusively CW. Look for him operating with a 4 W prefix from his next Q-T-H. (GB2RS)

Also, DL2GAC, who has been active from several Papua New Guinea island groups as P29VMS, has moved on to the Solomon Islands. He plans to be active as H44MS until mid-April. (GB2RS)

And the Balkan Contest Club LZ1KZA will operate with the special event callsign LZ125O through the 31st of March. This to commemorate the 125th anniversary of the liberation of Bulgaria. Activity is on CW, SSB and RTTY on all the HF bands. (Via e-mail)

**

THAT FINAL ITEM: A MILESTONE FOR SETI@HOME

And finally this week a story about a screen saver that is close to the hearts of many radio amateurs. Amateur Radio Newline’s Henry Feinberg, K2SSQ, is here with the latest on a project called seti@home:

--

After what adds up to more than a million years of computation by well over 4 million computers networked worldwide, the SETI@home screensaver that crunches data in search of intelligent signals from space has produced a list of candidate radio sources that deserve a second look. And in a few days the scientists behind the project will use a giant radio telescope to take a second look based on this data.

SETI@home is a more than the usual screen saver. Its actually a very high tech data processing program disguised as a screen saver. It springs into action after a computer is idle for a given length of time. Its purpose is to analyze radio telescope data downloaded to the machine over the Internet, search for strong or unusual signals from space and file a report back.

Many hams world-wide have embraced SETI@home and have it running around the clock on their P-C’s. They are the first to tell you that that the project is in keeping with the spirit of Amateur Radio itself.

Now, three members of the SETI@home team will head to Puerto Rico to use the giant radio telescope at Arecibo to revisit up to 150 places in the cosmos. These places in space have been identified as the source of possible signals from intelligent civilizations based on data already processed.

The candidates for that second look are particularly strong signals or ones that have been observed in the same spot more than once. Some of them five or six times. SETI@home project coordinators say that limited analysis of the signals will be done while the team collects the new data. This will permit the observations to be halted and repeated if -- by chance -- a very strong signal reappears.

For the Amateur Radio Newsline, I’m Henry Feinberg, K2SSQ
--

SETI@home users could find out the results of the re-observations within two to three months. More on SETI@home in next weeks Amateur Radio Newsline report. (W6RCL, Published Reports)

pOSSIBLILITY that the scanner is sending out Rf from some of the internal circuitry

Some years ago, it was possible to get window mount clips, for ham/CB, antenna.
Do these things still exist, and if so, does anybody know where in West
Cornwal,
I might find one? Failing that, a mail order source..

I ask, because my car is a Motability, vehicle, and even a mag-mount is frowned upon

E'mail <dubh_ghall@hotmail.com>

Thank you.

I believe that MFJ is one company that makes these, although I'm not
sure if their stuff makes it over to the UK. Try their MFJ-310.

Happy trails,

This is probably a stupid question, but have you tried changing the channel on the phone? If he's using a transceiver that can transmit on the 900 mhz cordless phone frequency, he'd have to tune around to find you if you changed channels.

Another avenue would possibly be to contact the FCC. I am not sure what sort of authority they have over this type of interference.

I would rather have the Rigblaster myself, I don't trust MFJ's quality control. Just my two cents, but I would rather pay a little extra and have a good quality product.

FOR SALE - Filament Transformers

Ready to build that BIG final amp?
Suitable for linear amplifier, repeater amplifier project etc.
Ideal for 3CX3000 Amplifier and other 7.5V tubes such as 8161,
3CX2500A3, 3CX2500D3, 3CX1000A3, Pair of 3CX1200A7 etc.

Thordarson 21F26 Transformer.
Top Quality. 115/230V AC Primary 50/60 Hz
to 7.5 Volts C.T. at 51 Amps.

Dimensions: 5" wide X 4.5" Deep X 4" tall

Will sell for $110.00 plus shipping

E-mail me to arrange purchase

hi.
i have audio from a guitar input to a circuit i built.
the auidio is being fed to a 4053 switcher thats switched via Laipac
wireless modules RLP433A and TLP433A. the 4053 is of course on the
same circuit as the RLP. the TLP is on another remote circuit that
activates the transmission..

the RLP is picking up random radio static and transferring it to the receiver circuit.

i have a PIC decoder that takes the data fed to it from the data out of the RLP and outputs signals to the 4053 IC that controls the switching.
i have all the grounds and power and antenna hooked up correctly on the RLP.
the linear or analog out is not connected.
the PIC gets its data from the digital out of the RLP.
if i connect the encoder PIC on the remote circuit DIRECTLY to the decoder PIC on the receiver circuit, there is no noise so i know its directly because of the TX/RX.

how do i isolate this noise from my receiver circuit?
even if i plug the RLP digital data out into an unused strip on my breadboard i get the SAME noises with the SAME intensity even though its connected to nothing. unplugged from the bread, the noise disappears.

I have both the MFJ and the Icom interfaces. They seem to work well.

When I first saw the name Rigblaster I never even read the specs. I
though it had to be something for CB like a power amp with a name like
that.  It was only later that I found it was an interface for ham
rigs.

From all I've read it's a good, does almost everything, interface.
It's written up in this months QST.

I'd probably have one, had I not been misled by their poor choice of
names.

I have a friend who frequently hears cellular calls on her scanner, I do not know the make or model of the scanner. The frequency in question is 460.5000, which is of course allocated to our local sheriff.

Could someone suggest a reason why this might be happening? Is 460.5000 a harmonic of a cellular frequency or something?

thanks!

mtoal

I have an Icom IC-W32A for sale. With the exception of shipping tape placed over the display lens (I do this to all of my H/T's to protect the lens, and it is easily removable) the radio is in as new condition. It will be shipped in the original box with manual, quick programming card, stock duck antenna, battery and charger. In addition, I will provide a registered original RT Systems software disk.

Asking $200.00 O.B.O. + shipping from 11786

Please e-mail off list with questions.

Thank you,
John, KB2COP

I just updated my Iraq War information pages at www.MilAirComms.com
This includes military frequencies and SWL freqs and schedules.

Just copies KOL Israel�s news broadcast at 1730 UTC on 17545 (excellent signal into Daytona Beach, FL). KOL Israel is reporting that they feel very strong that the war will begin VERY shortly after the 8 PM EST deadline. They feel strong that the war will begin in the early morning hours (local Israel time) as well as they have a strong feeling that Iraq will launch an attack on Israel in the early morning hours as well.

I�m sure the next few days/weeks are going to be busy on the airwaves�..

George

Recently I had access to these three radios yaesu FTH 2006 (2 bateries)
yaesu FTL 2007

and Motorola GP1200 (with charger) but till now I did not obtain any
information, i wonder
if anyone could help me .. or tell me price i should ask to sell them ?

i could trade also for a yaesu VX-5R

Hello,

Intresting to construct your own low-cost longwire BAL-UN?

And if so.. take a look at: http://www.inter.nl.net/hcc/Shortwave

Best regards and good dx-ing.

Dutchmill

With no architecture I would say it's a receiver spur and probably one of low order. If it's undesirable, then put in some front end protection like a low pass filter (preferrably an elliptic function filter with .1db ripple) with a corner at the last freq that you scan or you can build a notch filter on the cellular band. It all depends on what you want to hear and what your capabilities are for finding the right design and building it.

AMERICA AT WAR: HAM RADIO PREPARES

America's terror threat level has again been raised to "Code Orange." This in the wake of President Bush’s ultimatum to Iraqui dictator Saddam Hussein. And with our nation on high alert for terrorist attacks, Homeland Security Secretary Tom Ridge outlined a national plan Tuesday March 18th. One that he said would increase America's at-home defenses. Part of it is in the area of personal communications. Amateur Radio Newsline’s Norm Seeley, KI7UP, has the latest on this and the way ham radio can be prepared:

--

The plan, which Homeland Security Secretary Tom Ridge has named Operation Liberty Shield heightens security at the nation's borders, airports, seaports and railways. It also provides additional security at nuclear and chemical plans along with protecting elements of the nation's food supply and distribution system.

As you have probably heard in other n ews reports, vehicles are again will be subject to random inspections on roads leading into and out of airports, sea-ports and similar facilities. Most of those who will making inspection stops are probably unaware of ham radio equipment and why hams have it in their cars. Akll they will sdee is a different kind of radio that they have never experienced before. So, for the forseeable future Amateur Radio operators would be well advised to carry a copy of their license with them if they are driving a vehicle equiped with an antenna array anyplace close to a high security area. Its much simpler to show you ham ticket to the inspector than to try to explain the hobby while a long line of cars behibd you are honking their horns.

Also suggested by Holeland Security is for every family put in place an emergency communication plan. This plan should be specific to a given family unit, understood by all of its members and practiced regularly.

Some experts have recommended that a family communications plan not be totally dependant on land based or cvellular telephones that can easily become overloaded in an emergency. Recommended are forms of personal radio including FRS and the new M.U.R.S. service. Families where all members are licensed radio amateurs have a definite advantage here. If your wife and kids are not yet hams, now might be a hood time to make getting them all tickets as a super high priority. Three places on the web you can find training information are www.arrl.org, www.w5yi.org and www.gordonwestradioschool.com. And gordonwestradioschool is one word.

Radio amateurs involved in civil defense and disaster preparedness should now be on high alert as well. Radio gear should be in tip-top shape, tested daily and H-T batteries should be maintained at full charge. Do the same spare battery sets. Also, have one or more sets of alkaline cells ready to go. If the power goes out you will have no way to quickly recharge your NiCad or NiMH packs.

If you belong to an emergency service group like ARES or RACES, make sure your leaders know how to contact you 24 hours a day, 7 days a week. Take part in regular any scheduled on-the-air drills so that you will be knife-edge sharp if your services are needed.

And if you have never had Emergency Communications training, don’t wait. The ARRL is the only national Amateur Radio group certified to provide you with the schooling you need and courses are available right now. As soon as this newscast is over we urge you to go to the League’s website at www.arrl.org and to sign up.

Meantime, the American Red Cross is urging families and individuals across the nation to make appropriate preparations. The relief agency suggests everyone follow the Red Cross Recommendations for the Homeland Security Advisory System. It’s on the web at www.redcross.org.

For the Amateur Radio Newsline, I’m Norm Seely, KI7UP, reporting.

--

We will have more on ham radio and its part in defending America against the threat of terrorism in future Amateur Radio Newsline reports. (ARNewsline™)

**

AMERICA AT WAR: PROTECTING THE NATIONS COMMUNICATIONS

With war now reality and the possibility of terrorism, leaders from the telecommunications, Internet Service Provider, satellite and cable industries have begun consideration of widespread recommendations to help restore communications services in the event of an attack on the nation's communications infrastructure. Some of the recommendations were presented by members of the Network Reliability and Interoperability Council at its quarterly meeting March 14th at the FCC.

In developing what the group calls its best practices for service continuity and disaster recovery, the industry representatives identified and analyzed more than 200 such concepts. These cover a wide range of scenarios. And for the first time in the area of cyber security the communications industry has conducted a thorough assessment and analysis of its vulnerabilities.

The 56-member council vote on which recommendations to put in place will be completed on March 28th. (Published news reports)

**

HAM RADIO IN SPACE: ARISS TO CONTINUE WHILE SHUTTLES ARE GROUNDED

The grounding of America's Space Shuttles following the February 1st Columbia disaster has not had any major impact on Amateur Radio. Roy Neal, K6DUE, brings us up to date on whats happening in the shuttle program and with manned ham radio in space:

--

The announcements by NASA that its having Boeing build a new Orbital Space Plane and that it hopes to have the remaining Space Shuttles back in the sky by this fall signal a turning point for the space agency. It is telling the world that things are getting back on track.

But in there here and now there are still several months before full space operations resume. Amateur Radio on the International Space Station Chairman Frank Bauer, KA3HDO, says that ARISS is prepared for any eventuality.

According to Bauer, until the shuttles fly there will be less scientific work taking place on the International Space Station. This is because of the reduced on-orbit staffing of two member crews.

Bauer believes the most probable scenario for a crew change will be what we reported two weeks ago. That U-S Astronaut Ed Lu, KC5WKK and Russian Cosmonaut Yuri Malenchenko will fly to the I-S-S on a Soyuz rocket to become the Expedition 7 crew. But Bauer adds that Astronaut Mike Foale, KB5UAC, is a back-up for the crew -- also in training -- just in case he is needed. He also notes that Astronaut Pedro Duque, KC5RGG, who planned to use the ARISS equipment on the upcoming Soyuz transport flight, will now probably fly in the fall.

Baueer says that the only major setback for ham radio so far concerns upgrading the I-S-S ham station itself. According to KA3HDO, with the shuttles not flying, consumables like food and water are the highest priority items to be launched on the upcoming Progress re-supply missions. This means that the ARISS hardware that was planned to be flown this year will probably be delayed. The gear waiting for transport includes the Slow Scan Television equipment, plus Kenwood D700 and Yeasu FT-100 radios and the Naval Academy’s P C Sat 2 ham satellite. Bauer says that this equipment will be kept ready for any upcoming transport flight opportunities to the I-S-S.

The good news: Bauer says that the opportunities for school contacts will remain at the same. Look for them at a rate of at least two a week. Maybe more if the Expedition 7 crew finds itself with extra free time.

Right now, it appears as if ARISS operation from the I-S-S will continue on as it has since operations resumed. This, as investigators on the ground work to determine what caused the Columbia to disintegrate as it attempted to land last month and get ready to return the rest of the shuttle fleet to service later this year.

For the Amateur Radio Newsline, I’m Roy Neal, K6DUE.

--

The only item not touched on by Bauer was open contacts with the ham radio public. These tend to occurr only when the crew has some unscheduled free time. (ARISS)

RESCUE RADIO: UK RADIO CLUB FIRE

Back on Earth, a radio club meeting is interupted by a fire. It happened in the U-K and Jeramy Boot, G4NJH, joins us from Nottingham Englanmd with the details:

--

The Bredhurst Receiving and Transmitting Society's quiz night on the 6th of March was interrupted by what all members present assumed to be a power cut. However, club member Terry Wheeler, G7MIM, went out to investigate and discovered that a fire had broken out in the room above the club. He calmly asked the members to leave the premises and the evacuation of the building took place in a swift, orderly and calm manner. Richard, G7PPE, tried to open the door of the flat above the club room where the fire had started as the occupant was still inside, but was unable to break down the door. Fire crews arrived in a matter of minutes and the occupant was rescued and taken to hospital. Jeramy Boot, G4NJH.

--

Jean Darley, G1DLL, the Secretary of the Bredhurst Receiving and Transmitting Society says -- and we quote: "It's never a dull moment if you're a member of our radio society." G1DLL is also now trying to find an alternative venue for the club to meet. (GB2RS)

**

RADIO LAW: ANTENNA PROTECTION - CALIFORNIA TRIES AGAIN

If at first you don’t succeed, try again. And that’s exactly what hams in California are doing as they try to convince the state legislature and the governor that its time to offer protection for their antennas and towers. Amateur Radio Newsline’s Bruce Tennant, K6PZW has more:

--

March 26th is the date for a legislative hearing on California's latest attempt to pass an Amateur Radio antenna protection bill. The ARRL Letter says that Assembly Bill 1228 was introduced February 21st by Assemblyman Bob Dutton. It has been referred to the Committee on Local Government for consideration.

ARRL Pacific Division Director Bob Vallio, W6RGG, and the League’s antenna expert Dean Straw, N6BV, are among those scheduled to testify on behalf of AB 1228. Several others also plan to attend.

Back in 2000, the California Legislature passed a bill incorporating the essence of PRB-1, but Governor Gray Davis vetoed the measure. At that time the Governor said his opposition stemmed from a lack of budgetary funds to complete the required studies and his personal belief that amateur antennas should be considered a local rather than a state issue. The earlier California measure had carried a price tag of between $70,000 and $100,000 to fund studies and a model ordinance that lawmakers required.

Organizers behind the current bill say the new measure, being called "The Emergency Communications Enhancement Act," will not carry any price tag. A copy of the current legislative proposal is available on-line the California State Legislature web site.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, in Los Angeles.

--

So far, 16 states have incorporated the essence of PRB-1 into their laws or have approved Amateur Radio antenna legislation that includes minimum regulatory heights for antenna structures. (ARRL)

**

RADIO LAW: CALIFORNIA WORKING TO MOBILE CELL PHONE BAN

Still in the Golden State, a bill requiring cell phone users to use handsfree devices while driving has been adopted by a powerful California Assembly committee. Bill Pasternak, WA6ITF, has been following the story and has the latest developments:

--

The measure passed the California Assembly Transportation Committee on a 14 to 5 vote on Monday March 10th. This, after falling a single vote short of passage for the past two legislative sessions.

The bill's author is Assemblyman Joe Simitian, of Palo Alto. He has called the committee's approval the first step to saving lives on California roads and highways.

Under the Simitian's bill a first offense for using a cell phone while driving a motor vehicle would result in a mandatory $20 fine. Subsequent violations would carry a maximum fine of $50. Drivers could use handsfree cell phones without threat of a penalty.

The measure is exclusive to mobile cellular telephone use. It reportedly excludes all other forms of two-way radio communications. The bill now heads to the state Appropriations Committee for further hearings.

Reporting from near the city of Valencia California, I’m Bill Pasternak, WA6ITF, for the Amateur Radio Newsline.

--

If the measure eventually becomes law, California will become the second state to require handsfree use of cell phones by drivers. New York was the first back in 2001. (ARNewsline™ from various reports and sources.)

**

ENFORCEMENT: FCC ALLEGES NUMEROUS VIOLATIONS ONB MICHIGAN REPEATER

A pair of Michigan repeater operators have been told to cease operating their systems under automatic control. This, as the FCC launches an investigation into charges of several rules violations. The agency’s Daryl Duckworth, NN0W, has more;

--

Duckworth: “The Detroit District Director issued an order to cease autonmatic control of Amateur repeater station K5YHA to Sheri Gilbert and an order to cease automatic control of Amateur repeater station K5EKP to William Gilbert, both of Lupton Michigan. Both stations are under review by the Enforcerment Bureau for apparent violations of the Commissions rules inccluding inadaquite station control and deliberate interference.”

--

In a letter February 24th letter to the Gilberts, FCC Special Counsel Riley Hollingsworth alleges that numerous rule violations have taken place on the repeater. Also that the repeater is the source of interference to the K8GER system. He said that Violations on the repeater consisted of failure to identify by some users, use of false or misleading call signs by users and failure to have a control operator for the repeater. Hollingsworth alleges that back in January the Gilberts' apparently turned the operation of the repeater over to a car rally. During that time several of these type of rule violations occurred for more than 12 hours during a two-day period.

The letters warns the Gilberts' that that if they are unwilling or unable to prevent violations on their repeater, then their Amateur operator and station licenses will be subject to enforcement action by the Commission. This could include a fine, operator license suspension or station license revocation. The Gilbert's have since informed the FCC that the repeater has been taken off the air. (FCC)

**

AT THE FCC: NOW WE HAVE COALS

The acronym laden Federal Communications Commission has added COALS to its dictionary. This, as the regulatory agency begins implementation of the Cable Operations and Licensing System by Report and Order on March 13th.

With COALS the FCC has expanded its electronic filing capabilities to make it easier for multichannel video programming distributors to submit applications, reports, and other documents. The FCC says that COALS also makes license and cable operational information more accessible to FCC staff. This in turn makes for more efficiency in monitoring spectrum usage and competitive conditions in the cable and multichannel video marketplace. The FCC adds that the introduction of COALS represents more progress in the FCC's own modernization initiative. (FCC)

**

RADIO RULES: MEDIA OWNERSHIP HEARINGS

It looks like there will be more public hearings on media ownership restrictions. A Democrat on the Federal Communications Commission plans to hold two more hearings, sidestepping the wishes of the agency's Republican chairman.

Commissioner Michael Copps says he will hold hearings at the University of Washington in Seattle and Duke University in Durham, North Carolina. Copps is seeking public input on the F-C-C's review of whether decades-old media ownership restrictions are appropriate in a market altered by the growth of the Internet, satellite boadcasting and cable television.

FCC chairman Michael Powell had previously said that the hearing he held in Richmond, Virginia, on February 27th is all that's needed. Powell said that the agency has received 13 thousand comments from the public, most filed electronically. (FCC)

**

HAM RADIO CUDOS: PAUL HARVEY HONORS HAMS

Radio commentator Paul Harvey dchose Wednesday, March 19th to honor ham radio. In his broadcast, Harvey described radio amateurs as America's quiet warriors. He said that there are 700,000 of them who are unpaid, uncelebrated, civilian, radio operators, who are there during and after floods, fires and tornadoes. And says Harvey, after the 911 attack hams were indispensable in reuniting families.

It was a very unexpected salute to the nations ham radio community. You can find it on the web at www.paulharvey.com. Look for the show dated March 19th. (W6RCL)

**

CHANGING OF THE GUARD: MARC TONNA, F9FT, - SK

A pioneer in antenna design has passed on. According to a notice on thew A.F.T. antenna wwebsite, company founder Marc Tonna, F9FT died on March 2nd at the age of 91.

Way back in 1946, Marc Tonna revisited the design described by the Japanese searchers Yagi and Uda in 1926. Tonna brought to the Yagi improvements that made his antennas famous among the radio-amateurs, as well as in the field of the then uprising commercial TV. He later went on to become the co-founder of the company Antennes Tonna which today is known as A.F.T.. (AFT)

**

NAMES IN THE NEWS: NEW ARKANSAS SM

Dennis Schaefer, W5RZ, has been appointed as the new Arkansas ARRL Section Manager. He succeeds Bob Ideker, WB5VUH, who first served as Section Manager from 1991 through 1995 and who returned to office in 2001.

And heres where it become rather uinteresting. Ideker had decided to not run for another term. Eldon Bryant, K7ZQR, was elected to replace him. But Bryant later decided not to assume the office and Schaefer was named as his replacement.

Schaefer’s term begins on April 1st. Arkansas ARRL members -- or anyone elser can contact him by e-mail to w5rz@arrl.org (ARRL)

EMERGING TECHNOLOGY: CALL IT MC INTERNET

Hungry? You may soon get a surprising bonus when you dine at the Golden Arches. This, with word that McDonald's restaurants in three U.S. cities will be offering one hour of free high-speed Internet access to anyone who buys a promotional meal.

Ten McDonald's in Manhattan New York began offering wireless WiFi, or 802.11b, Internet access on Wednesday, Matrch 12th. By the end of 2003 McDonald's plans to extend the access to 300 restaurant locations in New York City, Chicago and a yet to be announced California city. Window signs will alert customers to which restaurants have WiFi wireless access. After using the hour of free access that comes with a meal, customers can pay $3 for another hour online or get more time by purchasing another extra value meal

Besides McDonald's, Internet surfers will also be able to tote their laptops to 400 U.S. Borders book stores, hundreds of hotels and a pair of U.S. airports where WiFi access will be available this summer. (Published news reports)

**

SPACE AND SCIENCE: MORE ON SETI@HOME

Last week Amater Radio Newsline’s Henry Feinberg, K2SSQ, brought you the latest news on a project called seti@home. Henry is back this week with some background on the project and how it got stasrted:

--

SETI@home first offered its screensaver to the world in May of 1999 as the first example of wide-scale distributed computing. Its aim was to link idle computers through the Internet to tackle large computational problem involved in searching for intelligent signals from space.

The key to its success was the collaboration between two people who would become the principal architects of the project. David Anderson is a computer scientist who was one of the principal developers of distributed computing. Dan Werthimer is a physicist with two decades of experience collecting radio data and parsing it in search of unusual signals from space. Together, they have drawn in not only the computer community, but many others as well. This includes thousands of ham radio operators interested in offering use of their spare computer time to benefit worthwhile projects.

Werthimer, who serves as chief scientist for SETI@home has conducted his own Search for Extraterrestrial Intelligence for the past 24 years. For 11 of those years he has been able to use the giant 1,000 foot diameter radiotelescope at Arecibo Puerto Rico to look again at promising locations and frequency ranges. This, to determine if a strong radio signal is more than random noise or a transmission from an orbiting satellite.

So far no luck but Werthimer is not disappointed. This is because SETI@home has mobilized so much more computing power than has ever before been thrown at signal analysis. Also, the team has been able to perform much more detailed and complicated computations on the radio data than now possible with Werthimer's own ongoing SETI project, called Search for Extraterrestrial Radio Emissions from Nearby Developed Intelligent Populations. Thats SERENDIP IV for short.

What is important is that SETI@home has performed the most sensitive and detailed SETI sky survey to date. It has also demonstrated the power of the Internet for doing scientific distributed computing, and has allowed the general public -- and the ham radio communuity to participate directly in an exciting research project.

And the success of SETI@home has also spawned numerous other distributed computing projects. These include Folding@home -- a distributed computing project to calculate the three-dimensional structure of proteins and climateprediction.net to improve scientific forecasts of 21st century climate. And scientists say that there is more to come.

For the Amateur Radio Newsline, I’m Henry Feinberg, K2SSQ.

--

So far, 4,287,000-plus users have lent thir spare computing time to analyze radio data for the SETI@home team. You can become a part of the project by taking your web browser over to http://setiathome.ssl.berkeley.edu. And if you missed that U-R-L you will find it in the print edition of this weeks amateur Radio Newsline report. (W6RCL, Published Reports)

**

DX

In D-X, word that A35KB has gone QRT -- probably for good! Paul Kidd, A35RK, told the Ohio Penn D-X newsletter that he hasn't heard Father Kevin Burke, A35KB, on the air for some time. So, last week telephoned Father Kevin only to learn that he is very busy with his duties as parish priest on the Island of Eua. Because of this, he is no longer able to operate on the radio, has allowed his license to expire, his station is dismantled, he has no intention of getting back on the air any time soon. Nor can he any longer respond to QSL requests. (OPDX)

On a brighter note for D-X’ers, the OPDX also reports that SP9FIH will be active from Tonga through April 14th. He already has verbal permission to operate and his license will be given to him after arrival on the island. Activity will be SSB on 80 through 10 meters including the WARC Bands. QSL to P.O. Box 480, 44-100 Gliwice, Poland. (OPDX)

And lastly word that Meanguera Island in the Fonseca Gulf will ba activated by DL7IQ, DL7IO and YS1CF from march 27th to the 28th as HU1M. Modes used will be SSB, CW, SSTV and RTTY. On the 29th and 30th the same call letters will be from San Diego Beach El Salvador. Full information is on the web at www.dl7io.de. (The' Modern DX'er)

**

THAT FINAL ITEM: SWLFEST 2003

And finally this week, hams are not the only radio hobbiests who get together at conventions. Shortwave listeners recently had a major get-together in Pennsylvania that saw guests and presenters from around the world. Steve Coletti of WBCQ was among them and has this in-depth report on SWL Winterfest 2003:

--

The listening side of the radio hobby made its 16th pilgrimage through the snow to the little town of Kulpsville, PA., for the annual SWL Winterfest hosted by NASWA. Although SWL stands for short wave listeners, the fest activities cover DC to daylight as again there were the usual demonstrations of overseas TV via satellite, the activities of the group who we affectionately call the "Scanner Scum", and a demonstration of DRM, the European digital shortwave broadcast standard by Jan Peter Werkman of Radio Netherlands, James Briggs of Merlin Communications and Kim Elliot, KD9XB, of the Voice Of America with additional help of a PC loaned by attendee Eric Cottrell, WB1HBU, to decode the broadcasts beamed specifically to Kulpsville.

This year, Bill Whitacre of the International Broadcast Bureau, parent of the VOA and other US international broadcast ventures, was able to schedule it's annual meeting of radio monitors to coincide with the Winerfest and 26 professional listeners from around the world joined the crowd in Kulpsville to explain that their job was more than just making sure that the signal was heard in the target area.

Although the Fest has been a listener only event, over one third of the attendees every year are hams and this year new ground was broken as Skip Arey, N2EI, ran an introduction to Ham Radio forum. Not only the first time for this discussion, but it was also one of two first time evening forums held on Friday night.

The international broadcasters were represented this year by Adventist World Radio and Radio Free Asia in the forums as well as live broadcasts over WBCQ. In addition to some regularly scheduled programming that went remote on Friday night, WBCQ had a Saturday marathon broadcast by the station's engineering magician, "Tim Tron" Smith, WA1HLR.

Other forums featured reports on listening tips, a summation of a DXpedition to Australia, and a report on overseas SWL group, the European DX Council's annual meeting.

Last year, Bob Zenotti, HB9ASQ, co-host of the now gone Shortwave Merry-Go-Round on Swiss Radio International made his first appearance at the fest as a guest speaker. This year he came on his own as regular attendee.

--

Zenotti: “This is one of the best ones I can remember. Great bunch of people, fantastic discussions, and a lot of excitement here….and very little sleep.”

--

The fest was not without it's humor. The hotel has the Stockholm, Copenhagen, and Oslo meeting rooms. In honor of the delegation from Finland that attends every year, the hosts of the event, Richard Cuff and John Figliosi, unofficially named the fest's hospitality suite, the Helsinki room.

For the Amateur Radio Newsline, I’m Steve Colletti a-k-a Big Steve Cole of WBCQ Radio reporting fot the Amateur Radio Newsline.
--

The 2004 S-W-L Winterfest is slated a year vfrom now on March 12th to the 13th at the same venue. You will find lots more about it on the web at www.swlfest.com. (Strve Coletti for ARNewsline™)

**

NEWSCAST CLOSE

I have a Larson Kulrod 220 antenna.
Was wondering if this 220 mag--mount could be used for 144/440 band on a
very temporary basis, or could this cause harm to the handheld
transceiver im interested in using it with(Icom--w32a)
Thanks in advance for any replies.

Probably wouldn't hurt it. HTs are pretty rugged. Put the SWR meter on and
see what it looks like. I'm sure it would be high, but how high?

Hello all,

My PA-SitRep website features a PA County Map whereby visitors may click on an particular County in the Commonwealth to get basic emergency communications information for each County.

Here's the address for the clickable map:
http://www.pa-sitrep.com/#MAP

I've made great progress over the last several years with this project but I still need a lot of fills.

If you think you may be able to provide emergency communications information for a particular County in PA (i.e. ARES/RACES repeaters, County EMA freqs and or web addresses, etc.), please take a moment to check out the map and see if you have any information to add to any of my PA County pages.

I'm also always looking for more PA-SitRep Contacts (Amateur Radio Operators and scanner enthusiasts are a perfect fit). Here's where you can learn more about the PA-SitRep Contact project:
http://www.pa-sitrep.com/contact.htm

PA-SitRep is a Pennsylvania Emergency Communications information website and is a 100% volunteer/non-commercial project.

tnx es 73

Can anyone either explain or point me to an explaination of the technique of zero beating a CW signal? It used to be simple (receiver and transmitter) but with the newer transceivers (most do not have a "spot" button) how does one zero beat a CW signal so everyone is on the same frequency?

Ron H.

AIUI yes. It's a trace that's been laid out in a way that gives it
some specified characteristics as a transmission line. You can also

think of the stripline+substrate+groundplane as forming a waveguide.

Amateur Radio Newsline™ Report 1332 – February 21, 2003

Amateur Radio Newsline report number 1332 with a release date of Friday, February 21 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Snow causes outages in the East and ham radio comes to the reascue. Hear the details on Amateur Radio Newsline™ report number 1332 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: THE NORTH-EASTER OF 2003

Snow plowing crews struggled to clear roads and airport runways on Tuesday February 18th. This after one of the worst storms in decades buried parts of the United States eastern states in 2 to 4 feet of snow. And in some areas ham radio was called out as we hear in this report:

--

Snowdrifts were piled high from the Ohio Valley to New England, mudslides and floods wreaked havoc in the southern Appalachians, and layers of ice snapped trees and power lines. At least 47 deaths had been blamed on the storm since it charged out of the mid-West Plains states over the previous weekend. Schools were closed from West Virginia to Connecticut and more than 250,000 homes and businesses lost power and telephone service. Enter ham radio.

During the height of the storm on the 17th, two communications emergencies were declared by the Federal Communications Commission in conjunction with the ARRL. The first was in Virginia to protect amateur emergency communications on 3.947 and 7.243 Mhz -- plus or minus 3 Khz. Also included were 145.430 MHz and 146.880 MHz repeaters in Richmond, the 147.360 MHz machine near Chesterfield and the 146.760 Mhz repeater serving Williamsburg at times when each was handling emergency traffic. It was only in effect for a few hours and terminated at 19:00 hours UTC the same day.

The second communications emergency was declared for Kentucky. Former ARRL President George Wilson, W4OYI, lives in the city of Owensboro. He says that his area recieved about 2 inches of glare ice and quite a bit of sleet on top of it.

But the big problem was in Fayetteville near the city of Lexington. Again the problem was mainly ice related and radio amateurs were ordered to keep from using repeaters on 146.760 Mhz, 147.165 and 444.125, MHz unless they were specifically taking part in the handling of emergency traffic

Further to the North, Bob Josuwait, WA3PZO tells ARNewsline™ that Montgomery County in suburban Philadelphia Pennsylvania had about 20 inches of snow. Montgomery County RACES was activated at 1800 on Sunday, February 16 th.

Bob Lees, W3ZQN, is Montgomery County RACES Radio Officer. He reports that members with four wheel drive vehicles were told to help, as possible, by providing transportation for essential hospital and nursing home workers within the county.

The Radio Officer sent an alert via the pagers carried by over 50 members, convened a net on the county two meter repeater and began making phone calls to determine specific needs.
RACES responded or attempted to respond to 17 different requests for transportation services until about 10 P.M. local on February 17th. A total of 21 people were transported by six different drivers in their personal vehicles. Each vehicle was in constant contact with net control by radio as they traveled.

Lees says that six hams acted as net control stations from their homes. Another 14 who did not have four wheel drive vehicles checked into a net called at noon on February 17th. Each operator indicated that they were monitoring and could possibly help in other jobs if requested. In all it was a good job done by RACES and ARES in the face of one of the worst North-Easter's of the past hundred years.

For the Amateur Radio Newsline, I'm Blair Alper, KA9SEQ.
--

For the region as a whole, it was the worst snowstorm since the blizzard of 1996. In that one at least 80 deaths were blamed on the weather. (ARNewsline™, ARRL, WA3PZO, W4OYI, VHF Reflector, Repeater Owners Remailer, published news reports.)

**

INTRUDERS: DRUG RUNNERS ALONG THE VK COASTLINE

What appear to be illegal drug runners have taken to the ham bands along the Australian coastline. Q-News Graham Kemp, VK4BB and Chris Wright, VK2UW, have the latest details:

--

“14.044 daily at 08:30 U-S-B are "Big Voice" -- must be thee HQ Stn.. and "Low Voice" Supply Boat ?? On the 23rd January "Big Voice" was joined by another Big Voice -- signal 59+ -- also in the same direction...

The N.T.News carried an article about the "roadside drug distribution points in

Western Australia. Maybe these two 'Big Voices' are running the distribution points and the 'smaller Voice' keeps up the supply to the Distributors ??

There was a video report on Darwin TV picturing an 'abandoned' Chinese Fishing Boat along the West Aust. Coast tied up to the Shore. No Crew and No Cargo. And there are some Indonesian Voices 'Hopping' in on the Frequency when it is not in use. Maybe they have a part to play in the business?

If my bearing of 250 degrees and VK6XW bearing of 360 degrees were used, they would cross in the vicinity of Broome.

--

According to Q-News, Australian hams are being encouraged to report anything they hear to the nations Intruder Watch Coordinator. (Q-News)

**

HAM RADIO IN SPACE: JAPAN ARISS CONTACT TO THE ISS

Ham radio contacts with the International Space Station continue. One of the latest took place on Tuesday February 18th when 8N3HES at the Hirano Elementary School in Kobe Japan succeeded in connecting its students with the ISS crew using Amateur Radio curcuits. One of the first questions answered had to do with ecology. How do you dump your garbage in space?

--
CONTACT AUDIO
--

That recording was made by JN1GKZ and you can only hear the I-S-S side of the contact. And some of the questions brought more information than many needed to know like when one student asked: “How do you take a bath in space?

--
CONTACT AUDIO HERE
--

This is the 3rd ARISS School contact with a school in Japan. To see a list of questions and herar all of the answers you only need to take your web browser over to the JN1GKZ website. You will find it at: http://www.qsl.net/jn1gkz/sound/ariss/8n3hes.htm (ARNewsline™ with sound from JN1GKZ))

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W3BN Reading Amateur Radio Club repeater serving Reading Pennsylvania.

(5 sec pause here)

**

ENFORCEMENT: PIRATES CANNOT EVER HOLD RADIO LICENSES

Pirate radio operators cannot ever get licenses to operate a legitimate radio station. So says a court of appeals. Amateur Radio Newsline's Ken Locke, N8PJN, has more:

--

A United States appeals court has upheld as constitutional a law that bans a pirate broadcaster from ever obtaining a license for a low-power FM radio station. In fact, it bars a current or former pirate broadcaster from even being involved with a station.

In its action, the full court reversed a ruling last year by a three-judge panel of a court that had struck the law down. By a 7 to 1 vote it ruled the law and the government regulations implementing it do not violate free speech rights under the First Amendment.

Back in 2001 Congress mandated that the FCC adopt rules to ban anyone who had been a pirate broadcaster or currently was broadcasting illegally from obtaining a license for a new low-power station. The appeals court appears to have taken this one step further in banning any affiliation bu current or former pirates with a legitimate FCC licensed broadcast operation.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN, reporting.

--

Thanks Ken. (FCC)

**

ENFORCEMENT: NO TWO METER SETS FOR HUNTING SEASON

The FCC has written to the manager of a Radio Shack store to warn against selling ham gear to unlicensed persons.

The letter went to Dennis Wilfong who manages the Radio Shack at the Valley point Shopping Center in Elkins West Virginia. In it the FCC says that it has information indicating that numerous individuals are purchasing Amateur radio Service Two-Meter radio units from that store for use during hunting season and the purchasers are using them without the required license.

But thats not all. The FCC says that those purchasing the radios are either not being told that the units require a license, or are being misinformed as to the licensing requirements.

The FCC tells Wilfong that he should advise purchasers of Amateur Radio transmitting equipment that unlicensed radio operation is a violation of

Section 301 of the Communications Act. That using the transceivers without first obtaining an Amateur Service license may result in a monetary fine of $7,500 to $10,000. (FCC)

**

ENFORCEMENT: FLORIDA UPGRADE SET ASIDE

John S. Gregory, W3ATE, of Lake Worth Florida has had his General class upgrade set aside. This, based on complaints about the operation of his station on frequencies not authorized by his Technician class license.

According to the FCC, at various times in 2002 Gregory apparently checked into a net on 14.300 Mhz while still a Technician class license holder. He was issued two warning letters but the FCC says that both were returned as unclaimed. (FCC, W5YI Report)

**

ENFORCEMENT: FCC ISSUES A RASH OF FINES

Hams are not the only ones hearing from the FCC. The Commission is continuing to flex its enforcement muscle by issuing a number of monetary forfeitures. Here are some recent examples courtesy of the CGC Communicator:

How about $2,500 to a telephone company for failing to exhibit prescribed tower painting. Or $4,000 to a CATV operator for failing to retransmit the EAS required monthly test.

But those are small in compariason to a $10,000 fine issued to a communications operator for failing to exhibit prescribed obstruction lighting on its antenna structure. Another $10,000 was issued to to an FM pirate while a $15,000 fine was issued to to an AM radio station for failing to maintain operational E-A-S equipment, and for failing to enclose the station's antenna tower within an effective locked fence. The whole story is in cyberspacve at http://www.fcc.gov/Daily_Releases/Daily_Digest/2003/dd030204.ht (CGC Communicator)

**

RADIO POLITICS: ARRL TRYING AGAIN WITH SPECTRUM PROTECTION ACT

If at first you don’t succeed, try try again may be an old addage, but it applies in the case of te 2003 Amateur Radio Spectrum Protection Act. This is a bill that has been introduced in the US House of Representatives by Michael Bilirakis of Florida.

According to the ARRL. Bilirakis filed the latest version of the bill, HR 713, on February 12th. It has been referred to the House Committee on Energy and Commerce. Like its predecessor, HR 713 is aimed at ensuring the availability of spectrum to Amateur Radio operators. It would protect existing Amateur Radio spectrum against reallocations to or sharing with other services unless the FCC provides equivalent replacement spectrum elsewhere.

The previous version of the Spectrum Protection Act attracted more than 50 cosponsors. An effort will be made to encourage additional House members to sign onto HR 713 as cosponsors. Additional details are on the web at www.arrl.org. (ARRL)

**

RADIO LAW: HAM PETITIONS TO KEEP EQUIPMENT ASALES DATE ON FILE

Dale Reich, K8AD, of Seville Ohio, has petitioned the FCC to require sellers of two-way voice or data equipment to keep on file a buyer's name, address, telephone number and any future information. This, when selling a radio that required licensing under the current FCC rules.

Accordiong to an ARRL bulletin, the information collected would remain private, available only to the FCC or law enforcement. Reich said in his petition that any retail vendor would be able to ask local police for an investigation if the retailer suspected the radios were not going to be used in compliance with the law.

Included in the petition is a requirement for "ownership and license tagging" for gear operating under Parts 5, 15, 18, 74, 80, 90, 95 and 97. In his petition, Reich said such tagging used to be an FCC requirement and that his proposed change was a needed tool for local law enforcement.

The full text of Reich's petitions is available on the FCC Web site. Search for petition number RM-1064. Comments are due no later than February 28th. (K8AD, ARRL Letter)

**

HAM RADIO ENTERTAINMENT: WRTC 2002 VIDEO NOW AVAILABLE IN THE USA

The World Radiosport Team Championship 2002 video had its United States premiere on Wednesday, February 5th. This, before a standing-room-only crowd in Washington state hosted by the Western Washington DX Club.

With photography by James Brooks, 9V1YC, and Dave Bell, W6AQ, the video covers WRTC 2002 from the perspective of a professional sporting event. The show begins with the arrival of competitors from more than 30 countries. It then takes the viewer behind the scenes for the various pre-competition activities and into the actual competition.

The video is available on VHS tape and DVD with extra material on the DVD. You can place your order on-line at http://home1.pacific.net.sg/~jamesb (WRTC)

**

CONVENTIONS AND CONFERENCES: SEVHFS IN HUNTSVILLE IN APRIL

If you have been trying to register on-line for the upcoming Southeastern VHF Society conference and getting a reply of no such website, try again. It will work the way its supposed to.

The problem was caused by an Internet Service Provider outage at the most inoportune time. The repair: Everything was moved to different server but that took a few days to accomplish. And now that its all back up and collecting bits and bytes in cyberspace, you will want to visit www.sevhfs.org for the latest conference update. This includes word that Steve Kostro, N2CEI of Down East Microwave Incorporated will be hosdting a surface mount soldering class on the opening Friday morning of the gathering.

The when and the where? This is the 7th Annual Southeastern VHF Conference. It is slated for April 25th and 26th at the Huntsville Marriott in Huntsville, Alabama. For further information and to register, visit that now up and running website at www.sevhfs.org. (SEVHFS)

RESCUE RADIO: THIS IS HDSCS

Last week Amateur Radio Newsline’s Joe Moell, K0OV told you that members of the Hospital Disaster Support Communications System of Orange County, California had been included in a new documentary series on the Discovery Channel. The show is called "Critical Rescue" and it aired on Thursday February 20th and on Saturday February 22nd. But what is the the Hospital Disaster Support Communications System or HDSCS and how does it work? Back with the answers is Joe Moell, K0OV:

--

HDSCS is a specialty group of ARES. It was formed in 1979 with the specific mission of providing backup communications that are critical to patient care. Since then, HDSCS has responded in 75 communications emergencies, ranging from single-hospital telephone system failures to area-wide disasters.

For its service, HDSCS has received awards and commendations from many hospitals and agencies, including FEMA. The most recent is the National Certificate of Merit from ARRL, awarded at the Board of Directors meeting in January 2003.

From southern California, this is Joe Moell K-zero-Oscar-Victor for Amateur Radio Newsline.

--

For more about the Hospital Disaster Support Communications System of Orange County, California and information about how hams can best support hospitals, point your Web browser to www.hdscs.org. (ARNewsline™)

EMERGING TECHNOLOGY: RC-110 REPEATER CONTROLLER GOES OPEN SOURCE

How would you like to be able to customize a repeater controller your way? Well, according to Ken Arck, AH6LE, There has been considerable interest from folks wanting to customize their RC-110 repeater controllers. So Arck, who is both president and CTO of Arcom Communications says that he has decided to make the source code available to any ham who wishes to take a stab at 'hacking' it for their own use.

Writing to the Repeater Owners Reflector, Arck says that as far as he knows, no other repeater controller offers this open source archecture. Of course there are certain conditions, but they're pretty straightforward.

If you are interested in getting the source code, Arck says that you simply need to join RC-110 mail list. To do this send an e-mail to rc110-subscribe@yahoogroups.com. The source is available in the files section of the list. More information is at Ken’s website – www.ah6le.net
(Repeter Owners Remailer)

**

INTERNATIONAL – UK: REPEATER STOLEN

A repeater in the United Kingdom is off the air due to theft. According to the RSGB, the GB3NC two meter repeater and its site companion the GB3MCB 1296 MHz beacon have not been heard since someone made off with the equipment. Both were co-located in Cornwall and the RSGB says that its not known if either will ever come back on the air. (RSGB)

**

INTERNATIONAL: YUGOSLAVIA: THE NEW NATION OF SERBIA-MONTENEGRO

Yugoslavia has become Serbia-Montenegro. This, after Yugoslavia's parliament voted to formally abolish that nation and replace it with a new country called Serbia-Montenegro.

According to the ARRL Letter, the new arrangement will have little immediate impact on Amateur Radio. For D-X-C-C purposes, Serbia and Montenegro will be considered a single entity, at least for the time being. Also, amateurs there are expected to continue using Y-U and Y-T prefixes. (ARRL)

**

CONTESTING:: UT5UDX ON THE MOVE

Ukrainian international football player Sergei Rebrov, UT5UDX, who moved to England in a multi-million-dollar deal in 2000, has moved again. This time to Turkish side Fenerbahçe.

Word is that Rebrov has signed an 18-month loan deal with the Turkish club on January 28th. The Turkish club now has the right to buy him at the end of the loan period.

Rebrov is a High Frequency contest operator. He and has been very active as M0SDX from his home in the U-K and from other locations in the British Isles over the last two years. He is reportedly now in the process of obtaining a Turkish callsign. (RSGB)

**

DX

In D-X, GB2RS says that a group of Swedish amateurs will be active as JW slash SM0BSO, JW slash SM0LQB and JW slash SM1TDE from Svalbard through the 23rd of March. Activity will be on 160 through 6 meters on CW, SSB, RTTY and other digital modes. Q-S-L this one as directed on the air. (GB2RS)

And F5PAC is returning to Panama from the 23rd of February until the 24th of March. He will also operate from several Islands on the Air groups including from the 25th to 27th of February. You can fopllow his exploits on the web at www.qsl.net/f5pac (Via e-mail)

**

THAT FINAL ITEM: EXTENDING MORE THAN A WELCOME

And finally this week, the story of a ham radio dream thats about to come true. Its also the story of what Amateur Radio is all about. Bruce Tennant, K6PZW, has the details:

--
Audio story only. Hear it at http://www.arnewsline.org
--

And after that, what else is there to say? (K6PZW)

A long time ago, I worked in research with superconductors, where
precise measurements of very low resistances were done. We were
charting resistance vs. temperature to determine the performance and
crossover temperature.

You might look at some of the lab techniques used there, and adapt
over to non-DC.

Happy trails,
Gary (net.yogi.bear)

You might want to start here
http://www.efunda.com/designstandards/sensors/methods/wheatstone_bridge.cfm
and work your way through the use of bridges to measure various unknowns.
If you use precision parts to build the bridge then the answer will be just
as precise.

Message-ID: <20030224224552.00882.00000486@mb-de.aol.com>
Xref: archiver1.google.com rec.radio.amateur:4939

A letter posted to Icom's Tech Support Line:

I E-mailed you about 4 days ago in reference to my IC-2100H, just throwing a Dead Carrier with No Audio, Until I manipulated the Connection at the radio. Your'e Tech support, suggested a crack in the board at the mic connection, as opposed to a cable problem. Since the Radio is out of warranty, and me being schooled in advanced electronics and 2M qualifed, I took a gamble. I inspected PCB # B5097B at the Mic connection, touched up what appeared to be a couple "cold" solder joints and inspected the board and reassembled. No change, still no audio. I snipped the molded CAT5 plug, dissected the coating to find a break from at the "moulded crimp" from the CAT5 connector. I connected a jumper acrossed the open and the radio functioned flawlessly! I want to Thank you for your advice and I'm thankful, that you Didn't call this one! I did not want, nor could afford, an internal radio problem. I also did not suspect an internal (was praying anyway) an internal problem, with the radios meeting Mil Specs for vibration. The wire that was Broken was, as your looking at the Radio, the 4th pin in from the Right, It appeared to be Dark Gray or Brown and appeared to be a shielding wire, I left the Gold Strands back and connected the Silver wires for the Repair. This E-mail is for youre notes. The cause, most likely from me stretching it to it's limits, or stretching it in cold Temps. I love ICOM's Quality! I don't see me buying another brand. I just got my T2H Sport today, and it works fantastic as well! It's Great to be back on the Air!

73's!!

By the way, If anyone suspects the same problem with Their 2100H, the Mic Cable is a Standard Cat5, RG-45,8-pin cable. For troubleshooting purposes. The Radio Shack Cat. # is 278-1763 for $4.99. I didn't buy one yet, but I will, while waiting for a stretchable stock cord, Icom P/N: 99011958, to get delivered. It keeps me on the air for the Emergency Nets while waiting for the replacement!

iI bought a brand new ICW32A at a HAMFEST. I tried all the programming
mods to extend receive freq's that I could find on the WEB. None of
them worked. Can anyonje assist with new programming mods. I don't
want to go clipping diodes or anything yet as I still have a warranty.
Thanks. Feel free to email me direct if you wish.   Keith in Alabama.

Has anyone seen a copy of the book put out by the ARRL in 1986 that was a
compilation of the cartoons
done by "Gil" W1CJD?

Any info greatly appreciated.

I acquired a couple of old GE monogram (Ericsson), 10 channel, 5 watt
portables, they're model SP2850's ..and would like some help with the LED
light indications.

Next to the led indicator it says: "BUSY", "TX", & "BT"

The only thing I'm sure of is when I transmitting ..the led glows red
..which makes sense

While monitoring ..this led sometimes sporatically glows in yellow? Does
this indicate other squelched traffic that I'd want to avoid transmitting
during

I'm guessing BT is a low or charged battery indication ..but, I'm not sure
exactly how to read it

If anyone's familiar with the monogram these sp2850's ..and can give me a quick run down of the led indications I'd really appreciate it ..feel free to email.

I'd also like to purchase an old manual for it ..if anyone has one they'd let go ..thanks, Ray.

Hi,

Need to come up with a design for a filter that will pass about 15khz at 40Mhz and nothing either side of that. Any pointers as to what type/configeration of filter I should be looking into?

Not a notch, which is a band-reject filter. I think you're looking
for either a crystal or a SAW filter.

I am a volunteer (non-HAM) with a mission group working in the bush in Malawi, Africa. We have a group of 5 vehicles traveling over remote areas of Malawi and want to be able to keep in touch with each other. We are considering adding radios to the vehicles but admit to being largely ignorant of what is available. We need to be able to communicate over a distance of several hundred miles in terrain that is hilly. We have had a recommendation of a Codan NGT unit because some other people in the area are using this. The estimated cost ($3500 ea) seems higher than we would really like. We have considered satellite phones but the per/minute cost is way too high.

Given the above - I would appreciate any help any of the experts in this group could give us. You can post here or email me directly at:
jim@nussbaumers.net

Thank you very much

Jim Nussbaumer
with Marion Medical Mission

Truth, as is justice and freedom, are shared values with all of
creation in a dream called forever answering not home. So I suppose, I
rely partly in faith
that we shall prevail as sure as life is by communicating something...

Example:

Have you heard demon bush recently talk on how he would work to
prosecute Saddam's forces if they should attack Iraqi infrastructure
as war criminals, but neglected to mention that is precisely what
dimwit american nazi forces did last time targeting specifically Iraqi
people by hitting water treatment plants, and then further on with
irrational sanctions on food and medicine? Our Mr. bush Jr., the
antiChrist, is now condemning himself as traitor to American values
openly, as evil is the decieved disguised. Wow! What a show!

>
> > > > > Why murder people (who could Just as sure be YOU) for bush when we

--

But tell anyone, how is it better to bomb Iraq people to rid ourselves of WMD, than it is currently to go anywhere unfettered? How is it possible to improve a senario that is as open as possible already? How will American soldiers eating bullets improve the search and dissarm technique? What ever happened to evidence being a requirment to convince US who is evil? Oh yeah, bush as the American cop killing antiChrist doesn't like American principles.

--

BUT LISTEN!!!

Okay, how is it MORE EFFECTIVE to send 800 cruise missiles and thousands of bombs onto more than 3000 targets, with an included, urban war conflict to rid Iraq of WMD, than it is now to go ANYWHERE unfettered by inspectors? (Again, how is that an improvement?) How does a criminal war improve the bushmob's stated goal of seeking out these weapons when people under attack will attack back naturally, and the WMD can fit in anyone's back pocket last year? How does spreading Uranium to kill humans for 4.5 million years, blowing up infrastructure, denying food, clean water, and vacines to US people as the unrepresented and innocent, while American soldiers eat bullets as criminal invaders like in Afghanistan but bigger, inprove the living conditions of ourselves who live in Iraq to suffer unjustly at the hands of the demon antiChrist, American cop killer, Our Mr. bush Jr.? (Our Mr. bush Jr., who demands Justice no longer be the found principle to protect American Freedom? (Like following the criminal leads for 9/11?)) How does Saddam, the secular leader who represents more than 750,000 Christians in Iraq, pose more of a funder of idealog zealot terrorist groups, than, say, Saudia Arabia, or Kuwait?, where women can't vote, drive, or learn from the internet? How does a plan of liberation sell to a nation that is more progressive than any of it's neighbors? How come American Soldiers don't demand bush make his case with ACTUAL evidence to substantiate his American allegations regarding the weapons sold illegally (an act of Treason against America) to Saddam up until 1992 by the bush Sr. administration to kill American service personel during the first Gulf war syndrome bombing campain? Why? Brain damage that's why. See, Anthrax doesn't have a shelf life of a decade, and American soldiers are dumber than the average American who holds already, (according to Blizter) the world's title of lowest literacy rates of the developed semi-developed world while currenting further regressing. Americans are cowardly, and too weak and dumb to even protect themselves now. Pitiful.

Johnny Wizard

whatreallyhappened.com

--

Agreed. But we are effected by suggestion, so, I thought it might be a better tactic than the slowly reviving, sleepy heads going, "Oh, wow I'm dreaming!" for twenty years, while bush day by day, really, actually, robs and murders Americans who know not of the sound principles of Justice to protect our freedoms as godlike is a human thing..

--

Ya! Freedom for all through Justice indivisable. All People are created equal, as is, self evident to those in the know. Our blind faith is not in bush as he demands without evidence to persecute US as the innocent not heard from dying for nothing unjustly. Demon bush must be tried and convicted for treason against God, being of US all, including the Atheists especially.

Johnny Wizard
--

Why murder people for bush when we don't need to sacrifice our families for such evil stupidity? If inspectors have unfettered access, and bush has no evidence to substaniate his demon allegations, why then must ALL America side to be war criminals? Is it not more effective to go anywhere without firing a shot, than it would be to kill people as innocent to increase the terrorist threat? How can warring Iraq be better at destroying hidden anywhere WMD, than methodically seeking out weapons that no one has a basis in fact as existing today? Mr. bush jr.'s dad sold Saddam Anrathax up untill 1992, and anthrax doesn't have a shelf life of a decade. What about following the criminal leads for the last American anthrax attack, before we blame Saddam on that too as powell as proscibed?

--

We don't buy corporate America's assault with ignorance however.
Just look at all the anti-hate, anti-crime, anti-bush posts. It is the
corporate, time bitten media whores, the irrational cultists, that
won't
allow open, honest discussion of the facts as publicly recognized,
that leaves US compelled to scream for Justice above the censorship
parading as Our apathy.

--
>
> Ya... a pirate terrorist bush is, who leverages the ignorance
> of the masses to believing, he, actually as American cop killer,
> believes in the return of Christ as God's Man to set the world
> straight on Justice, and the true meaning of being a Patriot, as
> committed to
> Freedom for all as God's Constitution.

--
> > Mentoring Roman orphans.
>
> Huh ?

I Think maybe he was referring to the children left parentless, to
watch CNN programing for further blind sacrifices of forgotten
American values. But let US not forget, american nazi cowardice as the
bush whore corporate products, will as evil pirates of the
Constitution, promote traitor tommy franks to lead the nazi soldiers
to run death squads against them also as the innocent.

Your busted.

--

--
One More Thing

So, that demon bush, the American cop killer and his
cohorts, are continuing to work destroying Humanity's
gains in civility, by evilly dividing Our humanity with
their blatantly open criminal intent to murder untold
millions as US innocent, and as of yet, have not been
executed by American Patriots for mass murder of God's
Family in New York City. Traitors to US all on 9/11
without contention, for Our truth speaks as Ourselves,
and witnessing just CNN's silence on General Ahmad,
speaks volumes on their contempt for US as worthy of
Justice. Refusing to do what is good for Humanity by
offering the central facts as publicly recognized by Our
Police Agencies to be actually documented. According to
the FBI: the vacationing General Ahmad financed the

alleged 9/11 mastermind, Atta, and also developed the criminal war strategy against Afghanistan with the bush administration, to boost the heroin trade, and save Enron to commit further frauds against American soldier families, while murdering over a hundred thousand American flag wavers, and then leaving US for further ruin with plans to continue on against 59 more countries in the same deceitful illegal manner against all Churches, as an evil nothing short of eternally crowning Our Mr. bush Jr., the super evil anti-Christ, the most hated and despised parasitic murderer in the entire annals of Humanity's History. Cool eh? Kill bush now! Why?

The bushmob have done nothing short of confessing to the entire terror event, but for jokes on our strained credulity to publicly press for further stalls. With the rights of kissinger left to be a public investigation official? (Gee, thanks for highlighting your partner like that for US bush, you nazi dumfuk.) Mr. bush Jr.'s america destroys themselves without Love for wisdom, or respect for intelligence as a Peace plan initiative. We publicly witness the blind and tormented dying bushmob slave whore charade, of contempt for living free in Our names. The two evil doers, bush and sadistic nazi rotten rumsfeld, are known publicly as documented, to continue leveraging the ignorance of the CNN ready to be broadcasted repeatedly, tranced dimwit marines, the true dumfuks of this world as weak and pathetic cowards to themselves as their own brothers they watch murdered for bush helplessly, communicated in CNN's un-American false image as the evil bush nation hiding in falsehoods as death squad recruiters against the practically defenseless as unarmed children, nazi vermin criminals, being unbiased as Blitzer about protecting your freedom Patriot, to lose your real life savings reader, truly too weak and stupid to stand up in protection for the flag as the living American Dream for anyone. Because witness again, CNN keeps not saying Justice is important as principle to hold our reflections.(CrossFire is getting better though.) Fortified behind locked doors in their bombed out bunkers, Blitzer and Hemmer sit rooted for the evil side to lose further to themselves by continuing to not respond to our communication know how. America, the People, rarely gain press time coverage as should be top priority always, while being paraded publicly as sold out as not deliberated, corporately represented as privately principled to stay ignorant of Justice to protect living personally, as actually worth something to the bottom line. Yours. Brought down Hell bound as cheated by corporate news america's valueless interest in the price of your living to continue on our behalves.

What does CNN think of 2% Social Security? cheating a Soldier's Grandmother to pay tithes to the bush demon as criminal dictator?, american nazi death squads?, insider stock trades?, arming bush's heroin partners?, rotten rumsfeld and bush murdering devout corporate cultists like a would be, still silent Hemmer?, no opinion? Or the working for the People in our names OFFICIALLY, as the FBI and CIA officers actually involved in uncovering the evil bushmob deeds, like the warrant sabotage, Odigo, stolen passports of alive so called highjackers as once American trained as still Saudi pilots, or Anthrax made to look Muslimized, is not failure to connect the dots ever, or insufficient funding then is not less payment for our law enforcement now to nab the prime suspects. As Mueller, or mueller has not publicly commented of, but to say, he hasn't seen or heard anything of this police work, leaving the FBI unrepresented publicly as a threat by himself as a terrorist supporter, an devout member of the bushmob cartel. Why?, we must investigate Mueller if we should have him arrested for publicly obstructing the FBI asking the important questions. IT IS THE FBI, not pissant mueller, WHO CONCURES THE BUSHMOB'S AHMAD FUNDED ATTA. Or how about the dumb ass Ashcroft assault against every American to save his embarrassment of being completely unqualified and never elected?, no concern to mention on this either? Who suffers for CNN's refusal to demand Enron give back the billions that were criminally stolen from all American Families still sitting in the Cayman Islands? My God.

Somebody call the cops.. again!

I have personally spoken to hundreds, and written thousands regarding bush's guilt, and we can't seem to find any fault with what I am saying... How about You? Check out usenet group, "us.military.army" on the internet to see for US all, what questions if any are asked. Know also, CBC and CNN management staff will not contribute their disagreement as none present, but for continuing disregard for Your interests during Our news cast of the facts. THINK. I tell gun clubs, police officers, Biker gangs, and the general public to kill bush today for 9/11 and his death squads, against the helpless and undefended while arming heroin dealers and selling terrorist handbooks, with all the evidence one would need or asks for, and CNN with CBC corporate management does not, to my knowledge, call Our Police agencies to complain about my free speech capabilities, or will allow US public discussions with Our History as documented. Why? Those nazi bastards, Walter Issacson, Robert Habinovitch, and the two Coast to Coast godless vermin parasites know personally, they propagandize our communities with deceit to keep us divided as the plundered and murdered for the private banker buildings who sell weapons in bush's name to kill the innocent as ourselves unheard from. I can barely survive watching US ignore them as King to this World, my sweetie baby sugar dumpling, but, I think it's time to let Arron Brown in on a little secret... Johnny wants a word with his living responsibility to Americans on Patriotism. Instead of what we currently witness, a reluctance to not relentlessly pursue the truth to provide US the facts, (Look, it's true, Johnny has an ass.) but a censorship of control to falsely prop up the unelected nazi war mongering criminal, Our Mr. bush Jr., a terrorist of tyranny through criminal impropriety in violation with the American Constitution as a death bringer heroin dealer, at a seating that truly holds no vacancy, nor a Buddha, but a deception to plainly hide, the actual, got to be for real, super evil anti-Christ of all religion ever mentioned. Wow eh, even gentle jolly Buddha wants bush squashed! Seriously, please kill the bush demon to save US as victims friend. Justice must prevail as is truth eternal, that of what will be as God is.. just how many more as Humanity will be sacrificed in cowardice for the evil bush demon, before an American Patriot kills the mortal nazi dictator for treason as an American cop killer, and betrayer to all of our Humanities? Don't let tomorrow's news story be about Your murder as another, no longer heard from bush victim. For, my reason is as evidenced to actually be known, easily, while the CNN corporate cult product lies to themselves as Our public fact finders to leverage more ignorance than is found now.. as Our public voice to suffer by criminal dictates to destroy God as life giver. Fuk you america.

Heaven is on the Horizon.

We can teach ourselves as the uninformed by CNN standards to misinform and ignore. CNN's continuing silence on Ahmad, bush and rotten rumsfeld, only supports further our claim in their contempt for American Soldiers, and Our Families as not represented as worthy business investment. God, don't you just love me? Hemmer?

Mr. bush's publicized war strategy of no evidence requirement to hold American convictions for murdering Ourselves is evil all around everywhere, as understood without question to every honest Cop, the most serious of all criminal behaviors, of which, they carry guns for in just this sort of political development to halt reoccurrences. But bush, the anti-Christ, as america, says no for ALL Americans, they can no longer hold onto

Justice as their own with him in their charging everyone as the enemy bush refraction. Just like, "bomb wherever" tommy franks would do with his own American family death squaded, like he did intentionally to our children, as his contempt for America will never stifle our voice with his silence regarding our aimed veracity to seek out and destroy the evil nazi bushmob fuks individually with God as Justice Supreme. The True American Way, for, the rare and few Marines, the one or two, are with US loyally to know so. See, there was a time when the Marines were taught diligently, so much so it was proudly ingrained as the moral fiber of their character, that an American Soldier's responsibility to America was to defend the Constitution as the Freedom to be America, with their lives if need be to protect their soul brothers as family, for the greater good by God, (just like the Taliban Rule Man) while today, Ashcroft, albeit muted, murmurs as rotten rumsfeld chuckles, Americans must instead as slaves give their lives unthinkingly as cowardly evil war criminals to protect the unelected bush mobster from criminal arrest for mass murders in New York City, and stealing that 50 billion, seeing that that stupid Justice thing in the American Constitution and Bill of Rights idea has now got to go instead of evil bush as demon traitor war monger, terrorist recruiting false god anti-Christ, but that aside... There is a guide book for leadership in the American Marines entitled, "Guidebook for MARINES", and inside, it contains 14 principles to strive for as an American Soldier wanting to be a True Patriot as leader of Soldiers prepared to die for love of country, and our fellow man as friend or stranger, and here they are:

Integrity, Knowledge, Courage, decisiveness, Dependability, Initiative, Tact, Justice, Enthusiasm, Bearing, Endurance, Unselfishness, Loyalty, and Judgement.

For integrity it states:

"1. Integrity. The stakes of combat are too high to gamble leadership on a dishonest man. Would you accept a report from a patrol leader who had been known to lie? Of course you wouldn't. All your statements, official or unofficial, are concidered by your men to be plain, unadorned fact. Make sure they are. When you give your word, keep it. There are people depending on you to come through with the goods."

Now, I could go on further about what kind of lifeless degenerate a lawless cowardly mute soldier in bush's nazi death squads would have to be, to serve under bush as slave and traitor to home and family, as against God, the Flag, and all that we represent as equals through Justice, but I won't.

Mr. bush's america is uncontrollable by anyone. CNN figures if they never mention US, we'll never know who was invited as participators. (Example: CIA officers have had to PUBLICLY contact British News Services as the CIA, (Never done that I know of likewise before), regarding American interests in apprehending the TRUE 9/11 culprits ignored by american corporate dictates, and tenant also. One should remember, bush and rumsfeld would want to secretly murder any persons involved in 9/11 to clean up the huge crime scene, and tenant, is no brave and True Christ like figure as a living person, so what can we expect in all reality? Tenant will pay dearly if the evidence further indicates, as his continuing silence does label him already a willing traitor to all America, as too, his personal meeting with 9/11's Ahmad just prior seems suspicious also as not mentioned by himself in defense, along with his refusal to disclose the insider stock trades while leaving the fine CIA officers personally involved in the dark, as abandoned American Patriots, armed and ready to defend America as they should immediately for themselves, by executing bush and rumsfeld as terrorist cop killer, drug running freedom haters.)

America's false deity, the super evil anti-Christ, Our Mr. Bush Jr., doesn't think for me to be sacrificed without opinion by John, for I am free to act for my own beliefs as understanding, as I live in defense for living as all things created I am of honestly, simply amazing God is. However, I, as any truly living person would, can't help hate Our Mr. bush Jr. to death for what he and rotten rumsfeld is criminally doing, and further proposing against Our living in my name as unheard from dying without cause as murdered, but for bush's criminal contempt for my Awesomeness to beg once again friends, someone out there please, for the Love of Yourself and God, help US destroy Our Mr. bush Jr. quickly before he kills more as Ourselves unrepresented by corporate values in our commitments to freedom for living through Justice for all persons. Our Mr. bush Jr. has indiscriminately murdered more than 100,000 innocent souls with only a contemptuous smirk to his credit, while fully committed to more robbing and heroin dealing by blaming Laden for whatever without any evidence. Leaving Our true willingness silenced by corporate demands to propagandize and censor our truths, allowing bush, the dumfuk traitor, to continue demonizing America into a hell hole of ignorance through his hatred for life, Science and Nature. CNN's silence for America regarding the bushmob publicly stealing from their Own Family their freedom of Rights to be living, while committing Americans to a dictatorial crime ridden government, that bush and rumsfeld proclaim, is no longer applicable to the Law of any Land, is an abomination against Christ as living is Ourselves Being. America isn't America anymore, it's the bushmobbed universe of injustice and blind self hatred against all of Humanity, committed to leave none to survive but as slaves to be terrorized for the dummy bush demon as their false deity, a traitor in my midst, disguised to no one but himself as personally expendable. Again, where are the American Patriots we all hear so much about in the big screen to take down the seriously anti-American demon bush monster cop killer heroin pusher for treason, as all understood widely now factually with evidence and everything? Kill the war criminal evil doers, bush and rumsfeld today and be loved by yourself to be of Human Nature, or hunker to hell as a coward and betrayer to yourself and your own family, while watching the bushmob openly rob and murder further from our World, and on all of which we stand strong united. Justice for You.

This living plan of mine empowers others to learn their Rights as eternally established to be Kings and Queens on equal footing to be as all in all of gods forever dreaming, while demon bush intends the destruction of individual freedoms while robbing and murdering Americans from the inside, like sharon with US Jews does, as underrepresented, a condemning onslaught on Your better Judgement as reasoned on anything factual they figure blindly to be spinable, without your word contested. Your God Given Living Rights my friend. Without a rule of Law principled in the fashion of Justice for all to be sought as measured, bush's nazi amerika will continue to suffer ourselves needlessly for their corporatized self contempt in Our living Humanity as censored, without a thought for Justice, or the American Bill of Rights as God acting out eternally for prophets to wonder endlessly. See, I came up with this wacky Idea one day to make all my equal as self created to be so normally, in this Universe as we exist for Happiness ultimately as eternal, so, You or i will work this challenge to speak out for ourselves as Creation about bush's america, and it's responsibility as publicly advertised, to gather the facts on who suffers for bush's criminal misdeeds, and overall ignorance on everything. Mr. bush's irresponsible tax scam for example, is to put America's public money into the hands of private bankers, as the extremely rich already, while taking money away from those who spend the highest percentage of their paycheck on basic necessities as a gambled to be advertised, "stimulation package". HOW?

The HOW is never explained with understanding as clearly regressive like the bush rule is, because.. Who spends MORE in taxes as investment at the grocery store to pay the cashier for his babysitter: 20,000 volunteer Janitors all named Rich, who ride the bus for convenience, or a mechanical billionaire private bank machine operator, who doesn't earn any nation's moola by working something for it?, and couldn't eat 20,000 cans of re-fried beans at one cruise lining to timbucks three without losing themselves, havening his tax manner over take in YOUR luxury. See, when America prints more money at the Treasury to give Greenspan to loan BACK to the Government illogically, the dollar value falls for everyone as investor, inflation, let alone the incurred bogus debt owed with real sweat as labor. Clearly, to every informed citizen not as democratic. Of course, National corporate news America, is genuinely not trying as capable by themselves to commit The living interest in Government as ourselves with oversight to manage US fiscally responsible, (like CNN regarding Justice and the Congress, or no Chomsky ever, E. Ann Clark as geneticist, or just research for experts as example), so, we do indeed, live in trying times due to ignorance as corporate america's disrespect for wisdom saught as yearning. It's like private bankers don't want the public to think about what we are doing as worthwhile knowing, eh? Or, I'm the only one on this planet who can almost read my own writing as the, one of a kind, good boy God freak. Anyway, the bushmobster scam leaves less finite wealth for all as taxable exchanges, while suggesting disposing of what dwindling national resource can be obtained, be given to create further debt by devolving into a military apparatus to make more enemies. Our Mr. bush Jr. is just plain stupid as destructive to everyone, but especially Americans to not stand up in defense of Ourselves. (Officially, rotten rumsfeld's criminal plan, "P2OG", is to encourage terrorist acts against Your Family, but you guessed it, not up to CNN's standard to report US as viable news material.) It's like saying fewer people educated, will keep us stupid enough as a Nation to blame the weak and poor as ourselves deprived till death as murdered, and, bush says makes sense secretly, as the all knowing for the blind and ignorant to faith in without thinking about what money is either. Our Governments should always be working to make the poor richer as a successful representation of our will as the public to improving our living condition, but the dumb and ignorant, talentless and monosyllabic, believe, someone else must be cheated and devalued, divided and murdered, in their universe for them to succeed without effort, or skill whatsoever.. Especially defense. Have you ever heard of the rock solid certainty of Universal "inverse variation" constants? (Canadian High School.) This is why in America, in a time where the nation was more literate as informed, Corporations were taxed at 85% and were happy about it for themselves as American citizens. It's understanding also, most as almost all of the most wealthy multi-nationals competing from military dictatorships against American minimums, run in continuous private bank debt, (your savings and pension as leveraged weaker being the entire Nations) but gross billions in profits. 99.9% of every private bank building in the Western World is mortgaged, not however in Iraq, or the Muslim World where interest is not charged on good standing loans made in Our names. (Sideline: Now recollect bush's puppet forcing Afghanistan to borrow from the World Bank for terrorist handbooks and heroin junkets, but not food, shelter or clothing, while spending in addition, 4-5 billion a month in godless bushfuked american Patriot Dollars, American Celeb Dollars, American TAX PAYER Dollars, to run deaths squads with tommy franks against teachers and children.) It's a strange idea to the dying to be corporately driven without thinking because, you wouldn't automatically think it could be more profitable to stay in cheaper as serviceable debt being a brick building, but it is by private banker swindle with National inflation succeeding personal interest rates. We lose personal wealth to the pirate banker fees without even privately using their/OUR National currency services, because truly, we can't go somewheres else. As of course in america, an Enron can always be pulled, where it goes bankrupt as a toxic non-living entity, but leave richer as crooks than they did before calling an end to paybacks, with the People stuck to take the loss together for sure as the victims. While bush, says corporating America, his america, should learn for next time, maybe, while the CRIMINALLY STOLEN money is still siting in the Cayman Islands!!! See the Depression, a Canadian High Schooler, or watch bush act in direct opposition to his word almost consistently as American death harborer terrorist psychopath. Then ask yourself, why can none of our defenses be publicly discussed as important deliberations?

Love Justice by allowing others to read this paper, to judge the truth for themselves as worth something for all persons, and I will be truly grateful you cared to believe in a better future, for together, we could find a new hope for freedom, as happiness and prosperity for Yourself included. We only need believe in ourselves as unstoppablly stupid, and the Universe is ours as God is now testifier.

I am my word,

and make believe King to this world I call home,

Yours forever,

Johnny Wizard

My Divine Right

Destroy bush and rumsfeld now American Patriot soldiers, fire fighters, and NRA members. We all notice CNN and CBC management refuse to allow open discussions on the documented facts outlining the cop killers, bush and rumsfeld treasonous behavior against the great American people, deliberately forestalling their criminal arrests for the mass murders of US as innocent in America. (Or even the recent broken elections in Florida.) Again, I repeat, I've spoken to corporate cult Americans, Leon Harris, Bill Hemmer, Daryn Kagan, Sid Beddington, and Walter Issacson, just to name a few at CNN. All forementioned cowards, who would watch Americans be robbed and murdered, and do nothing to protect ourselves, are personally aware the bushmob was warned of the terrorist plot specifically, the fact that Laden investigations were blocked by the WhiteHouse, while the bushmob in Enron interests, developed a war plan with General Ahmad to invade Afghanistan, for an oil pipe line on a premise of blaming Laden for whatever without evidence as US innocent, a documented truth that existed also just prior to 9/11, a strategy confessed to fully implemented, demanding the bushmob not follow the criminal leads, that point to themselves as traitors. Like the bad bush act on 9/11. (emperors-clothes.com) No arguments are given against what I have spoken on, nor am I even being adressed by our corporate standards as inter-nationally responsible. Why? Largely, because, we are adressing what is as documented to be true, irrespective of ourselves as opinion, Justice infinite as indivisable, like the stars in the sky, while the corporate news machine is refusing to be our own as legit. Mr. bush, the anti-Christ, and rumsfeld did 9/11 to kill ourselves to steal Constitutional American values, with their silence only further implicating themselves to the doubters. Neat eh? (I'm also playing the Creator, who just wants to be at peace with ourselves as equals.) As for Iraq, it was the American administration that removed the inspectors from doing their, going very successful job, not Saddam, while the corporate media continues to allow cheney, the evil nazi fascist bastard, to keep intentionally lying to American soldiers regarding the facts, like US Air Force Response, so the bush regime can throw away their lives as worthless, without meaning. (Agreed, on general terms, American soldiers are deeply ignorant and cowardly as cheney continually attests, but they are still preparing for death, and I understand many can read human, and haven't been hiding in a undisclosed location without a television, or newspaper these last few months.) The Senate Committee on Banking, Housing and Urban Affairs, found corporate America sold Iraq anthrax, VX nerve gas, West Nile fever germs and botulism, right up until March 1992, on hopes apparently, to risk further American soldier causalities, who were at that present time engaged in battle with poisoning themselves mostly. 250,000 troops are planned to criminally invade YOUR humanity, against now near SIXTY countries, representing around 2,083,093,468 people and counting, (that also includes freedom fighters, bikers, the Mob, and Jack), US, clearly aware of bush and tommy franks nazi plans, like in Afghanistan. To kill indiscriminately, while running death squads murdering innocent families, including your children. As for Saddam gassing the two guerilla groups called Kurds, who were fighting to murder in a war on behalf of Iran in 1988, labeled by American murdering nazi savage bush, Saddam's "own people", here is what the most definitive document on the issue states. It's a 1990 Pentagon report, published just prior to the invasion of Kuwait. Its authors are Stephen C. Pelletiere, Douglas V. Johnson II, and Leif R. Rosenberger, of the Strategic Studies Institute of the U.S. War College at Carlisle, Pennsylvania.

...

Iraqi Power and U.S. Security in the Middle East

Excerpt, Chapter 5

U.S. SECURITY AND IRAQI POWER

Having looked at all of the evidence that was available to us, we find it impossible to confirm the State Department's claim that gas was used in this instance. To begin with there were never any victims produced. International relief organizations who examined the Kurds -- in Turkey where they had gone for asylum -- failed to discover any. Nor were there ever any found inside Iraq. The claim rests solely on testimony of the Kurds who had crossed the border into Turkey, where they were interviewed by staffers of the Senate Foreign Relations Committee.

We would have expected, in a matter as serious as this, that the Congress would have exercised some care. However, passage of the sanctions measure through the Congress was unusually swift -- at least in the Senate where a unanimous vote was secured within 24 hours. Further, the proposed sanctions were quite draconian (and will be discussed in detail below). Fortunately for the future of Iraqi-U.S. ties, the sanctions measure failed to pass on a bureaucratic technicality (it was attached as a rider to a bill that died before adjournment).

It appears that in seeking to punish Iraq, the Congress was influenced by another incident that occurred five months earlier in another Iraqi-Kurdish city, Halabjah. In March 1988, the Kurds at Halabjah were bombarded with chemical weapons, producing a great many deaths. Photographs of the Kurdish victims were widely disseminated in the international media. Iraq was blamed for the Halabjah attack, even though it was subsequently brought out that Iran too had used chemicals in this operation, and it seemed likely that it was the Iranian bombardment that had actually killed the Kurds.

From another American government report:

"Blood agents [i.e., cyanogen chloride] were allegedly responsible for the most infamous use of chemicals in the war--the killing of Kurds at Halabjah. Since the Iraqis have no history of using these two agents--and the Iranians do--we conclude that the Iranians perpetrated this attack."

...

The New York Times reported on corporate America's war project SHAD, where during the Vietnam war, 4000 U.S. sailors were gassed deliberately by Republicans with gruesome biological toxins, including sarin.

As for proving that something is not secretly hidden by a nation as millions.. practically impossible! You can't ever conclusively prove that something isn't secretly hidden from perception by variables admittingly, unknowable. (For whom would be there to secretly watch the watchers?) When, and under what madness of bush tyranny as enslavement of our human species, would anyone be able to try standing up in Iraq or elsewheres and state, there is no Anthrax anywhere hidden secretly to kill bush, the false deity super evil anti-Christ with? Never I declare as the Son of Man, will evil bush escape the wrath of our fury as this Universe is, however, it is the supporters of bush's irrationality with our poltical will unchallenged by corporate standards, as these nazi monster, lawless American cop killers wish to use to terrorize 60 nations of almost 2 billion innocents without any evidence with.

With an intent to use a paultry 250,000 criminal nazi soldiers mindlessly stupid on drugs probably, while corporate America won't give anyone two minutes nationally to speak on the clear strong factual evidence implicating bush and rumsfeld for murdering over 3,000 AMERICAN flag wavers in Yew York City? Destroy American traitor bush now!!! The sanctions against the poorest of poor in Iraq are also irrational. The Republicans state the innocent people of Iraq must be denied food and medicine to starve and die because, they are practically politically powerless to change their state to be attacked as the unrepresented, while stating Saddam, if he could, wouldn't help them survive as a nation as the Republican justification to terrorize millions, while cheney skirts U.N. sanctions to sell Saddam whatever supplies privately in secret? So the suffering of Iraqis, is rightly attributed on American terrorist activity by all Iraqis, as the direct cause, working directly against the Republicans publicly stated purpose to commit such criminal intent. Example: If a well spoken father who may not like the policies of Saddam should go to the hospital with his child, he is told the bush clan wish his family death and suffering by American will for being born to our world in Iraq as human. The oil for food program however, is intelligently based, but it's purpose is defeated with the Republican atrocities to blindly murder US with. The demands for the betterment of the Iraq people through national oil sales, would make sense, if they weren't directly suffering under assault by the same terrorist network cancer cell that denies themselves inalienable rights to life as our own. Like pathetically weak as unrepresented American cowardly soldiers, who were provided no evidence to back up the evil bushmob's criminal allegations, then went murdering tens of thousands of innocent people in Afghanistan on the brink of starvation, instead of killing the documented child killer, heroin pusher, tommy franks, or bush and rumsfeld for 9/11 in America. Just on bush's behavior on the day in question, being left unreported by CNN dictates, should say much to everyone.

Joint Chiefs of Staff Chairman General Richard Myers told reporters at the National Press Club about Iraq's enormous unknown stockpiles of !secret! corporate american warfare weapons, "It does not take a lot of space for some of this work to go on. It can be done in a very, very small location," he said. "The fact that you can put it on wheels makes it a lot easier to hide from people who might be looking for it. So, yes we have evidence." Evidence of what? Nations with trucks should be nuked? Richard Myers is a nazi warmongering irrational fukhead, who wishes the murder of countless thousands, if not millions in AMERICA, who should be fired today. You see the nazi bastard, you fire him, do you hear me People? AMERICA? Johnny...? Mr. Myers, your fired!

While we now learn from public disclosures on Connie Chung, apparently, George Tenant, had only 3 CIA officers investigating Laden just prior to 9/11. While I remember last year it was alledged on PBS, the CIA had taxed the American public nearly 10 billion on those investigations regarding Laden over the previous year, but, hmmm, bush forbade police agencies, the pursuit of such investigations with his secret W199i directive. Guardian Wednesday 7, 2001 - "FBI claims bin Laden inquiry was frustrated"

George Tenant must be questioned on these matters, and his relationship to General Ahmad, then arrested regarding his inaction on the insider stock traders for 9/11. If neither happen in a timely fashion, he too, will be destroyed by US American Patriots for treason.

Excerpt From:

NY Newsday
U.S. Hypocritical on Human-Rights Abuses
by Marie Cocco

...

America's new business partner, Uzbekistan's president is brutal, and very bad.

The State Department human rights report says the former Soviet republic now "is an authoritarian state with limited civil rights ... Both police and the National Security Services routinely tortured, beat and otherwise mistreated detainees to obtain confessions ... Police also used suffocation, electric shock, rape and other sexual abuse. Neither the severity nor frequency of torture appeared to have decreased during the year."

What increased was American aid. It tripled to $160 million, the payoff for allowing U.S. military staging areas for the war in neighboring Afghanistan. President Islam Karimov was welcomed to the White House. In July, Treasury Secretary Paul O'Neill traveled to Tashkent and praised Karimov's "efficient leadership."

Bush has singled out one despot for removal.

He says he has many reasons for invading Iraq. Without a look at some secret new evidence the administration may or may not have about Saddam Hussein's arsenal, it is not possible to find truth. That is how the White House wants it.

From a smart thinking, great commenting archive sifting site somewhere titled,

Print Think

...

Bush planned Iraq 'regime change' before becoming President
By Neil Mackay, Sunday Herald

A SECRET blueprint for US global domination reveals that President Bush and his cabinet were planning a premeditated attack on Iraq to secure 'regime change' even before he took power in January 2001.

The blueprint, uncovered by the Sunday Herald, for the creation of a 'global Pax Americana' was drawn up for Dick Cheney (now vice- president), Donald Rumsfeld (defence secretary), Paul Wolfowitz (Rumsfeld's deputy), George W Bush's younger brother Jeb and Lewis Libby (Cheney's chief of staff). The document, entitled Rebuilding America's Defences: Strategies, Forces And Resources For A New Century, was written in September 2000 by the neo-conservative think-tank Project for the New American Century (PNAC).

The plan shows Bush's cabinet intended to take military control of the Gulf region whether or not Saddam Hussein was in power.

(snip)

The PNAC report also:

(snip)

- hints that, despite threatening war against Iraq for developing weapons of mass destruction, the US may consider developing biological weapons -- which the nation has banned -- in decades to come. It says: 'New methods of attack

-- electronic, 'non-lethal', biological -- will be more widely
available ...
combat likely will take place in new dimensions, in space, cyberspace,
and
perhaps the world of microbes ... advanced forms of biological warfare
that
can 'target' specific genotypes may transform biological warfare from
the
realm of terror to a politically useful tool'

Now, as for the corporate world telling US, we believe Laden is guity without evidence: A reasonable person doesn't have the justification to believe the unsubstantiated verdict. This is why the fascists at CNN propagandized, TERRORIZED, the American public by falsely alledging that Laden threatened to nuke America, or that he stated to murder any or all Americans like a bush would. Laden, like Saddam, or Arafat never was actually quoted to be that ignorantly stupid as a leader trying to communicate to the People, but for by CNN, and the sharon types regarding "Palestinians", as a lie to themselves to excuse their responsibility to ourselves as the humans. But EVEN IF TRUE, wouldn't make Laden responsible for every wrong doings the bushmob was actually responsible for, like robbing all Americans of their livelyhoods, unreported by CNN of course, to leave ourselves to fall victim by the bush regime as shysters pirating America, by shredding the Holy Constitution. However, Laden has skated near with the label "Jew", to be of the criminal, intolerant, offensive, fascist, bigoted jewish Israeli government, that imprisons or murders real Jews for being JUST that. Rabbi Hillel would be jailed by sharon in the israel of today. Wise Muhammad teachings cover this dumb Jew Christian thing well, as us all suffering by the illiterate evil dumbfuks who ignore ourselves, to steal our established values, while CNN, like Art Bell, forbids debate on their irrational falsehoods, refusing to protect the FBI, or the American flag through practicing censorship, while advocating murder, as Art Bell, the traitor, does almost daily, while hanging up every human caller.
Next, CNN will be blaming ALL the poor and starving in the third world, for secret Pentagon frauds through the removal of the False Claims Act. As, the American nation contributes the least to the world in aid, in relation to the GNP. (The give and take.) 5 billion a month to not feed, but murder innocent people in Afghanistan?
Destroy bush now, and be loved by all as God.

Hey, great! You've actually read this far. Say,
listen... Google, for one reason or another censors my,

and who knows who elses, posts for fear from the bushmob. The bushmob through Google 'Groups' has no problem with posts encouraging war crimes by bigots, but my rational posts regarding the nature of Justice, they have determined for US, is inappropriate, while bush prepares to criminally war our world to actually do so as an unelected mass murdering nazi savage. So I ask you to have faith in living, and give us your thoughts on this for yourself. When it's reposted, it makes it far more difficult to disect from public viewing, and gives the likely good people at Google, a viable excuse to not continuing to do so against our better interests. To comment this post with whatever position you may have regarding these important subjects, doesn't mean you agree that we are God, or I'm simply Johnny Wizard, but for open free communications regarding the true political state of ourselves worth being heard from. Murdering innocent people for evil bush and rumsfeld to steal from ourselves, is a sacrifice in cowadice, I for one, refuse to stand for as the living. How about you? Public rebutals regarding my supreme stupidity are found in alt.sercurity.terrorism.

Thanks friend,

Johnny Wizard

All Wrapped Up

CBC as managed has deliberately with intent, worked to misinform and propagandize our community on what is as, documented provable fact, regarding Mr. bush's complicity to the murder of US as the innocent in New York City. CBC has refused to live up to our responsibility to protect our democracy, and in silence, has pirated our names to murder those understood to be innocent of the accused offence. CBC has refused to allow ourselves as the public to understand, Mr. bush forbade the FBI from pursuing bin Laden investigations, just prior to 9/11 with secret Presidential directive W199I (199I WF213589), which had John O'Neil, the anti-terrorism head for the FBI publicly protest by resigning over. This W199I directive was put into place after the administration had been warned by the BND, and several other legitimate intelligence agencies, of an impending terrorist plot involving the high-jacking of American airplanes to be used as weapons and flown into land marks. In addition to these unreported top priority political issues that stand to be true as documented factually, the bush administration had also secretly put together a sinister war strategy, that was revealed to ourselves as the public, by Canada's own Jim Miklaszewski at MSNBC, to have existed without any doubt as Presidential Directive documents, two days prior to 9/11 at the WhiteHouse. A planned strategy to invade specifically Afghanistan, by blaming bin Laden for a crime, but providing no evidence to back up the allegations. That's right. The super evil criminal bush dictatorship had a plan in place to not follow the actual evidence to arrest the true culprits for a crime that hadn't even yet taken place, but that they were prepared for to close investigations on, as an opportunity to invade specifically Afghanistan, propping up the Northern Alliance who still practice the barbarity of sharia law, with the bush bonuses of selling heroin to our world, and most importantly, building a liquefied natural gas pipe line for bush and his Enron friends, to rob even more further from us all. Legitimate FBI officers unrepresented by Mueller claim General Amad was the principle terrorist funder of Muhammad Atta, responsible for a wire transfer of $100,000, who, incidentally was in unusual meetings, the General was, with the bush administration a week prior to 9/11, who also not only participated in meetings with several top officials in the Senate Intelligence Committee, but also, was reported to participate in building the war strategy of invading Afghanistan, as the reported desperate excuse offered for the General being there just prior to 9/11, and also, was personally responsible for negotiating the non-surrender of bin Laden, of which the ISI claimed, the General advised the Taliban not to do so because, no evidence would be offered, nor public trial for an offence bin claimed he played no part of.

We are all in agreement, in truth we rise, evil is just the deceived disguised. Boo!

The case is wrapped up, and bush and rumsfeld need to be immediately arrested for 9/11, for murdering countless thousands for stolen gain, at the losses to our humanity, that show through every putrid utterance of scum bucket bush, as contempt for our living as humanity through Law. Where a person accused of a criminal offence without any evidence is clearly innocent. For why I ask you reader, would any unjustified leader of US people blame someone for a crime who wasn't linked to the offense, while working to close investigations, and not follow through with the ample clues to capture the true evil doers? Just how cowardly stupid can soldier families be taken without conviction as themselves worth fighting for?

Justice for all, and glory be to godly.

RITTER PUTS HOLES IN CHENEY'S ALUMINUM TUBES STORY

Posted By: Rosalinda
Date: Tuesday, 10 September 2002, 11:50 a.m.

[source: CNN, Sept. 9]

RITTER PUTS HOLES IN CHENEY'S `ALUMINUM TUBES' STORY AND OTHER LEAKY EXCUSES. In an interview iwth CNN today, former UN Weapons Inspector Scott Ritter ridiculed the latest concoctions of the Mega crowd to justify an attack on Iraq. Excerpts follow:

PAULA ZAHN (CNN): I want to have, hear your reaction to the whole range of Bush Administration officials yesterday who said .. that Saddam Hussein has been trying to obtain materials to build nuclear weapons, particularly trying to buy thousands of aluminum pipes that could be used in the manufacture of a centrifuge and ultimately used to manufacture weapons.
What do you make of that?

RITTER: What an absurd statement. Thousands of aluminum pipes, and we're going to go to war over thousands of aluminum pipes? Even the IISS report that you cite says that if Iraq was to have trying to do uranium enrichment, it would take them many years before they could do it. This is patently ridiculous. These are aluminum pipes coming in for civilian use. They are not being transferred to a covert nuclear processing plant or any covert nuclear activity whatsoever.

But the best way to figure this out is to send the weapons inspectors in. If they, if the United States has this evidence that Iraq has these pipes, why not, heck, give me the data. I'll come to Iraq, hunt it down and we'll bring it to a close. That would save us going to war, killing thousands of people and destroying our reputation in the international community.
We cannot go to war because Vice President Cheney's worried about some aluminum pipes. This is ridiculous....

ZAHN: Let's talk more about what some say is the only independent voice in this whole argument, and that is the International Institute for Strategic Studies.... In this report, it suggests ... that Iraq could make a nuclear weapon in months if it had foreign help.

Let me read to you what the conclusion was, that, "War sanctions and inspections have reversed and retarded but not eliminated Iraq's nuclear, biological and chemical weapons and long range missile capabilities, nor removed Baghdad's enduring interest in developing these capabilities."

RITTER: Paula, what do we have here? Rhetoric? Where's the facts? "Enduring interest" in weapons capability? What does that mean? What evidence do they cite for this "enduring interest"? You know, ballistic missiles. They say he has 12. What, did they grow? Where are they? They didn't have 12 when I was a weapons inspector.

Chemical weapons? Biological weapons? They talk about bulk agent in terms of Iraq's biological weapons program. What bulk agent? Where did they make it? A bulk agent has a three-year lifetime in terms of storage in ideal conditions. The last time Iraq was known to have produced bulk agent was in 1990. That stuff, even if they held onto it, is no longer viable. So to have bulk agent today, Iraq would have had to reconstitute a manufacturing base in biological weapons. Where is it?

This report is absurd. It has zero factual basis. It's all rhetoric. It's all speculative and, frankly speaking, it's meaningless without, you know, with the sad exception that hawks in the Bush administration are going to point to this as justification for war....

ZAHN: What makes you think that if UN weapons inspectors went in now, after not being on the ground for four years, it would be any different than the last time around, when Richard Butler, who was the chief UN weapon inspector, said the Iraqis often moved stuff when they knew you guys were going to be on the ground?

RITTER: I had been there since 1991 working under Ralph Ekeus, when the vast majority of the actual disarmament took place. By the time Richard Butler came, we had already destroyed Iraq's weapons programs. We were hunting down for, you know, missing items, you know, a piece of metal here, some documents there.

And, yes, Iraq could have moved them, but this does not constitute a weapons program. It's illegal, and this is what inspectors need to do, come back here, finish the job so that Iraq can get on with rebuilding its economy, etc. But, you know, Richard Butler knows for darned sure that the Iraqis were not moving weapons from his weapons inspectors.

The weapons inspectors were trying to get into some of the most sensitive facilities in Iraq that dealt with presidential security. I was the guy leading these inspections and Richard knows that he allowed the United States to use my inspections to spy on Iraq, which is why they don't trust the inspection process.

So let's not bring up Richard Butler. Frankly speaking, he has no credibility on this issue.

ZAHN: I still don't understand why you think the inspections will be any different this time around. The administration seems convinced that if Iraq had nothing to hide, they wouldn't have broken all these UN regulations and they would have allowed inspectors in over the last four years.

RITTER: Come on, Paula, let's be fair. The administration knows that the Central Intelligence Agency used the weapons inspection program as a Trojan horse to insert intelligence collection capabilities to go after Saddam Hussein....

You know, I know that inspections did work. We achieved a 90 to 95 percent level of verified, absolutely certain accountability for Iraq's weapons program, including all the factories and associated production equipment. This is why I'm just amazed when I hear reports coming from the IISS that Iraq suddenly has the capability. Where did it come from? Did they suddenly grow factories? ...

... Let's get the inspectors back in, let's get them to find out what the ultimate disposition of these weapons programs are and if Iraq has no weapons of mass destruction program, thank goodness, we just diffused a war. And I think that's a good thing worth trying to do.

From the well recomended document:

US Intelligence and the Terrorists: Pre-9-11

... June 6, 2001. German intelligence warned CIA.

(A) The German intelligence agency, the BND, warned both the CIA and Israel that Middle Eastern terrorists were ``planning to hijack commercial aircraft to use as weapons to attack important symbols of American and Israeli culture.'' This intelligence reportedly came from Echelon, a high-tech electronic surveillance system used by the intelligence agencies of several nations to glean through electronic communications for certain keywords. It was first reported by the German daily newspaper, Frankfurter Algemeine Zeitung on September 13. Its sources were reportedly from the BND itself. (Gembeimdienste 6-6-2001; Stafford 9-13-2001; Ruppert 11-2-2001; Ruppert 11-27-2001; Ruppert 4-22-2002; Martin 1-5-2002; Martin 1-16-2002; Thomas 5-21-2002)

According to Gordon Thomas (5-21-2002) of Global - Intel, the original source of information actually came from Israeli Mossad agents operating in the U.S. who had infiltrated al Qaeda. According to his account the Mossad also informed British and Russian intelligence about the attacks, who then in turn notified the CIA. Thomas's sources are allegedly informants within the Mossad itself.

As of April 22, 2002, no challenges to this information has been reported. ...

Also, it has also been alledged that the German embassador Ischinger, On Monday 6, August, 2001, had met bush personally, and during that meeting, the Bundesamt fur Verfassungsschutz [German domestic secret service] and BND [Bundesnachreichtendienst, German foreign secret service] finding was once again reiterated in person.

From below:

"Mr. bush you nazi vermin, you attack my America, you attack US all. American soldiers will not sit back as cowards entirely, and watch you sacrifice our lives as worthless without meaning."

I think I love you too much

Wow, your amazing! So, what your saying is bush the nazi tyrant, the unelected mass murdering fascist dictator, has no interest following the ample criminal leads, because they lead to him, rumsfeld, and cheney likely too, right? And, when that evil monster told us instead he would rely on secret evidence, but couldn't tell us why, as too the FBI or CIA, it turned out to be nothing but another wicked evil deception against the great American people, Tony Blair, bin Laden, and law enforcement officers everywhere, to even further give him cause to close investigations into 9/11 as Reuters told us, and rob directly from American soldier families, their lives, pensions, life savings, and blind faith, in bush, the false diety, super evil anti-Christ.

Johnny Wizard is my Hero.

Weak Pathetic Coward Nazi Bastards

American soldiers are weak pathetic coward nazi bastards. The recorded evidence stands before all of our humanity, while CNN silently pleads ignorance on what is clearly established as documented fact, regarding Mr. bush and rumsfelds' complicity to murdering thousands of American citizens, stealing from all Americans the principles of which the American flag once represented, now unprotected by corporate dictates. Encouraging American soldiers to further sacrifice their dying rights, to murder potentially hundreds of thousands more for bushs' nazi conquests against ourselves further unprotected by nazi traitors at blitzer's war room. ("War Room" is the term used by nazi CNN nosearch big pay do squat staff who routinely work to keep America uninformed with their secret from no one, refusals to protect Americans for the bush regime, like in the case of "The False Claims Act", or evidence requirement to convince US who is evil.) You do five minutes research on the Anthrax suspect, and you come up with Dr. Phillip Zack, but what does CNN do to protect the American people? Nothing but mention Hatfill, not even still a suspect according to REAL FBI sources, who, you'll notice, Mueller or Ashcroft never if ever mentions, like point number six of Coleen Rowley in Time regarding treason at the highest level. Mr. tommy franks, the nazi traitor heroin pusher, runs death squads in Afghanistan, executing countless children as our own, but what does CNN say on behalf of our families?

http://www.theithacajournal.com/news/stories/20020525/topstories/380284.html

Nothing, but to refuse a voice to those they know murdrered in their names as nazi facists, refusing to allow open honest discussions on the true political state of the Union. Publicly advocating to be accessories to the murder of ourselves, refusing to make any attempt to stop bush from continuing to murder their our own families, and stealing from our nations the concept of Justice for ourselves, (Never mind America's own life savings STILL sitting in the Cayman Islands. (Thomas White.)) while advocating even more murders and thefts against the innocent, because soldiers are too

weak as colateral damaged disfunctional illiterates, to
stand up proud for the American people as equals. Under
the Bill of Rights, as justice for US all, truly brave
and strong, as the saviours of ourselves to be free as
individuals, humanity, WE will never surrender as slaves
to the false diety, anti-Christ, Our Mr. bush Jr.. The
lawless nazi facists mass murdering tyrants, Mr. bush,
bogus cheney, and rumsfeld, are the ememies of America
as the free world, who as WE, will no longer except
lying down to the continuing corporate silence of
surrender, to take us as dead and forgotten, as not
worth our time of day, to stand for yourself, as a
living breathing human.

Johnny has spoken to several hundred at CBC and CNN
including the CEO's of both, regarding the evidence that
no one has yet, suggested they find any contention with.
Destroy bush and rumsfeld American Patriot Soldiers, and
be loved by all as family.

Hello Paul,
I am guessing this is the radio controlled fighting robot project.
Did you sort out your small tuned whip aerial and coax
feeder cable?  Did you manage to get rid of the original
dangly aerial wire and modify the receiver input  Z to  50 ohms ?
If you did all that already, it should be working great!
What has happened?

Before you go into hi-tech mods. Tell us what is not
working properly.

 I am assuming your robot's electrical gear has
suppressers  fitted.  All the loose moving mechanical
 bits that can cause electrical noise have little braids
 of solder wick type material across the moving joints .

I am assuming your radio receiver is running off a
separate battery supply to the main motors and
contactors and other solenoids, grinding discs and
chopping arms.

Over to you Paul, just interested.
Regards,
John Crighton

Ray,

I believe the yellow indicator is channel activity which isn't using
the same tone (selcal, pl ?) frequency your RX is set to.

There is a small button above the PTT which should open the squelch.

Mark.

Assuming it is a passband filter...

Mix downto 10.7MHz, using 50.7Mhz or 29.3MHz local osc.

Pass through crystal filter.

Mix back up to 40MHz using same Local osc.

Look at MiniCircuits Double Balanced Mixers.

Look at RFsim99 as a design package which will autodesign filters
which will tranform impedence (50 ohm to xtal filter and back).

Look at MiniCircuits power splitter/combiners to feed the DBMs from a
single LO source.

Not sure the easiest way to generate a clean LO - probably a custom
cut Xtal and a coupel of xsistors, see ICMFG.COM. The osc needs 3dB
more power than the LO input of the DBMs with a splitter.

Digikey have some Xtal filters digikey.com.

Hope that is a start.

Mark.

Have a look at Icom, Yaesu or Kenwood commercial HF radios you should
be able to pick them up for about US$1000.00 new.

If you want I would be able to put you in touch with a company in SA
that should be able to help you or give you contacts in Malawi.

If you need selcall then we can help you with that. We deal with a
lot of the Aid/Missionary/NGO type organisations.

Good luck

Alan

>If you did all that already, it should be working great!
>What has happened?

Thanks, John. It's just another way of dealing with the problem, TBH.
At first I dismissed the idea of any form of rx pre-amp on the grounds
that it might drag in all the stray RF from everything else and just
make the problem worse. But then I considered it further and came to
the conclusion that it might be worthwhile if such a pre-amp could be
combined with an effective filter to keep all the crap out. Doing it
this way, I can have total control over the impedances and ensure
maximum receptivity to the desired signal.
The other alternative - my first choice - was to simply boost the TX
power, but there's always the risk they may introduce some arbitrary
power limit in the new 2003 Rules (due out anytime now). So
concentrating on the rx side of things has to be a safer bet - they
can't very well proscribe better, more sensitive receivers!

>Before you go into hi-tech mods. Tell us what is not
>working properly.

Nothing yet, but I want to ensure that I minimise the risk of having
it all go tits-up again when we get to the studio. The main problem is
you can test and test and test these models up to 300yds away and
they'll perform faultlessly in normal conditions, but you'd be lucky
to get 30 feet in the RF-hostile contest environment. Hence the
necessary "pre-overkill" on comms reliability.

> I am assuming your robot's electrical gear has

You assume wrong. But it's a good idea and I'll implement it where
possible!

>I am assuming your radio receiver is running off a
>separate battery supply to the main motors and
>contactors and other solenoids, grinding discs and
>chopping arms.

No, John. It *was* last time, but we couldn't guarantee adequate power supply from a separate smaller battery. Now *everything* runs off the main power batteries via IC droppers, suppressor caps and ferrite beads. It may not be ideal, but what is?

You're an excellent example of a fairly common problem.
You think your complete detachment from reality, i.e.
insanity, makes you some kind of oracle.  In fact, you're
just another logorrheic shithead.

> [ much gas    snipped ]

Get a job, cretin.   Try to keep your hands out of the hot oil.

Hello Paul, just keep it simple.
We are only talking 50 yards range.
Get rid of the wire aerial.
From your new BNC connector, use some miniature 50 ohm coax,
a small series capacitor, and connect to the other side of the
aerial tuning coil.
Measure the sensitivity of the Rx using the RF sig gen.
If tens of micro volts, then you are winning.

The lack of a good tuned aerial is your week link.

Have a look here
http://homepages.which.net/~paul.hills/Radio/Radio.html

I reckon, using a Rx, with lower than normal sensitivity, and a
good tuned aerial will work to your advantage in your high
noise, low range, application.

>But then I considered it further and came to
>the conclusion that it might be worthwhile if such a pre-amp could be

I say, concentrate on your Rx aerial first.
I don't think you will need amplifiers and extra filters.

Bypass that aerial tuning coil, fit the coax cable, tell us the Rx's sensitivity.
Yes, "overkill" on the tuned whip aerial.

Sorry to keep hammering the importance of getting your whip antenna right first up, before worrying about your filter.   :-)

Regards,
John Crighton

Typical new ham 2 meter QSO (mobile) between Ham A & Ham B

A: where are you now?

B: i'm on highway 1

A: can you hear me?

B: a little scratchy, how do I sound?

A: okay, where are you now?

B: about 1 mile further than when you last asked

A: should we change repeaters?

B: lets try this one a bit longer

A: how much power are you running?

B: about 50 watts, can you still hear me?

A: yes, can you hear me?

B: yes, where are you now?

A: i'm on highway 2

B: how much power are you running?

A: about 50 watts, can you still hear me?

B: yes, still scratchy

A: should we change repeaters?

B: this is okay, can you still hear me?

A: yes, can you turn up your power?

B: no, where are you now?

A: still on the highway,

and it goes on and on and on..........

Kinda remindes you of that DUMB Cell Phone comercial....

"Can you hear me now?" "Can you hear me now?" yada yada..

Bob

RF Transfer Relays
TS-15-F-SMA-I-SD-DE9P-C+ (we have 6, new price was $316) DC to 18GHz Coax Transfer Switch Failsafe Actuator with suppression diodes and indicators, 15VDC, 9 pin D sub-min interface, 0.5dB insertion loss max, Power Handling: 400W @ 100MHz, 175W @ 1GHz, 60W @ 10GHz. K & L purchased by Dow Key. I have a more complete spec sheet in PDF. Please e-mail if you want the more complete sheet. And Pictures
$45 each

Andrews WR-75 90 degree waveguide bend. P/N 55221-75-E708D. I was planning to use this on my 10 ghz equipment , but I changed my mind. Pictures available by e-mail
$65

Power One Open Frame 28 vdc power supply. Power One Model HC-28 2-A. 28vdc at 2 amps. Tested and working..
$20

Aydin 14.0-14.5 ghz GaAS Fet Microwave PreAMP P/N A22796 rev A. 20 db gain + 15 vdc. I tried to use this on my 10 ghz equipment. it raised the noise floor of the receiver, but would not pass a signal...
$20

Mini-Circuits ZFSC-2-10G 2way splitter new price $70) 2GHz - 10GHz 1dB insertion loss above 3dB split, 12 dB isolation
$35 each

Litton 8 - 18GHz Type L-2384-02 Tube
This is a microwave tube. I have NO data on it and I have NO way to test it.
$50

New in the Box VICOR MEGA MODULE DC-DC Converters. Model number VI-M3L-CS Input: 48Vdc 400Watts Output: 28Vdc 300Watts Operating Temperature Range -20 C to +85 C Requires mount to Heatsink. Full MFG.'s Data Sheet at

http://www.vicr.com/products/datasheets/ds_megamod.pdf

App Notes also available http://www.vicr.com/

New price was about $375 each... $100 each

4.2 - 5.0 GHz 1/2 Watt linear driver Amp; 1 Watt Sat power; 47dB gain nominal at 1/2 Watt power output. DC Input: +12V 0.5A. Tested and working. Supplied with lab test data sheet. $50

I have jpegs on all items above.

You may well be right. I'm unaware of any leading competitor that uses anything over and above simple good quality screening and earthing in their particular controllers.

>I say, concentrate on your Rx aerial first.
>I don't think you will need amplifiers and extra filters.

Probably not. But after 2 failures, it's *highly* tempting to go for overkill for next time out!

>Bypass that aerial tuning coil, fit the coax cable, tell us the Rx's
>sensitivity.
>Yes, "overkill" on the tuned whip aerial.

>antenna right first up, before worrying about your filter.   :-)

Any suggestions as to how I pin down that tuning coil? I assume it'd be the largest one nearest to (what's left of) the wire out for the antenna?

p.

>p.

Hello Paul,
I think we are at cross purposes here. I am not suggesting
that you do a less than top quality job. I am trying to help
you do a good job.

Make a good antenna.
Paul Hills web site explains about the whip aerials. (50 ohm)

Provide a coax feed (50 ohm) Use common RG 58

Modify your receiver to take the 50 ohm BNC connector.
Fit the Rx in a die cast metal box. Use several inches
of miniature 50 ohm coax from BNC connector on the
die cast box to the Rx's printed circuit board.

You will need to use an RF signal generator which is a
piece of test gear that simulates your transmitter. It has
frequency dials, modulation controls, and attenuator controls
to vary the strength of the signal being injected directly
into the Rx under test. You use an instrument like this
to measure your Rx's performance. Sensitivity, selectivity etc.

I thought you must have a Sig Gen already. Otherwise how could you check your proposed filter without one?

I think I told you on another thread that you can pick
up a good used old signal generator quite cheap.
Have a look here, just for the pictures only.
http://www.shopingathome.com/Test%20Equipment.htm
The third, fourth and fifth pictures down are examples
of good old gear than can be picked up cheap.
The TF144 H/4 that is shown pictured . I picked up
one like that for $10 (four quid in your money)
at a ham fest.

I am guessing, you will need an FM signal generator
which will cost more. But still peanuts, because it is
big, bulky, heavy and has valves. If you want a
smaller more modern sig gen then you have to start
parting with serious money.

Getting back to your receiver,
Draw out on paper the input circuit where the aerial wire
connects. The aerial tuning coil is probably the one you
mentioned above. Using a coax lead from sig gen with
miniature clip leads on one end, make sure you have
a small capacitor in series with the clip lead when you
go poking around in the Rx. So that you do not put
DC back into the 50 ohm attenuator accidently.
Connect your sig gen either side of that coil and you
should hear a noticable diference. Now I am jumping
the gun, I am assuming that you have located a monitoring
point for audio.   Going to be hard without a circuit.
This is fun isn't it!

I would not be surprised if Paul Hills has got a circuit
diagram of your Rx already. Ask him, he collects circuits.
What brand of RC set do you have ? Talk to Paul Hills.
He might have a recommended modification procedure
for connecting coax cable into the Rx with a good
50 ohm match.

Paul, without test gear, you are making this hard. :-)
Lets get some receiver sensitivity figures by reading
the attenuator dial on your sig gen. If the sensitivity
and selectivity are no good, then the boys here will
chuck circuits at you, for sure.
Regards,
John Crighton

You're aware that a switcher produces higher harmonics ?
I recently measured a 600kHz stepup and there were spikes
to be measured with 600MHz and more.

even if you're thorough on filtering your switchers,
are the others as good ?

Rene

Oh yeah. The "trend" is everywhere. One other thing I notice, is the use of a repeater with to mobiles 1/2 mile apart. Real swift! Never even think of using simplex. The key word is "think".

There's a new email reflector for hams in the Ocean County, NJ area. Visit http://groups.yahoo.com/group/ocar for more information or send a blank email to ocar-subscribe@yahoogroups.com. The list is for hams in the Ocean County, NJ area to chat. The topic doesn't need to be ham related, but should be of general interest to those on the list.

Ah come on -- stereotyping at its worst.

Here in CA a typical repeater has numerous discussions on VSWR, homebrew antennas, installing mobile rigs and antennas, what is CTCSS, PSK31, packet, software for Hams, antique radios and boatanchors, towers, DX, Contesting, IRLP, echolink, ILINK, long range interties, ATV, Microwave, RTTY, QRP, Slow Scan, auto noise abatement, stealth antennas, etc. Some have Ham help nets for newbies and oldies. Nets on off-road, hikers, microwave, NTS Traffic, ARES, sailors net, CW practice, youth groups, YL nets. How a repeater works -- duplexers, controllers, offset, tone encode, tone decode, crossband repeat. Lots more.

Non tech subjects such as history, old cars and restoration, welding techniques, aviation, trivia, digital cameras and printing, computer usage, printers, scanners, computer op systems and lots more.

If you repeater doesn't sound like this, suggest you institute interesting nets as above, ham help nets, emergency news and ARES nets.

Ask the other ham what they do for a living, we have lawyers, clergymen, marines and sailors, military jet pilots, a submarine commander, and just about every discipline imaginable, even a Llama rancher. Interesting discussions can often be heard on our repeaters.

Routine yeah as mentioned, commuter position reports, radio checks, blah, blah, -- but hey your friends do that all the time - don't they??

The aspiring elmer having scribbled is clear and off to the ARES net

My wife and I use simplex over repeaters most of the time.We get good, 10-20 miles from home to car. Figure people don't want to hear, "Mommy (Daddy), I love you and miss you, from our 6 1/2 year-old son.

I agree with AE.

Some repeaters are like the OP mentioned, but there are many which have interesting conversations which happen to be ON the radio, not just ABOUT the radio.

In the Boston area, the Waltham 64 repeater on 2M is especially lively, with the "Going In Show" and the "Going Home Show" during commuting hours. Those conversations tend to cover a large number of topics in a very intense way.

Also, there are various specialty nets in the area, including message traffic handling, RACES, Skywarn, a Youth net, an emergency services net, etc. Many clubs have a weekly net, which allows all members to stay in touch outside of meetings. Some large scale PS events have set up a net a week or so before the event, for Q&A, as well as all to test their radios on the primary frequency.

When hiking, I bring my HT along and try to catch repeaters from each summit. I've had some interesting conversations with people some distance away. This helps me understand the range of my HT for emergencies, and allows those I am hiking with to see ham radio being useful.

```
Happy trails,

Hi,

I'm looking for a HP 8568B spectrum analyzer for less
than $1500 that Ebay wants for it. I'm doing radio testing
and measurement of received HF signals to a frequency
accuracy of about 10 Hz (no I don't need the 1.5 GHz
upper end of the 8568, but I need the frequency accuracy
and low noise floor at narrow BW - that's why the HP 141T
won't work).

Does anyone have one of these lying around, gathering dust,
that they'd like to part with to a budding radio engineer?
This is for personal/ham radio design use only.

I'm in Medford, Massachusetts, if that helps.

Thanks,
Paul

p.s. Yes, I already have a great dual trace Tek 7603 scope
and Tek freq counters and RF signal sources. But thanks
anyways! (Thanks, Dick! QSL?)

On Sun, 02 Mar 2003 02:46:30 GMT, john_c@tpg.com.au (John Crighton)
opined thusly:

>Hello Paul,
>I think we are at cross purposes here. I am not suggesting
>that you do a less than top quality job. I am trying to help
>you do a good job.

I don't doubt that for a moment, John. No such implication was
intended and my apologies if that was how it appeared.

>Make a good antenna.
>Paul Hills web site explains about the whip aerials. (50 ohm)
>
>Provide a coax feed (50 ohm) Use common RG 58
>
>Modify your receiver to take the 50 ohm BNC connector.
>Fit the Rx in a die cast metal box. Use several inches
>of miniature 50 ohm coax from BNC connector on the
>die cast box to the Rx's printed circuit board.

Well, I've done this, but don't bother using co-ax *inside* the metal
box. I rely on the box's shielding properties in that area and simply
hook an ordinary wire from the inner of the BNC to the antenna
connection point on the rx's PCB. Surely that's okay?

>You will need to use an RF signal generator which is a
>piece of test gear that simulates your transmitter. It has
>frequency dials, modulation controls, and attenuator controls
>to vary the strength of the signal being injected directly
>into the Rx under test. You use an instrument like this
>to measure your Rx's performance. Sensitivity, selectivity etc.

I had one of those up until a few years ago when I got stuck for space
and had to ditch it - in the dustbin! Probably quite collectable now
it would have been, too. :-(Fortunately, however, I do have access to
another one.

>I think I told you on another thread that you can pick
>up a good used old signal generator quite cheap.
>Have a look here, just for the pictures only.
>http://www.shopingathome.com/Test%20Equipment.htm
>The third, fourth and fifth pictures down are examples
>of good old gear than can be picked up cheap.
>The TF144 H/4 that is shown pictured . I picked up
> one like that for $10 (four quid in your money)
>at a ham fest.

I plan to visit one just as soon as there's something organized in my
area.

>I am guessing, you will need an FM signal generator
>which will cost more. But still peanuts, because it is
>big, bulky, heavy and has valves. If you want a
>smaller more modern sig gen then you have to start
>parting with serious money.

I've never understood why these more modern signal generators cost so
much, John. Someone's obviously making a pile of money out this
business.

>Getting back to your receiver,
>Draw out on paper the input circuit where the aerial wire
>connects. The aerial tuning coil is probably the one you
>mentioned above. Using a coax lead from sig gen with
>miniature clip leads on one end, make sure you have
>a small capacitor in series with the clip lead when you
> go poking around in the Rx. So that you do not put
>DC back into the 50 ohm attenuator accidently.
>Connect your sig gen either side of that coil and you
>should hear a noticable diference. Now I am jumping
>the gun, I am assuming that you have located a monitoring
>point for audio.   Going to be hard without a circuit.
>This is fun isn't it!

I have to confess that unlike a lot of folks, I'm totally lost without
a schematic. I'll have to check out your suggestion of Paul Hills.

>I would not be surprised if Paul Hills has got a circuit
>diagram of your Rx already. Ask him, he collects circuits.
>What brand of RC set do you have ? Talk to Paul Hills.
>He might have a recommended modification procedure
>for connecting coax cable into the Rx with a good
>50 ohm match.

This is the bit that worries me. Firstly establishing the input
impedance of the amp and then getting it to match the coax's impedance
(and the whip ant of course).

>Paul, without test gear, you are making this hard. :-)

I'm sorted for test gear, John. That's the least of my problems!

>Lets get some receiver sensitivity figures by reading
>the attenuator dial on your sig gen. If the sensitivity
>and selectivity are no good, then the boys here will
>chuck circuits at you, for sure.

How am I going to go about measuring such figures? It seems to me, on
the face of it, to be a bit of a daunting prospect.

Hello Paul,
We can help you here.

First of all, what is the brand/model number of the
Signal Generator you have available?

Is your RC set AM or FM?
What is the brand/ model number?
Maybe it is on the web so that we can see it.

Over to you Paul,
John Crighton

Hello Paul,
Not good practice. We are doing a top job, remember! :-)

This is where you use the miniature teflon coax, that I
was mentioning before. It is about 1/8 inch diameter.
If you look inside an old two-way, taxi type radio, you
will see how neatly the coax lead dress is done on
the printed circuit boards. This tiny skinny coax
is very common, you should be able to find some in
junked two-way radios.

Getting back to your die cast box and Rx.
Strip the outer insulation of the coax.
Have about one inch for your inner conductor
and 1/4 inch for the braid.
Solder the braid to the common or ground plane,
zero volts, negative on the Rx's printed circuit board.
Solder coax inner conductor to the other side
of the aerial tuning coil.

Ensure that the BNC connector's body is making a
good connection with the Die cast box.
Scrape away any paint. I am stressing this because
I have been caught before.
For the mini coax on the BNC you will probably
have to use a solder lug, under the nut, for the braid.

You can make your skinny coax lead inside the box
several inches long so that there is ample flexibility
for working on your unit.

Sorry to hammer that point Paul, but you would have
had a big gound loop, which is no good.

Back to you Paul,
John Crighton

Amateur Radio Newsline™ Report 1333 – February 28, 2003

Amateur Radio Newsline™ report number 1333 with a release date of Friday, February 28 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. An amazing feat. Alaska to the United Kingdom using one watt on 136 Khz. Find out who did it and how on Amateur Radio Newsline™ report number 1333 coming your way right now.

(Billboard Cart Here)

**

RADIO RECORDS: UK TO ALASKA ON 136 KHZ

Reaching Alaska from the United Kingdom using just one watt ERP is quite a feat for any band, but Laurie Mayhead, G3AQC, has just achieved this on the 136 kHz band. And in doing so he has set a new record. RSGB Newsreader Jeramy Boot, G4NJH, has the story:

--

In the early hours of the 15th of February he transmitted to KL1X in Anchorage, and just before UK dawn at 0615 his callsign was clearly identified. G3AQC was using QRSS - very slow CW - with a 60-second dot period. The distance was 7278 kilometres, a record for one watt ERP on 136kHz.

Last year G3AQC became the first person to cross the Atlantic on the 73kHz band. KL1X is perhaps better known to UK amateurs as Laurence Howell, GM4DMA. Laurence said, "What is more surprising than the distance is that the path is notoriously poor between south-east Alaska, on the east coast of the Pacific, and Europe.

The signal would theoretically go on a great circle route to nearly 80 degrees north, over the northern Canadian Arctic, northern Greenland, east of Iceland, Glasgow, then over the UK to the South Coast - across and through the Auroral oval. There are some thoughts that the actual path might have gone round or even under the Auroral zone as no Auroral Doppler was seen on the received signal."

--

A lot of research and preparation work was carried out by G3NYK, G3LDO, W3EEE and W4DEX. This pre-planning is probably in good part responsible for helping to set this new work 136 kHz record. (GB2RS)

**

ON THE AIR: THE 5 MHZ EXPERIMENT - AN UPDATE

Also from the United Kingdom comes word that progress is being made with the analysis and future direction of the 5 MHz band experiment. This, following a meeting between members of the 5 MHz Working Group and experts from the Rutherford Appleton Laboratory. As a result, work is now under way to convert contact logs to a computer readable form with analysis results by April.

The meeting also looked a the fundamentals of the 5 MHZ experiment and came up with a number of suggestions of ways of improving how it should be conducted in the future. These ideas will require further development and consideration by the full 5 MHZ Experiment Working Group. It is hoped that this experiment and others conducted around the world could eventually lead to a new ham radio band. (RSGB)

**

RADIO RULES: ARRL CONCERNED ON PROPOSED 70CM CHANGES

Back on this side of the Atlantic the ARRL says that its concerned about two FCC proposed actions. Its says that both could negatively affect Amateur Radio and it has made its position known in comments filed to the FCC.

Of the two proposals, the one with greatest impact comes from the National Telecommunications and Information Administration. It would greatly increase the geographical area in New Mexico and western Texas where amateurs in the 70 cm band would be limited to 50 Watts peak envelope power to protect military radiolocation operations.

The ARRL says that there are 67 Amateur repeater in the proposed area. It says that most of these are far beyond line-of-sight paths to any military facilities. So the League has asked the FCC and NTIA to cooperatively evaluate the proposed restrictionton to determine whether it is overly broad. The ARRL adds that weak-signal operations in the region could also affected.

The other propsal comes from the National Weather Service. It wants to deploy wind-profiler radars in the 448 to 450 MHz segment of the 70 centimeter band. Here, the League says that it understands that the National Weather Service would notify ARRL of their locations as selected. The League notes that amateur repeaters are incumbent in the band at this time. It suggests that the National Weather Service select sites that minimize the effect on repeaters in that part of the band. (ARRL)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WR4AMS repeater system serving all of Eastern Kentucky.

(5 sec pause here)

**

ENFORCEMENT: HAM TURNS IN LICENSE FOR RUNNING UNLICENSED BROADCAST STATION

A Berkley Michigan ham radio operator has turned in his ticket after the FCC finds he has operated an unlicensed radio station. The Commission's Daryl Duckworth, NNZ0W, explains:

--
Duckworth: "The Enforcement Bureau has issued a Notice to Thomas Brothers KI8BE, acknowledging the cancellation of his amateur license as a result of a finding by the Detroit office that he operated an unlicensed FM station."
--

The action rescinding Brother's ham radio license is the result of monitoring and direction finding by the Detroit Field Office. It established that Brothers operated an unlicensed FM radio station from his home in 2001. In addition to canceling his current ham radio license the Commission is prohibiting Brothers from applying for a new one until December 5th, 2007. (FCC. RAIN)

**

ENFORCEMENT: STILL MORE FINES

Hams are not the only ones feeling the sting of Uncle Sam. In fact, the FCC is continuing its enforcement activities in all of the services it oversees. Roy Neal, K6DUE, has the details on what they are doing outside of the world of Amateur Radio:

--
The CGC Communicator reports that a$ 5,000 Notice of Apparent Liability --

better known as a fine -- has been issued to an AM radio station. This, for failing to maintain a record of the its efficiency factor that is used to determine its actual operating power. The station was also dinged for operating in excess of 105% of its authorized power,

Another A-M broadcast station has been socked for $10,000. This, for failing to register its antenna structure and failing to maintain a presence at its main studio during its normal business hours.

But the big one -- a fine of $20,000 went to a company for operation of radio transmission equipment without the required Commission authorization. It was also cited for use of a radio frequency device that failed to comply with Commission regulations.

This is just a sample of the non-ham radio enforcement the regulatory agency has been involved with. In all, its been a pretty busy time for the protecxtors of the airwaves at the FCC.

For the Amateur Radio Newsline™, I'm Roy Neal, K6DUE.
--

The details on all of these actions are on the FCC's website. You can read the details at http://www.fcc.gov/Daily_Releases/Daily_Digest/2003/dd030206.html (CGC Communicator, FCC)

**

ENFORCEMENT: UK MAN CONVICTED OF SELLING ILLEGAL CCTV GEAR

Meantime, across the Atlantic a British electronics supplier has been convicted of selling Closed Circuit TV transmitters that operated illegally in an amateur radio band. According to Jim Merachen, ZL2BHF, the British might say what he did just isn't cricket.

--
The United Kingdom's Radiocommunications Agency says that David Burrows plead guilty on February 10th in Newark Magistrates' Court to two charges of selling non compliant radio apparatus. The prosecution by the Radiocommunications Agency followed a complaint about interference from a licensed U-K radio amateur in May 2002.

The source of the interference was identified as an illegal Closed Circuit TV transmitter installed at a farm in Lincolnshire. The Radiocommunications Agency says that the tranasmitters had been bought from David Burrows's company valled A-E-R-C.

Inspectors searched the company's premises last July. At that time they seized a number of television transmission modules capable of illegal operation on amateur frequencies. The company website had claimed the surveillance equipment was exempt from the need to obtain a U- K licence.

Burrows, of Newark England, was sentenced to serve 60 hours of community service and ordered to pay 300 Pounds in court costs. Also, the equipment seized from Burrows business was ordered forfeitted to the government.

For the Amateur Radio Newsline™, I’m Jim Meachen, ZL2BHF.
--

It appears as if the Radiocommunications Agency may be using the Burrows case to send a message to others thinking of selling similar equipment by calling it ham radio gear. (GB2RS)

**

RADIO LAW: NY STATE HAMS TRY AGAIN TO GET ANTENNA PREEMPTION

For the third year in a row, Amateur Radio antenna legislation has been introduced in the New York Legislature. If approved and signed by Governor George Pataki, it would prevent passage of any zoning ordinance that would prohibit or -- effectively prohibit -- the construction of an antenna support structure by a federally licensed Amateur Radio operator.

But theres more. The ARRL Letter says that municipal ordinances in New York State that impact the placement, screening or height of antenna support structures would have to reasonably accommodate amateur radio antennas and impose the minimum regulation necessary. It would also prohibit municipalities from passing laws or ordinances to restrict antenna support structure height to less than 95 feet above ground level or restrict the number of antenna support structures. The legislation also would require municipalities to adhere to the provisions of PRB-1.

Last year's bill passed in the State Senate but died in the Assembly's Rules Committee. (ARRL)

**

THE WAR AGASINST TERRORIOSM: FREE EMERGENCY NOTIFICATION ALERTS

Even though the government says that it may downgrade the national terrorism alert back to Code Yellow, the Emergency E-mail & Wireless Network says that it is increasing its efforts to encourage everyone to sign up for its free Homeland Security notices. This by e-mail and wireless device. You can sign up for the messaging notifications at www.emergencyemail.org

The Emergency E-mail & Wireless Network is the largest public service notification network and a provider of e-mail notification and wireless messaging services to government, the private sector and non-profit organizations. The organization serves over 3160 local areas in all 50 U. S. States. Its website is located in cyberspace at www.911message.com. (EEWN)

**

THE WAR ON TERROR: THE FIRST RESPONDER

The latest terror alert has law enforcement agencies on guard and preparing for the worst. And after September 11, 2001, emergency crews are better prepared for disasters, thanks to new technology. Amateur Radio Newsline's Bruce Tennant, K6PZW, tells us about First Responder:

--

One major problem on September 11th 2001 was communications between emergency crews. Most could not talk to one another because they were all using different types of radios, in different services and on different frequencies. In fact, the only group with common communications channels in the days immediately following the 911 terror attacks were the ham radio operators who had their own gear and volunteered to assist.

But that all could soon change thanks to a a new mobile command center built into a Sports UtilityVehicle and dubbed First Responder by its designer Raytheon.

While the exact information on how it works has not been made public, First Responder is designed to allow emergency crews to communicate on the same radio channel anywhere, anytime - even if phone and power lines are down. In addition to normal two-way radios, the design includes satellite phones, a mapping system, hacker-proof computers and infrared cameras. Just about any type of communications you can imagine except for ham radio and C-B.

Raytheon says that it developed First Responder to improve homeland security. It will also soon be equipped to detect biological and chemical agents as well as providing inter-service communications.

For the Amateur Radio Newsline™, I'm bruce Tennant, K6PZW, reporting.

--

According to news reports, the first, First Responder is already in use in the Los Angeles California area, but more of these S-U-V's may soon be seen nationwide. This, thanks to new federal legislation that could release billions of dollars in Homeland Security funding. (Published news reports)

**

WITH THE HANDI HAMS: A-R-T FOR THE BLIND

A descriptive audio version of the new ARRL video "Amateur Radio Today" will soon be available for the visually impaired from the Handi Hams. According to Pat Tice, WA0TDA, the ARRL has agreed to let the Handi Hamd reproduce a special version of the show in audio for its members with disabilities who cannot use regular video.

Tice says that the audio only version will contain added dialogue to describe the action that would be on-screen in the original version. No date for when this special version of Amateur Radio Today will be available, but you will have to be a Handi Hams member to be eligable to receive a copy. You can join by calling the toll free Hamdi Ham membership line at 1-866-HANDIHAM. For those who perfer numbers, thats 1-866-426-3442. (HandiHams)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

**

COLUMBIA DISASTER: NASA SEEKS HELP FROM SKY WATCHERS

NASA is still seeking help from the American public to supply video and still images of the Space Shuttle Columbia on its return flight to Earth. The agency says that while there has been a great public response, more material will help the investigation of the Columbia accident.

Anyone who may have video or stills of Columbia’s entry path are encouraged to send it to investigators. You can mail videotapes to the NASA Johnson Space Center, Mail Code JA17, 2101 NASA Road 1, Houston, Texas 77058. Email digital images to columbiaimages@nasa.gov

NASA adds that videotapes and photos can be returned upon request and the materials will not be released to the media without the submitter's permission. For more information call the Johnson Space Center Emergency Operations Center at area code 281-483-3388. (NASA)

**

VOLUNTEER NEEDED: AMSAT SATELLITE REPORT NEEDS NEW EDITOR

AMSAT says that it s looking for a new Editor for its Weekly Satellite Report. If you are interested in volunteering to help your fellow satellite operators stay abreast of the latest status of the ham-sats, please e-mail n1jez@amsat.org (AMSAT-NA)

**

CONVENTIONS AND HAMFESTS: CHARLESTON W VA IN MARCH

Between 600 and 700 Amateur Radio Operators are expected to gather on Saturday, March 15th, for the 19th Annual Charleston Area Hamfest and Computer Show. The venue for this one is the Coonskin Armory, on Coonskin Drive in Charleston. The event is a giant flea market of new and used amateur radio, computer and related gear.

Representatives of Governor Bob Wise will be present, along with people the Board of Public Works. Also, the states Office of Emergency Services will have their Mobile Command Center on display. And for those want to get into the hobby or upgrade, ham radio testing will be availabe.

The Charleston Area Hamfest, which is open to the public draws attendees from West Virginia, Ohio, and Kentucky. It runs from 9 AM to 3 PM with an entry fee of only $5.00. For more information on the Charleston Hamfest, e-mail n8tmw@arrl.net or call 304-965-5349 during normal business hours Eastern time. (N8TMW)

**

INTERNATIONAL – BAHAMAS: 6 METER BEACON MOVED

On the international scene, Steve Rutlidge reports that his C6AFP beacon is back on the air from grid square FL16. The beacon, which operates on 50. 062 MHz was moved from Great Abaco Island to Green Turtle Cay. The distance is about five miles and the grid square in the same. The beacon is now operating from the home of C6AGN. (VHF Reflector)

**

INTERNATIONAL – FINLAND: BEACON STOLEN

Users of the five-band Northern California D-X Foundation beacon network may have noticed the absence in recent weeks of transmissions from the Finnish OH2B beacon. The reason? The transmitter hass been stolen. The good news -- the beacon is expected to resume transmissions in the European spring. No other transmitters in the word-wide NCDXF beacon string have been affected. (RSGB)

**

INTERNATIONAL - SINGAPORE: NEW FREQUENCIES FOR HAMS

And word that Singapore’s telecommunications regulators have approved several UHF spot frequencies for Amateurs to operate. They are 433.425 , 433.450 and 438.450 MHz, and a maximum of 5 watts effective radiated is permitted. (Q-News)

**

DX

In D-X, Q-News reports that the Air Force has closed down Johnston Island and demolition will start shortly on the remaining buildings. There will be probably DXpeditions to the island later but not under the call of KJ6BZ. The good news is that the history of the Johnston Island Amateur Radio Club will be held in the Air Force archives. (Q-News)

The ARRL DXCC Desk has announced that the VKZ0MQI Macquairie Island operation from January 1, 2002 through March 15, 2003 has been authorized for DXCC credit. Also approved the 3C2MV Equatorial Guinea DXpedition from November 11 through December 12, 2002. (ARRL)

**

THAT FINAL ITEM: HAPPY RETIREMENT TO N6AWE

Before we go, a word of congratulations to Amateur Radio Newsline’s own Mert Garlick, N6AWE, on his retirement from Fox Television’s KTTV in Los Angeles. Mert started with the station back in October of 1966 when it was still a part of Metromedia. Over the years he has done every job a broadcast engineer can perform at a television station. From manning the transmitter atop Mt. Wilson to microwaving signals back from the scene of a breaking news story to covering the annual Tournament of Roses Parade in Pasadena -- Mert Garlick, N6AWE, has done it all -- and a lot more.

Now its time for him to travel other roads and Mert tells us that retirement will not really slow him down. Instead it will give him a lot more time to pursue his other interests which include genealogy and of coarse Amateur Radio. And you will still be heraring him regularly, right here, on these weekly Amateur Radio Newsline reports.

So before we sign off, please join us in wishing one of the nicest people in ham radio -- Mert Garlick, N6AWE -- many happy and fulfilling years of retirement. And don’t be surprised if you run into him more regularly on the air. (ARNewsline™)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline™. Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's™ only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I’m Norm Seeley, KI7UP, saying 73 and we thank you for listening." Amateur Radio Newsline™ is Copyright 2002. All rights reserved.

The Tech Plus class doesn't exist anymore, but with the 5 wpm, he can work the old tech plus portions of the HF bands.

From the FCC's website:
http://wireless.fcc.gov/services/amateur/about/operatorclass.html

Technician

The privileges of a Technician Class operator license include operating stations while transmitting on channels in any of 17 frequency bands above 50 MHz with up to 1,500 watts of power. To pass the Technician Class examination, at least 26 questions from a 35 question written examination must be answered correctly. A Technician Class licensee who also has passed a 5 words-per-minute (wpm) telegraphy examination receives privileges in four long distance shortwave bands in the HF range (3-30 MHz) (Refer to Section 97.301).

Grandfathered Operator Classes

No new Novice, Technician Plus, or Advanced Class amateur service operator licenses will be issued. These licenses, however, may be modified or renewed. Technician Plus class operator licenses will be converted to Technician Class licenses if renewed. Technician Plus class operator licenses will also be converted to Technician Class when modified to show a vanity call sign.

Technician Plus

The Technician Plus Class operator license was issued to Technician Class licensees, who, in addition to passing a written examination, also had passed at least a 5wpm telegraphy examination. A Technician Plus Class licensee is authorized the privileges of a Technician Class licensees plus the privileges of a Novice Class licensee.

What is the best way to start learning about amateur radio? I know that I will want to get my license in the next few months after learning more about ham. What would be good places to start to find info about difference between bands, radios, ect.? Thanks for the help.

Mike

Mike:

Assuming you are in the US, the American Radio Relay League (ARRL) is the national organization of amateur radio operators.

At their website www.arrl.org they have many resources to help you.

They publish a book called "Now You're Talking" which will answer many of your questions, teach you the basics, and prepare you for the written Technician exam. Available at many electronics stores and Radio Shack.

Also, they have info on local radio clubs. Many clubs have formal license training classes, or you can meet people and informally ask

questions. You do not need to be licensed to attend or join, only be
interested in radio.

There are many different parts of ham radio, and some may interest you
more than others.

Happy trails,
Gary (net.yogi.bear)

Thanks for the detail, Paul. The schematic in the link below is a
ceramic resonator oscillator I built with some parts I had handy. I
added a quintupler output stage to multiply the 8 MHz resonator
frequency to 40 MHz. 1-5 Volts on the tune input should tune it over
the full range. You can add another tuned output stage similar to Q1
if you need more rejection of the spurs.

Nice, Frank. What's the purpose for R5, the 100 ohm at Pin 1 of the
74HC04?

Mike

I guess your test failed.
The posting appeared in rec.radio.amateur instead of alt.test or one of the
other many test ng's (where I'm sure you intended it to be). Sorry to have
to tell you that.

Hi Mike -- it is a great hobby and service.
Best starting place is at The American Radio Relay League Site --- URL:
http://www.arrl.org/hamradio.html

Study guides and details of privileges, bands, modes etc are covered there.

Good Luck

Hi fellas

I am about to purchase a Kenwood TS520 and was wondering if there is anywhere i can download a copy of the operators and/or service manual. It seems that there are places that will sell them at a premium but i was hoping not to have to do that. I am mainly interested in the transmitter tuning procedure as it has been years since i had a valve transmitter to tune. Any help would be greatly appreciated. My email if anyway can help is tstone12002@yahoo.com.au

Cheers
T Stone

Tony -- try URL:
http://hamradio.online.ru/sch_eng.html
I haven't downloaded anything myself from there - so not sure how well it works.

Also Sams may sell a manual reasonably or any of the vendors at URL:
http://ac6v.com/manuals.htm
At least one of them there has the service manual for $23
But postage to VK may be prohibitive

Hi. I had no idea that there was a "test" type newsgroup, as I am new to newsgroups. Now I know.   I would not have thought of looking for one (because I didn't know they existed). I indeed did post to the rec.radio.amateur newsgroup. Thanks for the info. Many other people might have had a sarcastic response.

Another way to "test" without getting sarcastic responses would be to
post a real post.

Happy trails,
Gary (net.yogi.bear)

Amateur Radio Newsline™ Report 1329 - January 31, 2003

==

A NOTE TO THOSE WHO ONLY "READ" AMATEUR RADIO NEWSLINE(tm)

For those of you who only know of the Amateur Radio Newsline (tm) as a text newsletter we would like to invite you to listen to the audio version. This Amateur Radio Newsline (tm) script is actually written for the "spoken word." It is recorded each by professional broadcasters and is available for private listening or rebroadcast over your repeater. Two methods of delivery are available: FTP MP3 or dial-in telephone. Please visit our website at http://www.arnewsline.org for a list of telephone numbers (you have to pay your own long distance charges) and links to our voice newscast. On site free FTP Downloads are available at our site by clicking on the newscast number at the top of the page.

RESCUE RADIO: AUSTRALIAN FIRES FOLLOW-UP

Amateur Radio is still supporting firefighting efforts in Australia. Q-News Graham Kemp, VK4BB, is in Brisbane with the latest.

--

--
vk1zpl audio
--

That's the voice of Phil Longdon VK1ZPL WICEN - ACT Coordinator speaking from Canberra.

As these Wildfires, or as we "downunder" call them "Bushfires" raced through South Eastern Australia they came dreadfully close to the Deep Space Network antennas at the NASA's site at Tidbinbilla. Here four giant antennas including Deep Space Station 43 - a 230-foot steerable antenna - the largest in the Southern Hemisphere are located.

The world famous Mount Stromlo Observatory west of Canberra was totally incinerated by the fires - a nearly $12 million loss.

Luckily for the Amateur Population, their main repeater was spared.

--

"The VK1 Black Hill repeater: Well if the hill wasn't black before it is now. It will be two to three weeks before they can gain access to the site, all the coaxial cables on the mast have been melted or damaged in some way.

A contractor for the tracking station will be removing and replacing them. Unfortunately these VK1 cables are not part of the contractors work, VK1 hams intend to try and get a price from the contractor to install their cables as they do the work for the tracking station. The equipment in the hut appears to be undamaged however will need to be checked out".

--

And the current scene in VK1 Phil?

--
Audio Here
--

Further South from Phil in VK3, The number of radio amateurs involved in providing communications assistance during the three week long fire disaster in north-east Victoria is growing DAILY, with two separate and distinct activities taking place.

WICEN Victoria has radio operators at three Incident Control Centres and two airbases in the north-east, while Red Cross is using its RECOM data communications system.

WICEN Victoria State Coordinator, John Kerr VK3BAF expects the provision of radio operators to the Department of Sustainability and Environment in the north-east could continue for at least another two weeks.

Additionally, John Kerr VK3BAF said, "WICEN has now been requested by the Victoria Police to be on a much higher level of standby to provide point to point communications should other radio or telephone networks fail".

--

"WICEN Victoria has now set up a statewide HF-radio network using the 40 and 80 meter bands. 3.6 and 7.075 MHz +/- QRM with 'W' abbreviated callsigns. Operators at Corryong will use callsigns 'WIC', Mt Beauty 'WIB,' etc. and net control AWI to the designated listening post on each band.

Schedule times are 0700 and 2000 hrs for 80 meters, 0900 and 1800 hrs for 40 meters with a continuous listening watch at all other times, especially on the hour up to three minutes past".

--

In other activity, the Australian Red Cross National Registration and Inquiry System is using three teams of radio amateurs at three entres - Eskdale, Bright and Omeo registering thousands of people who have been displaced.

A Red Cross WICEN communications system known as RECOM relies on radio amateurs in the field to transmit to a State Inquiry Centre the registration details of emergency evacuees.

This information is transmitted by radio amateurs at the Red Cross registration centres using laptop computers linked to amateur radio transceivers using PACTOR II.

WICEN Victoria's Division 4 Region 4 Coordinator, Peter Weeks VK3YZP reported late 29 January that currently there are 12 radio amateurs in the field - ten at Incident Control Centres, and two at airbases for fire bombing radio traffic. WICEN has been sourcing radio amateurs for the airbases who have aircraft experience.

Peter VK3YZP stresses that no radio amateur should enter the Alpine region without being assigned by WICEN Victoria, authorised by the other authorities, have been properly equipped with clothing, and provided an entry escort.

Reporting from Brisbane Australia, Im Graham Kemp, VK4BB, of Q-News for the Amateur Radio Newsline.

--

Meantime, Phil Longdon, VK1ZPL reports that Australia's Wireless Institute Civic Emergency Network or is providing operators at the Yarralumla Shire Fire Control Center. Longworth says that WICEN is supplying a total of ten operators with others on standby if needed. (VK1 WICEN, WIA Victoria and QNEWS)

**

REGULATORY: ARRL ASKS FCC TO GO SLOW

The ARRL has registered mixed feelings about the FCC's Spectrum Policy Task Force Report issued last November. In comments filed this week, the League called the report a positive first step in developing a comprehensive spectrum management approach but stopped short of endorsing it as presented.

In a bulletin to its members the ARRL says that the report fails to address the needs and goals of the Amateur Service. It also says that the report's orientation toward commercial services makes it not wholly applicable to the Amateur Radio which cannot pay for spectrum access.

And says the ARRL there's not been enough time to study the report's recommendations thoroughly, much less deploy them immediately. The League urged the FCC to not abandon longstanding allocation policies that are based on engineering.

But the ARRL reaction is not entirely negative. It says that it was encouraged that the FCC had worked to involve all portions of the telecommunications industry in developing a spectrum policy. And the ARRL has asked the FCC to consider greater use of "negotiated rulemaking" to expedite allocation decisions. (ARRL)

**

RADIO LAW: GOVERNMENT TOLD IT CANNOT RECLAIM FREQUENCIES

The United States Supreme Court has ordered the Federal government to return billions of dollars worth of unused wireless licenses to NextWave Telecom Inc.. This, as the court tells the government that it cannot take back what has been bought, even if it was not paid for.

Nextwave had defaulted on payment for the licenees it purchased at auction and the FCC had moved to reclain the bandspace. Nextwave went to litigation to stop the government seizure.

It all ended on Monday January 27th. At that time Justice Anthony Scalia, writing for the court, said the Commission could not justify intervening in the bankruptcy proceeding to take the licenses by claiming a regulatory motive.

The spectrum has been hanging limbo during the protracted court battle. (Published reports)

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world Xerox Amateur Radio Club repeater -- WD6CZH -- serving El Segundo California.

(5 sec pause here)

**

ENFORCEMENT: COORDINATED REPEATER VS. COORDINATED REPEATER

Two coordinated repeaters in the North-East have squared off over the use of a repeater pair. And if the FCC does decide to try to solve this one, it may need the wisdom of a King Solomon. Bill Pasternak, WA6ITF, has more:

--

Connecticuts Northville Amateur Radio Association's NA1RA machine is coordinated by the Connecticut Spectrum Management Association. This is a relatively new repeater coordinator that was formed a few years after the failure of the Tri-State Amateur Repeater Council. Tri-State was the group used to serve parts of New York, New Jersey and Connecticut.

And now Northville has complained to the FCC about interference to its NA1RA operation coming from the W2KGY repeater. This is a system operated by the West Point Military Academy Amateur Radio Club at West Point New York. But unlike most cases where one repeater is coordinated and the other is not, W2KGY holds coordination from UNYREPCO -- The Upper New York Repeater Council.

When one repeater is coordinated and the other is not, the answer is simple. The uncoordinated repeater bears the majority of responsibility to clear up interference to the coordinated machine. But in this case, both machines appear to hold legitimate coordination but from different adjoining coordinators. In other words, at least at this writing, both repeaters appear to be on the same channel pair becasuse a coordinator says thats where each respective systems should be.

So far, the only action by the FCC has been to send out an information gathering letter to UNYREPCO. UNYREPCO has responded and a copy of that response has been forwarded to the Northville group for its reply along with a recommendation that
a response from the Connecticut Spectrum Management Association be included as well. Only after digesting that response is the FCC likely to render a decision as to whether or not it will get involved. Well let you know what the agency decides.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF.

--

In the past, on verification that all systems in a dispute held bona fide assignments from a recognized frequency coordinator the FCC has opted to stand aside and permit the coordinators solve any disagreements that might arise. (FCC)

**

ENFORCEMENT: HAM WHO OPERATED UNLICENSED STATION TURNS IN LICENSE

A Berkely Michigan ham has submitted his license to the FCC for cancellation after being accused of operating an unlicensed transmitter in the FM broadcast band. According to the W5YI Report, Thomas Brothers, may not reapply for another Amateur Radio license for the next five years. He was also fined $10,000 after direction finding and an inspection of his premisis found the transmitter on 88.3 Mhz in the F-M band. (W5YI)

**

ENFORCEMENT: OPERATION BEFORE LICENSE ARIVES BRINGS SET ASIDE

The FCC has set aside of General Class license of John Gregory, W3ATE, of Lake Placid, Florida. This, for operation outside of his Technician class license privileges prior to recieving his General class license grant.

According to the regulatory agency at various times in 2002 Gregory apparently checked into a net on 14.300 MHz while still licensed as a Technician. He was issued Warning Notices regarding this matter on May 6 and June 6, 2002 but letters were returned to the FCC marked unclaimed.

Now the FCC has issued another notice to Gregory that gave him 20 days to explain his actions. If he fails to respond the FCC says that his General class application will be dismissed. (FCC)

**

ENFORCEMENT: UNLICENSED OUT OF BAND WARNING

Ten radio operators, eight of whom are hams have been sent warning notices by the FCC. This, regarding their alleged operation on 26.555 and 25.540 MHz.

In each case the warning letter recipient was told that operation of radio transmitting equipment on these frequencies without a license is a violation of Section 301 of the Communications Act . As such he could be subject to a fine or imprisonment if he continues on the air. Fines normally range from $7,500 to $10,000. (FCC)

**

NAMES IN THE NEWS: AA6JR NAMED TO HEAD ARRL PR COMMITTEE

On a much more positive note, word that Jeff Reinhardt, AA6JR, of Agoura Hills, California, has appointed by ARRL President Jim Haynie, W5JBP, as 2003 chairman of the League's Public Relations Committee. Reinhardt, who was recently elercted Mayor of Agoura Hills is also Public Information Coordinator for the ARRL Santa Barbara Section and Public Information Officer for his local club. (ARRL)

**

PROMOTING THE HOBBY: "AMATEUR RADIO TODAY" - THE VIDEO - FOLLOW-UP

This word to those who are wanting to obtain a copy of the new ARRL ham video "Amateur Radio Today." Please remember that the American Radio Relay League holds the legal and intellectual copyright to this program and that it is the one and only official, legitimate source for the new show. No other individual or group has been authorized to distribute it -- be it free or for a charge.

The ARRL plans to make Ham Radio Today available on both Video C-D and VHS tape. To get on the list for a copy please take your web browser to www.arrl.org/catalog and follow the instructions to order item number 8861. (ARRL)

**

HAM RADIO TRAINING: OMARC IN NEW JERSEY

OMARC - New Jersey's Oceam Monmouth Amateur Radio Club is sponsoring ham radio training classes again this winter. The sessions begin Tuesday, March 18th 2003 and run through the end of May. Classes will be held at the InfoAge Center OMARC Diana site, building 9116 on Marconi Road, in Wall Township. All classes will be begin promptly at 6:30p.m., each Tuesday night. For information on the clsees, ham radio testing and directions visit www.qsl.net/n2mo (OMARC)

**

CONVENTIONS AND HAMFESTS: NAB HAM RADIO RECEPTION IN LAS VEGAS

The annual National Association of Broadcasters Ham Radio Reception will take place during the NAB Convention on Wednesday April 9. The reception venue is the Hilton Hotel adjacent to the Las Vegas Convention Center.

Again this year the reception is co-hosted by CQ Magazine and Kenwood Communications and runs from 6 to 8 PM. This gives anyone planning to attend ample time to see one another yet ending early enough so that people can enjoy a night on the town or grab a flight nome.

More information on the Ham Radio Reception will be posted at www.cq-amateur-radio.com. Information about the convention and on-line registration is at www.nab.org/conventions (CQ)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE WEB: NEW BUG SLOWS DOWN THE WWW

If you had problems surfing the World-Wide-Web last weekend you were not alone.   A fast-spreading worm-like infection called Slamm SQL is being blamed for dramatically slowing down Internet traffic, interfering with Web browsing and delaying e-mail delivery. Bruce Tennant, K6PZW takes a look at what happened:

--

Agencies assigned to monitor the Internet say that the latest bug hit on Saturday, January 25th. That's when at least 40,000 infected computers were found to be transmitting a flood of data that was disrupting hundreds of thousands of other servers worldwide.

The virus-like attack, which began about 12:30 a.m. EST, sought out vulnerable computers on the Internet to infect using a known flaw in popular database software from Microsoft Corp. According to the Computer Associates Virus Information Center, the SQL Slamme worm exploits a buffer overrun security vulnerability in Microsoft SQL Server 2000 and the Microsoft Desktop Engine 2000. The worm scans randomly generated I P addresses for vulnerable systems and sends out numerous packets, which may effectively cause a denial of service attack on the infected network. That translates into a lot of useless data clogging the Internet and causing it to bog down.

The only good thing about this worm -- if there can be anything good -- is that it does not go after home computers unless they happen to be running Microsoft SQL Server as an operating system. Also, this worm does not infect files and does not send any e-mail out. It exists only in the memory of the successfully exploited system. The downside is that there is no file based anti-virus signature available to detect this worm.

Monitors reported significant slowdowns, although recovery efforts appeared to be succeeding. A spokesman for Microsoft Corp. confirmed that Internet congestion was interfering with administrators trying to download the crucial software patch that Microsoft made available to protect vulnerable computers. The spokesman said that the congestion was also preventing consumers from contacting Microsoft over the Internet to unlock the anti-piracy features of its latest products.

According to a statement from Bill Murray of the Federal Bureau of Investigations National Infrastructure Protection Center, the overall Internet began to normalize by early Monday the 27th. And while everyone from on-line publishers in the United States to a telephone company in Finland seemed to be hit by the latest worm the world's largest Internet provider, America Online, reported no problems with any aspect of its service.

For the Amateur Radio Newsline, I'm Bruce Ternnant, K6PZW, in Los Angeles.

--

A check of our own statistics shows that Amateur Radio Newsline was not badly affected by the worm. Comparing downloads to the previous weekend we saw no significant change. (ARNewsline™ from published reports)

**

EMERGING TECHNOLOGY: PORTABLE PEOPLE METERS ARE WATCHING YOU

Media ratings company Arbitron has released some initial ratings results for its new television, cable and radio audience measurement system that it calls the Portable People Meter or P-P-M. The Portable People Meter has been undergoing U.S. market trials within the Philadelphia market since December of 2000. The PPM is pager-sized and is carried by consumers. It automatically detects inaudible codes that TV and radio broadcasters as well as cable networks embed in the audio portion of their programming using encoders provided by Arbitron. (TV Technology)

**

HAM RADIO IN SPACE: AMSAT PRESENTS THE FUTURE

Slow Scan TV and a possible plasma cloud experiment were among possible future projects discussed at a recent meeting of the Amateur Radio on the International Space Station or ARISS International Team. According to the ARRL Letter, the group included representatives from ARISS partner countries, their national ham radio societies and several national AMSAT groups.

Among other experiments discussed was a slow-scan television system camera that could be launched later this year. It would allow school groups to see as well as hear the astronauts during ARISS contacts.

Also discussed were a number of other future possibilities. These ranged from crossband operation from VHF to 10 meters using PSK-31 and a full-duplex voice repeater to comparing the performance of various solar arrays and even conducting a plasma cloud experiment. No details were available on what that might entail but plans are well under way to activate a 70-centimeter station from the I-S-S. (ARRL, ARISS, CQ)

**

RADIO IN SPACE: EDUCATOR ASTRONAUT RECRUITMENT PROGRAM

The National Aeronautics and Space Administration says that recruitment is currently underway for the Educator Astronaut Program. Applicants must be teachers who are U.S. citizens, certified to instruct Kindergarden through 12th grade with a minimum three years in-classroom teaching experience within the past four years. They must also hold at least a bachelor's degree in physical science, biological science, engineering or mathematics, or an education degree with a concentration in physical science, biological science, engineering or mathematics. An Amateur Radio license is not required. Applications are being accepted through April 30th.   More information and the application package is available at http://edspace.nasa.gov. (NASA)

**

INTERNATIONAL - ISRAEL: TREES REMEMBER 911

Hagal International reports that the Israel Amateur Radio Club will plant one hundred and nineteen trees in that nations Silent Keys' Forest. These trees are in memory of the ham radio operators who lost their lives in the September 11th 2001 terrorist atacks in New York City, Washington D-C and Pennsylvania.

Hagal International is the English language on-line edition of the Israel Amateur Radio Club's monthly magazine. It can be found in cyberspace at www.iarc.org. The planting of trees in rememberence is a tradition among people of the Jewish faith. (Hagal International)

**

INTERNATIONAL - UK: CLUB GETS LOTTERY FUNDING

Now how's this for getting money for club projects. The Telford and District Amateur Radio Society in Great Britain has received confirmation of receiving U-K National Lottery funding to the tune of 2,908 Pounds. This, for its Foundation and Intermediate class Amateur Radio licence training programes.

The monies will cover the purchase of training materials, room rental expensse, equipment, tools and everything else needed to do the job properly. Currently, 16 beginners are undergoing training at the home of G3JKX on weekends. The club is also a certified examination center and offers all levels of Morse and written testing. (RSGB)

**

DX

In D-X, word that Marti Laine, OH2BH, and several of his friends will be active from Johnston Island through February 5th. Laine made the destination of his latest D-X adventure public on a stop over for lunch with some friends in Los Angeles on Friday January 24th. The multi-member team will operate the High Frequency bands plus 6 meters on SSB, CW and RTTY. Q-S-L direct to OH2BH. (Various)

And the second DX'pedition to Ducie Island is scheduled to begin on March 8th and last about a week. According to the C-Q website, the new operation will include nine operators from five countries, with stations on all bands from 160 through6 meters plus the AO-40 satellite, on CW, SSB and RTTY. The callsign will be VP6DI2. Yes, that's a number two at the end, not a zee or zed. Very apropos don't you think. (CQ)

Lastly, word that IV3NCC is active portable A 4 from Oman for a the next several months. Look for him on the usual frequencies on the High Frequency bands and QSL as directed on the air. (GB2RS)

**

THAT FINAL ITEM: BE PREPARED

And finally this week, as the world grows more tense with each passing day, it is important for ham radio communicators to be prepared for any eventuality. Lloyd Colston, KC5FM, is with the Mayes County Emergency Management in Pryor Oklahoma. He says that the first step is to form a Community Emergency Response Team:

--
Audio only report. Hear it at http://www.arnewsline.org
--

Lloyd will be back next week with some ideas on how you can personally be ready to cope with any emergency or disaster in your area. (KC5FM)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Mert Garlick, N6AWE, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2002. All rights reserved.

FS: PERMAPOWER SPS1800L UNINTERRUPTABLE POWER SUPPLY (UPS)

Permapower SPS1800L UPS provides 1800 AC watts output and has six 3-prong outlets. Perfect emergency backup for your rig, PC, etc. Has alarm for when mains power loss, status indicators for powerline normal, powerline outage/low voltage, powerline high voltage, system ready, batteries rapid charging, system overload, surge suppressor failure. Milliseconds switchover to UPS operation on glitch from AC mains. Unit is in good electrical and cosmetic condition, and will be shipped in original factory carton WITHOUT batteries because of their weight and their need for replacement. Sealed batteries (Type PS-6100-F2, 6V @ 10 AH) are readily available for this unit, and purchase sources will be provided upon request.
$25.00 plus shipping. Please email me if you have any questions, want photos, or require additional information. Shipping weight is 38 pounds.
Thanks!

Does anyone know if QSL.Net has been taken down for good? All I find this morning (Feb 2nd, 2003) is an empty parent directory. I have a *VERY* successful web page on their server which I manage, and if QSL has tanked for good I need to start looking at other host options.

I know they have been having money problems lately. If anyone could let me know if this is permanent, or just a temporary outage, I'd appreciate it.

Robert Williams KC7BUM

Well, another post that got lost but thank goodness I found it in the
end! Many thanks indeed for your time and effort, Frank. They won't be
wasted!

An after thought -- I scan 50.100 to 50.150 SSB for activity with the receiver squelched down.
Any activity will break the squelch.

I also check the DX Packet Cluster via telnet -- any 6M activity will be reported.

Last Dec we had f-layer skip from Calif to the East Coast -- Wow Worked 14 States and Canada + Caribbean. Some here worked Australia and Japan. Signals were enormous so not a big deal for the brag tape.

And frequently in the last summer -- Sporadic E to the Western States - 12 States.

Beacons frequently reveal openings.

Also local channel two TV fading out and some far off place taking over is a good prop indicator.

Contest time is a excellent chance for contacts -- lots of station. During field day -- we made 30+ contacts with western states.

I would be on 6 if there were more people on the band using it and the band was open a little more. ^ Meters would be an excellent band for local nets at night. It would be neat to use 6 Meter AM for local comms at night if you could get enough people interested in it. I may have to look into getting on 6 sometime.

I still have my 6 meter Benton Harbor lunchbox and would sell it. A number of us used to be on 6 AM around here. I had a Johnson Ranger. Others had Gonsets and some other rigs. We all had decent antennas. Mine was a 6 element Crunchcrash at 60 feet. 25 watts station to station at 150 miles was no big deal. A simple halo antenna was adequate for local stuff. I was amazed at how the packet networks were on UHF FM instead of 6 AM. It would have been much better on 6 with far fewer links necessary.

Then, there's the TVI problem. I had a Heathkit Seneca once. It was screen modulated and was a real TVI generator that got me a couple of QSLs from the FCC before I got rid of it.

hi i recently purchased a yaesu ft 2400 h 2 meter mobile.
i think this is a fantastic radio for rejection and sensitivity.

but i understand that this radio can be opened abit for
RX.
presently it is 140-173.995 for rx   and 144-148TX

i understand it is simple as removing the front plate
and un-joining a jumper from 1-2 and making a jumper
on 3. I can't seem to find these jumpers.

Can anyone help?

AND

is there anyway i can stop the doorbell sound everytime
the scan stops on an active channel. It is becoming very
annoying.

Can anyone help?

can you please email me with suggestions.

thanks

shyguy@cogeco.ca

Great Radio...

Modification is very easy...

Bell can be turned off...

I sugest going to the following website for a manual and all the info on the modification...

http://www.mods.dk

Good Luck ...

nah ... common equipment
He could count on a manual being available.
And he was right, there seem to be several on-line alternatives.

Does anyone know where you can obtain new, blank white cardboard boxes
for valves (various sizes to fit the range of valve sizes)?

I have a lot of loose valves that would be better protected in
individual boxes.

If you aren't recycling, some gift boxes might do the trick.

Also consider a larger box with padded dividers.

FS: MOTOROLA CONSOLE/MOBILE FOOTSWITCH
This is a very heavy duty footswitch which Motorola uses for mobile installs (this one is from an ambulance install, allows hands-free for paramedic with headset) and also for dispatcher consoles. Don't have a Motorola part number, but this is the real-McCoy, drop shipped by Motorola from Line Master Switch Corp. OEM. Unit is is heavy cast, black with black foot lever, measures approx. 5"x4"x2". Internal terminal strip permits wiring for normally-open or normall-closed. These make a perfect foot operated PTT for your ham rig or can be reused for commercial applications. I have several of these, some with cables, some not. Very easy to replace/rewire cable. $20 each plus shipping. Email if you want pix or more info. Remove NOSPAM from my email address: NOSPAMdt0124@comcast.net

Hi,

Just finished building the circuit for a new grid dip meter that uses two dual-gate MOSFETS in a kalitron osc. operating in a cross-coupled configuration and was wondering if it's working okay or not. The output waveform I observe on the scope resembles a series of positive peaks with gaps between them, along the lines of the output of a class C amplifier or perhaps half of a rectifier. Should I be concerned? I thought with two devices I'd get a full wave sine output of some sort, albeit with maybe a modicum of x-over distortion, but no sign of any negative going pulses; just 18v positive-going pulses. The supply is conventional 9v battery and both the FETS are N-channel. Any ideas?

I read in sci.electronics.design that Paul Burridge <redscar@waitrose.no
tthisbit.com> wrote (in <oes14vgv2cehllmh69q6rr7ab45u4263vs@4ax.com>)
about 'Kalitron oscillator query', on Wed, 5 Feb 2003:
>Just finished building the circuit for a new grid dip meter that uses
>two dual-gate MOSFETS in a kalitron osc.

Kalitron? Where did you dig that up from? If it should really be
'kallirotron', that's a WW2 name for an astable multivibrator, IIRC.

>operating in a cross-coupled
>configuration and was wondering if it's working okay or not. The

Yes. Where is your tuned circuit? It sounds as though the thing isn't
even giving you a proper square-wave output, and it may be oscillating
at some UHF frequency or, if you have got a functioning tuned circuit in
one or both drains, it may be squegging.
>I
>thought with two devices I'd get a full wave sine output of some sort,

Patent it as a voltage-doubler! (;-)

Sounds like G3WP0's excellent Kalitron based "fet dip oscillator" in Rad comm' handbook ?.
You should be getting a reasonable sine wave at the drain of both fets (sitting on the 9Vdc rail). The Kalitron circuit is balanced, so the waveshape should be identical top to bottom and cycle to cycle. You seem to have one of the fets not working and it's badly oscillating on one fet only.
Setting the gate2 dc bias voltages for best oscillation, can be a bit tricky. Adjusting this voltage externally from 0 to say 5v would show the strength of oscillations grow from nothing at 0v through to overloaded distorted outputs near the 5V point (any coil).
regards
john

This circuit doesn't resemble an astable multivibrator in any way
SFAICS, but the original design does go back the 1930s when it was
implemented with triodes. God I miss valves! :-(

It's normal for this type of circuit to give an output that's double
the Vcc rail.

Very astute, John! I should have guessed you of all people would spot this one. :-)

>You should be getting a reasonable sine wave at the drain of both fets
>(sitting on the 9Vdc rail). The Kalitron circuit is balanced, so the
>waveshape should be identical top to bottom and cycle to cycle. You seem to
>have one of the fets not working and it's badly oscillating on one fet only.

>tricky. Adjusting this voltage externally from 0 to say 5v would show the
>strength of oscillations grow from nothing at 0v through to overloaded
>distorted outputs near the 5V point (any coil).

If you've looked at the circuit in RC then you'll know that it's essentially symmetrical, so performing DC voltage checks should quickly show up where the problem lies... that is, of course, unless you're saying that I should expect to see complete, separate and distinct sine waves from each fet, in which case comparative readings from each device (and their supporting components) won't mean anything like as much. Seems an odd design if that's the case, to my way of thinking.
The G2 Bias problem appears to be addressed by these so-called "gain-setting resistors" that co-habit inside each plug-in coil, BTW.

Anybody got a Collins 51s-1 main tuning knob they would like to sell.
Prefer very good or excellent condition but anything considered if JPEGs
supplied. Ideally I would need the Bristol wrench to go with it as I don't
have one.
What's your price ?

73's
Mike

I read in sci.electronics.design that Paul Burridge <redscar@waitrose.notthisbit.com> wrote (in <fsg24vcg9b8oknh64lglf7ntcg517fbofu@4ax.com>)
about 'Kalitron oscillator query', on Wed, 5 Feb 2003:
>>Kalitron? Where did you dig that up from? If it should really be
>>'kallirotron', that's a WW2 name for an astable multivibrator, IIRC.
>
>This circuit doesn't resemble an astable multivibrator in any way
>SFAICS, but the original design does go back the 1930s when it was
>implemented with triodes. God I miss valves! :-(
>
>>>operating in a cross-coupled
>>>configuration

If you have two active devices in a cross-coupled configuration, giving positive feedback, it can operate as an astable multivibrator, intentionally or not.

Anybody got a Collins 51s-1 main tuning knob they would like to sell.
Prefer very good or excellent condition but anything considered if JPEGs supplied. Ideally I would need the Bristol wrench to go with it as I don't have one.
What's your price ?

73's
Mike

It's not *that* kind of cross-coupling!

If you have a shorted final, it still could show current draw, even though
there is no RF out! Probably not that though. Do a CPU reset.

I love mine!  I can't believe what this thing can pick up.  I live on
teh outskirts of a large metro area and if anything, I have far to
many choices of what to listen to.  Of course, that's where the 1000
channels comes in handy!

I am in need of a service manual for the FT-5100. I am willing to pay
a reasonable price of an original or photcopy of this manual. I am in
need of the section on how to replace the dial bulbs and the battery
if someone could e-mail this.
Thanks,
Ken KG4VAG

I just passed my code test at 5 wpm for a Canadian basic licence, and for study I downloaded the W1AW audio files. Also, the programe, Winmorse.exe is really helpful, because you can cut a block of text (say from an online newspaper), and it will turn it into code. I found that practising at 6 or 7 wpm helpful to prepare for 5 wpm. Also, convert the cipher groups from the old ARRL code practise book into code--cipher groups are random letters and numbers, so you can't guess the next letter. In the same book, there is a list of common words and endings, such as "the" "with" "ing" "tion" etc., that are helpful to learn as complete sounds.

Nothing beats practise.

NuMorse Pro from http://www.Nu-Ware.com does all that and much more. As well as a selection of different training courses it will generate QSOs and add QSB/QRN for extra realism.

Sally

I found the best way to learn morse was to listen to letters at 15wpm with
enough spacing to slow the total wpm to a speed at which I could take then
as I progressed shorten the timing between the letters. Four or five months
at 20mins a day got me to approx 15 wpm.
THEN I got a key out and started sending...

I like taking texts, such as a computer version of "My Utmost for His Highest," and running it through code. Good practise.

Anyone out there with the correct formula for the crystals on a Motorola ht90 (ht440)?

I just picked one up and inside it has 4 crystals reading:
55387.50
55395.31
17206.01
17203.7

It transmists on 464.5000 ch 1 and 464.5625 on ch 2
Both simplex

Thanks for any help!

Chris

> Anyone out there with the correct formula for the crystals on a Motorola
> ht90 (ht440)?

Youbetcha.

TX = Crystal F times 27
RX = Crystal F times 8, plus the first IF (21.400MHz).

International Crystal can provide rocks for ham freqs if you want. You should have the service manual and a service monitor handy to do the alignment.

(SHAMELESS PLUG ALERT)

If you do not have access to either of the above, I have both, and I can install the new rocks and tune the radio(s) up. See http://www.bluefeathertech.com/rf.html

Hi all,

I just got my Tech license and am preparing to set up my first radio. (I'm in no rush since I'm still learning Morse code and reading the General book.) Unfortunately I live in an antenna restricted neighborhood. I was planning on using an attic dipole, but the ARRL Tech study book recommends not using one due to RF radiation in living areas.

On the other hand, wouldn't using a portable like a B&W AP-10A give exactly the same problem? If anyone has any ideas or recommendations I'd be very interested to hear them.

Thanks!
Mike Markowski

As a general rule, a portable is not capable of putting out as much power as a mobile or base station rig. RF radiation is roughly proportional to transmit power.

You need to consider distance from possible exposure to people, transmit power, frequency, SWR, and antenna design to fully gauge the RF exposure potential. Other factors include potential fire risks with higher power (if something goes wrong) and lightning risks for an external antenna.

The warning you saw is conservative as a first pass. As you read further, you will find what factors increase and decrease exposure to RF, and be able to make your own judgements.

Happy trails,
Gary (net.yogi.bear)

Please don't hurt me. I'm still greeeving from the Super Bowel. And there's
nothing to loot in my neighborhood.

Besides, I do mostly QRP. You know, for hams who don't feel they have to,
uh, compensate for other shortcomings.

I wouldn't worry about that for most of the HF bands. To be any danger, you would have to be inches from the antenna on most of the lower bands. I run an attic dipole on 40-10 meters, and I give little thought to RF exposure. The antenna is 15 ft over my head. Not close enough to be any problem just running 100w. In general, the higher the freq, the farther you must be to be in "compliance". On 10m, running a 100w radio into a dipole, anything over about 13 ft away is safe for both controlled and uncontrolled envionments. On 80m, you would only need to be 2 ft away from the antenna to be in compliance for even an uncontrolled area. So, overall, I wouldn't worry about it. You can use this online program to calculate your particular envionment.

>(10,15 or more) else phase noise will be a problem. You should
>consider shielding the frequency determining elements to prevent
>pulling from stray effects; however, designing for a higher loaded Q
>will mitigate pulling from some external effects.  If you only need to
>pull the signal a few 10's of kHz, use a ceramic resonator, NOT a
>crystal ... parallel or otherwise. If you want schematics for either,
>I would be happy to elaborate, but only after I learn a little more
>about the application ... don't want to do it twice ;-)

Okay, that's fair enough and thanks for the offer, Frank. To elaborate
a little, I don't need SSB standard stability at 40Mhz; enough drift
to still be within a 12.5Khz channel on FM at that frequency would be
acceptable.
I just want to be able to tune for any desired channel say 50KHz +/-
of that centre frequency and have the osc. stay with that tuning
sufficiently well so as not to lose an narrow-band FM signal on the
same channel.

Besides the rf exposure that others have mentioned, beware of the potential fire hazard. I had one end of my dipole come loose and land on an air conditioner duct. After having on air reports of feedback on my signal, I went into the attic and found the wire down and it had scorched the insulation on the duct!

I now have a very robust support system and visually inspect the antenna before each on air session.

PERMAPOWER SPS1800L UNINTERRUPTABLE POWER SUPPLY (UPS)
Permapower SPS1800L UPS. Provides 1800 AC watts output and has six
3-prong outlets, alarm, status indicators for powerline normal,
powerline outage/low voltage, powerline high voltage, system ready,
batteries rapid charging, system overloaded, surge suppressor failure.
Extremely fast switchover to UPS operation. Unit is in good electrical
and cosmetic condition, and will be shipped in original factory carton
WITHOUT batteries because of their weight and their need for
replacement. (If you're willing to pay addtional freight, I'll ship
the existing batteries too). Sealed batteries (Type PS-6100-F2, 6V @
10 AH) are readily available for this unit, and purchase sources will
be provided upon request. Please email me if you have any questions,
need photos, or require additional information. Packaged unit weighs
38 pounds. $30 + shipping. Email to NOSPAMdt0124@comcast.net and of
course remove the "NOSPAM".

Amateur Radio Newsline™ Report 1328 - January 24, 2003

Amateur Radio Newsline report number 1328 with a release date of Friday, January 24, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Wildfires rage in Australia, an FCC official says the agency is excited about P-L-C and the past becomes today at Cape Cod. These stories and more follow on Amateur Radio Newsline report number 1328 coming your way right now.

RESCUE RADIO: HAMS HELP IN FIRE COMMUNICATIONS IN VK3 WIKLDFIRE

Hams in down-under are hard at work assisting in emergency communications as widfire rage in several Australian states. Q-News Graham Kemp, VK4BB, is in Brisbane with the latest:

--
Audio report only. No text. Hear it at www.arnewsline.org
--

(Q-News)

**

RESCUE RADIO: REPEATER APPEARS LOST IN VK1 WILDFIRE

Meantime there is some good news regarding hams living in and around the city of Canberra. They are all reportedly O-K, but one of their local repeaters may have been lost in a widlfire thats has been sweeping the area. Phil Longworth VK1ZPL who is the WICEN Coordinator Canberra:

--

Longworth: "We have a couple of repeaters around town. One which is actually located at the NASA site down at Cape Mc Villa. We haven't heard it since Saturday. The scouts cannot get close to there because they have lost a lot of infrastructure. So we are assuming that we have probably suffered some damage."

--

The repeater being referred to is VK1RAC. So far radio operators have not been called in the Canberra area because there have be no major failures in the nations telecommunications system. But hams are standing by even though they may have to do without one major repeater.
(Q-News)

**

RESCUE RADIO: US HAMS NOT NEEDED IN MEXICAN QUAKE

Mexico's telecommunications system is working properly following a major earthquake and communications assistance from the United States is not needed. The quake hit in Nortth-West Mexicio. It registered 7.6 on the Richter scale, toppled dozens of homes, killed at least 24 people and injuring at about 175. And while telephone service in several remote areas was knocked out for a time, the Mexican government got it quickly restored. Also, Mexico's own ham radio community has decasdes of experience making outside aid not necessary in many cases.

Here in the United States, Gordon West, WB6NOA, has been monitoring the situation from his home in Costa Mesa Claifornia. Thats about 150 miles North of where the quake hit. And hes been taklking to hams in the area and confirms that United States hams going to assist are just not needed:

--

West: "In communiocating with the maritime mobile operators near Manzinello Mexico, many ofd the mariners rowed ashore and asked whether or not their ham radio gear on 40 meters might help relay messages back to the U.S.A. The villagers on shore evidently indicated that their communications were still up, and, that while they apreciated the boaters going ashore to ask for relays, none were needed.

The mariners did indicate that they felt a slight tidal movement. That was reported the following morning on many of the Baja maritime mobile nets."

--

West says that immediately after the quake hit he began monitoring the various frequencies known to be usaed by Mexican hams for emergencies on 40 and 75 meters. West says that not a signal on the air indicated any apparent need for mutual communications aid from the United States. Don. (ARNewsline™)

**

SPECTRUM ALLOCATIONS: FCC ON WRC-03 PROPOSALS

Back here in the U-S, an ARRL Bulletin says that the FCC is seeking comments on draft recommendations the World Radiocommunication Conference Advisory Committee adopted January 8th. Amateur Radio Newsline's Ken Locke, N8PJN, has more details:

--

The FCC's International Bureau says that based on its initial review of the recommendations, it tentatively concludes that it can generally support the proposals recommended by the W-R-C 03 Advisory Committee. And if adopted, United States delegations will use the proposals at bilateral, regional and international meetings.

One agenda item of interest to hams involves examining the adequacy of the frequency allocations for High Frequency broadcasting in the vicinity of 4 to 10 MHz. The FCC also has draft proposals developed by Executive Branch agencies, and the agency is requesting comments on those as well.

The Public Notice was released January 15th. The deadline for comments is January 31st. Complete texts of draft proposals are available via the FCC's WRC 03 Web site. You reach it from a link at www.fcc.gov.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN.

--

Comments may be filed via e-mail to wrc03@fcc.gov. You can also submit them by mail the Office of the Secretary, Federal Communications Commission, 445 12th Street, SW, Washington, DC 20554. (ARRL)

EMERGING TECHNOLOGY: PLC MAY BE COMING TO THE USA

P-L-C could be coming to the United States -- but not right away. This according to a top official at the FCC. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with the details:

--

P-L-C stands for Powerline Communications and the idea is to use the same wires that bring electricity to your home as a pathway for high-speed Internet access. And as previously reported, in nations where P-L-C has been evaluated or approved it has caused moderate to severe degradation to a good portion of the electromagnetic spectrum. In fact,. several nations have decided against implementing P-L-C even though it holds the promise of becoming a less expensive alternative to cable modems and D-S-L telephone lines as a way to get broadband service.

And the FCC appears to be optimistic about P-L-C. On Wednesday January 15th, Edmond Thomas, chief of the Federal Communications Commission's Office of Engineering and Technology said companies developing the technology have overcome many hurdles in the past year.

The FCC has been studying P-L-C technology for several months and Thomas says that the agency will pay more attention to it this year. He notes that there are no regulations that prohibit the technology, but the agency is concerned that Internet data transmissions carried over power lines could radiate signals inside and outside the home that could cause interference.

And Thomas indicates that the widespread introduction of Powerline Communications wont happen very soon. He says that the FCC wants to be certain P-L-C is not going to cause problems to your TV. And that's certainly good news for all communications services including Amateur Radio.

Reporting from Los Angeles, I'm Bruce Tennant, K6PZW.

--

Obviously this is an emerging technology that can impact negatively on ham radio and will have to be watched. (Published reports)

**

ENFORCEMENT: FCC CANCELS EXPERIMENTAL LICENSE WC2XZV

The FCC has cancelled an experimental license to California company because the agency says its being used for other purposes. According to the CGC Communicator, the FCC cancelled experimental authorization of WC2XZV after Enforcement Bureau monitoring confirmed the operation.

In a short letter dated January 17th, the Commission stated that the California station's emissions were not in compliance with the terms of its experimental radio license. But a story on recnet.com says a lot more. It says that that there were published reports of an alleged pirate station operating in the Antelope Valley area prior to the experimental license grant. The station was operating on 104.7 MHz and identifying as Frequency Radio with its website at www.1047.fm A check of the website makes no mention of the experimental license or the FCC action to cancel it. Acopy of the FCC's letter is posted in cyberspace at www.recnet.com/fcc/wc2xzv_cancel.pdf   (CGC Communicator)

NAMES IN THE NEWS: MITNICK FREE TO REJOIN THE WWW

Former computer hacker Kevin David Mitnick, N6NHG, has completed his probation and is now free to once again use a computer and surf the web. After being released from prison three years ago on probation, the Mitnick had been barred from contact with computers until last year. He was not allowed to access the Internet until this his probation ended Monday January 20th.

But simply roaming the web may not what Mitnick has in mind. Since his release he has turned his efforts to becoming a consultant on computer and Internet security issues. He hosted a radio program on Los Angeles talk station KFI, has written a book and has even testified before a congressional committee on ways to make computing more secure.

Only a few weeks ago the FCC agreed to permit him to renew his Amateur Radio license. The Administrative Law Judge hearing the case said that

Mitnick was rehabilitated and would likely adhere to all of the agency's rules. And in a recent interview with the Los Angeles Times newspaper, Mitnick said - quote : "The truth is, I learned my lesson."

Kevin Mitnick, N6NHG, also learned a lot about computers and the world-wide-web from his days of hacking. Now he appears to want to use this knowledge for the benefit of all in society. (ARNewline™ from published news stories)

PROMOTING THE HOBBY: "AMATEUR RADIO TODAY" - THE VIDEO

The most trusted man in America has lent his name and callsign in support of the hobby. This as retired CBS newsman Walter Cronkite, KB2GSD, tells the story of hobby's public service efforts to the non-ham public in a new ARRL produced video titled Amateur Radio Today.

Cronkite narrates the program from his office in New York City from a script developed by Alan Kaul, W6RCL. Kaul is the West Coast Producer of NBC Nightly News and a former anchor here on Amateur Radio Newsline.

Amateur Radio Today was directed by Dave Bell, W6AQ, who is responsible for many ham radio films including the all-time classic "The Hams Wide World." Bell, Kaul, Bill Baker, W1BKR, of PBS and Bill Pasternak, WA6ITF served the co-producers. The show was edited at Suite Sixteen Post in Burbank California with Keith Glispie, WA6TFD, at the controls of the all digital Quantel Edit Box. But its really Walter Cronkite that takes you on a fast-paced six minute trip into the very soul of ham radio.

The only legitimate authorized source of Amateur Radio Today is the American Radio Relay League which holds the copyright. It will be available on video CD in the very near future and -- eventually -- VHS tape. Visit www.arrl.org/catalog and order item number 8861 (ARRL, ARNewsline™)

HAM RADIO VIDEO: WRTC 2002 VIDEO NOW AVAILABLE

Another video is aleady being called the best ham radio sports show ever to hit the street. This with the announcement that the official video of the Amateur Radio Olympics 2002 is now available on DVD and VHS.

The world premier was held in Helsinki Finland on January 18th before an overflow crowd at the Contest Club Finland meeting. Unlike previous ham radio videos, this one is produced from a 100% "pro-sports" perspective.

In order to capture as much of the action as possible, three camera crews taped as many teams and events as they could during the actual 24 hour competition. Supporting all this great footage are high-end 3D graphics, scoreboards, top-ten boxes, team profiles, and everything else that you might expect when watching a professional sports event on television. And the production is even narrated by one of ESPN's top sportscasters

The program's total running time is 60 minutes. The DVD version contains lots of extra features like full score breakdowns for each team, continental line-ups, competitor rulebook, and even all the past W-R-T-C scores dating back to 1990.

If you've ever wanted to watch the worlds top radiosports teams in action, now is your chance. Copies are available for a nominal fee from the website: http://home1.pacific.net.sg/~jamesb (WRTC)

**

RESCUE RADIO: FISHING BOAT CREW DISAPPEARS BUT CELL PHONE TURNS UP IN INDONESIA

A strange story from Taipei. A mobile telephone belonging to the missing chief engineer of a ship found abandoned off Australia has been used to make more than 80 calls from Indonesia. Australian police said they are baffled by the discovery of a fishing boat full of rotting fish and its lifeboats in tact, but no crew. News reports say that the boat was found drifting off the remote northwest Australian coast. The phone calls from Indonesia add to the mystery of what happened to the missing crew. (PacificRimOnline)

**

COMMUNICATIONS MAGAZINES: POPTRONICS CEASES PUBLIC ATION

Popular Electronics -- better known as Poptronics Magazine is the latest hobby electronics publication to fail. This with the announcement that its publisher Gernsback Publications is no longer in operation.

Gernsback was in the publishing business for 94 years. The January 2003 issue was the last. Negotiations are reportedly under way to provide an alternative publication to Popular Electronics current subscribers. (W8HDU)

**

HAM LICENSING HELP: OH-KY-IN OFFERING HAM CLASSES

If you live in Ohio, Kentucky or Indiana and have a friend wanting to become a ham, this is for you. The OH-KY-IN Amateur Radio Society will offer ham radio license classes in the Cincinnati, Ohio area. Training is scheduled to begin on Thursday evening, February 20th.. Training will cover Technician through Extra grades along with Morse instruction to 5 words per minute. At the conclusion of the ten week course, Amateur exams will be offered. More information is in cyberspace at www.ohkyin.com. (OK-KY-IN release)

**

WITH THE HANDI HAMS: THE CALIFORNIA CAMP

The Handi Hams California Radio Camp is the week of March 2 through 9th. This years special guest speakers include Bob Zeida N1BLF, Gordon West WB6NOA and Bill Pasternak WA6ITF.

Also, those of you contacting camp special event station W0EQO will be eligable for a special QSL. More information about the camp and the station is on the web at www.handiham.org (HandiHams)

CONVENTIONS AMD HAMFESTS: THE MIAMI TROPICAL HAMBOREE

The 2003 convention seasons gets off to a bang the 1st weekend in February. Thats when the 43rd annual Tropical Hamboree and ARRL Florida State Convention will be held in at the Fair Expo Center in Miami Florida.

The Tropical Hamboree is truly a fun filled convention with loads of new and used radio gear for sale along with a host of terrific programs and top notch speakers.

The hours of operation are 9 am to 5 pm Saturday February 1st and 9 am to 4 pm on Sunday the 2nd. For everything you might want to know about this years Tropical Hamboree take your web browswer over to www.hamboree.org (Tropical Hamboree)

**

HAM RADIO ASSISTS: THE MIAMI MARATHON

Another activity scheduled for the same weekend in the same place is the 2003 Miami Marathon. Sponsored by Toyota and The National Diabeties Association, the Miami Marathon is a 26 mile foot race starting at the famed Coconut Grove, across Biscayne Bay, to Miami Beach and back again to Miami.

The date for this event is Sunday February 2nd. Ben Nemser WA4DZS, owner of Nemal International Electronics is coordinating the amateur radio communications. His assistant, all the way from New York City is none other than that well-known 'marathon man', and former ARRL 1st Vice President Steve Mendelsohn, W2ML.

With two major events involving ham radio the same weekend, its going to be a major challenge for the South Florida ham community. Its also looks to be a very memorable weekend in Miami as well. (Tropical Hamboree)

**

TECHNOLOGY: EIGHTY ONE MILLION PEOPLE WATCH FREE TV

According to the National Association of Broadcasters, approximately eighty-one million television sets in the U.S. receive programming exclusively from free, over-the-air TV stations. In comments filed with the Federal Communications Commission, the NAB noted that while the total number of television sets in the U.S. is 267 million that more than three out of every ten TV sets relies exclusively on "free TV" for programming. This means that the TV set is not hooked up to cable, satellite or any other subscription TV service.

Other figures noted by the NAB say that twenty-five percent of all cable and satellite homes have at least one TV set in the household that receives signals solely from free TV. Also, 24 percent of African-American and 32 percent of Hispanic households rely exclusively on free TV for their television viewing.

The National Association of Broadcasters analysis was provided to the FCC as part of the Commission's "Annual Assessment of the Status of Competition in the Market for the Delivery of Video Programming." The N-A-B says that its comments demonstrate the considerable extent to which consumers still depend on over-the-air broadcast television signals. (NAB)

**

INTERNATIONAL - IARU

On the international scene, the Radio Society of Great Britain passes along word that the national amateur radio societies of Cameroon and Macau have been admitted to the International Amateur Radio Union. A-R-T-J in Cameroon was formed in 1998 and has 14 members, seven of whom are licensed. Macau's ARM was founded in 1992 and now has 85 members. Both societies were inducted as of last December the 9th. (RSGB)

**

ON THE AIR: AO-40 QSO PARTY

The operating period for the first AO-40 QSO Party has been extended to 4 days in order to give more operating windows to Amateur stations world wide. The QSO Party will begin at 0000 UTC on the 24th of January and conclude at 2400 UTC on January 27th. Currently stations from over 30 countries have indicated their intention to participate in this years event. (ANS)

**

DX

In DX, a team of operators that includes SM0BSO, SM0LQB and SM1TDE will operate from the QTH of JW5E on Spetsbergen between February 24th and March 1st. Look for them on 160 through 2 meters running CW, SSB, RTTY as well as SSTV and other soundcard modes. QSL to each operators home call direct or via the bureau. (GB2RS)

**

THAT FINAL ITEM: SPANNING THE ATLANTIC

And finally this week, the story of history being celebrated. Of the earliest days of radio being commemorated by the people of the 21st century. And those who were there said it was like the past catching up with the future on a cold day at Cape Cod Massachusetts.

The event was the 100th celebration of the first ever radio transmission from the United States being received in Europe. It was made by radio pioneer Guglielmo Marconi in 1903. And it was his daughter, Princess Elettra Marconi, who lent her voice to begin the 100th anniversary celebration of the first trans-atlantic radio message. A message that probably sounded something like this:

--
Audio Here
--

That sound was supplied by Bob Doherty, K1VV. He along with members of the Marconi Radio Club and Marconi Cape Cod Memorial Radio Club were the people behind KM1CC. That was the on-the-air celebration of the two club's namesake making the first wireless transmission to Europe. And quite an affair it was.

Princess Elettera Marconi began the festivities in a brief contact with Ken Bowersox, KD5KBP. That's Commander Ken Bowersox on board the International Space Station. A bit later, Bowersox spoke with Cape Cod area school children who asked questions about life on-orbit. Both contacts were made possible by ARISS -- Amateur Radio on board the International Space Station.

The January 18, 1903 contact by Guglielmo Marconi used an early form of hand sent code to span the Atlantic. A short time later Marconi predicted that mans voice would eventually span the globe using wireless. Now, precisely a hundred years later on a frigid January 18, 2003. Marconi's daughter returned to near the scene of that first contact and got to speak to a man in space. If he were alive today, Guglielmo Marconi would justly be proud. (K1VV)

Check out www.arrowantenna.com , their OSJ144/440 J-pole is very good and if you're handy darn easy to build. With scraps I had lying around I built one for $7 and it's been up for over 2 years doing a fine job.

i located a couple RF TX/RX pairs.

http://www.radiometrix.co.uk/products/tx1rx1.htm
http://www.quasarelectronics.com/30a15.htm
http://www.quasarelectronics.com/3082.htm
http://www.rfdigital.com/product.htm?item=rfd27996

ur recommendation would be helpful.
how do i make this into a switch?
my idea is to have a box receiving an instrument (guitar) signal with 4 jacks:
INPUT
OUTPUT
SEND
RETURN

i need the RF switch to kick in the SEND/RETURN loop b4 the INPUT
signal goes to the OUT jack.
or not (INPUT signal goes directly to the OUT jack).

There used to be a guy on the air that called himself PorkButt and was on every day and night. There were several people on there that were devout followers and he used to preach and brag to them for hours on end while they listened and soaked it all up. In the meantime, there were some guys on that were really hilarious giving him a hard time. This was about two years ago or more. I think the guys giving him a hard time didn't like him because he was always QRMing and horning in on conversations and frequencies where he had no business. Does anyone remember this? They were fighting all the time and the guys who fought with PorkButt were always pretty witty and funny. Did the FCC take PorkButt off the air for the QRM or did people get tired of it or what? Or did they move to another frequency? Occasionally I have tried finding them but to no avail.

Anyone know anything about this?

Tom

Hello Folks,
Looking for info on the cable for programming a Tekk NT-8.
Prefer to build as I have Maxim 232 Chip. I usually build most of my programming cables and converters, but need specs for Tekk NT-8 cable.
Can you help!
Thanks!
Chris

I have it brand new in the box in Central Florida area. $250.00

$340 at AES in Orlando.

Description below.

Thanks,
Rich

TITAN DX
8 Band Multiband DX Antenna

SPECIFICATIONS

Bands
10m 12m 15m 17m 20m 30m 40m and 100 KHz on 80m
Bandwidth -- Under 2:1
Entire band on 40m 30m 20m 17m 15m 12m 10m
100KHz on 80m
Height -- 25 ft
Weight -- 25 lbs
Mount : All hardware supplied except the 1 1/4" O.D. steel mast
Counterpoise : 4 rigid counterpoises 80" long each
Ground Area Required : None

THE TITAN DX
Your latest requests have been for an antenna that's easy to setup, needs no radials, covers 10m-80m in addition to all the WARC bands and uses the same GAP technology found in our other products. In response to these requests GAP is proud to announce the newest addition to the family, the Titan.

The Titan is a center fed GAP vertical, that provides a host of benefits in a rugged, yet manageable form. The Titan offers broad, continuous frequency coverage in a no tune, easy to assemble format. Designed to work in a limited space or as the perfect compliment to an antenna farm.

One of the primary virtues of the Titan is the GAP center feed. By elevating the feed the earth loss is dramatically decreased, which means the RF is going out to make the contact instead of into the ground to warm the earth. Reducing the earth loss eliminates the need for a radial system. The Titan requires NO RADIALS.

Another key benefit the Titan provides is the ability to go virtually anywhere in the HF amateur spectrum, at anytime without having to make any adjustments. The Titan is the ONLY antenna marketed with total continuous coverage under 2:1 on 10m 12m 15m 17m 20m 30m 40m and 100 KHz on 80m. Titan's broad bandwidth and no tune feature make it an ideal antenna for getting those multipliers during contests or switching frequencies as band conditions change.

The Titan is a respectable 25' tall and weighs a solid 25 pounds. The Titan is configured to mount easily on a 11/4" O.D. mast. This mast can be a length of your choosing and since the feedpoint is elevated this mast can be as short as a foot.

The first 8' of the antenna is comprised of double wall tubing and where the Titan mounts to the mast the antenna is triple wall! Which means guys are not a necessity.

The N4EE Wells Burton Memorial Station will be on the air from the Trident Amateur Radio Club's emergency communications van on 20-15-10M tonight and tomorrow from the Charleston (SC) Hamfest at the Ladson Fairgrounds. (Hamfest talkin is on 145.250-/146.790-)

We plan on hanging out around 14.275-300, 21.300, 28.600 SSB or 29.620 FM running 650W from our power winched tower and 4-element tribander that can be erected from specially made mounts you park the van tire on in about 15 minutes.

Give us a listen and a call if you hear our little station....(c;

73, Larry W4CharlestonSouthCarolina

One of our young hams in my club here got his Tech at 10, General at 11, is now an Advanced at 12 and I'm dangling a $20 bill in front of his nose that's his IF he gets his Extra before he's a teenager in a few months....(c;

Ham radio is still in good hands, indeed.

He and his father are also heavily into amateur rocketry sending missiles a hundred thousand feet in the air in seconds. Daddy's also a ham....er, ah, but only Advanced...(c;

Too bad more kids don't have a dad just like him.....

Amateur Radio Newsline™ Report 1330 - February 7, 2003

++

+++

A NOTE ABOUT WHAT YOU ARE ABOUT TO READ

For those of you who only know of the Amateur Radio Newsline (tm) as a text newsletter we would strongly urge you to listen to the audio version this week. Our service is best described as "audio intensive" and all Amateur Radio Newsline (tm) scripts are specifically written for the "spoken word." Because of this there is no way to convey in print the emotion of what you "hear" when you listen rather than read.

Candidly, you are really missing what Amateur Radio Newsline is really all about by only reading it. The newscast is recorded each week by professional broadcasters and is available for private listening or rebroadcast over your repeater. Two methods of delivery are available: FTP downloadable MP3 files or dial-in telephone.

Please visit our website at http://www.arnewsline.org for a list of telephone numbers (you have to pay your own long distance charges) and links to our voice newscast. Free FTP Downloads are available at our site by clicking on the newscast number at the top of the page.

Amateur Radio Newsline report number 1330 with a release date of Friday, February 7 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. The space shuttle Columbia falls from the sky and all on-board are lost. Three were radio amateurs. More on the tragedy and the search for answers comes your way right now:

(Billboard Cart Here)

**

HAM RADIO IN SPACE: HAM RADIO OPERATORS LOST IN COLUMBIA TRAGEDY

Three ham radio operators were among the seven member crew of the space shuttle Columbia who were killed when the orbiter broke up during re-entry over Texas on Saturday February 1st. Amateur Radio Nesline's Norm Seeley, KI7UP, has the details:

--
President Bush Audio: Audio only report. Hear it at http://www.arnewsline.org
--

Those were the words of President George W. Bush expressing the grief of the world on learning that that the spaceship Columbia had fallen from the sky. That it's crew of seven astronasuts was lost.

On board was a 7 member crew that included three ham radio operators. Killed in there tragedy were Mission Commander Rick Husband, and Pilot William McCool. Also lost were Mission Specialists Michael Anderson, David Brown KC5ZTC, Laurel Clark, KC5ZSU, Kalpana Chawla, KD5ESI and Israeli Payload Specialist Ilan Ramon. Ramon was a well-known Israeli Air Force pilot became the first man from his country to fly in space.

Columbia was at an altitude of about 203,000 feet over north-central Texas and traveling at 12,500 mph, when Mission Control lost all contact and tracking data. It was about 9 a.m Eastern time. That was almost the same moment when residents in the Dallas area reported hearing a gigantic sonic boom. The loudest anyone had ever heard. Witnesses who looked up reported seeing a bright flash followed by smoke plumes streaking across the sky. Several people grabbed their home video cameras and caught the tragedy. Tape shows debris appearing to break off into separate balls of light and falling back to Earth.

What actually happened is still very much unclear. The shuttle is essentially a glider during the hour-long decent from orbit. It is covered by some 20,000 thermal tiles to protect against temperatures as high as 3,000 degrees.

The space agency is already looking at a liftoff incident where a part of the center fuel tank's foam insulation broke away and impacted one of the Columbia's wings. NASA saus that just before it disintegrated Columbia experienced an abnormal rise in temperature and wind resistance. That forced the shuttle's automatic pilot to make rapid changes to its flight path. Some experts say that this is possible evidence that some heat-protection tiles were missing or damaged.

Administration officials said there was no immediate indication of terrorism but accounts from those on the ground have lead to speculation of a explosion somewhere on board the orbiter. Others say the abnormally high sound level was the result of multiple pieces of Columbia all breaking the sound barrier at slightly different times and creating an ongoing sonic boom.

Debris from Columbia fell along Northern Texas and into Louisiana. NASA declared an emergency after losing contact with the crew and sent search teams to the Dallas-Fort Worth area. It also warned people to stay well clear of any debris field they might encounter because of chemical contamination from the very toxic fuel. But that was easier said than done. Residents of the town of Nacogdoches say they found bits of metal strewn all across the city and a local dentist reported that a metal bracket about a foot long crashed through his office roof.

STS-107 was NASA's 144th shuttle mission.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP.

--

On January 28th, 1986, the space shuttle Challenger exploded shortly after liftoff but in 42 years of U.S. human space flight, there had never been an accident during the descent to Earth or landing until now. NASA has grounded all of its space shuttles, but there's no word yet that the Columbia tragedy will affect the current Expedition 7 crew's future aboard the International Space Station. (ARNewsline™ from published news reports)

**

HAM RADIO IN SPACE: TEXAS HAMS ASSIST IN SHUTTLE DEBRIS HUNT

Amateur Radio played a signifigant role in the debris recovery efforts after Columbia broke up over Texas. Amateur Radio Newsline's David Black, KB4KCH, has that part of the story.

--

A family member gets a close-up view to the tragedy. One of the Columbia's heat protective tiles was found near my nephew's college dorm in north central Texas. My newphew took a picture of it, which you can see on the Amateur Radio Newsline website. While the tile survived re-entry, the Columbia did not.

Within hours of the accident, Amateur Radio Emergency Service volunteers with the Nacogdoches Amateur Radio Club began helping Emergency Management officials and NASA teams in locating and cataloging debris falling from the shuttle.

Tim Lewallen, KD5ING, is the Public Information Officer for the Nacogdoches Amateur Radio Club. He says the hams worked in tandem with students from a local college's Geographical Information Systems lab. Together, they surveyed the city and county looking for shuttle debris. When any was located it was photographed and its exact position determined using a G-P-S. The data was later downloaded into a database that will be superimposed over terrain maps. Local officials say debris was found in nearly 2,000 sites, including some 1,200 places in Nacogdoches County.

As we go to air, well over 12,000 pieces of Columbia had been found, from as far west as New Mexico eastward into Louisiana. NASA hopes the position of the debris field will give it some insight into what caused Columbia to disintegrate.

Reporting for the Amateur Radio Newsline, I',m David Black, KB4KCH.

--

Lewallan says that the entire effort was coordinated by the ARES group. He adds that ARES volunteers were also directed to coordinates given by NASA that the space agency believed might contain missing parts of the Columbia. The recovery and cataloging effort went on for several days. (Nacogdoches Amateur Radio Club via KD5ING)

**

HAM RADIO IN SPACE: AMSAT MOURNS COLUMBIA LOSS

Its no secret that Amateur Radio and the space program have had a very close association since the very first Orbiting Satellite Carrying Amateur Radio or OSCAR was launched back on December 12th 1961. It was carried into space by a United States built Thor Agena launch vehicle from Vandenberg Air Force Base in California. OSCAR 1 was a tiny 4.5 kg package that made only 312 orbits before re-entering the Earths atmosphere. But it set the stage for four decades of ham radio in space. A lot of it took place from the space shuttles including Columbia. In fact it was from Columbia that ham radio's first man in space, Owen Garriott, W5LFL, talked to a senator and a king:

--
Audio only. Hear it in the audio version at http://www.arnewsline.org
--

And so it was when news of the Columbia's demise began to settle in that the representatives of AMSAT groups from around the world began paying their respects. Perhapps none was more poignant than the words of AMSAT North America President Robin Haighton, VE3FRH. His statement is read by Amateur Radio Newsline's Newsline's Henry Feinberg, K2SSQ:

--

"It is with great sadness that I have learnt of the Columbia disaster. AMSAT has always been a strong supporter of the Shuttle program and of ARISS. We have had many interactions with the astronauts who have fearlessly ridden the shuttle into space. Currently several are AMSAT members and supporters.

On this sad occasion on behalf of the Board of Directors, Officers and Members of AMSAT, I wish to send our deep sympathy to the families, relatives and friends of those who undertook this Columbia mission. Their understanding of the risks taken on this and other missions did not prevent them from performing at the highest level, and, unfortunately paying the ultimate price.

To our friends at NASA, we at AMSAT send our understanding and our sympathy,
knowing that the exploration of space and carrying out important experiments
for the benefit of humanity will continue to be your mission."

--

AMSAT France, AMSAT Germany, AMSAT Itlaly, AMSAT Sri Lanka and other AMSAT groups the world over also offered words of condolence an consolation.

Frank H. Bauer, KA3HDO, the Chairman of ARISS International issued a statement that read in part -- and we quote: "This is a difficult time for all of us. Let's work together to keep the torch of space travel alive in the hearts and spirits of humans worldwide. And most importantly, please keep the astronauts, their family and friends in your thoughts and prayers." (AMSAT-NA, ARISS, others)

**

Break 1

From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the W4BBB Radio Amateurs Club of Knoxville repeater serving Knoxville Tennessee.

(5 sec pause here)

**

RESCUE RADIO: TENNESSEE HAMS HELP AFTER TORNADO

The January 8th issue of the Knoxville News-Sentinel tells the story of Sheila Tailent, KB4G, and how she came to the rescue after a tornado ripped through Morgan County Tennessee. Tailent is the state ARES coordinator realized a need to provide reliable communications following the storm. Thanks to her efforts, within 15 minutes after the twister struck hams with emergency communications gear were on their way.

According to the News-Sentinel, for the next 48 hours ham radio volunteers relayed communications among police departments, firefighters, rescue squads, demolition units, repair crews the Red Cross and many others. The article says that dozens of radio amateurs worked around the clock with many taking vacation days from work and donating the time to the community.

The newspaper says that a conservative estimate of the value of the communications provided free of charge by hams to Morgan County could be upward of $80,000. (W5YI Report)

**

RESCUE RADIO: BE PREPARED - PART 2

The Columbia tragedy and the Morgan County tornado are two incidents that again bring home just how important it is for ham radio operators to be prepared. The ARES members in Nacogdoches Texas had no idea that their training would involve them in trying to find out why a space shuttle fell from the sky. But thats excatly the role that they played -- and continue to play.

Last Week, Lloyd Colston, KC5FM, was here to explain the importance of emergency preparedness. Now says Colston, its time for some personal preparations:

--
Audio only report. Hear it at http://www.arnewsline.org
--

Lloyd Colston, KC5FM, is with the Mayes County Emergency Management in Pryor Oklahoma. He will be back from time to time with other tips on how hams can be ready for any emergency that may come their way.
(KC5FM)

**

RADIO LAW: FCC AND NTIA TO IMPROVE FREQUENCY COORDINATION

The FCC and the Commerce Department's National Telecommunications and Information Administration have signed a new Memorandum of Understanding on spectrum coordination. According to the C-G-C Communicator, the agreement calls for the FCC to responsible for non-federal frequency users such as broadcast, commercial, public safety and even Amateur Radio. The N-T-I-A will hold responsibility for all federal government users. The full document is on line at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-230835A1.doc (CGC Communicator)

**

SPECTRUM ISSUES: FCC REALLOCATES SPECTRUM FOR NEW WIRELESS SERVICES

Also from the C-G-C Communicator word that the FCC has reallocated 30 megahertz of spectrum from the 2 GHz Mobile Satellite Service to fixed and mobile services. The purpose is to provide frequencies for a variety of new wireless applications. The Commission is seeking comments on potential uses of an additional 15 megahertz of spectrum previously identified for new wireless services. It also wants comments on increased flexibility in the Unlicensed Personal Communications Service band. This too is on the web. You will find it at:
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-230754A1.doc (CGC Communicator)

**

CONVENTIONS AND HAMFESTS: SUPERFEST 2003

A-E-S has gotten it's Superfest 2003 registration form online. The Superfest takes place April 4th and 5th at Amateur Electronic Supply in Milwaukee. To register take your web browser to
www.aesham.com and take the link to the Superfest menu. If you need help or have any questions, please contact Molly Schreiber at A-E-S.
Her e-mail is molly@aesham.com (AES)

**

HAMFESTS AND CONVENTIONS: RADIOFEST IN SEASIDE CALIFORNIA

The Naval Postgraduate School Amateur Radio Club will host RadioFest 2003 on Saturday, February 22nd. This is a West Coast hamfest and will be held at the General Stilwell Community Center in Seaside, California. The show includes a flea market, vendor booths, demonstrations, license exams, door prizes and more. Among the forum presenters scheduled are Leslie Ragghianti from the 911 Emergency Communications Center, Jeff Orr, K-G-6-K-C-O, discussing "Echo Link" along with Don Carlson , KQ6FM, and Glenn Thomas, WB6W discussing ARES. Sound interesting? For more information go to the web at www.radiofest.org (W6FVI)

**

RADIO MEETINGS: SCADS IN SEAL BEACH CALIFORNIA

Also in the Golden State the Southern California Area DXer's shortwave listeners monthly meeting takes place on Saturday February 15th from noon to 4:00 p.m. Pacific time. The venue is the F&M Bank Community Room in Seal Beach California. This months subject is Radio Communication Listening Worldwide. For more information e-mail Bill Fisher at billfishernow@netzero.net (SCADS)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE FUTURE: HOW TO MAKE HAM RADIO MORE KID FRIENDLY

"How to Make Ham Radio More Kid Friendly" is the topic that Amateur Radio Newsline has chosen for this years Ham Radio Town Meeting and we are looking for some younger hams who might want to take part.

The Town Meeting is held each May at the Dayton Hamvention. This years Hamvention theme is the "Year of the Young" and planners tell us that the three day show will focus on the young ham and on bringing 12 to 18 year olds into amateur radio.

Its no secret that recruiting youngsters into the hobby is getting harder and harder. Keeping most of them is all but impossible. There is organized sports. There are those numerous after school activities. And lets not forget the lure of the World Wide Web with its license free ham-radio like chat rooms. All of this makes it a real challenge to get youngsters licensed and keep them interested.

Obviously the old ways of recruiting young people no longer work. So we are going to take two hours and give you the chance to come up with some new ways.

If you are a young ham planning to attend Hamvention 2003 and would like 10 minutes to present your ideas, drop us an e-mail. We will go through what you send us and some of you might be invited to be a part of our all-star panel.

The best way to contact us is by e-mail. Mark your note Town Meeting and send it to newsline@arnewsline.org. (ARNewsline™)

**

ON THE WEB: REPEATER LINKING POWERPOINT PRESENTATION

If you are into repeater linking, this one is for you. Kevin Custer, W3KKC, reports over the VHF Reflector on a new Repeater Linking presentation using Microsoft's Power Point Presentation format. It was produced by Douglas Otoupal, N5HYD, is 131 kilobytes in and available at http://www.repeater-builder.com/rbtip/pdfindex.html. (VHF Reflector)

**

INTERNATIONAL - GREECE: NEW VHF/UHF ONLY LICENSE CLASS

The V-H-F Reflector says that Greece now has its own, entry level VHF only license. The new ticket use the prefix SW1 through SW9 with priveleges on 2 meters and above. SV1 through SV9 prefixes indicate Greek stations that have full High Frequency operating privileges. (VHF REflector)

**

INTERNATIONAL - GERMANY: DEUTSCHE WELLE DROPPING NORTH AMERICAN SERVICE

Germany's premiere shortwave station says that transmissions to North America will soon cease. This with confirmation by Margot Forbes of the broadcaster Deutsche Welle that it will be terminating the long running service at the end of March.

Up until now, there have been several claims made by various sources that Deutsche Welle would be shutting down its broadcasts to North America this spring. The station would not deny or confirm this directly until now.

According to Forbes, the stations budget has been slashed time and time again by the German Government. Forbes says that maintaining shortwave transmissions are particularly expensive and the decision has been made to cancel operation on some frequencies. This includes the very popular transmissions to North America

Forbes says that there are no plans yet for a replacement service. but says there is the possibility of somthing being worked out using satellite delivery or over the Internet. (shortwavedxing.com)

**

PROPAGATION: SA 100 MICROWATT 7 MHZ BEACON HERARD IN USA

And a possible record for a high frequency beacon transmitter. Over the last 4 months, an extremely low power beacon transmitter has been operating from the QTH of ZS1J at Plettenberg Bay, South Africa. The measured power output of the 7.029 MHz transmissions is 100 microwatts and reception reports from all over South Africa, up to 1100 kilometers, have been received. But the big surpriose came on Tuesday January 29th. Bill Diggens, WA8LXJ, in West Union Ohio made a positive identification of the beacon transmiutter.

Diggens gave it a Readability 2, Signal strength 1 and tone T 9. He also made a tape recording of the signal received and played it back to amazed South African amateurs on the daily, split frequency net. A newt that can be found 7.095 and 7.177 MHz in the 40 meter band. (ZS6AKV)

**

DX

In DX, PS7AB says that Mexiana Island will be on the air May 21st through the 25th. Five operators will activate Mexiana on 40 through 10 meters on SSB only. Mexiana is considered the most wanted Islands on the Air group in all of South America. More information is on the web at http://www.mexianaisland2003.hpg.com.br (Press release)

**

THAT FINAL ITEM: HAM RADIO AND THE SPACESHIP COLUMBIA

And finally this week, we like many other Amateur Radio operators around the world felt a special loss following the Columbia space shuttle disaster. As we already mentioned, three of the astronauts on board were licensed Amateur Radio operators. And Amateur Radio has had close ties to the space program, to the astronauts, and to the ill-fated Columbia since the very early days of shuttle flights.

It was on board the Columbia during the STS-9 mission in November of 1983 that Dr. Owen Garriott, W5LFL, became the first person ever to operate a ham radio station from space. In case you have forgotten, this is how that historic contact sounded:

--
Audio only. Hear it in the audio version at http://www.arnewsline.org

--

That QSO marked the first time that astronauts could communicate directly with people on Earth. And they did it without going through the normal NASA's communications channels.

In 1990, NASA, the ARRL and AMSAT formed SAREX -- The Shuttle Amateur Radio Experiment. This was a program to schedule regular contacts between school students and the astronauts on-orbit using Amateur Radio. Astronauts were encouraged to obtain Amateur Radio licenses. Many did and they used them to talk with kids in schools the world over. A lot of those contacts took place from the mid-deck of the spaceship Columbia.

--
Audio only. Hear it in the audio version at http://www.arnewsline.org
--

In addition to the SAREX contacts, astronauts were encouraged to spend some of their free time making random contacts with hams on Earth. Open contacts they were called and they became a new form of radiosport. A kind of contest with radio amateurs everywhere vying to be the first in the city or neighborhood to talk to a ham radio operator in space.

Then Russia entered the realm of ham radio on-orbit. Amateur Radio gear was installed on its MIR space station and talking with cosmonauts soon became almost commonplace. Who can forget British astronaut Helen Sharman when she visited the MIR and took to the airwaves using ham radio.

--
Audio only. Hear it in the audio version at http://www.arnewsline.org
--

SAREX has now given weay to ARISS -- Amateur Radio on the International Space Station. But it all had to have a beginning and from its earliest days on-orbit until it disintegrated in the sky above Texas the space ship Columbia and ham radio have shared history together. Now the Columbia is now gone, but the world of Amateur Radio will never, ever forget it or the seven human beings who were on it when it met its firey demise. (From the combined thoughts of the worlds radio amateurs as posted to various Internet remailers, by e-mail and numerous other sources.)

***

NEWSCAST CLOSE

Good advice.

Local clubs would be an excellent resource for not only the exam, but instruction to prepare you for the exam and give you an understanding of the material.

Some even do a "Tech license in a weekend" setup, where you have instruction all day Sat and Sun AM, and the test Sun afternoon.

Also, many hamfests have an associated testing session.

Happy trails,
Gary (net.yogi.bear)

Hello! Am still trying to figure out what to buy. I am thinking the Yaesu FT-817, as I have antenna restrictions, limited space, and limited time on the air. Here is what I will be doing: Mainly local 2 mtr repeater work, messing around on 6 and 70cm (I will have a tri-band antenna up on roof) and for HF, I only listen to some hams and general Shortwave stuff (will use 70' random wire). Anyway, any thoughts good or bad on this radio? How is the receive for general coverage HF? Thanks in advance!

Hello Group,

Looking for a manual for the Standard Radio C558A 2m handheld on behalf of a fellow ham.

Specifically, he's looking for instructions for setting the PL tones on this unit. Apparently it's not as intuitive as other rigs.....

Please contact me off list. Remove the no you don't from the address below to reply.

Thanks in advance

I recently passed the Technician exam and am looking to purchase a mobile rig for use split between base and a big gas guzzling SUV. I've been an active SWL for quite sometime and would like any recommendations. Thanks.

Try sort for a web page, like www.kenwood.
You may get lucky? This is a guess at a web site.
You could try a guess like www.trio
These are only part web site addresses, and as I say
a guess at that.

Any of the "big Three" Yaesu, Kenwood, Icom, would do you fine. As a SWL, you might like the extended receive features found on some of these rigs.

You could mount it in a way that you have a PS and antenna in the house, and a direct wire power connection and antenna in the car, and just move the rig back and forth as needed. Quite common.

You may not need it in a large vehicle, but a number of these units have an optional add-on that lets you mount the faceplate here, and the actual box there. For moving back and forth this could get too complicated.

www.arrl.org (in the members section)
www.qrz.com
www.eham

are sites which have equipment reviews and comparisons.

Many units have their own specific email groups at Yahoo Groups.

And of course, if you attend a meeting of a local radio, you will be able to find people happy to talk about equipment.

Happy trails,
Gary (net.yogi.bear)

I've lost the instruction book for my 1984 Kantronics UTU.
Recently returned to the air and want to put it back in service.
Anybody out there have a manual or know I might find one?
Tnx

I don't think you would have anything to worry about with an indoor antenna such as the AP10, Mike. These antennas are designed to be mounted on window sills with the radiating element on the "outside" side of the window, well away from the user, so the chances of RF exposure are minimal.(The radiating element cannot fall onto anything either, since it is attached to the mounting bracket.) I live in an apartment building and use a similar type of portable antenna (MFJ-1621) with a 100-watt rig; I have had no major issues with it except for some feedback into my headphones when transmitting on 10m SSB.

Good luck, and I hope you pass your General exam. Once you have the General you will have 90 percent of U. S. amateur privileges as well. It's a great feeling to get that ticket. I had a Technician license

for ten years and upgraded to General in 1985. That upgrade was one of
the best things to happen to me since becoming a ham in 1972.

73,

Jeff Strieble, WB8NHV (mailto: jeffhs@ameritech.net)

> TELL ME ASSHOLE...DOES SWITZERALND, FRANCE, SPAIN, ITALY, CANADA ,
> MEXICO, ARGENTINA OR ANY OTHER NATION HAVE THIS PROBLEM WITH THE USA ?

(snpd)

Why murder people for bush when we don't need to sacrifice our families for such evil stupidity? If inspectors have unfettered access, and bush has no evidence to substaniate his demon allegations, why then must ALL America side to be war criminals? Is it not more effective to go anywhere without firing a shot, than it would be to kill people as innocent to increase the terrorist threat? How can warring Iraq be better at destroying hidden anywhere WMD, than methodically seeking out weapons that no one has a basis in fact as existing today? Mr. bush jr.'s dad sold Saddam Anrathax up untill 1992, and anthrax doesn't have a shelf life of a decade. What about following the criminal leads for the last American anthrax attack, before we blame Saddam on that too as powell as proscibed?

(snpd the good stuff...)

See, bush has said that his criminal america, does not want to seek out Iraq's WMD through non-violent means, but rather, would decide to murder millions to increase the likely terrorist threat to all Americans everywhere, from sales Saddam may have passed to the Laden Group years ago as extremely unlikely. Substances like Anthrax, that were illegally sold to Saddam more than a decade ago by bush's evil father, is evil bush jr's secret evidence, of a substance, that has long since expired due to shelf life. Ahh, but the bushwhores wish confusion for Americans with the facts, so they can betray God as the Nation, and everything the flag once represented. It would seem if Laden were involved with Saddam, that would therefor mean, do not attack Iraq criminally with un-needed murders. For then, the terrorist threat would manifest like bush is America's cancer, and the world would have good reason to hate american cowardice to stand up for themselves as equals under God, siding instead, to be pulverized into tyranny by Humanity as a lost cause gone broke from misgivings.

--

Johnny Wizard is Mainstream!

The nazi fuck bush, the unelected American cop killer, has still to be questioned by american corporate dictates, why, General Ahmad, is not a wanted man by American Patriot flag waving standards being coporatized as not worthy thinking as. Our entire World can easily witness, no American soldier has publicly stood up verbally against my calls for bush and rumsfeld's immediate arrest or execution for 9/11. Sure Blitzer, and Bill Hemmer froth secretly in contempt for all the American People, at the opportunity to sit secure well blocking US interests at CNN headquarters, to watch in glorious minute by minute coverage, scores of unrepresented by corporate cult standard Humans, be criminally murdered by their evil anti-American propaganda by the will of now more than 2 billion people the bushmob has declared as his personal enemy (60 countries), just like what Blitzer and Bill have done unbiasedly regarding Afghanistan's heroin pushers, the deliberate bombing of the Taliban's girl schools, and the running of death squads by wimp ass coward and traitor to EVERY soldier the world over, tommy franks, largely as he has, against the understood by all to be innocent, unarmed and practically defenseless. With bush's america, showing no interest in preventing the further degradation of the living standards of US People in Afghanistan, (who were already at the brink of starvation), but for to steal the resources of an impoverished nation, and too, as they have, already indebted to the World Bank by purchasing millions of unused american minted terrorist handbooks from the eighties, while spending 4-5 billion dollars a month to continue killing US innocent people to steal even further American values, like "we" don't even exist anywhere. More wealth wasted than would be needed to feed and house the entire population, while forming a just police force accountable to a rule of conduct. But no, according to the election rigging repuglicans, (ES&S search "Dozens of Documented Reports") there is no money to steal if they don't murder, torture, and rob from our communities to destroy our belief in Humanity. Again, I will remind you reader, and NRA card caring member if your joining ME late, I have personally contacted Bill Hemmer, and Bliter's secret "War Room" in Atlanta, as well as contacting Walter Issacson (CEO of CNN), and Sid Beddington (super dumbass CNN producer) with the following facts, that they have refused to allow Americans to openly consider in bush's criminal american dictatorship. Our Mr. bush Jr. and rumsfeld, had a plan revealed by MSNBC to invade Afghanistan, on the premise of not following the criminal evidence for a undisclosed crime, while planning to blame bin Laden for it without producing any evidence, a crime that hadn't even yet taken place when the plans were officially drawn up and dated with General Ahmad, plans to specifically attack the Taliban for not siding with Enron we learned from Niaz, The Working Group, India, cheney and Ken. Also, the Taliban, had offered Laden for arrest during Clinton's tenure, but Clinton admitted, they could not actually find any evidence to stand the scrutiny of the public, nor justify the reasons for Laden's blind vilification through corporate controls. (It has been alleged it was Barbara Bodine HERSELF who sent the Cole into Yemen against the voiced concern of all involved military commanders, then insured the criminal investigations into her matters would be halted, as example.) So, clearly, a brand new crime would have to be devised secretly. (Note: without 9/11, how would it look killing indiscriminately severely poor Afghan families not tied in anyway whatsoever to flying American planes into American buildings by a German, Mr. Atta, who was funded by the General, salaried by the 30 billion plus Tenant?) That's right. This same General Ahmad, from the ISI, not only put together the 9/11 cover up plan together with the bushmob in Washington according to several members of the Senate Intelligence Committee, but also was according to the fine FBI officers involved in the criminal investigation, the prime terrorist funder, to our Mr. Atta. (globalresearch.ca) Also, if this doesn't already clearly paint a clear picture of betrayal by CNN ignoring the American People, consider this also: The bushmob insisted this same General be the war criminal to go to the Taliban personally, to tell US, no evidence would be offered against Laden, nor public trial offered, against what would be to all Americans who actually believe in the Constitution, and the Bill of Rights, (or the Taliban leadership who really believe in God while mistaking like everybody else does), not guilty of the accusation based only as blind speculation. The very same General who devised the plot we're telling you, as documented, and confessed to MSNBC by the White House ALREADY. What an "embarrassment" the ISI blushed! So, what did bush, america's false deity then state as traitor to ALL humans while closing investigations? "We don't need any evidence, we know he's guilty.", right on que. Mr. bush, the demon plays that cheat against Humanity over and over again now, like he figures someday it'll really work for me, (never mind G), cause he figures no truth exists actually in his dark evil world of betrayal against himself as US all included. His wicked dumb evil, that costs the lives and hardships of REAL Americans, only succeeds, because corporate dictates demand no discussions on anything politically factual. (At least not for longer than two or three minutes, with nobody respected as invited for being knowledgeable, or knowing basic high school maths either.) It's the term "we", bush and rumsfeld uses routinely, without substantiated fact to honestly hold our conclusion, as their criminal justification to willingly murder US people as unheard of. He figures as the anti-Christ, because he stole the title of President, he therefor inherited all knowing wisdom like dark magic by openly fooling himself, as all of humanity witnesses repeatedly his falsehoods on our truer Nature. Not as a Jesus the Creator might, to play the crazy, laugh at strangeness, or sing almost lyrically to life for the joy of it, but as a talentless demon monster to rob and murder from ourselves as the established innocent factually, and left unprotected because the Living eternal Universe can be feared for nothing I suppose. If bush is not following the criminal leads, nor the relevant public information easily available for all to peruse, how can he disagree with everyone without public answers to disprove our existence? "Secretly", he and rotten rumsfeld continue to state to the six billion plus of US, even so though, it doesn't therefor make the recorded History, or the actual evidence of reality go away somewheres else, such as some of the great work the FBI, or the CIA has done being directly involved, again doesn't just vanish as not presidentially viable.(The highest office in America, should be citizen.) Or, make WMD just appear out of nowhere either, if Iraq don't actually have any. You'd figure, as Mike said better at whatreallyhappened.com, but I can't recall specifically, if bush has secret evidence to substantiate his allegations against the Iraqi people, and thinks his knowledge, being better than all US rest put together, shows a threat to the American People, wouldn't he therefor make it known to all, to protect ourselves truly as concerned? Like Johnny would? Instead of, as he is, using the bluff to excuse the potential MURDER of untold thousands if not millions to also steal from for himself, like the election, and that 50 billion? Remember: bush killed New Yorkers to steal American lives, and publicly showed Our world no interest in arresting himself, the true evil doer for the 9/11 money maker. No purpose in life, but to make others suffer and die, is the bushmob mantra. (Even if weapons do show up, staged, or otherwise, it is still no reason to kill Iraqis to steal their resources, to leave US people there, under a criminal dictatorship for a planned thirty years of massive American casualties after American casualties, so the bushmob can steal even more from our grand parents left unprotected without police protection here at home left alone.) Particularly, if the public evidence we conclude as documented FACT stands directly in opposition to bush's dark secret fantasy of Universal criminal tyranny he spews daily as lies against GOD in Our public air space. A planned criminal tyranny of evilness, that has been released to US publicly through one real American after another, ignored overtime by the CNN celebs, yet, still happening as Our high priority issues. I'm beginning to have a difficult time keeping up with the truth that leaks from the bushmobbed syndicate like a sieve practically everyday too. Have you heard of, "RebuildingAmericasDefenses.pdf" on CNN? Or, how about "11-14-02_Chin-4.pdf"? (Don't miss that one.) I haven't, but can't really stand watching them pretending we can't see anything at all either. So, these terror plans.. When the nazi bushmob was caught without them, (as they were top secret presidential documents entrusted to the witch condoleeza), could do nothing but confess they were fully implemented. Why? Because they walk through the entire scenario that bush puppeted the months before to armed Soldiers. (God wins every time.) Mr. bush and General Ahmad's plan, is to continue to wage an unending war against humanity, (60 nations) as the "way" of escaping public Wrath, Your Wrath American Soldier, for something, that, again, for 9/11, hadn't yet happened, but bush and rumsfeld prepared for to close investigations on. Mr. rumsfeld was reported (emperors-clothes.com) to have been told by his own Secretary, in case he had forgotten his top job responsibility while sitting behind his desk fidgeting, he was, as rotten rumsfeld, required to be at NMCC immediately. He didn't go after then either. The only possible place the terrorist plan could have been carried through to stand down the Air-Force. (Let those under him take the bullet if push comes to shove. American traitor rotten rumsfeld thinks of everything too eh?) His public excuse I'm sure it would be, he was concerned about the death of US People while sitting there doing nothing. The same rotten rumsfeld, who tells US openly in Our public arena while almost cackling, he wishes to murder and torture completely innocent people that Americans should be forbidden to learn of in a open as the Public court room of Our peers through America's once respected, if sadly, mostly mythologized fair Justice system, now headed by ashcroft, a total incompetent, who wishes not to apprehend terrorists by tracking the criminals, but to destroy what little freedom is left for America by advocating, in public, the persecution of US innocent persons instead. Really. Again, listen up Ashcroft, last time: bush and rumsfeld's plan, that the White House confessed to as fully implemented, demands by excuse after excuse, that the actual evidence trail not be followed, and that legitimate FBI, and CIA officers (Rowley, and the insider trades for example.) are to be continually ignored. Just as CNN has done staying unbiased. Allowing bush and rotten rumsfeld to kill innocent People deliberately, stealing America's Freedom through injustice to themselves. First degree murders. See, the nazi bush slaves go on and on how great it it to be murdering innocent populations far away as terrorists to steal and plunder, but, for who would be there as themselves close up and personal (gods WE are) to question their own demise by someone who thought without thinking likewise? (God is Not.) This is why I ask an American Soldier somewhere to stand as One single person for America, a Family Man, and take out the re-offending mass murderer, unelected dictator, Our Mr. bush Jr., by thinking like a Soldier is really Universal. And, if his successor, should do the same secretly, publicly advocating wars, death squads, or torture against Ourselves as the innocent to steal from, WE do the same again, until, CNN finally opens up communications to the American People as warranted to be wise.

Sure, only Jews in Kenya, like with Odigo, seemed to be warned to stay clear from an impending terrorist act, and sharon played a personal role as documented several months ago to attempt the blowing up the Mexican Congress and blame it on the Unionists, or bin Laden, oh ya and also, I shouldn't forget, apparently, the rocket launcher was painted blue lying in a field untouched when the mossad in Kenya pointed it out to reporters they brought to witness the whole story by-line, but that doesn't therefor, make the likud party, or especially ariel sharon Jewish. For ariel knows when he steals or kills others as innocent being himself openly a terrorist, is ariel knowing, real Jews would be murdered too, by someone like himself, albeit, in secret avoiding the trying but divided coppers, that he murders also. But, hey, that's where he gets all the repuglican money he doesn't earn but steals over the lives of Jews he watches fall dead as unfigured. Mr. sharon, will tell us how disgruntled he is to see only Jews die by terrorism, then goes out as a PUBLIC FIGURE, and commits the same, but far more hanious acts against G as a pirating criminal National icon. So, sharon, what is it that so upsets you to see US Jews die then you nazi parasite, you cancer tumor, you disingenuous harbinger of suffering to God as Humanity? It is only his private show without questions for comment, as he can not answer publicly without being dishonest about his criminality. Murder is murder, and sharon, the bigoted-racist murderer, the terrorist supporter and perpetrator, has stolen the rights of the Children of Israel to live in peace by good will, and Justice for everyone counted. Jews are Palestinian. See, being Jewish is a religion, and the ancient Palestine, is of a label for comprising every understanding to this, that can not be completely understood symbolically as contained to be definitive. Also, like America is truly melting, and murder accomplice negroponte, can not face for personal weakness, ineptness, and hatred for all of Humanity, so advocates huge oppression against all America as real People corrupted by a government of injustice, and contempt for themselves unheard from. (Jesus, just try to get together two people who agree on everything. Justice however, should be a no-brainer for everyone, but CNN say's nothing in Our defense as equals, and would, as they do, watch You be robbed and murdered, and not raise a word.) Also, just for double, the oldest practicing Jews we know of through recorded history, (the almost censored "Dead Sea Scrolls" included), are dark skinned, and live in Ethiopia, and the likud party, like so many other "settlers", are mostly filtered christian Kaisers, who migrated from Russia on the promise they would receive stolen property, (sure, I'm jewish!) (search "ILA" and the "JNF") like farms, houses, and Our children's toys. (FrontLine's one time broadcast) See, If sharon didn't steal and murder, repuglicans would have no excuse to receive kick backs to plunder even further, from the great stupid American People. Which is why a bush supporter is so deeply ignorant on just about everything like Speilberg is regarding the Holocaust, and like too many american soldiers, who we can be sure, would die in sacrifice from cowardice before bravery as evil under the anti-Christ, dictating war crimes against US all as Humanity unrepresented. Until Now. For, Christians have no protection from anti-discrimination laws in Israel, nor do Atheists either apparently. How spooky dumb is that? Legitimizing hitler they are politically. Jews are this, jews are that, and all of everyone else, is something unquantifiable, unknowable, and all around unloved and disrespected everywhere as G-D is forgiveness to be abused on Christmas, according to the deliberate practices of sharon singularly, as a bigoted nazi murderer, and the written words of the banned in Canada talmud also.) No bullshit. Clearly to all, very anti-American. Biggest secret going! Why? Americans are largely illiterate, drugged, and all around dumb. Now, where is CNN, or Our beloved "wealthy" celebs, who advocate blind obedience as slaves to the anti-Christ, to discourse me a liar truly as Jesus? Nowhere? You are still waiting People, while American families continue to be robbed and left for dead by inaction through corporate american standards. For, what can only one God do I ask yourself really?

If a thing is done wrong often enough, it becomes right.
-Richard A. Leahy

Johnny Wizard

--

Holy Jesus Man!

Have you heard the Revelations from India's government to the FBI now made public?, regarding the principle terrorist funder of Mohammad Atta being, the ISI's, General Ahmad? The bush administration's personal confidant, and top secret military strategist? See, it was Jim at MSNBC that informed US of bush's terrorist plan existing as once top secret presidential documents, and, that this same general, was also responsible for, according to several members of the Senate Intelligence Committee, developing the said war strategy of invading Afghanistan on behalf of the evil bushmob, with the very anti-human premise, of blaming bin Laden for a crime without any evidence to substantiate our public accusation, to murder more than a hundred thousand, plus! A crime, 9/11, I will remind you, that for when the evil plan was devised, hadn't even yet taken place. But was threatened would happen, if the Taliban didn't side for Enron's interests in serving for Ken Lay, one of bush's many bum buddies. (They apparently do that sort of thing on a regular basis, with all the members in their secret meetings of the 'only Boners' fraternity.) It doesn't take much either to understand why rotten rumsfeld, corporate america's sweetheart, (you know, the sadistic nazi war criminal who gets off on murdering or torturing innocent people), told US he wanted to have arrested those at the WhiteHouse and the Pentagon, or even in the Military, who would dare as Americans, to inform Americans what he and bush were truly doing in their names.

Destroy the unelected unarrested heroin pushing American cop killer war criminal, the demon we all know so well as corporate america's false deity, the super evil doer anti-Christ, Our Mr. bush Jr. Now Patriot Soldier, and be loved by all as Savior. Or not, and be a thoughtless degenerate, a cowardly regressing nazi bush slave, who would sacrifice your own family as yourself truly, because JESUS CHRIST, life is living to survive for Justice, as God is warranted to be as ourselves, with equal rights to being as is of US all included. Mr. ashcroft tells Americans he is purposefully destroying their freedoms as legal due process because he, as an idiot, and a traitor, has to fight ourselves as a terrorist blindly in Our names without American Justice, but never explains his action, is asked to, nor could he. As ashcroft, like most in the bushmob are, is founded completely unqualified. Why doesn't ashcroft move to have bush and rumsfeld arrested or executed immediately by following the criminal leads for 9/11 on behalf of Americans as an American?, what with all the ample evidence documented as factual and everything? Instead, decides too, like the demon bush demands in attempt to sway his capture, that evidence will no longer be mandatory for him to decide who should be stolen from, as the left dead to be robbed as forgotten by Justice denied to all as Godly. American soldiers are truly as represented, weak, slow, and painfully pathetic cowards, refusing to protect their own families as a national defense measure, instead, as nazi dumfuk bush slaves, willingly support the murder of would be themselves as criminals, truly against US all as the innocent.

Mr. bush was quoted once again defending his irrationality as criminal murder rampages against the innocent as ourselves like he did in New York City with rumsfeld, by stating,

"Maybe somebody needs to explain to me why they say something, but I don't feel like I owe anybody an explanation."

The evil anti-Christ figures he'll just continue to rob and murder American Patriots while destroying freedom as Justice for US all, and simply escape Your wrath by corporate america making no fuss to speak in Our defense as the still living to be underestimated as equals.

Destroy Our Mr. bush Jr. now, and be loved by all as God would!

From: British News
July 17, 2002
Britain backs US plan for attack on Iraq
By Philip Webster, Political Editor

(Quoting the terrorist supporter blair, Philip was),

``To be TRUTHFUL about it, there was no way we could have got the public consent to have suddenly launched a campaign on Afghanistan but for what happened on September 11.'' ...

Oh, so there was a criminal intent known also by yourself then blair to prop up heroin pushers to save Enron's impending criminal bankruptcy?

We have repeatedly witnessed, CNN and CBC refusing to represent our Democracies, our FBI officers, like airing Coleen Rowley, General Ahmad, or the sabotaging of the Moussouie investigation by ashcroft, or the CIA, regarding the insider stock trades, or dealing heroin. The innocence of the Taliban for 9/11, and the barbarity of the Northern Alliance as heroin pusher slave owners. No, every single american according to CNN being unbiased, does not want bush the anit-Christ arrested immediately for killing Americans in New York City to steal our worths and freedoms as worthy of defence matters by their own measure as corporate cultists. As I told you, Bill Hemmer and several other celebs at CNN, now are fully aware of bush and rumsfeld being the true purpetrators of 9/11, yet, Bill continues to play evil against US all, figuring nobody ever will know without CNN coverage on his contempt for American Patriots he asks to have sacrificed for as bushwhores like himself and Blitzer. CNN refuses to protect Americans as equals commited to Justice for US all.

It was just reported by Chris Marden on the 27 November 2002, that bush's top whore richard pearl, has advised Britsh MPs, that bush secretly as the anti-Christ has no intention of allowing the Iraqi inspection process to succeed, and instead, is commited to murder ourselves either way.

Again, bush and blair, like CNN, have no evidence to substantiate their allegations against Saddam, and have stated because they have no evidence, they therefor as demons, can murder anyone on the face of this planet to steal our lives in OUR names as US innocent. Mr. blair and the bushmob have recently stated, that they have no evidence that Saddam has any WMDs, nor, is any threat to OUR WORLD community, and because of that, if the inspectors find no weapons, and Saddam insists it is because he doesn't have any, this, accordingly, would give these criminal master minds a cause to murder hundreds of thousands of innocent people, if not millions, and steal all the assets of the Iraqi people, while destabilizing our entire endangered species. They are mass murderers, threatening humanity to recommit more murder as TERRORISTS! Never while I stand ALIVE evil nazi dumb fucks. KILL BUSH NOW! Hey, have you heard about rotten rumsfeld's P2OG? "O", as in Oh rumsfeld is truly an evil fuck! Apparently, rumsfeld wants to provoke terrorist activity to murder ourselves as innocent cilivilians, as an opportunity to invade any country he wants to rob and plunder further. Also, most importantly, according to the official documents, rotten rumsfeld figures it would be important when he and his mobsters commit these crimes, it be understood, that nobody be able to trace it to himself, or his partners in crime, so they figure, the criminal acts should be carried out through his department at the pentagon, then, get this, he won't therefor be accountable, or scrutinized by the American people through corporate news channels. The offical pentagon report details this.

You see the American cop killer unelected bush or blair, tommy franks the death squad recruiter child killer, unelected rumsfeld or unelected cheney, unelected poindexter or unelected ashcroft, you kill them instantly for attempting to escape the criminal arrests of those responsible for mass murder of Americans in New York City. You either shoot them dead on the spot, or tear them to pieces with your bare hands God lovers. No legitimate judge, jury, or police officer, would do anything but commend you for saving OUR lives. The bushmob our threatening our entire humanity with criminal murders to rob from ourselves deliberately. Counting on american nazi troops to mindlessly slave to their orders, soldiers so unbelievably dumb, weak, and cowardly to allow the bushmob to rob not only from their own parents and children, but even themselves as they fall dead as cowards, before they even dare to publicly ask questions about what the fuck they're actually doing, that frankly, leaves me even beginning to have my own doubts.

Also,

Mr. blair, you evil nazi fuck, you do not have OUR consent to commit murder in our names against ourselves as the innocent in Afghanistan, Iraq, or in Britain. Especially now, what with your ties now made public to terrorist acts through the IRA against innocent civilians to steal our values, that you have threatened US Brits to not learn of as having already. (Shayler.) Mr. blair evil nazi fuck, WE DEMAND AS THE BELIEVERS IN JUSTICE FOR OURSELVES, YOUR IMMEDIATE ARREST OR EXECUTION FOR WAR CRIMES AGAINST HUMANITY. YOU WILL BE ARRESTED, TRIED, AND SPEND THE REST OF YOUR LIFE BEHIND BARS WHERE YOU BELONG AS A DANGER TO OUR COMMUNITIES, OR RIGHTLY DEAD FOR TREASON BY THE HAND OF THE ENGLISH!

Americans, the world over are known as cowards, dumb, and willing victims for bush sacrifice as lifeless degenerates, but the Brits, well, you got a another thing coming!

Johnny Wizard has decided to stay for snacks.

Some quotes from:

Americans Against World Empire, Americans Against Bombing

"Moslems don't hate us because we are "good" or "free." They hate us because we have been killing them, a million dead in Iraq, and humiliating them," Editors

"Bush, himself the most intellectually backward American president of my political lifetime, is surrounded by advisers whose bellicosity is exceeded only by their political, military and diplomatic illiteracy," Gerald Kaufman Former Labor Party Shadow Foreign Secretary,Balt. Sun 8/23

`You know what I believe, and you know I can't do anything about it with the crazies in this administration.' Colin Powell's Eyebrows NY Times

"Americans will also have to accept that their triumphalism and disdain for international law are creating enemies everywhere, not just among Muslims," How Islam Lost its Way, WASH. POST 12/30

"Nevertheless, the president continues to divide humanity into the moral equivalent of shirts and skins. "Our responsibility to history," he said, "is already clear: to answer these attacks and rid the world of evil." Not only is this a ludicrous principle on which to base a foreign policy but also an equally ludicrous interpretation of the world's major religions. Mr. Bush should pull out his trusty Bible and brush up on what it says about original sin," Arianna 12/6/01

The Most Dangerous Man on Earth ---Today the world faces a single man armed with weapons of mass destruction, manifesting an aggressive, bullying attitude, who may well plunge the world into chaos and bloodshed if he miscalculates. This person, belligerent, arrogant and sure of himself, truly is the most dangerous person on Earth

"In 1960, when I came out of prison as an ex-convict, I had more freedom under parolee supervision than there's available to an average citizen in America right now... God almighty, what have we done to each other?" Merle Haggard

"The Sudanese rebels had...Israeli support." Wall Street Journal 9/17

"well-funded, semi-autonomous, unconventional centers of U.S. foreign policy." America's Pro-Consuls

"Average annual cost per military service member, including training, pay and benefits is now $98,425," NY TIMES 4/19/02 according to study by Stephen Daggett, military analyst at the Congressional Research Service

"Now, in the views of many scholars, Bush has restored the ``Imperial Presidency,'' a term Arthur Schlesinger Jr. used to describe Richard M. Nixon's administration in 1973.

``The power President Bush is wielding today is truly breathtaking,'' said Tim Lynch, director of the Project on Criminal Justice at the libertarian Cato Institute. ``A single individual is going to decide whether the war is expanded to Iraq. A single individual is going to decide how much privacy American citizens are going to retain.'' Wash. Post 11/22

"We do not agree that if Iraq complies with its obligations concerning weapons of mass destruction, sanctions should be lifted." --Madeleine Albright from an essay by John Pilger (The Guardian 03/04/2000) This never countermanded by Bush.

"'Smart Sanctions' make no provison for paying salaries of civl servants in Iraq. Therefore, regardless of how much medicine, chalk and chlorine arrives in Iraq, doctors, nurses, teachers, water and sanitation engineers will remain underpaid and desperate to find the income to support their families The Iraqis' meager income is already less than a quarter of pre-Guilf War levels." ECONOMIST 1/26/02

At the other pole is Donald "Rumsfeld's Pentagon, increasingly seen by some as an asylum where a coterie of vengeful Cold War unilateralist relics plot a return to a forceful, Reaganesque Pax Americana, broadening the war to encompass military action against Iraq, Syria, and Lebanon--essentially fusing Israel's national security agenda with that of the United States. No fans of multilateralism or diplomatic initiatives, this crew--despite its majority's lack of uniform service or time spent in combat zones--is particularly bellicose, and contemptuous of Powell and his belief in conflict limitation," Saddam in the Cross Hairs

"Making truth the first casualty of our war against terrorism carries a price. Other nations and peoples are more resentful of pious hypocrisy than of Realpolitik bluntness." Bruce Fein, 10/9, WASHINGTON TIMES

``Who has reason to hate this country? Only a few hundred million people -- Arabs, Muslims, Serbs, and numerous others whose countries have been hit by U.S. bombers. Imagine hating a country so much that you were willing to cross an ocean and carry out an elaborate revenge against its people, killing yourself in the process. This is something far more than the sort of ideological anti-Americanism that leads student mobs to throw stones at U.S. embassies abroad; that's kid stuff. This is an obsessive, fanatical, soul-consuming hatred,'' Joseph Sobran column

Scott Ritter, the former UNSCOM inspector who dealt with the Iraqis many times, recently told CNN on 2/18/01 "In terms of large-scale weapons of mass destruction programs, these had been fundamentally destroyed or dismantled by the weapons inspectors as early as 1996, so by 1998 we had under control the situation on the ground." Saddam, says Ritter, poses no immediate threat. Again confirmed Yahoo 4/11/02

Some 7,000 Jewish settlers in Gaza (mostly American immigrants) take up 40% of the land, with 1.3 million Palestinians crammed into the rest, WALL STREET JOURNAL 5/29/02

"The West Bank is not a political battle at all. It is a contest over whether or not the word of God is true....Israel has a right to the land," U.S. Senator James Inhofe, Republican leader in Senate, 12/4/01

"Palestinians recognized Israel's right to exist, in return for a future state in Gaza & the West Bank in the Oslo accords," signed in 1993. Wall Street Journal, 8/13/01

"There is now one commissioned officer for every five enlisted, it was one to six just 10 years ago, and one to ten in WWII," Carlton Meyer

"Washington's turning a blind eye to Turkish human rights abuses, and its sponsorship of the expansion of Turkish influence in the region, have probably done more than anything else to convince Russians that American rhetoric about human rights is hypocritical, and that the United States is implacably hostile to Russian interests ....unnecessary and frivilous provocations...." Anatole Lieven, NATIONAL INTEREST winter 1999

"The Russian Defense Budget is $4 Billion, the American--$284 Billion" NEW YORK TIMES 1/16/2000; "Rus. attack Submarine fleet down from 200 to 20," WASH. POST 8/16/2000; Rus. surface fleet now 35 ships, English Navy has 34, Since end of cold war Rus have cut their fleets by 80%, LONDON TIMES, 10/20/00) Anatol Lieven reports that the total Russian budget for 2001 is $42 Billion (NYT 4/13/01)

"The plight of the Russian military also raised questions about the justification of U.S. military's enormous budget, according to retired U.S. General William Odom, a former director of the National Security Agency, "It does raise the question of why we need 10 carrier battle groups and close to 100 attack submarines," he said. The U.S. budget for 1999 was almost $280 billion while the Kremlin Russian budget was just a fraction of that, at an estimated $5.6 billion.

Under an agreement ratified by Kyrgyzstan, it would earn US$7,000 for each takeoff or landing of a U.S. Air Force plane.......some thirty to forty U.S.fighter-bombers and several transport planes are to be stationed at the airbase at Manas. JAMESTOWN MONITOR 12/11/02

"In another action, Ashcroft moved to inhibit press freedom, a First Amendment right, by encouraging federal agencies to use the pretense of national security to hide public records that the press is ordinarily entitled to receive under the Freedom of Information Act. The law was passed during the Cold War to encourage an open government. Last month Ashcroft issued a memo to federal agencies telling officials that if they decide to deny requests for information filed under the FOIA, they "can rest assured that the Department of Justice will defend your decisions ... ." Helen Thomas

"U.S. military has established 'zones of exclusion' near sensitive U.S. military installations and during major exercises in which international airspace laws are declared invalid. The Gulf of Sidra conflicts with Libya in the 1980s occurred whenever the U.S. 6th Fleet established a huge "zone of exclusion" just off the Libyan coast..... In one incident, a hotdog Navy F-14 pilot shot down two Libyan Su-22s which were cruising off the coast. The Navy concocted a phony "dogfight" story...... For the past ten years, the USA has mocked international law by unilaterally imposing "no-fly zones" over most of Iraq and parts of the Balkans," Carlton Meyer

"Here we are, the most powerful nation in the world, the sole surviving superpower, and around the globe our military folks are hunkered down like inmates in maximum- security prisons. In dozens of other overseas hot spots, our soldiers live in virtual barbwire-enclosed fortresses and call themselves POPs -- prisoners of peace," Col. David Hackworth

And 500,000 Iraqi children died, after PR atrocity lies (Hill & Knowlton) that 20 babies were thrown out of incubators by Iraqi soldiers. (ed.)

Rus. Military Spending $6+ Billion; China Military Budget $17 Billion; Bush 6/01 wants $329 Billion

"There is virtually no situation anywhere in the world that can't be made worse by U.S. intervention," Stromberg's Law (THE COSTS OF WAR, Transaction Publishers, l997)

"The U.S. has perverted the U.N. weapons process by using it as a tool to justify military actions, falsely so. ... The U.S. was using the inspection process as a trigger for war." --Scott Ritter, former head of the U.N. arms inspection team in Iraq, on the NBC TODAY SHOW, December 17, 1998.

Johnny Wizard

Kill bush Now!
Ask any public american bush supporter, why do they mindlessly as slaves without thought to question, advocate as terrorists, the planned for murder of those known by all to be innocent? As yourself, publicly accused in our names without evidence, as done so by the bushmob is still, and will be for always, the high crime of murder in the first degree. A crime well established, as again, I am filing as voiced publicly, against the perpetrator war criminal bush Jr., and rotten rumsfeld, as pirates of my freedom to live for such willingly. I demand their immediate arrest or execution as confessed guilty for 9/11. An american soldier to not do so, is no American Patriot, but a nazi coward, and a traitor against all the nation as America for the People enshrined by the Constitution, as equals under God, innocent until proven otherwise.
Do you think I'm going to go silent?, while the bushmob murders innocent people in humanity's name to steal freedom's won value?, as garnered only through Justice ever fought for? Do you think US for a fool maybe corporate devolving human haters? Mr. bush and

rumsfeld, who with General Ahmad, were the central perpetrators of 9/11, as the actual evidence is concretely established by the FBI and MSNBC with presidential directive documents, with no contention offered from anyone, for as vile evil is deceived, they've already confessed to the deed as guilty of, against the American people as it's Justice system is of ourselves truly living.

But yes, american soldiers are too weak minded to pay attention as even alive apparently, according to almost all American corporate news broadcasts, as worth consideration whatsoever. I'd have to agree, on general terms, americans soldiers represented, are cowardly nazi dumb fuck scums. Read posts at us.military by signed so as bush whores. Barely literate, who spout endlessly about how good it feels to drop bombs on US as the innocent and practically defenseless, while cowering in fear from those who suggest their job is to protect America as the equal rights through law instills, not for the evil, unelected anti-Christ, American cop killer, Our Mr. Bush Jr. to steal further from the American ideal.

We witness in silence to watch their OWN protectors run away to be cowards to drop bombs on ourselves in Afghanistan, so the bushmob can sell heroin and leave the Afghans unprotected, and so further too, rifle all our savings as won for already battles. A criminal is only to be, as known so by evidence. Those to hide the identity of bush's america war reason as good cause, is a deceived nation murdering innocent people to steal our purpose as themselves, unworthy. Like evil tommy franks the terrorist does, murdering people indiscriminately as the unrepresented by corporate outrage, to be denied justice for yourself too american dimwit. Or rumsfeld, who after implementing the strategy to murder good police officers, offered a reward to kill Omar the Just, because Omar publicly suggested arresting the terrorists by following the actual ample evidence as the true American belief system lost to the evil dictates of Un-American rumsfeld's illegitimacy, unchallenged by corporate standards. All of America's intellectuals are forbidden from public acknowledgement through corporate cult standards, though, like Chomsky, sell millions of books almost yearly to US masses. Fuck, I'd destroy American traitor, American cop killer bush, rumsfeld, or death squad leader tommy franks in a heart beat, how about you American Patriot Soldier? Evidence these three sadistic nazi demon child killers demand we no longer follow, to arrest the true criminals, for 9/11 as example, which would be naturally, the bushmob themselves, headed by the royal dumb fuk, america's false deity, the anti-Christ, Our Mr. Bush Jr., the evilest thing that has ever existed in the entire history of humanity. The american corporate news entertainers, do everything they can, to rob from the great American people, their life savings and living standards, by actively working to watch the bushmob destroy the American Constitution through ample corporate media access, er, coverage to not be so concerned with those freedom living matters for our entertainment value. Ask a dumb fuk nazi bush supporter, what a regressive tax is, and they'll go mindlessly blank, while advocating the robbery of their Own grand parents with VLTs, as their very own family being cheated, and mislead, which is why, they are so stuck ignorantly evil, and dumb as themselves TRULY, honest to God, whoreshiping to bush as their all knowing false god unthinkingly. Americans are truly dumb son. (2% Social Security are what Americans are getting back in themselves as investment, but the nazi bush supporters don't want Americans to publicly figure the simple math, but instead, to get access to CNN almost daily need only advocate further shysting, as americans, on the whole, are genuinely stupid to be conned generally as a nation that, in total, holds the highest rates of illiteracy, innumeracy, incarceration, and just overall, dumb fuckedness.) Mr. rumsfeld tells american nazi soldiers he wishes to torture and imprison completely innocent individuals as would be their own brothers and sisters, as denying us all legal due process, while purposefully, publicly advocating more terrorism to benefit the coffers at the Pentagon, and do American soldiers not just shoot him, and bush dead immediately as war criminal mad men on the loose re-offending? No. Not present anywhere as Brave Americans ready for sacrifice apparently. Too fucking stoopid to tink about duh American flag as worth protecting as their own brethren still living. We hear corporate america go on about how important it is to murder established as innocent people for no reason but to put more money in bush and rumsfeld's thieving pockets, while managing CNN for less responsibility,(Less investment for the time spent, or.. more money for the buck right?) all over the arguments that terrorist threats exist secretly that no one actually knows about, while I, Johnny Wizard, tell NRA members publicly, and American soldiers to destroy bush and rumsfeld immediately to many thousands the world over, relying only on the facts clearly documented. Yet, corporate america makes no mention about the importance of practicing the tenants of law to apprehend the two demon fascists, while instead, tells US those that hate bush with a vengeance, just live in some cave hidden away unknown somewhere secretly, and do so because... We hate freedom under bush as dictator. Mr. Bush, you demon nazi freedom hater, you and me, a fight

to the end, bare hands, televised, world wide, then rumsfeld, ashcroft, and finally tommy franks and his wimp ass slave boys. The evidence for 9/11 I stand with, is irrespective of my opinion. The bushmob actually killed Americans in New York city, and no one can actually find disagreement with the documented to be true facts, not the FBI, the CIA, the RCMP, nor, the Secret Service. Nor any of the many police officers I have spoken honestly with. But they, as the corporate cult cogs down at corporate news command, continue to lie as the American public to be drawn cowardly conning, uninterested in arresting or immediately executing bush and rumsfeld as mass murderers, instead, to continue to murder and rob from those they believe are weak as underrepresented by corporate control without themselves as US being. Ever. Bill Hemmer knows bush killed all those many, like himself in New York City, and he speaks nothing in his defense as a victim to his own shallow existence, as nor does he speak in defense of soldiers sacrificed to be as easily propagandized to become traitors to their own family and neighbors. Well, I, for one, am willing to mark down cowardly american soldiers for what they truly are individually, and will continue to Fight as I have, as a true American Patriot, until, those left standing for Freedom, are those who uphold the Amercan principles as law in the American Constitution, and the Bill of Rights, to garner true happiness for the American Nation of Human beings the Universe over. Think NRA member. I'll post this to practically every American military usenet group, and not one American Soldier will articulate a disagreement with our findings as documented, however, CNN will continue to broadcast, that WE, the God Loving, the Just Living, the Atheists, are a poor minority worth sacrifice in the millions for demon bush as the unheard publicly from on the importance of your Justice to be so. That they, the corporate cultists, wish YOUR unquestioning faith and dying obedience for bush to suffer and die undeserving for, is as they witness our world to be what they see to be themselves. Practicing their machinations as corporate agenda. Unthinking...
Spooky.
Kill bush now!

Is Enron Behind The War In Afghanistan?
http://globalresearch.ca/articles/MAD201A.html

--

Look, American soldier..
You now should know, bush and rumsfeld murdered Americans in New York City, and as consequence, have no interest in acknowledging as pursued the criminal investigations. CNN holds no responsibility, as we

witness repeatedly, to American soldiers, but to harbor those who pirate our rights to openly steal real lives. If bush makes no mention of himself stealing 50 billion dollars, murdering American police officers, sabotaging the weapons inspections process, funding israeli atrocities against the God loving, and warring our world as the anti-Christ by running death squads against the innocent, well, CNN, the american success, sure ain't gonna be speaking out for your stolen freedoms poor dying comrades. For what benefit in market share would there be to work for your living, dirt bagged? CNN is so colorfully excited about selling the glossy bush war to kill the poor stupid people, but for what american fascist weak binded bushmobbed soldier without principles? Again, how stupidly dunce does a poor cowardly american soldier have to be to not believe? Nobody but a cult corporatized illiterate fascist nazi vermin parasite, just like Jew hater ariel sharon would support the murder of American soldiers for a criminal conflict that doesn't serve to protect. But if it, as bush nazi evil does with little struggle over the masses complaining, and america marches off to criminally war the third world as the bad guys, our World, indeed this Universe will then know the absolute true cowardice of american soldiers, as premised upon the weakness of america's army to not uphold America's own rule of Law for freedom as themselves included. It only takes One Soldier to turn this tide to destroy bush Jr. and rotten rumsfeld, and that Soldier is where in America partner? Who American soldier, do you think bush as traitor does steal from as the duped General public as corporately represented to be painfully unawares? Do american soldiers have to convince themselves their families are not worth fighting for, and instead, lay their lives down in sacrifice to the bush demon who would also steal from their graves as the lifeless to speak out for themselves ever? Ever? Did you know American Soldier, the Pentagon, after receiving complaints from surviving soldier families, (some of like the over a thousand documented American troops slaughtered in Afghanistan) that taps wasn't being played because of so little real talent present in american military affairs, and that now, when a cowardly American nazi soldier dies for the bushmob, the mock national guard will hold a horn to his lips and act out the part to your grieving as stolen from family, while secretly pressing a hidden button, that will play a cheaper recording? But shhhh...

The fact that you don't see this post, or others nearly like it at american military internet sites, exemplifies their fear and weakness to stand as a force worth reconing with. (Look, we destroy bush and rumsfeld, stop funding the drug trade and sharon, and begin the

public trials, all in three simple steps.) No, to be an american soldier in bush's america today, you have to hide from your cowardice like the 9/11 evidence, and be something corporate news america is not. Involved.
Just go ahead and die for nothing american soldier, but for to be unaccounted as hidden without value, while the bushmob robs from your grand parents as unprotected.
Tis' true it does further seem, american soldiers, on general terms, are super dumb ass nazi scums, who hold little of no conviction to protect the America I remember. Why? Because the unelected war criminal, American traitor, mass murderer, cop killer bush is still spewing his blind hatred for the progress of our civilizations, instilled through law as a function to gain justice for people, People who are suffering and dying for bush's contempt of our American dream.
Destroy traitor bush and rumsfeld for escaping to recommit murder today, and be actually caring for your world tomorrow, or not, and deem yourself unworthy by your own admission to play fair as the eternal standing proud, strong, and forever free.
Free to be living justly for yourself
truly as caring to know this as everything.
Whew...
Now, how about the Koran?

Johnny Wizard
--
Christ I'm Actually Rising!
Destroy the traitors to our humanity, the unelected lawless dictator Mr. bush, and rotten rumsfeld the sadistic savage now American Patriot Soldiers. Stand up for your country, and live for your family. The corporate TV news professionals show you, as an American Soldier a concern for your life as unworthy of discussion, actively censoring the political reality on bush's america, while encouraging soldiers to commit crimes against our being, by keeping us all uninformed as the sacrificial sheeple. The bushmob have actively worked to not arrest themselves for 9/11, and in so doing, are purposefully ignoring the public evidence that is freely available. Mr. Tenant and Mueller would have you believe the officers of America, who have completed the criminal investigations outlining the cop killer bush, are unworthy as American Patriots serving the cause for freedom and liberty to not be publicly acknowledged, while blaming Laden for every terrorist crime that happens before an police investigation even begins! See? Evil deceived. What do you think? Is
not a list of all supporters of the bushmob in Congress, who voted to dismantle the Constitution, and wage a criminal war, as without just cause to murder Soldier families for stolen Human values, a good list to be

broadcast? Or shall we sit in doubt while these talentless demon monsters murder millions of US as innocent cowards? Who isn't a freedom fighting al-Qaida member according to the evil tommy franks dum fuk's conclusion? How stupid can an American Soldier be, to be asked by rumsfeld and CNN, to destroy their own principles, and to sacrifice their lives for such cowardice in whoreship to the evil dictates of the anti-Christ, Our Mr. bush Jr.? And, to the still groggy, without the payoffs of corporate america's holy Larry King even!, or the anti-Semitic fascist Saturday Night Live troop to boot your stupid carcass to the front line as entertainment? BA HA HA HA (like SNL's new, it's all so hilarious audience, paid for likely because the degrading intolerant bigoted news crew, have so little real talent performing to the robbed and dying to be devalued and murdered by their inaction to even joke about it. Why? No money in contributing to the poor stupid people without TV contracts, or TVs, electricity, or running water now that the clouds are being privatized.) $155,000 is the base pay of bush's now anti-American criminal congressmen, and that's before corporate bribes, oops, I mean corporate BRIBES to urge YOUR "willed" sacrifice in corporate america's "democracy", now that bush's america is convinced evidence is no longer a requirement to convince US, who is truly an evil doer, or who actually wins elections on behalf of the People. You ask yourself, again, who are you dying for American Patriot Soldier? Know that this paper, like all the rest, will reach the CNN and Coast to Coast network staff under one name or another, and yet, they'll continue to turn against the interests of American soldiers by not addressing our present top priority concerns regarding the facts on your schedule for departure. Only broadcasting the popular, bush contempt for all American lives as too much trouble, as unworthy the free time to openly discuss things before "they" die, all those nasty evil powerless People. I dare you American, to be a Soldier and email this to your brothers and sisters, to convince them with tough Love, how you wouldn't want to see them die unjustly for Mr. bush Jr., Art Bell, or even me as the Wizard. Or spew instead, how you would as a traitor to yourself, your family, your country, and God too, sacrifice your worthless self as unfactored, but for to be a pitiful coward, falling to die by your own sword on stupid evil bush's corporate command over your rights to be represented fairly. Be your own Savior!
Big G is cool, or not. You decide Holy.
The truly most as the living god King of all as Creator, your servant and trying to be friend, a wizard and Thor, the Secret Flower and Odin, Allah, Omega, Adam, Alpha, Krishna, Shiva, Mithra, Mahdi, Anu and Yahweh. And even

a blade of grass, a snake and a elephant, a lion, rat,
monkey, giraffe, spider, shark, wolf, and bat, Lucifer
Morningstar, Jesus Christ, Oberon, an all mighty nobody
kinda even all ready.
P.S. Don't miss the awesome magic Johnny Wizard papers,
"Let Love Rule", or "Strange is Strange", slowly now
disappearing from your nearest search engine dealer!
Get your free copy now, before they're all gone to the
slave owners who truly have know power anyway...

PA-SitRep (Pennsylvania Situation Report) is developing a group of PA-SitRep Contacts, most of whom (44) are Amateur Radio Operators. We are currently seeking additional Amateur Radio volunteers.

PA-SitRep Contacts are asked to monitor emergency situations from their local areas and post emergency situation reports to the PA-SitRep Discussion e-mail list which is used, in part, for monitoring developing emergency situations. If warranted, PA-SitRep Administrators move the emergency situation reports to our main emergency alert PA-SitRep list where the alert is distributed to over 550 subscribers throughout the state of Pennsylvania.

Our ultimate goal with PA-SitRep is to build a significant enough network of Contacts throughout Pennsylvania in order to provide timely and accurate emergency situation reports, free of charge, to those subscribed to our emergency alert e-mail distribution lists.

In addition to providing the situation reports for our own emergency alert lists, the eventual long-term goal of PA-SitRep is to provide rapid emergency situation reporting service, free of charge, to any interested served agencies, much in the same way that SKYWARN provides weather situation reports for the National Weather Service.

If you're interested in volunteering as a PA-SitRep Contact, or have any questions regarding PA-SitRep, please drop me a line at owner@pa-nospamsitrep.com (remove "nospam" from the address).

Or visit the website to learn more:

I have a number of RF designs which call for 50Ohm microstrips of various sizes, anyone help me with this one, it is just a trace or what?

Any info appreciated..

Mitch

As usual in these groups, we are asked for help with very little information from which to proceed. You want them of "various sizes". What does this mean? If you have the RF designs, why don't you have the microstrips that go with them?

Give me a concrete example, such as the impedance you want, the electrical length you want, the type of material you are using as a substrate (i.e. alumina, pcb fiberglass, ???) and the thickness of the metal trace. I'll work the example and then tell you where to go to find the same software I used for the example.

Jim

Hi Mitch,

Download AppCAD http://www.hp.woodshot.com/

Select Passive Circuits (bottom left) then Microstrip.

A few assumptions:

Sounds like you are new to this area so you won't be using any exotic substrate. 'Regular' fiberglass PCB material is usually FR4 (please check in your case), so pull down FR4 (Er = 4.6).

If you are making this yourself you are probably using 1/16" material, double sided (very common), if so set H = 63 mils (1/16"). Laminate thickness doesn't affect impedance too much so set T = 2.0.

Width does affect impedance, set W = 114 mils.

Hit F4, impedance = 50 ohms.

AppCAD is very easy to use and should give you a good intuitive feel about Microstrip very quickly. Obviously waggle parameters and see how impedance etc. are affected.

This should hopefully be a reasonable start. Also explore the rest of
AppCAD. Another free package worth looking at is RFsim99, great for
exoploring S parameters etc.

Regards,

Mark.

Amateur Radio Newsline™ Report 1331 - February 14, 2003

Amateur Radio Newsline report number 1331 with a release date of Friday, February 14 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The terrorism warning level goes up in the United States and ham radio operators should be prepared. The details on Amateur Radio Newsline report number 1331 coming your way right now.

(Billboard Cart Here)

**

THE WAR ON TERROR: NATION GOES COLOR ORANGE: HAMS SHOULD BE ALERT

Homeland Security Secretary Tom Ridge says every American must be vigilant. This as the Bush administration raises the nations terror alert from Code Yellow to Code Orange and says this represents the most significant warning since the Sept. 11, 2001 attacks. Among those best equipped to assist the nation in fighting terror are its ham radio operators. Amateur Radio Newsline's David Black, KB4KCH takes a look at how hams can prepare themselves and how they can help:

--

The government isn't minimizing the threat. Officials expects more attacks against the United States and its allies in coming days. The only thing they can't do is predict when and where an attack will occur.

Federal officials recommended that Americans should take basic disaster preparation steps. This includes maintaining a three day stockpile of food and water. They also recommended obtaining duct tape and plastic sheeting to seal a house in the event of a chemical or biological attack or disaster. They also say to have some sort of emergency radio receiver. One that can operate for days without being plugged into a power outlet is best. This will be the primary way the government talks to you should the unthinkable happen.

How can ham radio operators help? Start by making sure that your ham gear works. Especially your hand held and mobile radios. If you only have one battery pack for your H-T, go out and buy one or two more. Or even better, get a case that lets you use alkaline batteries that are widely available. If the power goes out, you can't recharge Ni-Cads or NiM-H cells. But you can operate for a number of hours with Alkaline batteries. So have several sets of these on hand -- at least enough to get you through 72 hours of non-stop operation.

If you are a trained communicator active with an ARES or other emergency communications group, be sure to let the chain of command know where you will be. Give them a list of phone numbers where you can be reached 24 hours a day -- 7 days a week. Better yet, get a pager and give its number only to the person who will be calling you. That way if that pager goes off, you know it's for real.

What about looking out for terrorism in your own community? Do it. Observe and report.

If you see something that looks out of the ordinary or suspicious, call the police. Remember that old adage about better to be safe than sorry. While it's not likely you'll encounter a real live terrorist cell, it's not out of the question, either. And that's where your radio, your local repeater and its autopatch come in.

Even if you don't own a cellular telephone, your hand held or mobile radio is your emergency lifeline. If you have access to an autopatch equipped repeater its a lot better than a cell phone. Cellular phones are known for not being reliable in many areas. With a ham repeater, if you can hear it, the chances are it will hear you. And even if there's no autopatch, another amateur can relay your message to authorities.

What about on the air? What are the chances that a terrorist cell might take to the airwaves on your favorite band? Not very likely but again not impossible, either. Terrorists tend to try to blend in with the background. Setting up a communications network on even an underutilized band like 6 meters would be like waiving a red flag in front of a bull. Hams are very protective of their spectrum and are not afraid to go after those on a band illegally.

It's far more likely that a terror group would set up shop on license free public frequencies than on 2 meter F-M or 20 meter sideband. And it's a pretty good guess that government monitors are keeping a close ear on F-R-S, MURS, Class D CB and the frequencies nearby to each service.

What if you hear something that seems suspicious? There are three letters to remember: F-B-I. The agency set up a website and dial-in tip line immediately following the September 11th attacks. Both are still in service.

The website U-R-L is www1.ifccfbi.gov and it puts you only a link away from filing a report. Just click on the words "Report Terrorist Activity."

And this word to hams who have never handled emergency communications. If you hear a net going on, don't break in to ask if you can help. The chances are that you cannot. You can do more good by listening and learning procedures. Better yet, go to the ARRL's website and sign up for one of their Emergency Communications Training Classes. With the stark new reality of terrorism on our homeland soil, it should be incumbent on every ham regardless of age or license class to become skilled in emergency communications techniques. It might be you who's called on to save a life.

For the Amateur Radio Newsline, I'm David Black, KB4KCH, in Birmingham, Alabama.

--

The bottom line. As the Office of Homeland Security has said, every American must be vigilant. In retrospect, all of our lives could depend on it. Hams can sign up for emergency communications training at the ARRL website -- www.arrl.org. (ARNewsline™)

**

ENFORCEMENT: HAM FINED $12000 FOR MULTIPLE VIOLATIONS

A ham has been fined $12,000 for violation of the Amateur Service Rules. We have this report:.

--

Its one of the largest fines ever assessed for ham radio rules violations and its been handed to Scott E. Kamm, the license holder of amateur radio station N0UGN. And it comes after the Federal Communications Commission finds Kamm apparently responsible for causing intentional interference, broadcasting music and failing to identify with his station by its FCC assigned call.

Kamm's story goes back to December 9, 2002. In response to complaints of continuing interference on 146 point 31 MHz, an agent of the Commission's Kansas City Field Office began monitoring. At approximately 7:00 P.M., the agent observed a very strong signal on the frequency. It was reportedly made up of music, sound effects and unmodulated carriers. No station identification was transmitted. More important. These transmissions were interfering with existing communications that were in progress between other amateur stations.

Using radio direction finding the agent determined the source of these interfering signal to be Kamm's residence in near-by Waterbury, Nebraska. The FCC says that Kamm has two addresses that they know of. One in Sioux City, Iowa and the other in Waterbury where they traced the interference as coming from.

The scenario repeated itself a day later on December 10th. This time the agent entered the premises and inspected Kamm's station. The agent found an amateur radio transmitter capable of operating on 146.31 MHz but Kamm stated that no transmissions were made from his station. That he used the radio to receive only. Kamm also asserted that no one else operated the station.

But the FCC is not buying that story. It says that the Amateur Service Rules state that no ham shall willfully or maliciously interfere with -- or cause interference to -- any other radio communication or signal. Also amateur stations are prohibited from transmitting music using and that they must identify at the end of each communication or at least every 10 minutes.

And, based on the evidence before it, the FCC says that it finds that Scott E. Kamm did willfully and repeatedly violate the Amateur Service Rules by causing intentional interference, broadcasting music and failing to identify. He is being fined $7000 for the interference, $4000 for transmitting the music and $1000 for failing to identify.

In Blair Alper, KA9SEQ, reporting for the Amateur Radio Newsline.

--

Kamm was given the customary thirty days to pay up or file an appeal. (FCC)

**

ENFORCEMENT: UNLICENSED RADIO BROADCASTER SENTENCED TO 18 MONTHS PROBATION

The FCC has announced that Benjamin Leroy Carter has been sentenced to 18 months probation. This, following his conviction on seven counts of unlicensed radio operation.

The conviction and subsequent sentencing is the result of an investigation that began in February of 1999. The Commission's Tampa Florida Office says that it received complaints from residents and broadcasters in the Orlando, Florida area of interference to the reception of licensed radio broadcast stations. Carter, who also went by the name of Malik Copafeel Abdul, pled guilty to seven counts of unlicensed radio operation in November of 2002. He also agreed to forfeit all equipment used in connection with the station.

The FCC says that 4 months of the sentence will be served as home confinement. In addition, Carter will be required to perform 50 hours of community service. Its all in cyberspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-231068A1.doc (FCC, CGC Communicator)

**

RESCUE RADIO: NEW CLASS OF FIELD DAY STATION

Amateur Radio's premiere emergency preparedness operating event is changing. This with word that the annual ARRL Field Day will gain another entry class for 2003.

Called Class F, these will be Amateur Radio stations which are set up and operate from emergency operations centers, or EOC's. ARRL says that the change renews the emphasis of Field Day's 1933 origins as an emergency preparedness exercise as opposed to a routine contest. (ARRL)

**

RESCUE RADIO: A NEW CB SIDEBAND EMERGENCY CHANNEL

Doug Schwinn N0LAY, reports over the QRZ.com website that the Michiana Emergency Monitoring Group is promoting an iniative to have C-B channel 39 designated as an additional frequency to be used and monitored during emergencies. This in addition to the existing C-B channel 9.

The reason? Schwinn, who also holds the call KDZ0430 says that he joined in the effort because of the mountainous region of Colorado where he lives. He says that he would likely be heard using lower sideband on C-B Channel 39 than A-M on Channel 9 during an emergency situation. He also notes that a spokesperson for the group stated in an article in Popular Communications that this is part of an effort to restore and legitimize the Citizen Band Service. (N0LAY via Internet)

**

RESCUE RADIO: HAM RADIO ASSISTANCE IN COLUMBIA DEBRIS RECOVERY ENDS

Ham radio communications assistance in finding parts from the fallen space shuttle Columbia has wound down. According to several Internet reports, February 12th was the last day hams were to be called out to provide communications in the recovery effort.

During the height of the recovery, activities being conducted over the W5NAC repeater in Nacogdoches Texas could be monitored using Echolink's EDU_NET conference. Rick Hambly, W2GPS, says that there was a very active effort by RACES and SKYWARN to aid NASA and government agencies like the FBI with the identification, G-P-S location, cataloging and recovery of space shuttle Columbia components.

As previously reported, the Columbia was at 203,000 feet when it disintegrated plummeted back to Earth. All seven Astronauts on board were killed. Three of the 7 were licensed radio amateurs but no ham radio gear was carried on that ill-fated flight. (VHF Reflector, W2GPS, others)

**

REMEMBERING COLUMBIA: HAM CREATES ON-LINE MEMORIAL

A former Amateur Radio Newsline Young Ham of the Year ward recipient has created a lasting Internet tribute to the space shuttle Columbia.

The memorial website was created by Kevin Boudreaux, N5XMH, of Orlando Florida. Boudreaux, who grew up just outside New Orleans was the recipient of our 1993 "Young Ham of the Year Award" for his organizing Amateur Radio emergency communications following a devastating hurricane.

Today Boudreaux is a Manager with the Hilton Hotels and a professional website designer. He tells Amateur Radio Newsline that he was so personally touched by the Columbia tragedy that he created this memorial website to the shuttle and its crew.

The webpages he has created are filled with facts about the orbiter and its mission along with photos and short biographies of its STS-107 crew. Kevin also provides links to other Columbia memorial websites along with the complete statement of President George W. Bush when he sadly went on the air to let the world know that the Columbia was lost.

Kevin was only 14 when he went out to help his community in time of disaster. He was 15 when he received the "Young Ham of the Year Award" and his dedication has never stopped.

You can view his web tribute to the fallen Columbia and its crew at www.sscolumbiamemorial.com or www.columbia7memorial.com (ARNewsline™)

**

RADIO LAW: ALLEGED PAY TV INFO THIEF PLEADS NOT GUILTY

A 19-year-old University of Chicago student has pleaded not guuilty to federal charges of stealing plans for security systems used by satellite broadcaster Direc TV and distributing them freely on the Internet. Igor Serebryany is accused of stealing information related to Direc TV's latest access cards and then posting the priporotity information to websites dedicated to the hacking of the companys security systems

As previously reported, the theft allegedly took place while Serebryany was working at the Los Angeles office of a law firm that represents Direc TV. He was indicted by a federal grand jury last month on three felony counts of theft of trade secrets and faces a maximum sentence of 10 years in prison if convicted on all charges. (Published news reports)

**

CONVENTIONS AND HAMNFESTS: CHARLOTTE NC IN MARCH

March 8th and 9th are the dates of this years Charlotte North Carolina Hamfest and Computer Fair. The venue is the Charlotte Merchandise Mart on Independence Blvd. Doors open 8:30 a.m. both days with talk in on the 145.29 Mhz repeater. This years featured forum speaker is FCC chief rules enforcer Riley Hollingsworth, K4ZDH. More information is in cyberspace at www.w4bfb.org/Hamfest.html (Press release)

**

RESCUE RADIO: HAM RADIO IN TV DOCUMENTARY

Ham radio is part of a soon to be shown documentary produced for the Discovery Channel. Joe Moell, K0OV, has the details:

--

Members of the Hospital Disaster Support Communications System of Orange County, California have been included in tapeings for a new documentary series on the Discovery Channel. "Critical Rescue," a series of programs featuring rescue workers and those who support them, made its debut on February 6.

A team from New Dominion Pictures spent a half-day with HDSCS last August. They interviewed founder and leader April Moell, WA6OPS, and taped reenactments of ham communications that took place on April 23, 2002. On that day, hams were awaiting their assignments for one of the four large-scale disaster drills in Orange County each year. At 8:10 AM, a 6000-ton mile-long freight train struck a standing Metrolink double-decker commuter train at a crossing in Placentia, causing three deaths and over 200 injuries. The drill was immediately cancelled, and as rescuers converged on the train crash scene, area hospitals braced for the wounded passengers.

As Net Control, WA6OPS quickly deployed hams to the 14 hospitals most likely to receive victims. There they handled countless messages, verifying victim dispatch and patient counts, providing information for inquiring victim families, and communicating with hams supporting the Red Cross. Within some hospitals, HDSCS provided direct links to handle messages between triage areas, Emergency Departments, and Command Posts.

Additional HDSCS operators participating in the reenactments were Sam Creason K6EW, Cheryl Simpson KD6MWZ, Ralph Swanson WB6JBI, and David Mofford W7KTS. It is not known how much of the HDSCS footage will appear in the edited program.

From southern California, this is Joe Moell K-zero-Oscar-Victor for Amateur Radio Newsline.

--

Again, "Fateful Journey" will air 8 and 11 PM Eastern and Pacific times on Thursday February 20th, and again at 2 PM Eastern and Pacific on Saturday February 22nd. (ARNewsline™, K0OV)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

ARRL PACIFIC DIVISION DIRECTOR JIM MAXWELL, W6CF, SK

ARRL Pacific Division Director Jim Maxwell, W6CF, has died. The 69 year old Maxewll passed away on Thursday February 6th at his home in Redwood Estates, California. The cause of his death has not been announced.

Maxwell, who became a Director in January 2000, joined the ARRL Board in

1994 after being elected Pacific Division Vice Director. He also served as an ARRL Emergency Coordinator from October 1991 to March 1999.

An avid DXer, Jim Maxwell belonged to mumerous DX clubs, contest clubs and organizations. This included the famed Northern California Contest Club. He also served as a member of the ARRL DX Advisory Committee from April 1988 through 1994 and was an accredited Volunteer Examiner.

Professionally, Maxwell held doctoral degrees in aeronautical engineering and biomechanics. He retired from the Lockheed Missiles and Space Corporation as a technical consultant in 1992 and from Scitor Corporation in 1998.

Pacific Division Vice Director Bob Vallio, W6RGG, takes over immediately as Director. ARRL President Jim Haynie, W5JBP, will appoint a new Vice Director in the coming days. Maxwell previously held the call W6CUF. (ARRL)

**

HAM RADIO IN SPACE: ISS PACKET RETURN DELAYED FURTHER

When will the packet system on the International space station come back on? Nobody is quite sure but ARISS International Chairman Frank Bauer, KA3HDO says that his group has been working with its colleagues in NASA and Russia's Energia to get it operational again. Unfortunately, so far they have only been successful in getting it turned on for about one orbit.

Bauer says that several factors are impeding the packet startup. First, the progress vehicle docked with ISS and the crew is currently unpacking and stowing about a ton of supplies and equipment. Also, the crew is working with their mission control counterparts on schedule changes that have occurred due to the Columbia accident.

Given these items its apparent that this crew is not as engaged in ham radio the way the last ISS Expedition crew was. And because of this the packet system may be off for a bit longer. (ANS)

**

CONTESTING: ARRL SAYS BEACONET IS OK

ARRL Contest Branch Manager Dan Henderson, N1ND, says that BEACONet does not violate any contesting rules. According to Henderson, after additional review the ARRL has come to believe that BEACONet is similar to an automated CQ'ing system. That it only facilitates the solicitation of contacts and as such it seems to comply with the letter and spirit of the contest rules. (VHF Reflector)

**

DX

In DX we take to the sky this week. This with word that Wayne Estes, W9AE, plans to operate the Amsat Oscar 40 satellite as FG slash W9AE from the island of Guadeloupe. The tentative plan is for Wayne to start operation at 2300 U-T-C on February 21, 22, 25, and 26 for windows to the Americas and the Pacific. Also listen for him on Sunday February 23 from 1500 to 2000 UTC for a satellite window to Europe and central Asia. Exact operating times will depend on the RUDAK schedule and Wayne's vacation activities. If you work him, QSL to Wayne Estes, 18673 W. Meadow Lane, Mundelein IL 60060, U.S.A. (ANS)

And Hagal International reports that Israeli amateur operator Dov Gavish, 4Z4DX is the first ham in the world to completely confirm DXCC using electronic QSL's. Although still not recognised by the DXCC, electronic QSL'ing is gaining ground in the DX community. (Hagal International)

Also, the ARRL's new Logbook of the World secure electronic contact-confirmation system took a major leap toward public release in January. This, with several weeks of limited tesrting of the concept. (ARRL)

**

THAT FINAL ITEM: TURN AROUND IS FAIR PLAY

And finally this week, we have all heard the expression "turn around is fair play. And one person who has just found that out is former computer hacker turned on-line security expert Kevin Mitnick, N6NHG. That's because Mitnick's new company website has been -- well -- hacked. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the rest of the story:

--

The ham who holds the honor of being the world's best-known computer hacker suffered the indignity of having hackers break into his new security consulting company's Web site -- twice. But news reports say that Kevin Mitnick, N6NHG, simply shrugged off the incidents as amusing and not serious enough for him to call authorities to investigate.

As I said, two electronic break-in's have taken place. The first was on January 30th. In that one a hacker calling himself "BugBear" added a page to Mitnick's corporate website that read "Welcome back to freedom, Mr. Kevin." This is probably a reference to Mitnick's probation which ended ten days earlier on January 20th. During his probation Mitnick was barred from accessing the Internet and this hack may have been more of a welcome home -- in this case -- home being the World Wide Web.

The latest incident took place over the weekend of February 8th and 9th and was more of an on-line job application than a hack. In this case a hacker in Texas broke in and asked Mitnick to hire him as the company's security officer.

Mitnick says that the hackers apparently exploited separate flaws in Microsoft's Internet server software. He says that the person responsible for the company's Web site failed to install patches available from Microsoft.

In neither instance did hackers vandalize the Website. One said in e-mail that he didn't do damage out of respect for Mitnick.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Mitnick's new organization is called Defensive Thinking and is located in Los Angeles. A company spokesman said that no customer information was released nor was there any danger of information being compromised. (Published news stories)

Microstrip impedance depends on several things such as board
thickness, copper thickness, dialectric constant etc.
Download a free copy of AppCad from www.agilent.com
It will design microstrip and other transmission lines for you.

Hi,
Can anyone recommend a good book about
```

```
amateur radio which includes information
on 2m and 70cm bands: repeaters, CTCSS,
antennas...
Better, but not necessary if it also includes
some info on HF.

Thanks,

"Now You're Talking", published by ARRL (American Radio Relay League),
is a good introductory book that gives an overview of ham radio, and
will prepare you for the US Technician exam.

There is also a lot of info from them at www.arrl.org

Your country's amateur radio organization probably publishes a similar
book that prepares you for the equivalent exam there. The science
remains the same, but the legalities will be different.

Happy trails,
Gary (net.yogi.bear)

BUT LISTEN!!!

Okay, how is it MORE EFFECTIVE to send 800 cruise missiles and thousands of bombs onto more than 3000 targets, with an included, urban war conflict to rid Iraq of WMD, than it is now to go ANYWHERE unfettered by inspectors? (Again, how is that an improvement?) How does a criminal war improve the bushmob's stated goal of seeking out these weapons when people under attack will attack back naturally, and the WMD can fit in anyone's back pocket last year? How does spreading Uranium to kill humans for 4.5 million years, blowing up infrastructure, denying food, clean water, and vacines to US people as the unrepresented and innocent, while American soldiers eat bullets as criminal invaders like in Afghanistan but bigger, improve the living conditions of ourselves who live in Iraq to suffer unjustly at the hands of the demon antiChrist, American cop killer, Our Mr. bush Jr.? (Our Mr. bush Jr., who demands Justice no longer be the found principle to protect American Freedom? (Like following the criminal leads for 9/11?)) How does Saddam, the secular leader who represents more than 750,000 Christians in Iraq, pose more of a funder of idealog zealot terrorist groups, than, say, Saudia Arabia, or Kuwait?, where women can't vote, drive, or learn from the internet? How does a plan of liberation sell to a nation that is more progressive than any of it's neighbors? How come American Soldiers don't demand bush make his case with ACTUAL evidence to substantiate his American allegations regarding the weapons sold illegally (an act of Treason against America) to Saddam up until 1992 by the bush Sr. administration to kill American service personel during the first Gulf war syndrome bombing campain? Why? Brain damage that's why. See, Anthrax doesn't have a shelf life of a decade, and American soldiers are dumber than the average American who holds already, (according to Blizter) the world's title of lowest literacy rates of the developed semi-developed world while currenting further regressing. Americans are cowardly, and too weak and dumb to even protect themselves now. Pitiful.

Johnny Wizard

whatreallyhappened.com

--

Agreed. But we are effected by suggestion, so, I thought it might be a better tactic than the slowly reviving, sleepy heads going, "Oh, wow I'm dreaming!" for twenty years, while bush day by day, really, actually, robs and murders Americans who know not of the sound principles of Justice to protect our freedoms as godlike is a human thing..

--

Ya! Freedom for all through Justice indivisable. All People are created equal, as is, self evident to those in the know. Our blind faith is not in bush as he demands without evidence to persecute US as the innocent not heard from dying for nothing unjustly. Demon bush must be tried and convicted for treason against God, being of US all, including the Atheists especially.

Johnny Wizard

--

Why murder people for bush when we don't need to sacrifice our families for such evil stupidity? If inspectors have unfettered access, and bush has no evidence to substaniate his demon allegations, why then must ALL America side to be war criminals? Is it not more effective to go anywhere without firing a shot, than it would be to kill people as innocent to increase the terrorist threat? How can warring Iraq be better at destroying hidden anywhere WMD, than methodically seeking out weapons that no one has a basis in fact as existing today? Mr. bush jr.'s dad sold Saddam Anrathax up untill 1992, and anthrax doesn't have a shelf life of a decade. What about following the criminal leads for the last American anthrax attack, before we blame Saddam on that too as powell as proscibed?

--

We don't buy corporate America's assault with ignorance however. Just look at all the anti-hate, anti-crime, anti-bush posts. It is the corporate, time bitten media whores, the irrational cultists, that won't allow open, honest discussion of the facts as publicly recognized, that leaves US compelled to scream for Justice above the censorship parading as Our apathy.

--

>
> Ya... a pirate terrorist bush is, who leverages the ignorance

--

> > Mentoring Roman orphans.
>
> Huh ?

I Think maybe he was referring to the children left parentless, to watch CNN programing for further blind sacrifices of forgotten American values. But let US not forget, american nazi cowardice as the bush whore corporate products, will as evil pirates of the Constitution, promote traitor tommy franks to lead the nazi soldiers to run death squads against them also as the innocent.

Your busted.

--

--

Christ I'm Actually Rising!

Destroy the traitors to our humanity, the unelected lawless dictator Mr. bush, and rotten rumsfeld the sadistic savage now American Patriot Soldiers. Stand up for your country, and live for your family. The corporate TV news professionals show you, as an American Soldier a concern for your life as unworthy of discussion, actively censoring the political reality on bush's america, while encouraging soldiers to commit crimes against our being, by keeping us all uninformed as the sacrificial sheeple. The bushmob have actively worked to not arrest themselves for 9/11, and in so doing, are purposefully ignoring the public evidence that is freely available. Mr. Tenant and Mueller would have you believe the officers of America, who have completed the criminal investigations outlining the cop killer bush, are unworthy as American Patriots serving the cause for freedom and liberty to not be publicly acknowledged, while blaming Laden for every terrorist crime that happens before an police investigation even begins! See? Evil deceived. What do you think? Is not a list of all supporters of the bushmob in Congress, who voted to dismantle the Constitution, and wage a criminal war, as without just cause to murder Soldier families for stolen Human values, a good list to be broadcast? Or shall we sit in doubt while these talentless demon monsters murder millions of US as innocent cowards? Who isn't a freedom fighting al-Qaida member according to the evil tommy franks dum fuk's conclusion? How stupid can an American Soldier be, to be asked by rumsfeld and CNN, to destroy their own principles, and to sacrifice their lives for such cowardice in whoreship to the evil dictates of the anti-Christ, Our Mr. bush Jr.? And, to the still groggy, without the payoffs of corporate america's holy Larry King even!, or the anti-semitic fascist Saturday Night Live troop to boot your stupid carcass to the front line as entertainment? BA HA HA HA (like SNL's new, it's all so hillarious audience, paid for likely because the degrading intolerant bigoted news crew, have so little real talent performing to the robbed and dying to be devalued and murdered by their inaction to even joke about it. Why? No money in contributing to the poor stupid people without TV contracts, or TVs, electicity, or running water now that the clouds are being privatized.) $155,000 is the base pay of bush's now anti-American criminal congressmen, and that's before corporate bribes, oops, I mean corporate BRIBES to urge YOUR "willed" sacrifice in corporate america's "democracy", now that bush's america is convinced evidence is no longer a requirement to convince US, who is truly an evil doer, or who actually wins elections on behalf of the People. You ask yourself, again, who are you dying for American Patriot Soldier? Know that this paper, like all the rest, will reach the CNN and Coast to Coast network staff under one name or another, and yet, they'll continue to turn against the interests of American soldiers by not addressing our present top priority concerns regarding the facts on your schedule for departure. Only broadcasting the popular, bush contempt for all American lives as too much trouble, as unworthy the free time to openly discuss things before "they" die, all those nasty evil powerless People. I dare you American, to be a Soldier and email this to your brothers and sisters, to convince them with tough Love, how you wouldn't want to see them die unjustly for Mr. bush Jr., Art Bell, or even me as the Wizard. Or spew instead, how you would as a traitor to yourself, your family, your country, and God too, sacrifice your worthless self as unfactored, but for to be a pitiful coward, falling to die by your own sword on stupid evil bush's corporate command over your rights to be represented fairly. Be your own Saviour!

Big G is cool, or not. You decide Holy.

The truly most as the living god King of all as Creator, your servant and trying to be friend, a wizard and Thor, the Secret Flower and Odin, Allah, Omega, Adam, Alpha, Krishna, Shiva, Mithra, Mahdi, Anu and Yahweh. And even a blade of grass, a snake and a elephant, a lion, rat, monkey, giraffe, spider, shark, wolf, and bat, Lucifer Morningstar, Jesus Christ, Oberon, an all mighty nobody kinda even all ready.

P.S. Don't miss the awesome magic Johnny Wizard papers, "Let Love Rule", or "Strange is Strange", slowly now disappearing from your nearest search engine dealer! Get your free copy now, before they're all gone to the slave owners who truly have know power anyway... Weee!!!

George Bush Plans High Crimes and Misdemeanors: Why We Are Marching on October 26th

By Carl Messineo and Mara Verheyden-Hilliard

The authors, attorneys and co-founders of the Partnership for Civil Justice ~ LDEF, are members of the national steering committee of the A.N.S.W.E.R. (Act Now to Stop War & End Racism) Coalition

George W. Bush has declared his intention to wage a "preemptive" war against Iraq and is now seeking to strong-arm the international community, the U.N., and the Congress into support and submission. As members of Congress rush to show their obedience and member states of the U.N. line up to receive the anticipated spoils of war, the administration is now waging a campaign to convince the people of the United States to fall into step and finance with money and blood this war brought for conquest on behalf of the corporate and oil interests that make up Bush's true constituency.

Bush's preemptive war is a war of aggression. The U.S. policy supporting the war is not the rule of law, but the rule of force.

But no U.N. resolution and no Congressional resolution can legalize an illegal war. With pen to paper and votes of support, they can only commit to wilful ratification, complicity and responsibility for illegal acts by endorsing a criminal enterprise.

A war of aggression violates the United States Constitution, the United Nations Charter, and the principles of the Nuremberg Tribunal. It violates the collective law of humanity that recognizes the immeasurable harm and unconscionable human suffering when a country engages in wars of aggression to advance its government's perceived national interests.

The National Security Strategy: Blueprint for Global Empire

On September 20, 2002, the Bush Administration issued its blueprint for global domination and ceaseless military interventions, in its comprehensive policy statement entitled "The National Security Strategy of the United States."

The National Security Strategy sets forth the U.S. military-industrial complex's ambition for the U.S. to remain the world's superpower with global political, economic and military dominance. The stated policy of the U.S. is "dissuading military competition"1 and preventing any other world entity or union of states "from pursuing a military build-up in hopes of surpassing, or equaling, the power of the United States."2

The strategic plan elevates free trade and free markets to be "a moral principle. . . real freedom"3 and endorses a comprehensive global conquest strategy utilizing the World Trade Organization, the Free Trade Act of the Americas, the International Monetary Fund, the World Bank, among other mechanisms.

The Washington Post reports that the National Security Strategy gives the United States "a nearly messianic role" in its quest for global dominance.4

The National Security Strategy confirms and elaborates what was reflected in the January 2002 Nuclear Posture Review, that the Bush Administration maintains a policy of preemptive warfare contemplating the use of non-conventional weapons of mass destruction as a first strike measure.5

Turning Logic on Its Head

Bush's preemptive war policy is a war without just cause. Under international law and centuries of common legal usage, a preemptive war may be justified as an act of self defense only where there exists a genuine and imminent threat of physical attack.

Bush's preemptive war against Iraq doesn't even purport to preempt a physical attack. It purports to preempt a threat that is neither issued nor posed. Iraq is not issuing threats of attack against the United States. It is only the United States which threatens war.

It is not a war for disarmament. It is the U.S. which has stockpiled nuclear, biological and chemical weapons. It is the U.S. which is directly threatening to use these weapons against another country. It is the U.S. which has bombed Iraq relentlessly for more than ten years, killing scores of innocent civilians.

The Bush Administration turns logic on its head, twisting reality in order to create the pretext for its war of aggression. The Administration claims that the necessary prerequisite of an imminent threat of attack can be found in the fact that there is no evidence of an imminent threat, and therefore the threat is even more sinister as a hidden threat. The lack of a threat becomes the threat, which becomes cause for war.

By the U.S. Government's own claims, it destroyed 80% of Iraq's weapons capability in the earlier Gulf War, and subsequently destroyed 90% of the remaining capacity through the weapons inspections process. There has been no evidence that Iraq is capable of an attack on the U.S., let alone possessing the intention of carrying out such an attack.

Bush's Proposed War and Current Threats Violate the U.S. Constitution, the U.N. Charter and International Law

Bush's preemptive war policy and proposed attack on Iraq cannot be justified under any form of established law.

The preemptive war policy and Bush's threatened new military assault on Iraq violates U.S. domestic law and international law. The warmongering, preparations for war, and threats of violence coming from Bush, Cheney, Rumsfeld, Rice and other White House and Pentagon hawks, are in and of themselves violations of international law and constitute crimes against peace.

Article VI of the U.S. Constitution establishes that ratified treaties, such as the U.N. Charter, are the "supreme law of the land."

The Article 1 of the U.N. Charter establishes

"The purposes of the United Nations are. . . To maintain international peace and sovereignty, and to that end: to take effective collective measures for the prevention and removals of threats to the peace, and for the suppression of acts of aggression or other breaches of the peace and to bring about by peaceful means, and in conformity with the principles of justice and international law, adjustment or settlement of international disputes or situations which might lead to a breach of the peace. . . ."

Article 2 states that all member states "shall act in accordance with the following Principles"

"...All members shall settle their international disputes by peaceful means in such a manner that international peace and security, and justice, are not endangered.

"All members shall refrain in their international relations from the threat or use of force against the territorial integrity or political independence of any state, or in any other manner inconsistent with the

Purposes of the United Nations...."

Under this framework, acts of aggression, such as Bush's threatened attack, are to be suppressed and force is used only as a last and unavoidable resort.

The U.N. Charter was enacted in 1945 in the aftermath of the devastation and suffering of World War II. The Charter was enacted to bring an end to acts of aggression, "to save succeeding generations from the scourge of war, which twice in our lifetime has brought untold sorrow to mankind."

Disputes which might lead to a breach of the peace are required to be resolved by peaceful means.

Chapter VI of the U.N. Charter, "Pacific Settlement of Disputes," requires countries to "first of all, seek a resolution by negotiation, enquiry, mediation, conciliation, arbitration, judicial settlement, resort to regional agencies or arrangements, or other peaceful means of their own choice."

No Resolution by the U.N. Security Council can Legalize a Preemptive War or First Strike Plan

Bush has asked the U.N. Security Council to support execution of Bush's policy of a potentially nuclear "preemptive" war, as if that Council could endorse a war of aggression. The Security Council lacks the legal authority to grant such permission. The Security Council, by affirmative vote or by acquiescence to U.S. policy, cannot abrogate its own mandate. No collective action by the fifteen permanent and temporary members of the Security Council can lawfully violate the Charter which is the sole source of their collective authority.

This is made clear in the U.N. Charter itself, which provides in Article 24, that "In discharging these duties the Security Council shall act in accordance with the Purposes and Principles of the United Nations."

While there are, of course, procedures by which collective use of force may be authorized by the Security Council to maintain or restore international peace and security (Articles 41 and 42) those procedures may not be used to endorse aggression in violation of the primary purposes of the U.N. Charter. Article 51 of the U.N. Charter acknowledges the right to self-defense "if an armed attack occurs against a Member of the United Nations until the Security Council has taken measures necessary to maintain international peace and security." None of the provisions allow for authorization for Bush's war plans and first strike strategies. Any resolution authorizing a preemptive war of aggression is ultra vires, or null and void as beyond the authority of the Council to enact.

The very issuance of the Bush doctrine of preemptive warfare and also the threat to wage war against Iraq are, each, a violation of international law as a crime against peace, which is defined in the Nuremberg Charter as the "Planning, preparation, initiation or waging of a war of aggression or a war in violation of international treaties, agreements or assurances."

Responsibility for War Crimes

Neither Congress nor the President has the right to engage the U.S. in a war of aggression and any vote of endorsement, far from legalizing or legitimizing global war plans, serves only as ratification of war crimes. Under the principles of universal accountability established at Nuremberg, "The fact that a person who committed an act which constitutes a crime under international law acted as Head of State or responsible Government official does not relieve him from responsibility under international law."[6]

The execution of economic sanctions by the Bush I, Bush II and Clinton Administrations, which has caused the deaths of over one million people, primarily children and their grandparents, is likewise sanctionable as a crime against humanity under the Nuremberg Charter and under the International Criminal Court Statute as "the intentional infliction of conditions of life,. . . the deprivation of access of food to medicine, calculated to bring about the destruction of a part of a population."[7]

The Bush Administration has rejected the International Criminal Court treaty signed by over 130 countries. This rejection is an admission of the administration's consciousness of guilt and of criminal intentions. The Bush administration acts with a conscious disregard of humanitarian laws and a stated intention to avoid accountability for their crimes under international law prohibiting crimes against the peace, war crimes and crimes against humanity. The National Security Strategy promulgated by the Bush administration states that the United States "will take the actions necessary to ensure that our efforts to meet our global security commitments and protect Americans are not impaired by the potential for investigations, inquiry or prosecution by the International Criminal Court (ICC), whose jurisdiction does not extend to Americans and which we do not accept."8

Endless War, Aggression and Terror

Once this policy of preemptive wars of aggression is invoked by the Bush Administration to justify unprovoked attacks against the centers of population in Iraq, the doctrine will be used by the hawks in the administration time and time again, and will also be adopted by nations and individuals internationally as a justification for the preemptive use of catastrophic violence against centers of population worldwide. The legitimization of preemptive wars of aggression will be used to justify attacks against U.S. centers of population, and will bring greater violent retribution upon the cities and people of the United States for actions that the government is taking in their names, without their informed consent.

The risk of suffering harm because of this doctrine is, of course, not distributed equally among all residents of the United States. Those who will lose their lives fighting in wars of aggression will be the young, disproportionately persons of color, and those who must enlist in the U.S. military because of bleak economic opportunity. Those who derive their wealth and security from the transactions of war, from increased oil profits caused by global instability or conquest of oil rich regions, and from the constant re-building and re-arming necessary to conduct endless wars against countless peoples premised on imperceptible threats - - they will have the means to acquire seclusion, protection and greater safety.

Preemptive war will not stop with Iraq. Constant military interventions worldwide are necessary to enforce Bush's stated policy of global economic, political and military domination. Just four days after the September 11th attacks, the CIA presented its "Worldwide Attack Matrix" identifying scores of countries that the CIA wanted permission to attack. Bush approved the CIA wish list, and authorized immediate covert and lethal CIA operations in over sixty nations.9

Taking to the Streets

As the U.S. moves at breakneck pace in execution of its stated policy of global domination and over military interventions, the need for the people to take action is urgent.

Congress will not stop this policy of aggressive warfare and global domination. Many in Congress are well served with the tithing of the war profiteers and their corporate sponsors who see U.S. military domination as a way to enforce their interests, to exploit human labor at starvation wages overseas and to drive down wages domestically, to mine vast sources of environmental resources globally, and to impose and expand the reach of their "free" markets.

The U.S. Constitutional framework provides that, regardless of who temporarily holds office, all power remains in the hands of the people. It is time now for the people to take the reins of power back from those who have stated their intention to act in violation of all laws that humankind has struggled to create to end global conflagration and prohibit wars of aggression.

When law will not restrain the government, the people must. We must take to the streets in mass numbers in organized and spontaneous acts of resistance. The message must be clearly conveyed that if the Bush administration refuses to be accountable to U.S. domestic law, to the U.N. Charter, to international law, to all known standards of just conduct, then the people of conscience within the United States will rise up to demand accountability. And the message must be sent that the people of the U.S. will not allow the Bush administration to spend the blood of the people of the United States and the people of Iraq who are not our enemies, in a needless war for oil.

September, 2002

The authors, Carl Messineo and Mara Verheyden-Hilliard, constitutional law and human rights lawyers, are the co-founders of the Partnership for Civil Justice Legal Defense and Education Fund, a public interest legal organization in Washington, D.C., and authors of the forthcoming book "Empire at Home: George W. Bush and John Ashcroft v. the Bill of Rights"

My Divine Right

Destroy bush and rumsfeld now American Patriot soldiers, fire fighters, and NRA members. We all notice CNN and CBC management refuse to allow open discussions on the documented facts outlining the cop killers, bush and rumsfeld treasonous behavior against the great American people, deliberately forestalling their criminal arrests for the mass murders of US as innocent in America. (Or even the recent broken elections in Florida.) Again, I repeat, I've spoken to corporate cult Americans, Leon Harris, Bill Hemmer, Daryn Kagan, Sid Beddington, and Walter Issacson, just to name a few at CNN. All forementioned cowards, who would watch Americans be robbed and murdered, and do nothing to protect ourselves, are personally aware the bushmob was warned of the terrorist plot specifically, the fact that Laden investigations were blocked by the WhiteHouse, while the bushmob in Enron interests, developed a war plan with General Ahmad to invade Afghanistan, for an oil pipe line on a premise of blaming Laden for whatever without evidence as US innocent, a documented truth that existed also just prior to 9/11, a strategy confessed to fully implemented, demanding the bushmob not follow the criminal leads, that point to themselves as traitors. Like the bad bush act on 9/11. (emperors-clothes.com) No arguments are given against what I have spoken on, nor am I even being adressed by our corporate standards as inter-nationally responsible. Why? Largely, because, we are adressing what is as documented to be true, irrespective of ourselves as opinion, Justice infinite as indivisable, like the stars in the sky, while the corporate news machine is refusing to be our own as legit. Mr. bush, the anti-Christ, and rumsfeld did 9/11 to kill ourselves to steal Constitutional American values, with their silence only further implicating themselves to the doubters. Neat eh? (I'm also playing the Creator, who just wants to be at peace with ourselves as equals.) As for Iraq, it was the American administration that removed the inspectors from doing their, going very successful job, not Saddam, while the corporate media continues to allow cheney, the evil nazi fascist bassturd, to keep intentionally lying to American soldiers regarding the facts, like US Air Force Response, so the bush regime can throw away their lives as worthless, without meaning. (Agreed, on general terms, American soldiers are deeply ignorant and cowardly as cheney continually attests, but they are still preparing for death, and I understand many can read human, and haven't been hiding in a undisclosed location without a television, or newspaper these last few months.) The Senate Committee on Banking, Housing and Urban Affairs, found corporate America sold Iraq anthrax, VX nerve gas, West Nile fever germs and botulism, right up until March 1992, on hopes apparently, to risk further American soldier causalities, who were at that present time engaged in battle with poisoning themselves mostly. 250,000 troops are planned to criminally invade YOUR humanity, against now near SIXTY countries, representing around 2,083,093,468 people and counting, (that also includes

freedom fighters, bikers, the Mob, and Jack), US,
clearly aware of bush and tommy franks nazi plans, like
in Afghanistan. To kill indiscriminately, while running
death squads murdering innocent families, including your
children. As for Saddam gassing the two guerilla groups
called Kurds, who were fighting to murder in a war on
behalf of Iran in 1988, labeled by American murdering
nazi savage bush, Saddam's "own people", here is what
the most definitive document on the issue states. It's
a 1990 Pentagon report, published just prior to the
invasion of Kuwait. Its authors are Stephen C.
Pelletiere, Douglas V. Johnson II, and Leif R.
Rosenberger, of the Strategic Studies Institute of the
U.S. War College at Carlisle, Pennsylvania.

...

Iraqi Power and U.S. Security in the Middle East

Excerpt, Chapter 5

U.S. SECURITY AND IRAQI POWER

Having looked at all of the evidence that was available to us, we find it impossible to confirm the State Department's claim that gas was used in this instance. To begin with there were never any victims produced. International relief organizations who examined the Kurds -- in Turkey where they had gone for asylum -- failed to discover any. Nor were there ever any found inside Iraq. The claim rests solely on testimony of the Kurds who had crossed the border into Turkey, where they were interviewed by staffers of the Senate Foreign Relations Committee.

We would have expected, in a matter as serious as this, that the Congress would have exercised some care. However, passage of the sanctions measure through the Congress was unusually swift -- at least in the Senate where a unanimous vote was secured within 24 hours. Further, the proposed sanctions were quite draconian (and will be discussed in detail below). Fortunately for the future of Iraqi-U.S. ties, the sanctions measure failed to pass on a bureaucratic technicality (it was attached as a rider to a bill that died before adjournment).

It appears that in seeking to punish Iraq, the Congress was influenced by another incident that occurred five months earlier in another Iraqi-Kurdish city, Halabjah. In March 1988, the Kurds at Halabjah were bombarded with chemical weapons, producing a great many deaths. Photographs of the Kurdish victims were widely disseminated in the international media. Iraq was blamed for the Halabjah attack, even though it was subsequently brought out that Iran too had used chemicals in this operation, and it seemed likely that it was the Iranian bombardment that had actually killed the Kurds.

From another American government report:

"Blood agents [i.e., cyanogen chloride] were allegedly responsible for the most infamous use of chemicals in the war--the killing of Kurds at Halabjah. Since the Iraqis have no history of using these two agents--and the Iranians do--we conclude that the Iranians perpetrated this attack."

--

The New York Times reported on corporate America's war project SHAD, where during the Vietnam war, 4000 U.S. sailors were gassed deliberately by Republicans with gruesome biological toxins, including sarin.

As for proving that something is not secretly hidden by a nation as millions.. practically impossible! You can't ever conclusively prove that something isn't secretly hidden from perception by variables admittingly, unknowable. (For whom would be there to secretly watch the watchers?) When, and under what madness of bush tyranny as enslavement of our human species, would anyone be able to try standing up in Iraq or elsewheres and state, there is no Anthrax anywhere hidden secretly to kill bush, the false deity super evil anti-Christ with? Never I declare as the Son of Man, will evil bush escape the wrath of our fury as this Universe is, however, it is the supporters of bush's irrationality with our poltical will unchallenged by corporate standards, as these nazi monster, lawless American cop killers wish to use to terrorize 60 nations of almost 2 billion innocents without any evidence with. With an intent to use a paultry 250,000 criminal nazi soldiers mindlessly stupid on drugs probably, while corporate America won't give anyone two minutes nationally to speak on the clear strong factual evidence implicating bush and rumsfeld for murdering over 3,000 AMERICAN flag wavers in Yew York City? Destroy American traitor bush now!!! The sanctions against the poorest of poor in Iraq are also irrational. The Republicans state the innocent people of Iraq must be denied food and medicine to starve and die because, they are practically politically powerless to change their state to be attacked as the unrepresented, while stating Saddam, if he could, wouldn't help them survive as a nation as the Republican justification to terrorize millions, while cheney skirts U.N. sanctions to sell Saddam whatever supplies privately in secret? So the suffering of Iraqis, is rightly attributed on American terrorist activity by all Iraqis, as the direct cause, working directly against the Republicans publicly stated purpose to commit such criminal intent. Example: If a well spoken father who may not like the policies of Saddam should go to the hospital with his child, he is told the bush clan wish his family death and suffering by American will for being born to our world in Iraq as human. The oil for food program however, is intelligently based, but it's purpose is defeated with the Republican atrocities to blindly murder US with. The demands for the betterment of the Iraq people through national oil sales, would make sense, if they weren't directly suffering under assault by the same terrorist network cancer cell that denies themselves inalienable rights to life as our own. Like pathetically weak as unrepresented American cowardly soldiers, who were provided no evidence to back up the evil bushmob's criminal allegations, then went murdering tens of thousands of innocent people in Afghanistan on the brink of starvation, instead of killing the documented child killer, heroin pusher, tommy franks, or bush and rumsfeld for 9/11 in America. Just on bush's behavior on the day in question, being left unreported by CNN dictates, should say much to everyone.

Joint Chiefs of Staff Chairman General Richard Myers told reporters at the National Press Club about Iraq's enormous unknown stockpiles of !secret! corporate american warfare weapons, "It does not take a lot of space for some of this work to go on. It can be done in a very, very small location," he said. "The fact that you can put it on wheels makes it a lot easier to hide from people who might be looking for it. So, yes we have evidence." Evidence of what? Nations with trucks should be nuked? Richard Myers is a nazi warmongering irrational fukhead, who wishes the murder of countless thousands, if not millions in AMERICA, who should be fired today. You see the nazi bassturd, you fire him, do you hear me People? AMERICA? Johnny...? Mr. Myers, your fired!

--

While we now learn from public disclosures on Connie Chung, apparently, George Tenant, had only 3 CIA officers investigating Laden just prior to 9/11. While I remember last year it was alledged on PBS, the CIA had taxed the American public nearly 10 billion on those investigations regarding Laden over the previous year, but, hmmm, bush forbade police agencies, the pursuit of such investigations with his secret W199i directive. Guardian Wednesday 7, 2001 - "FBI claims bin Laden inquiry was frustrated"

George Tenant must be questioned on these matters, and his relationship to General Ahmad, then arrested

regarding his inaction on the insider stock traders for
9/11. If neither happen in a timely fashion, he too,
will be destroyed by US American Patriots for treason.

--

Excerpt From:

NY Newsday
U.S. Hypocritical on Human-Rights Abuses
by Marie Cocco

...
America's new business partner, Uzbekistan's president
is brutal, and very bad.

The State Department human rights report says the former
Soviet republic now "is an authoritarian state with
limited civil rights ... Both police and the
National Security Services routinely tortured, beat and
otherwise mistreated detainees to obtain confessions ...
Police also used suffocation, electric shock, rape
and other sexual abuse. Neither the severity nor
frequency of torture appeared to have decreased during
the year."

What increased was American aid. It tripled to $160
million, the payoff for allowing U.S. military staging
areas for the war in neighboring Afghanistan. President
Islam Karimov was welcomed to the White House. In July,
Treasury Secretary Paul O'Neill traveled to Tashkent and
praised Karimov's "efficient leadership."

Bush has singled out one despot for removal.

He says he has many reasons for invading Iraq. Without
a look at some secret new evidence the administration
may or may not have about Saddam Hussein's arsenal, it
is not possible to find truth. That is how the White
House wants it.

From a smart thinking, great commenting archive
sifting site somewhere titled,

Print Think

...
Bush planned Iraq 'regime change' before becoming President
By Neil Mackay, Sunday Herald

A SECRET blueprint for US global domination reveals that President
Bush and
his cabinet were planning a premeditated attack on Iraq to secure

'regime change' even before he took power in January 2001.

The blueprint, uncovered by the Sunday Herald, for the creation of a 'global Pax Americana' was drawn up for Dick Cheney (now vice- president), Donald Rumsfeld (defence secretary), Paul Wolfowitz (Rumsfeld's deputy), George W Bush's younger brother Jeb and Lewis Libby (Cheney's chief of staff). The document, entitled Rebuilding America's Defences: Strategies, Forces And Resources For A New Century, was written in September 2000 by the neo-conservative think-tank Project for the New American Century (PNAC).

The plan shows Bush's cabinet intended to take military control of the Gulf region whether or not Saddam Hussein was in power.

(snip)

The PNAC report also:

(snip)

- hints that, despite threatening war against Iraq for developing weapons of mass destruction, the US may consider developing biological weapons -- which the nation has banned -- in decades to come. It says: 'New methods of attack -- electronic, 'non-lethal', biological -- will be more widely available ... combat likely will take place in new dimensions, in space, cyberspace, and perhaps the world of microbes ... advanced forms of biological warfare that can 'target' specific genotypes may transform biological warfare from the realm of terror to a politically useful tool'

--

Now, as for the corporate world telling US, we believe Laden is guity without evidence: A reasonable person doesn't have the justification to believe the unsubstantiated verdict. This is why the fascists at CNN propagandized, TERRORIZED, the American public by falsely alledging that Laden threatened to nuke America, or that he stated to murder any or all Americans like a bush would. Laden, like Saddam, or Arafat never was

actually quoted to be that ignorantly stupid as a leader
trying to communicate to the People, but for by CNN, and the
sharon types regarding "Palestinians", as a lie to
themselves to excuse their responsibility to ourselves
as the humans. But EVEN IF TRUE, wouldn't make Laden
responsible for every wrong doings the bushmob was
actually responsible for, like robbing all Americans of
their livelyhoods, unreported by CNN of course, to leave
ourselves to fall victim by the bush regime as shysters
pirating America, by shredding the Holy Constitution.
However, Laden has skated near with the label "Jew", to
be of the criminal, intolerant, offensive, fascist,
bigoted jewish Israeli government, that imprisons or
murders real Jews for being JUST that. Rabbi Hillel
would be jailed by sharon in the israel of today. Wise
Muhammad teachings cover this dumb Jew Christian thing
well, as us all suffering by the illiterate evil
dumbfuks who ignore ourselves, to steal our established
values, while CNN, like Art Bell, forbids debate on
their irrational falsehoods, refusing to protect the
FBI, or the American flag through practicing censorship,
while advocating murder, as Art Bell, the traitor, does
almost daily, while hanging up every human caller.
Next, CNN will be blaming ALL the poor and starving in
the third world, for secret Pentagon frauds through
the removal of the False Claims Act. As, the American nation
contributes the least to the world in aid, in relation
to the GNP. (The give and take.) 5 billion a month to
not feed, but murder innocent people in Afghanistan?
Destroy bush now, and be loved by all as God.

(snpd)
Public rebutals regarding my supreme stupidity are found
in alt.sercurity.terrorism.

Thanks friend,

Johnny Wizard

--
Man, Mr. bush Jr. sure is wicked evil eh?

Look, Americans... You, as a individual, to escape the
wrath of hell, must find strength within yourselves to
protect America from Mr. bush's further criminal acts,
otherwise bush will easily have you all wiped out
really, as unworthy to join the Universal Nations peace
process. Murdering those understood to be innocent
without reason but for to rob from is just wrong, and
abdicating your rights as a living American to not
demand Justice for your own self as the nation, will
surely have all Americans pay the consequences for truly
being so. God, who is kidding who? You, as an

American, must find the will to preserve your own nation from further bushmob atrocities, and not standing up like corporate america portrays continually, while bush tells us he is going to pirate American rights to further rob and murder for the likes of Enron or rumsfeld for decades, should to a real American, find them looking for the quickest way to Washington. CNN is not reporting on the reality of bush's crime wave, nor is showing little responsibility to represent soldiers lives as being risked for as worthless for the anti-Christ. Again, the public evidence freely available for 9/11 demands bush and rumsfeld be immediately executed for escaping public trial, as the prime suspects for the WTC terrorist act, and guilty as war criminals completely for blaming Afghanistan without evidence to substantiate their accusation. The Taliban rule of Justice for Freedom, was, and is, the American ideal. They though had some bad laws, that they were communicative regarding, and had brought much needed as good stability to the People, who would have told you, like the State Department, but CNN's Walter Isaccson forbids the truth to be broadcast. Destroy bush today American Patriot Soldier, and be loved by your commrads bush would see fall dead for dummy cowardice.

White House 'exaggerating Iraqi threat'

Bush's televised address attacked by US intelligence

Julian Borger in Washington
Wednesday October 9, 2002
The Guardian

President Bush's case against Saddam Hussein, outlined in a televised address to the nation on Monday night, relied on a slanted and sometimes entirely false reading of the available US intelligence, government officials and analysts claimed yesterday.

Officials in the CIA, FBI and energy department are being put under intense pressure to produce reports which back the administration's line, the Guardian has learned. In response, some are complying, some are resisting and some are choosing to remain silent.

"Basically, cooked information is working its way into high-level pronouncements and there's a lot of unhappiness about it in intelligence, especially among analysts at the CIA," said Vincent Cannistraro, the CIA's former head of counter-intelligence.

In his address, the president reassured Americans that military action was not "imminent or unavoidable", but he made the most detailed case to date for the use of force, should it become necessary.

But some of the key allegations against the Iraqi regime were not supported by intelligence currently available to the administration. Mr Bush repeated a claim already made by senior members of his administration that Iraq has attempted to import hardened aluminium tubes "for gas centrifuges, which are used to enrich uranium for nuclear weapons". The tubes were also mentioned by Tony Blair in his dossier of evidence presented to parliament last month.

However, US government experts on nuclear weapons and centrifuges have suggested that they were more likely to be used for making conventional weapons.

"I would just say there is not much support for that [nuclear] theory around here," said a department of energy specialist.

David Albright, a physicist and former UN weapons inspector who was consulted on the purpose of the aluminium tubes, said it was far from clear that the tubes were intended for a uranium centrifuge.

Mr Albright, who heads the Institute for Science and International Security, a Washington thinktank, said: "There's a catfight going on about this right now. On one side you have most of the experts on gas centrifuges. On the other you have one guy sitting in the CIA."

Mr Albright said sceptics at the energy department's Lawrence Livermore national laboratory in California had been ordered to keep their doubts to themselves. He quoted a colleague at the laboratory as saying: "The administration can say what it wants and we are expected to remain silent."

There is already considerable scepticism among US intelligence officials about Mr Bush's claims of links between Iraq and al-Qaida. In his speech on Monday, Mr Bush referred to a "very senior al-Qaida leader who received medical treatment in Baghdad this year".

An intelligence source said the man the president was referring to was Abu Musab Zarqawi, who was arrested in

Jordan in 2001 for his part in the "millennium plot" to bomb tourist sites there. He was subsequently released and eventually made his way to Iraq in search of treatment. However, intercepted telephone calls did not mention any cooperation with the Iraqi government.

There is also profound scepticism among US intelligence experts about the president's claim that "Iraq has trained al-Qaida members in bomb-making and poisons and deadly gases".

Bob Baer, a former CIA agent who tracked al-Qaida's rise, said that there were contacts between Osama bin Laden and the Iraqi government in Sudan in the early 1990s and in 1998: "But there is no evidence that a strategic partnership came out of it. I'm unaware of any evidence of Saddam pursuing terrorism against the United States."

A source familiar with the September 11 investigation said: "The FBI has been pounded on to make this link."

In making his case on Monday, Mr Bush made a startling claim that the Iraqi regime was developing drones, or unmanned aerial vehicles (UAVs), which "could be used to disperse chemical or biological weapons across broad areas".

"We're concerned that Iraq is exploring ways of using these UAVs for missions targeting the United States," he warned.

US military experts confirmed that Iraq had been converting eastern European trainer jets, known as L-29s, into drones, but said that with a maximum range of a few hundred miles they were no threat to targets in the US.

"It doesn't make any sense to me if he meant United States territory," said Stephen Baker, a retired US navy rear admiral who assesses Iraqi military capabilities at the Washington-based Centre for Defence Information.

Mr Cannistraro said the flow of intelligence to the top levels of the administration had been deliberately skewed by hawks at the Pentagon.

"CIA assessments are being put aside by the defence department in favour of intelligence they are getting from various Iraqi exiles," he said. "Machiavelli warned princes against listening to exiles. Well, that is what is happening now."

Johnny Is Marching Home

So, you know cop killer bush has no evidence to back up his allegations against Iraq, while Saddam repeatedly offers Americans to come look anywhere, and nazi bush refuses the offer, instead lies to all Americans through corporate control as US being worthless without meaning, without soul as himself, lacking purpose but for destruction of our Humanity as unworthy to hear from. Mr. bush tells US secretly, he wishes to sacrifice at minimum, hundreds of thousands of American soldiers in a criminal war against our dying Planet, 60 countries, without following evidence to substantiate his claimed to be therefor super evil allegations, nor, will he practice legal due process as a terrorist in Our names by flying the American flag as a true Patriot would. Destroy nazi bush and rumsfeld the traitors today, and be loved by every American principle of Freedom, as Justice for US all. Or be a lifeless coward to watch the bushmob steal not only from our dumb dorky soldiers to be wasted as sadistic murdering tommy frank savages, to be not defenders of the faith or the hopes for a better future, but also from our murdered sons and daughters, who could have, at one day, understood the principles of Freedom and Justice, present in the forgotten American Constitution as worth fighting for to be protected as ourselves always. Mr. bush the demon, is not my false deity, as he is irrationally insisted by the American corporate cult product schedule to be so. CBC and CNN we all witness as Humanity daily, refuse to ever cover the corporately mandated bushmob atrocities, as documented facts that steal real lives. Our Mr. bush Jr. has shown little of no concern for the living people in Afghanistan left alone without an American commitment to protect our lives, or feed their families, now prepared to waste hundreds of billions against the starving in Iraq over something planned close to thirty years by criminal occupation. Their strategy, like in Afghanistan, is to put worthless nazi slave soldiers on the front oil pipe lines only, while murdering students and teachers who would have suggested clean hydrogen is practically free nazi dum fuk scums. You think if Saddam was murdered, the rest of our Humanity the whole world over, would allow like a cowardly corporate american slave whore, Mr. bush, rumsfeld, and tommy franks, to give all of the Iraqi resources, to the murderous criminal thieving intolerant evil fascist israeli government of nazi bigot human haters, without objections from G of all beings? Holy Jewish Jihad Jesus! We notice the corporate news agenda to rob from US all, our commitment to human rights, is to never inform our communities as publicly aware, that nazi amerika, blocks food and medicine from ALL the Iraqi people, but yet will afford our time to propagandize our community with bushmob lies, left uncorrected. Has Ramsey Clark ever been offered as a legitimate voice of opposition, to clarify our positions? Does Ramsey Clark speak untruths, like bush does to kill and plunder the American People? You'd imagine, if CNN was truly American, they would tell Americans importantly, bush has no evidence to conclude OUR position, and murdered thousands in New York City, while Saddam offers the World to witness the falsehoods of the bushmob to come see for ourselves, or just simply give some attention to bush's true evilness he spouts as his own. The bushmob is tirelessly working to undermine the UN peace effort, by trying to suggest, if the World community should get the weapon inspectors in before mindless nazi forces get there to blindly murder and terrorize further, untold thousands in Iraq, slave boy Powell wants inspectors to include armed nazi soldiers, planes ready to bomb civilian targets, and openly, secret spies to be criminals! Something any legitimate inspector would appose as a ridiculous proposal, undermining of the peace initiative to be a Just cause, and the UN as an INTERNATIONAL BODY. And, as so should, motivate wimp ass Kofi to vocally detest on behalf of US people he claims to represent as a living person. Europe reports as human, while CNN as traitors to all of Humanity refuse to offer the facts. CNN sees no responsibility to protect America, or our soldiers as worthy the effort to address their real concerns regarding Our... Godly is Justice Freedom thing, or this all powerful Mr. Wizard person even. LOOK, THINK... I'm telling people around the world, Mr. bush and rumsfeld are documented to have murdered Americans at 9/11 to thwart Enron's impending CRIMINAL bankruptcy, while, I've repeatedly demanded their immediate arrest or execution by the lovers of Humanity, and don't you think that would make for a legitimate National news story? ("The Dabhol Working Group", cheney's secret energy meetings with Enron, public threats against God as Justice through the Taliban, BND, September 9 war plan, Ahmad and Ahmed, and, AMERICAN FBI and CIA investigations.) Why not? Because I am relying on the evidence like a Police Officer does, as it is related to Justice indivisible as ourselves, THE ACTUAL FACTS JACK, and CNN doesn't truly want American soldiers to know who's dying for who. Myself, as the dreamy Saviour, am open for dialog, discussions with what we can measure and what we can not, debate to put to shame any even on the Nature of truth and deception, God, and this Universe, something CNN refuses to all American Patriots as worthy of deliberation. Like with economics, or basic high school maths. I've personally contacted the CEOs of both, CBC, and CNN, who have decided with intent to ignore Our concerns. Look, one of the first things bush did when he stole the Presidency, was steal fifty billion American tax dollars from our grandmothers, and don't you think that would make for your National news interest?, as a soldier worth giving your life away to bush for? You know, Mr. bush, the super evil, false deity, anti-Christ of biblical folklore? So unbelievably vile and putrid, the Son of Man as God's only true born Son, has to come down here to defend myself as all of Creation exists for this day. Mr. bush's american whores would work to decimate the Constitution and sacrifice humanity as Jesus on the cross, and ask US why?, without listening? CNN won't allow amerika to be America, but for to be misrepresented as slaves to die by corporate command, through the evil practices of the unholy and criminal dictates of Our Mr. bush Jr., traitor to US all. The Messiah asks the American people to stand up for themselves as a nation of individuals, to demand equal access to our rights for freedom, by reaching out to our neighbors as soldiers and police officers, to break through Our international media controls at CNN headquarters, that silence our concerns as the living to be justly represented. We demand the immediate firing of Water Issacson, and Sid Beddington, and Johnny wants Our voices heard now on our Public airwaves! A word of wisdom: I wouldn't tick off our King like this for much longer bushmobsters, you don't want to see the Family, US, losing our patience by getting really wrangled up with little corporate america's false deity of hatred towards the makeitwithart living John man. Johnny'd rather have American men find courage somewhere to stand up for themselves against being robbed of their generosity, but Jesus Christ all mighty, if there is no real Manly men in corporate america, we'll just have to come down daring to make all doze men look like the weak twerpy cowards they are to be deprived so sleepy, as too afraid of their own little shadows to protect the once great American dream for Humanity. I thought I knew America, my father thought he knew America, and bush, the treasonous unelected fascist nazi mass murdering savage criminal, he don't know the America we believed we are of once.

Again, I can not stress enough to the truly proud and strong American People in the NRA, bush's criminal evil, and those who support him factually against Justice and Freedom in Congress and the Senate through the prepared before hand, unread Patriot Act, and for approving an unrepresentative blatant criminal war as clearly the evil doers, is really happening. CNN refuses to report in American survival interests, while we now know, bush and rumsfeld hold little reservation murdering American citizens or soldiers, Police Officers, Fire Fighters, if it then means they can steal further our life's purpose, and pursuit of happiness by fair play as Justice instills for all. Mr. bush openly lies as a demon to our world deliberately while smirking, counting on CNN at the National level, not correcting his treason against the entire human race, leaving US isolated as individuals, with potential doubt always ever present. But, we can indeed measure, and verify irrespective of bias or ideology. A fence that is seven feet tall, is a fence seven feet tall. And, when demon bush advocates the murder of innocent people to steal our life savings while destroying the living economy, people do actually suffer and die. Forget about my fanciful dreams to be a party King, and think about your own future and family as we exist in reality, dying unjustly at the hands of the anti-Christ through corporate cult america that sacrifices themselves even included as unworthly to what? They glorify dumminess, as an attribute for success, sacrificing our dying freedoms to be heard as the still barely living with concerns. Gee, and you wonder why they take half of life's investment to bankers as sacrifice for nothing...

I beg you, to forward this paper to all you know who should consider this for themselves.

The war criminals, Mr. bush, rumsfeld, and tommy franks, must be arrested or executed by True American Patriots immediately. The three traitors to humanity, that not only have advocated in your name, the murder of US as innocent people, but have also perpetrated the criminal acts. Leaving US to judge themselves, as they have judged, to be treated as they wish to continue treating Ourselves, or Just you alone, with Rights granted by living as freedom to be so. God or no God. Mr. bush, rumsfeld, and tommy franks will immediately be arrested, or executed by True American Patriots to stop further bloodshed of our Humanity, as their real destruction of the American Dream for all as evidenced to be criminals under the Constitution, is found to be evidenced by all who understand so.

Glory be to God in the highest order, and if I should die tomorrow, I'll know I fought to the best of my love for living in a world where accidents do happen. If my life should grow unable to win our wager, and I lose all my fortune to the anti-Christ, Our Mr. bush Jr., my wanting for a better world will have never diminished. I'll know that I accepted to do what I could to the best of my giving. I can only hope these words, were enough thought as worthy of sharing to others, who believe in themselves to read this far in agreement with me.. I make a pretty damn good King eh?

Without risk, we would have nothing to be thankful for. Do not be afraid of living for freedom my friends, for most FBI officers support freedom for America, and so too do soldiers. Those who don't are generally weak, stupid, incompetent, and very very slow without Love in their hearts, or the will to be brave. Mr. bush and rumsfeld don't want to arrest the true culprits by following the available criminal leads for 9/11, and it doesn't take much figuring to understand why. We are all angered by Mr. bush Jr., and the contempt he and rumsfeld has shown for all those fallen murdered in America and Afghanistan.

And, just recently in Indonesia, a claim that al-Qaeda would attack a civilian target like the bushmob does advocate as practiced, and Laden repeatedly condemns, is again, with not even a thread of evidence offered on CBC to conclude such a statement that was made officially, shows a contempt for the rules of Justice to be practiced rightly by the ruler, and likely, staging the criminal investigation to go nowhere. Or, conversely, this sniper killing civilians in America, being a reflection of the Nation's true american bushmobster will to innocent good people going unreported elsewheres. The sniper is only a small taste my friends of bush's america as God is my witness. Mr. bush, america's false deity that corporate america puts all of every America's blind faith into as slaves without rights through Justice, had no interest in arresting himself and rumsfeld for 9/11, instead, with corporate america backing bush's further criminal intentions, dropped over 4000 bombs on Afghanistan, including a 14 ton bomb on Kabal. (The brave Taliban, we remember, were supporting the arrest of the actual culprits responsible. A no no to the bushmob circle.) Or like tommy's death squads against Afghan children for Enron, Afghans, who bush and rumsfeld murdered close to

100,000

without CNN daily coverage, as blamed for 9/11 without following the evidence and closing investigations, practicing a war planned terrorist strategy existing at the WhiteHouse it did, two days prior without able excuse anywhere to be found. A junta dictatorship of pure evilness. How stupid and cowardly does an American soldier have to be, before they stand up as one in defense for their own family? Like the Taliban would have?

Look at the American military usenet groups to read for yourself regarding Our Mr. bush Jr., little of no disagreement is found with what I have written so far. Sure, corporate america will continue to try, by illusion, to have US all believe we are the minority to stand with conviction to protect ourselves as Humanity. However, the free communications that our internet provides, clearly indicate our truer positions as not entirely devoted to self destruction by ignorance, and criminal behavior against ourselves by dictatorship under the anti-Christ. Help destroy bush, and be loved by all as yourself to be cared for as heard from. As King, I am so much looking forward to retiring as soon as humanly possible, counting on yourself eventually to believe also, for a real better future by only simply trying to win the day for everyone.

Can somebody please help ourselves for living's sake?

Johnny Wizard

Bonus Track

Did you know, factually, no bull, the national debt accrued through the dilution as willed from Currency, is what is owed to the Nation, not the bankers? The creation of government debt is done by the willed devaluation of your earnings. See, it is a loan made in our names to the banker for ourselves. The public loan is actually made, when the banker is granted as doing so privately. It is not the magician banker who we must pay for nothing, it is the banker who owes the nation as the loan was to begin with to be legitimized by any national policy. Wealth taken as not earned, comes from those who work honestly getting jipped. So, I propose a private banker swindle tax, to cover the administrative costs of running openly public funded gambling enterprises, with 100% cash payouts to actually thwart our falling economies, then, maybe the corporate news industry will see a responsibility to measure how much a lottery official pays themselves secretly with our banked interests accruing. Our governments should be providing what services we want, and are willing to pay for. Stealing from the desperately poor to pay even more as servitude to our further ineptness, is not only firmly established as illegal, but also makes no sense to most anyone I'd bet. Example: VLT's payout 96% as advertized, well not truly, the math as counted says 30% before expenses, but who of the general corporate TV intellect, has our time to figure it honestly? See, it is easy to understand a criminal offence is taking place, but because the corporate mandate is to keep the public more ignorant than Our Mr. bush Jr. on everything as a monetarily rewarding experience, (Larry King is a millionaire) the corporate cult products refuse to practice the interests of Justice for our values to protect our living standards. Accordingly, bush murdered all those New Yorkers for whatever ill reason (who really cares) as the anti-Christ, and corporations refuse to follow the story as evidenced impartially. Too much work for no pay, but the expense is risked by the loss of investment in Humanity to be defended. This is why CNN won't even defend their fellow corporate cult members who lost their human lives at the World Trade Center. Who really cares?, for the value of innocent life?, Your Mr. bush Jr.???

Johnny Wizard

--

Up to You

Look, american service personnel aren't even American enough to publicly defend their treasonous behavior against the good old red, white, and blue. Why? Cowards. We all know the bushmob has tirelessly worked to steal American service personnel's pensions, savings, and lives as worthless of protection, while counting on every American Soldier as Police officer, to not arrest the bushmob ourselves for 9/11 in New York, and the war crimes committed against the innocent in Afghanistan. Mr. tommy franks, the heroin pusher, tells dumfuk soldiers to kill innocent humans, and American soldiers aren't there anywhere to protect themselves? Sadistic nazi war criminal rumsfeld tells us all openly, he wishes to persecute those he knows to be innocent as a true nazi did. With all the blessings of sharon naturally. Why do American soldiers not protect America? Or know the Constitution as Holy? Too weak, stupid and cowardly I told you Johnny. They sit terrified, unwilling to stand for their country, while demon bush and rumsfeld decimate my economy with a regressive tax swindle, and in addition, criminal thefts through the Pentagon and Social Security, while publicly planning to war two billion people of

US

for no good reason but for sacrifice to corporate america's false deity, the anti-Christ, Our Mr. bush Jr.. While we now all also know, to not only rob, but murder thousands of Americans too, as fair play by the bush backed terrorist protocol, exposes Our Mr. bush Jr. as the most heinously evil demon humanity has ever witnessed factually. All evidenced and everything. So, will Americans live up to protecting their dying rights, or will bush, the anti-Christ, succeed to further steal our God sworn, Patriotic duty to protect our own humanity? Will bush succeed in destroying civilization, or will we succeed in destroying pathetic criminal pirate nazi traitor bush, by the will of our own survival to continue as the People?

The godless corporations refuse me to speak publicly in our defence naturally, and people generally, seem to concur as stupidity, to sacrifice their own families purposefully for the banker buildings, while putting their religious faith into corporate dictates for slavery. I am not myself to be G in all worlds, nor, am I all dreams to be so undesirably. I am just a super human being as space time continuum, day tripping all alone, wondering about prospects for a world in which I can live with. I love life, and our ailing planet, but maybe, I did get this story line wrong somewhere, and got taken away too far in fantasy. Maybe, bush's humanity as it exists here in reality, is a nightmare not worth saving for yourself being.. CNN and CBC do work against our communities, documented everyday, by their continual refusal to cover our top priority issues. Corporate radio programs primarily, but not always, insist on only hiring semi-literate ignorant bigot whores as fascist degenerates, who insist on disallowing open communications, or learning to learn with the community, while advocating the murders of American service personnel and innocent civilians, as a patriotic duty to not live up to our personal responsibilities as a member of society. It is all up to ourselves to fight for peace, or be slaughtered on Coast to Coast's alter of apathy to not care so for living justly. We are not at war with ourselves, or a third of humanity as cheney and bush repeatedly claim, but with the warmongers, who wish US all harm, to steal our human values of love and understanding, good will, and compassion. With evil bush, cheney and rumsfeld figuring, there is no way for US all to stand up for yourself, under the banner of Justice as freedom for all. Well, I say, nuts. If God can do it, and I can do it, so can you true! Help yourself up please won't you do it as us living already? Or, maybe for beer?

Please do not allow the bushmob to murder millions. The fears to stand proud as Americans, are the fears to stand proud with Love as ourselves being the Universe. Boo! That wasn't so scary, was it? Again, traitors bush and rumsfeld must be immediately arrested for 9/11, and tommy franks, for war crimes in Afghanistan. Like Now.

Always forever, the one and only,

Johnny Wizard

All at Once

Nobody would want our lives or freedom stolen, by simply living to not deprive those same rights from any other.

So, Mr. bush Jr. tells you, we're either with us, or with the terrorists. Hmmm. As a member of the general public, bush, as himself, has no more rights to speak openly as the person I am, and therefor, I will except his proposal on equal grounds to communicate freely. So, I'm either with yourself as a would be, could be anyone is, or your factually documented as an unbelievably super evil, anti-American mass murdering fascist dictator, war criminal terrorist recruiter, as the, golly gee, actual, must be for real, warmongering anti-Christ from this Book by John then eh?... No? You, what do you figure Mr. bush Jr.? Can you hear humanity calling you out to publicly explain your vast stupidity? Politics has it as our mutual understanding, loyalty to life through law as living is civilization. Law, as is the only true measurement of freedom for ourselves to know so. Are you alone on this too? Ha, er... um, anyway..

Nobody would want our lives or freedom stolen, simply by living to not deprive those same rights from others. So we form Governments, and have loyal police officers to practice our will as ruled out to the best of our ability.

We need a new national news format to make for this information age approaching, that sets a high priority on ourselves as concerned about where we are going. The Constitution is not just a jumble of tossed blurbs, telling of a day when people didn't care for living as America in spirit also, the Constitutional rights of Justice stand strong through good reason, and are easily defended up at the national news desk, we're sure to say eventually, if we only had the show for something. While we wait, corporate america prepares to never have Chomsky aired, or legitimate critics as the voices for freedom by representation, to gain ourselves progress as we would normally on Watt's happinin for real man. You know, the awesome power of communication, and Chomsky, being a best seller over and over like that, or Ron Paul being a Republican citizen, committed to working for Americans as a true Patriot would under the flag? The Constitutional rights of Justice stand strong through good reason. Ashcroft is truly incompetent. His failure to grasp why a democracy would choose to treat all people fairly, as duly protected with a system of laws practiced to find governing with, leaves us instead as, the ancient bushmob vision of injustice against ourselves that he fails to confess as us innocent until understood otherwise. The crusades were a lesson we never want to be learning over, with Our Mr. bush Jr. at our wills demanding a crashed course we've done and learned from already. I think Ashcroft's personal turn to criminality for America, has to do with sabotaging that FBI investigation, and the fair play consequence of us People arriving to communicate him to justice on behalf of the Nations with questions that need immediate answers. Sabotaging the FBI was not due from insufficient funding, or failure to connect the dots ever as investigators.

Nobody would want our lives or freedom stolen, by simply living to not deprive those same rights from any other. Right? Save America for your own sake Americans! The strength is within ourselves to make this a better world for living.

As you are,

Johnny Wizard.

Is It Not True?
Questions On Iraq From A GOP Congressman

Ron Paul is an M.D. and a Republican Member of Congress from Texas

Editor's Note: Texas Republican Rep. Ron Paul read the following to the House of Representatives, September 10, 2002.

Soon we hope to have hearings on the pending war with Iraq. Here are some questions I would like answered by those who are urging us to start this war:

1. Is it not true that the reason we did not bomb the

Soviet Union at the height of the Cold War was because we knew they could retaliate?

2. Is it not also true that we are willing to bomb Iraq now because we know it cannot retaliate -- which just confirms that there is no real threat?

3. Is it not true that there are those who argue that even with inspections we cannot be sure that Hussein might be hiding weapons, and at the same time imply that we can be more sure that weapons exist in the absence of inspections?

4. Is it not true that the U.N.'s International Atomic Energy Agency was able to complete its yearly verification mission to Iraq just this year with Iraqi cooperation?

5. Is it not true that the intelligence community has been unable to develop a case tying Iraq to global terrorism at all, much less the attacks on the United States last year? Does anyone remember that 15 of the 19 hijackers came from Saudi Arabia and that none came from Iraq?

6. Was former CIA counter-terrorism chief Vincent Cannistraro wrong when he recently said there is no confirmed evidence of Iraq's links to terrorism?

7. Is it not true that the CIA has concluded there is no evidence that a Prague meeting between 9/11 hijacker Atta and Iraqi intelligence took place?

8. Is it not true that northern Iraq, where the administration claimed Al Qaeda were hiding out, is in the control of our "allies," the Kurds?

9. Is it not true that the vast majority of Al Qaeda leaders who escaped appear to have safely made their way to Pakistan, another of our so-called allies?

10. Has anyone noticed that Afghanistan is rapidly sinking into total chaos, with bombings and assassinations becoming daily occurrences; and that according to a recent U.N. report the Al Qaeda "is, by all accounts, alive and well and poised to strike again, how, when, and where it chooses?"

11. Why are we taking precious military and intelligence resources away from tracking down those who did attack the United States -- and who may again attack the United States -- and using them to invade countries that have not attacked the United States?

12. Would an attack on Iraq not just confirm the Arab world's worst suspicions about the United States? And isn't this what bin Laden wanted?

13. How can Hussein be compared to Hitler when he has no navy or air force, and now has an army one-fifth the size of 12 years ago, which even then proved totally inept at defending the country?

14. Is it not true that the constitutional power to declare war is exclusively that of the Congress? Should presidents, contrary to the Constitution, allow Congress to concur only when pressured by public opinion? Are presidents permitted to rely on the United Nations for permission to go to war?

15. Are you aware of a Pentagon report studying charges that thousands of Kurds in one village were gassed by the Iraqis, which found no conclusive evidence that Iraq was responsible, that Iran occupied the very city involved, and that evidence indicated the type of gas used was more likely controlled by Iran not Iraq?

16. Is it not true that anywhere between 100,000 and 300,000 U.S. soldiers have suffered from Persian Gulf War syndrome from the first Gulf War, and that thousands may have died?

17. Are we prepared for possibly thousands of American casualties in a war against a country that does not have the capacity to attack the United States?

18. Are we willing to bear the economic burden of a 100 billion dollar war against Iraq, with oil prices expected to skyrocket and further rattle an already shaky American economy? How about an estimated 30 years occupation of Iraq that some have deemed necessary to "build democracy" there?

19. Iraq's alleged violations of U.N. resolutions are given as reason to initiate an attack, yet is it not true that hundreds of U.N. resolutions have been ignored by various countries without penalty?

20. Did former President Bush not cite the U.N. resolution of 1990 as the reason he could not march into Baghdad, while supporters of a new attack assert that it is the very reason we can march into Baghdad?

21. Is it not true that, contrary to current claims, the no-fly zones were set up by Britain and the United States without specific approval from the United

Nations?

22. If we claim membership in the international community and conform to its rules only when it pleases us, does this not serve to undermine our position, directing animosity toward us by both friend and foe?

23. How can our declared goal of bringing democracy to Iraq be believable when we prop up dictators throughout the Middle East and support military tyrants like Musharaf in Pakistan, who overthrew a democratically elected president?

24. Are you familiar with the 1994 Senate Hearings that revealed the United States. knowingly supplied chemical and biological materials to Iraq during the Iran-Iraq war and as late as 1992 -- including after the alleged Iraqi gas attack on a Kurdish village?

25. Did we not assist Saddam Hussein's rise to power by supporting and encouraging his invasion of Iran? Is it honest to criticize Saddam now for his invasion of Iran, which at the time we actively supported?

26. Is it not true that preventive war is synonymous with an act of aggression, and has never been considered a moral or legitimate U.S. policy?

27. Why do the oil company executives strongly support this war if oil is not the real reason we plan to take over Iraq?

28. Why is it that those who never wore a uniform and are confident that they won't have to personally fight this war are more anxious for this war than our generals?

29. What is the moral argument for attacking a nation that has not initiated aggression against us, and could not if it wanted?

30. Where does the Constitution grant us permission to wage war for any reason other than self-defense?

31. Is it not true that a war against Iraq rejects the sentiments of the time-honored Treaty of Westphalia, nearly 400 years ago, that countries should never go into another for the purpose of regime change?

32. Is it not true that the more civilized a society is, the less likely disagreements will be settled by war?

33. Is it not true that since World War II, Congress has not declared war and -- not coincidentally -- we have not since then had a clear-cut victory?

34. Is it not true that Pakistan, especially through its intelligence services, was an active supporter and key organizer of the Taliban?

35. Why don't those who want war bring a formal declaration of war resolution to the floor of Congress?

No Telling

Destroy bush and rumsfeld now! Look, the terrorist network runs out of CNN and CBC, both willingly advocate criminal intentions against our community interests, by censorship and dissin' information. (Video Lottery Terminals eat at our souls, and destroy our economy. 100% payouts must be demanded, anything less, is a perpetration that does not stand up to sound fiscal management.) The management of the networks, Walter Issacson and Sid Beddington of CNN, Israel Cinman, Robert Habinovitch, and David Cochten of CBC, are all our humanity's enemy, as the true harborers of terrorist activity, evil scum to US all. These monsters refuse to allow reporters open public discussions on the true current political state of OUR affairs, protecting their false deity, the anti-Christ, Our Mr. bush Jr. from immediate arrest or execution, for perpetrating 9/11, now getting away with open deceit as unchallenged with OUR facts, perverting America's democracy into in junta dictatorship. CBC and CNN play our nations as unworthy of deliberation, while censoring OUR ELECTED officials. Like the recent Florida election. Or those in the American government, responsible for managing to barely protect Social Security, that bush has now illegally had removed from their jurisdiction, while silently telling all Americans, he'll manage to rob from us in secret without telling anyone. Arron Brown, like Larry King, feels the Social Security of our soldiers is unimportant as newsworthy, nor their lives as worth protecting. Or how about when bush stole 50 billion tax dollars from American families, and stated, he wasn't accountable to the people as a legitimate leader? No fukin kidding! Unaccountable to no one evil nazi murderer bush thinks America will not stand up for ourselves without godless national news coverage, nor will American men be brave enough to stand strong to protect their own bereaving families. Again, the bushmob not only threatened directly the Taliban with war in July 2001, for not siding for Enron's interests, but was also caught with the 9/11 war strategy fully developed two days prior to the event in question. Why would Laden, or the Taliban give bush a justification to follow through on his evil nazi threat? How could the irrational, illogical, lawless criminal dumfuk bush, have attacked the students of Afghanistan, then let tommy franks run death squads to murder defenseless children, without 9/11 I ask you? Gee, the Taliban sided for the better pipe line contract for the interest of their nation, and turned down bribes to sell out their brethren, therefor, the bushmob as Enron can steal and murder anyone they want to because, Americans refuse to uphold their own Constitution, of which, true American Patriot Soldiers it was rumored at one time, used to actually give pledge to with their lives if necessary in protection, while crying through a salute to the flag, that bush and ashcroft now spit on deliberately, challenging US to come down there ourselves personally, because Americans, are so unbelievably cowardly! Again, the pension money stolen from American families through Enron is sitting in the Cayman Islands, and the biggest crook of them all is Thomas White, bush's Secretary of the Army. (Thomas, as Secretary, does the financial paper work for the US Army, in case you didn't know.)

As for evil dumfuk rumsfeld's statement to justify our unjustified incriminations, "The absence of evidence is not evidence of absence.", no it's not, nor is it impossible that every real man alive will destroy rumsfeld ourselves, before he continues to murder us all irrationally for possiblilities we could maybe might do. Mr. rumsfeld tells us he would without reason to claim so, steal and murder from ourselves as established innocent, of which he himself, would even contend as the criminal! To have rotten rumsfeld tell us he has a belief in our names to persecute innocent people, because he can't substantiate any evidence factually, gives himself no honest justification to hold such a position against our better interests. So goes to show, rumsfeld, the nazi, is a war criminal! Then, of course, there was the statements rotten rumsfeld made, that enrages every loyal member of the NRA when communicated clearly, where rotten rumsfeld stated, that of the Taliban prisoners held illegally at Guantanamo Bay, that even if they were honestly tried, and found innocent in an American court of Law as judged by our peers publicly, rumsfeld would still fight our humanity as a terrorist, and refuse their release as farmers with beards, or protectors of our communities. Or like ashcroft said about terrorists not deserving the same Constitutional Justice protections as everyone else, like facing their accusation in a public court of law to defend themselves against alegations made in our names. What is it then nazi bassturds, is ashcroft saying people in other nations should be terrorized, or is he saying american criminals are getting away unaprehended?

Destroy rumsfeld now American Patriots!

www.washingtonpost.com/ac2/wp-dyn/A38441-2002sep4?language=printer

To persecute our humanity for no other reason, but for rumsfeld's paranoia with what is possible, or fear of reprisals for 9/11 by real American Patriot Soldiers, would mark himself openly as a terrorist to everyone, threatening US all with murder for crimes he says he has no evidence to back up as alleged. Mr. rumsfeld, like ashcroft and bush, is a traitor to the Constitution of America, and every living soul in this Universe! While WE know, he didn't go to the NMCC on 9/11, where he knew, and was reminded, he was supposed to be. While WE know, there was no public evidence linking Laden or the Taliban secretly either according to the British Parliment, at the time he ordered the blanket killing of Afghans, (who as a Nation, like "Omar the Just" were in support of following the criminal leads to arrest the true evil doers, (true American Justice!)), as the reason offered to stop all investigations by hiding most of all the evidence that would jeopardize his, and bush's security as demons of pure nazi filth, traitors to US all as the living to be humans. Like the eight black boxes, cockpit recordings, testimony from the ATC, FAA, NORAD, the Air Force, Building Seven, the FBI (Rowley and General Ahmad) and the CIA (Insider trading on the airline companies testified to not be connected to Laden). Or like flight manifests, with the alleged high-jackers who boarded without tickets, using stolen names of people either still alive, or mostly from Saudi Arabia. Gee, why would, would be terrorists steal passports they didn't need, of American trained Saudi national pilots, if they didn't want to be discovered as American trained Saudi national pilots? Why plan to high-jack planes from faraway Boston? Why did the Ladens fly out of America at bush's request right after 9/11 from Boston too? Hmmmm. How is it possible for a terrorist to board a commercial plane without purchasing a ticket? AND, how would the two fbi officers (James Woods), and three cia officers responsible for 9/11 investigations, be able to conclude the false names of the suspects, if they weren't on the manifest? Destroy bush now and be loved by all as God!

Yours truly,

Johnny Wizard

globalresearch.ca/articles/CHI205C.html

All Wrapped Up

CBC as managed has deliberately with intent, worked to misinform and propagandize our community on what is as, documented provable fact, regarding Mr. bush's complicity to the murder of US as the innocent in New York City. CBC has refused to live up to our responsibility to protect our democracy, and in silence, has pirated our names to murder those understood to be innocent of the accused offence. CBC has refused to allow ourselves as the public to understand, Mr. bush forbade the FBI from pursuing bin Laden investigations, just prior to 9/11 with secret Presidential directive W199I (199I WF213589), which had John O'Neil, the anti-terrorism head for the FBI publicly protest by resigning over. This W199I directive was put into place after the administration had been warned by the BND, and several other legitimate intelligence agencies, of an impending terrorist plot involving the high-jacking of American airplanes to be used as weapons and flown into land marks. In addition to these unreported top priority political issues that stand to be true as documented factually, the bush administration had also secretly put together a sinister war strategy, that was revealed to ourselves as the public, by Canada's own Jim Miklaszewski at MSNBC, to have existed without any doubt as Presidential Directive documents, two days prior to 9/11 at the WhiteHouse. A planned strategy to invade specifically Afghanistan, by blaming bin Laden for a crime, but providing no evidence to back up the allegations. That's right. The super evil criminal bush dictatorship had a plan in place to not follow the actual evidence to arrest the true culprits for a crime that hadn't even yet taken place, but that they were prepared for to close investigations on, as an opportunity to invade specifically Afghanistan, propping up the Northern Alliance who still practice the barbarity of sharia law, with the bush bonuses of selling heroin to our world, and most importantly, building a liquefied natural gas pipe line for bush and his Enron friends, to rob even more further from us all. Legitimate FBI officers unrepresented by Mueller claim General Amad was the principle terrorist funder of Muhammad Atta, responsible for a wire transfer of $100,000, who, incidentally was in unusual meetings, the General was, with the bush administration a week prior to 9/11, who also not only participated in meetings with several top officials in the Senate Intelligence Committee, but also, was reported to participate in building the war strategy of invading Afghanistan, as the reported desperate excuse offered for the General being there just prior to 9/11, and also, was personally responsible for negotiating the non-surrender of bin Laden, of which the ISI claimed, the General advised the Taliban not to do so because, no evidence would be offered, nor public trial for an offence bin claimed he played no part of.

We are all in agreement, in truth we rise, evil is just the deceived disguised. Boo!

The case is wrapped up, and bush and rumsfeld need to be immediately arrested for 9/11, for murdering countless thousands for stolen gain, at the losses to our humanity, that show through every putrid utterance of scum bucket bush, as contempt for our living as humanity through Law. Where a person accused of a criminal offence without any evidence is clearly innocent. For why I ask you reader, would any unjustified leader of US people blame someone for a crime who wasn't linked to the offense, while working to close investigations, and not follow through with the ample clues to capture the true evil doers? Just how cowardly stupid can soldier families be taken without conviction as themselves worth fighting for?

Justice for all, and glory be to godly.

RITTER PUTS HOLES IN CHENEY'S ALUMINUM TUBES STORY

Posted By: Rosalinda
Date: Tuesday, 10 September 2002, 11:50 a.m.

[source: CNN, Sept. 9]

RITTER PUTS HOLES IN CHENEY'S `ALUMINUM TUBES' STORY AND OTHER LEAKY EXCUSES. In an interview iwth CNN today, former UN Weapons Inspector Scott Ritter ridiculed the latest concoctions of the Mega crowd to justify an attack on Iraq. Excerpts follow:

PAULA ZAHN (CNN): I want to have, hear your reaction to the whole range of Bush Administration officials yesterday who said .. that Saddam Hussein has been trying to obtain materials to build nuclear weapons, particularly trying to buy thousands of

aluminum pipes that could be used in the manufacture of a centrifuge and ultimately used to manufacture weapons.
What do you make of that?

RITTER: What an absurd statement. Thousands of aluminum pipes, and we're going to go to war over thousands of aluminum pipes? Even the IISS report that you cite says that if Iraq was to have trying to do uranium enrichment, it would take them many years before they could do it. This is patently ridiculous. These are aluminum pipes coming in for civilian use. They are not being transferred to a covert nuclear processing plant or any covert nuclear activity whatsoever.

But the best way to figure this out is to send the weapons inspectors in. If they, if the United States has this evidence that Iraq has these pipes, why not, heck, give me the data. I'll come to Iraq, hunt it down and we'll bring it to a close. That would save us going to war, killing thousands of people and destroying our reputation in the international community.
We cannot go to war because Vice President Cheney's worried about some aluminum pipes. This is ridiculous....

ZAHN: Let's talk more about what some say is the only independent voice in this whole argument, and that is the International Institute for Strategic Studies.... In this report, it suggests ... that Iraq could make a nuclear weapon in months if it had foreign help.

Let me read to you what the conclusion was, that, "War sanctions and inspections have reversed and retarded but not eliminated Iraq's nuclear, biological and chemical weapons and long range missile capabilities, nor removed Baghdad's enduring interest in developing these capabilities."

RITTER: Paula, what do we have here? Rhetoric? Where's the facts? "Enduring interest" in weapons capability? What does that mean? What evidence do they cite for this "enduring interest"? You know, ballistic missiles. They say he has 12. What, did they grow? Where are they? They didn't have 12 when I was a weapons inspector.

Chemical weapons? Biological weapons? They talk about bulk agent in terms of Iraq's biological weapons program. What bulk agent? Where did they make it? A bulk agent has a three-year lifetime in terms of storage in ideal conditions. The last time Iraq was known to have produced bulk agent was in 1990. That stuff, even if they held onto it, is no longer viable. So to have bulk agent today, Iraq would have had to reconstitute a manufacturing base in biological weapons. Where is it?

This report is absurd. It has zero factual basis. It's all rhetoric. It's all speculative and, frankly speaking, it's meaningless without, you know, with the sad exception that hawks in the Bush administration are going to point to this as justification for war....

ZAHN: What makes you think that if UN weapons inspectors went in now, after not being on the ground for four years, it would be any different than the last time around, when Richard Butler, who was the chief UN weapon inspector, said the Iraqis often moved stuff when they knew you guys were going to be on the ground?

RITTER: I had been there since 1991 working under Ralph Ekeus, when the vast majority of the actual disarmament took place. By the time Richard Butler came, we had already destroyed Iraq's weapons programs. We were hunting down for, you know, missing items, you know, a piece of metal here, some documents there.

And, yes, Iraq could have moved them, but this does not constitute a weapons program. It's illegal, and this is what inspectors need to do, come back here, finish the job so that Iraq can get on with rebuilding its economy, etc. But, you know, Richard Butler knows for darned sure that the Iraqis were not moving weapons from his weapons inspectors.

The weapons inspectors were trying to get into some of the most sensitive facilities in Iraq that dealt with presidential security. I was the guy leading these inspections and Richard knows that he allowed the United States to use my inspections to spy on Iraq, which is why they don't trust the inspection process.

So let's not bring up Richard Butler. Frankly speaking, he has no credibility on this issue.

ZAHN: I still don't understand why you think the inspections will be any different this time around. The administration seems convinced that if Iraq had nothing to hide, they wouldn't have broken all these UN regulations and they would have allowed inspectors in over the last four years.

RITTER: Come on, Paula, let's be fair. The administration knows that the Central Intelligence Agency used the weapons inspection program as a Trojan horse to insert intelligence collection capabilities to go after Saddam Hussein....

You know, I know that inspections did work. We achieved a 90 to 95 percent level of verified, absolutely certain accountability for Iraq's weapons program, including all the factories and associated production equipment. This is why I'm just amazed when I hear reports coming from the IISS that Iraq suddenly has the capability. Where did it come from? Did they suddenly grow factories? ...

... Let's get the inspectors back in, let's get them to find out what the ultimate disposition of these weapons programs are and if Iraq has no weapons of mass destruction program, thank goodness, we just diffused a war. And I think that's a good thing worth trying to do.

--

From the well recomended document:

US Intelligence and the Terrorists: Pre-9-11

... June 6, 2001. German intelligence warned CIA.

(A) The German intelligence agency, the BND, warned both the CIA and Israel that Middle Eastern terrorists were ``planning to hijack commercial aircraft to use as weapons to attack important symbols of American and Israeli culture.'' This intelligence reportedly came from Echelon, a high-tech electronic surveillance system used by the intelligence agencies of several nations to glean through electronic communications for certain keywords. It was first reported by the German daily newspaper, Frankfurter Algemeine Zeitung on September 13. Its sources were reportedly from the BND itself. (Gembeimdienste 6-6-2001; Stafford 9-13-2001; Ruppert 11-2-2001; Ruppert 11-27-2001; Ruppert 4-22-2002; Martin 1-5-2002; Martin 1-16-2002; Thomas 5-21-2002)

According to Gordon Thomas (5-21-2002) of Global - Intel, the original source of information actually came from Israeli Mossad agents operating in the U.S. who had infiltrated al Qaeda. According to his account the Mossad also informed British and Russian intelligence about the attacks, who then in turn notified the CIA. Thomas's sources are allegedly informants within the Mossad itself.

As of April 22, 2002, no challenges to this information has been reported. ...

--

Also, it has also been alledged that the German embassador Ischinger, On Monday 6, August, 2001, had met bush personally, and during that meeting, the Bundesamt fur Verfassungsschutz [German domestic secret service] and BND [Bundesnachreichtendienst, German foreign secret service] finding was once again reiterated in person.

! ! ! ! NEWSFLASH ! ! ! !

September 12, 2002 NewsNight with Arron Brown
(snpd)
Mr. Butler, did not refute, with his repeated opportunity, Ritter's documented as fact, with the paper work to prove it, allegations of american corruption succeeding, in fact, repeatedly, Butler refused to answer the direct question, on wether, he, Mr. Butler, abdicated his responsibility to our world community, and sided instead to bow as a fascist coward to CRIMINAL american sabotage regarding the U.N. resolution inspection's process.

Gee, no wonder Saddam has concerns for his people...

A worthwhile note also, is during CNN new briefs on Saddam's recent comments, never once was it said, that Saddam alleges to our world, bush murdered New Yorkers for financial gain, as he did factually claim, and I do too, as the evidence is unmistakable. Mr. bush, the super evil anti-Christ, and too, Mr. rumsfeld, the sadistic nazi dumbfuk, must be immediately arrested, or executed by Patriot American Believers, so we may begin to get this PUBLIC court case regarding the facts on the mass murder of AMERICANS under way. I wanna lead the prosecutor's team!!! (I am now officially excepting book offers.)

--
(snpd)
E-mail this to somebody for Christ states,

yours truly,

Johnny Wizard

--

From below:

"Mr. bush you nazi vermin, you attack my America, you attack US all. American soldiers will not sit back as cowards entirely, and watch you sacrifice our lives as worthless without meaning."

--

I think I love you too much

Wow, your amazing! So, what your saying is bush the nazi tyrant, the unelected mass murdering fascist dictator, has no interest following the ample criminal leads, because they lead to him, rumsfeld, and cheney likely too, right? And, when that evil monster told us instead he would rely on secret evidence, but couldn't tell us why, as too the FBI or CIA, it turned out to be nothing but another wicked evil deception against the great American people, Tony Blair, bin Laden, and law enforcement officers everywhere, to even further give him cause to close investigations into 9/11 as Reuters told us, and rob directly from American soldier families, their lives, pensions, life savings, and blind faith, in bush, the false diety, super evil anti-Christ.

Johnny Wizard is my Hero.

--

Weak Pathetic Coward Nazi bassturds

American soldiers are weak pathetic coward nazi bassturds. The recorded evidence stands before all of our humanity, while CNN silently pleads ignorance on what is clearly established as documented fact, regarding Mr. bush and rumsfelds' complicity to murdering thousands of American citizens, stealing from all Americans the principles of which the American flag once represented, now unprotected by corporate dictates. Encouraging American soldiers to further sacrifice their dying rights, to murder potentially hundreds of thousands more for bushs' nazi conquests against ourselves further unprotected by nazi traitors at blitzer's war room. ("War Room" is the term used by nazi CNN nosearch big pay do squat staff who routinely work to keep America uninformed with their secret from no one, refusals to protect Americans for the bush regime, like in the case of "The False Claims Act", or evidence requirement to convince US who is evil.) You do five minutes research on the Anthrax suspect, and you come up with Dr. Phillip Zack, but what does CNN do to protect the American people? Nothing but mention Hatfill, not even still a suspect according to REAL FBI sources, who, you'll notice, Mueller or Ashcroft never if ever mentions, like point number six of Coleen Rowley in Time regarding treason at the highest level. Mr. tommy franks, the nazi traitor heroin pusher, runs death squads in Afghanistan, executing countless children as our own, but what does CNN say on behalf of our families?

www.theithacajournal.com/news/stories/20020525/topstories/380284.html

Nothing, but to refuse a voice to those they know murdrered in their names as nazi facists, refusing to allow open honest discussions on the true political state of the Union. Publicly advocating to be accessories to the murder of ourselves, refusing to make any attempt to stop bush from continuing to murder their our own families, and stealing from our nations the concept of Justice for ourselves, (Never mind America's own life savings STILL sitting in the Cayman Islands. (Thomas White.)) while advocating even more murders and thefts against the innocent, because soldiers are too weak as colateral damaged disfunctional illiterates, to stand up proud for the American people as equals. Under the Bill of Rights, as justice for US all, truly brave and strong, as the saviours of ourselves to be free as individuals, humanity, WE will never surrender as slaves to the false diety, anti-Christ, Our Mr. bush Jr.. The lawless nazi facists mass murdering tyrants, Mr. bush, bogus cheney, and rumsfeld, are the ememies of America as the free world, who as WE, will no longer except lying down to the continuing corporate silence of surrender, to take us as dead and forgotten, as not worth our time of day, to stand for yourself, as a living breathing human.

Johnny has spoken to several hundred at CBC and CNN including the CEO's of both, regarding the evidence that no one has yet, suggested they find any contention with. Destroy bush and rumsfeld American Patriot Soldiers, and be loved by all as family.

Destroying the evil doers

(snpd)

What do you know?

Hi everyone, so, what do we know? Mr. bush made plans to attack Afghanistan just prior to 9/11, for not signing a contract with CentGas, which would have given Enron access to LNG. For without, they as members of the bushmob, would face their impending criminal bankruptcy, revealing they were stealing from any as all Americans, their life savings. Without the illegal war against the struggling to be better Taliban, the bushmob would have been exposed without fear by America, and soon, we would have all faced a bright new day understanding further, the importance of Justice for humanity as ourselves deserving not to be robbed from.

None of the evidence indicated Afghanistan, and by bush running without judgement with his plan made prior, showed a willingness to not apprehend the true culprits, while warmongering a fury in bigoted corporate America, to attack our humanity without thinking, or understanding the reasons why the American Constitution holds still respect, for it's wisdom granting protections to the people as we are, individuals with rights to be represented as equals under the law, in defence against the evils of humanity, of which, our Mr. bush willingly as a demon, works to destroy US as the too weak and cowardly as terrified to know better to speak up for themselves rightly.

(snpd)
Americans, like our corporate news
services in Canada also, are expected to not report the murder of ourselves in Afghanistan, excusing their contempt for themselves as God, to name ourselves, demonized willingly trying to take you to sacifice your rights as censored for bush to steal from our families escaping prosecution. I call news agencies, who as individuals, see no responsibility to ourselves as community. I recieve only refusals as excuses to deny ourselves equal access. Why? They, like deer caught in the headlights, or swimming in the, it feels so good to be taken banker advertising, leave us to only death to others they see not as themselves, be it thousands or millions, than allow me to enter as simply a concerned man named John to speak factually as documented, calling for the immediate arrest of bush and rumsfeld the murderers, to escape further bloodshed. Or, I'm baselessly insulted without argument, ouch, or dismissed as alarmist for screaming for the stopping of the murder of US as really dying, while my, how am I going to survive job prospects go vanishing, because of my excellent research abilities on behalf of the humans.

CBC in Washington just refuses to report as Canadians.

(snpd)

How do American soldiers feel
about sacrificing their lives to sell heroin, and steal oil, to likely pollute the region as Dutch shell would as they do murder civilian protestors with Tony in Britian harboring them? Killing for the World Bank who will pocket the paid expenses while indebting the impoverished nation? As death squads against freedom as cowards? You'd think if they were going to kill anyone in Afghanistan, it would be the terrorist leader, heroin pusher, tommy franks and his northern alliance business partner mercenaries, like the brave Taliban would have to protect us innocent all over the world, no? The truth is in while the cowards pretend. You know Dad, I'm beginning to suspect american nazis on our planet, don't actually know us too well as the humans yet...

Wide Open

All American people, police officers and soldiers hear this out please. Mr. Mueller has shown no commitment to represent the FBI. He has made no responsible public mention of the investigations regarding General Ahmed, and his connection to Mr. Atta, nor Odigo's two hour warning. He has not mentioned the investigations regarding the Israeli spy ring done by the FBI, and it has been only FOX News, the DEA, and their spokesperson Rogenc Waite, who have been able to get around Mr. Mueller's contemptuous silence for America, while bushmobster Susan Dryden, states we are all an urban myth. The FAA, NORAD (Canada's arm), Mike Vreeland, the CIA even, and several responsible military and civilian air traffic controllers, and a great many others disagree with CNN's refusal to mention our public statements against bush and rumsfeld's contentions. Never mind Police Commissioner Bernard Kerik who was handed Atta's passport by someone not named yet, of which Kerik stated "Apparently, it must have fallen into the air just as the crash occurred, surviving the almost 1000 degree heat of the fire, then came across a strong wind to blow it several blocks away." With loose papers between the pages of the passport even surviving the gusts. Now we witness the corporate cultists, desperate to contain us with the magic bullet theorists, we're expected to believe 2000 degrees actually is the only way possible, as impossible to prove scientifically. Also remember, the buildings weight were bore by interconnecting columns of steel through a central core design named "tube within a tube", not like a simple toothpick project laid out by fancy computer grapics, that neglect the actual blue print designs, as thought through since before the Roman Empire. If still so though, how then can the desperate doubters explain building Seven, or maybe Six, not struck by planes, but fell just the same without melted bricks?, of glass? As also reported, Atta actually taking the time to pack, yes that's right, pack his suicide letter is too stupid for even the average American intellect. Nevermind the sneaky suspected terrorists arguing over a parking space restricted at the airport yelling. Or, Mr. Mueller's ATM picture of a 'highjacker' who was already dead while the picture was supposedly taken. Hmmm... dead men as the terrorists named Mohammad or something like that.. Jesus! Then finding out according to James Woods, the double agent actor, bush's Mueller had secretly, only two officers responsible for following more than 30,000 selective as important leads over a crime of such magnitude. Bing bing bing bing bing bing bing bing bing bing bing bing bing bing.. Hey... Did you hear that? We see the weakness of the many stuck as bushmobsters, like possibly completely innocent Myers, and his inability as cowardice to speak out regarding his political position as responsible to America, likewise as so many others, showing no concern for the nation as US people. Typical of a usual ignorant fascist right winger sellout like bush has been his entire career to his barely living self of evilness never before witnessed. And, I could go on for twenty more pages on the motives, Enron, and the proven to be criminals at the Pentagon, with the official corporate news story failing the simplest of scrutinies.

Reminder: first tower was struck at 8:45, second, 9:03.

Airports were closed at 9:17, but the soon to be shot down flight 93 calls in at 9:50 apparently according to rumsfeld, asking for permission to do a u-turn, fly east an hour and a half, to land in WASHINGTON? (two planes don't seem to have highjackers on them, and I guess the plan got messed with the remotes somehow.) While the Bin Laden family is preparing to leave America at bush's request, to escape any questioning, regarding the soon to be blamed Holy man Bin Laden, without evidence by the Washington Post in the late edition of Sept. 11th, by the surprisingly thoughtful monster henry kissinger, while CNN reports a story unbiasedly in the forth party apparently, (heard it from a friend who heard it from a friend...) of a call just received to their private newsroom from somebody somewhere to whomever, about friendly, er.. no mean Muslims on board, pre-activating pay phone services without doing so, or so we can only guess, a falsehood truly painful to relay completely. Mr. bush and rumsfeld killed those good Americans in New York, and must not under any circumstances be allowed to continue as escaped leaving the scene, to repeat offend against ourselves, who under these circumstances, must not be taken as granted by Chris at MSNBC. I have repeatedly offered my position of responsible debate with any corporate cultists, that refuse to represent our democracies being toppled into lawless dictatorship. Why does corporate America refuse to report on elected Congressman Kucinich? Again, Mr. bush and rumsfeld need to be immediately arrested or executed as traitors by the brave and true, strong and righteous. We need to seize all available evidence that Mr. Mueller has stolen, like airport video tapes, as well as recordings done from within the airliners. Or provide me, Mr. death, to testify to the recorded gruesomeness as unbearable. Anyone in the bushmob who stands in our way to do so, must as will be also found guilty of treason by all the loyal American people. I call on all police agencies, ball clubs, loggers, swank hotel clerks and the PTA, to pull together under this banner, and make the world something better for everyone, before getting back to wrestling amongst ourselves over what have you. Mr. bush's evil is very real, in this time I, as a strange voice from the wilderness, who does not make your decisions to do the right things for yourself, plead for you to do so as you should. Get off your ass. I mean, who and for what are our soldiers still killing people for in Afghanistan? The heroin dealing puppet government of foreigners with the World Bank are in place losers, and do I understand they have already spent near a 100 million dollars of ours on things like 3 million school text books for practical terrorism from the eighties, while leaving so called heroin addict alliance forces happy to oblige without 'official' pay checks. CBC in Canada shamed the world by running a propaganda piece on school funding, but neglected to mention the 'new' books, just like the 'old' books came from the bushmobsters again, also with CBC 'pretending' to not know that the Taliban had begun girl schools in Afghanistan, a story that had already been almost correctly covered by the Washington Post, amazingly about a month ago, albeit, without the girl schools element, but Jeeze, the truth seems to be finding it's way, despite the tommy franks grouped with the northern alliance targeting youths who can read as the enemy Taliban right? Mr. bush displays a hatred expressed against our entire human race as himself, to kill us all truly as his position, that he in self contempt, refuses to acknowledge, while we further fall dying unjustly, for who I ask you? Mr. bush has actually publicly positioned himself to state he does not support effective treatments for cancer. Why? Because there is no money or ours as tax payers to steal from. Deception is an element of all living truth, and evil secretly is just being openly stupid like bush is, (you can't pretend insight as wisdom truly), leaving the biggest secret being, here is but only one, you too, as we all share nothing as no secret in silence as a reflection of all living dreams. GOD IS AMAZING. There is no spoken answer to the question of a mystery asking as forever endlessly, as life could be unbelievably fantastic at a level of real world sustainability, but you know what my friends? Nobody at corporate mind control seems to care, but only to say how wrong we all are on everything, by people who do not know any better for trying to do nothing. Do not know any better. No argument, no science, no reason, just almost as robots working for the death machines in cowardice and self loathing against ourselves not represented. I, as the make believe Creator, attempting to represent freedom of will eternal, can't help hate and despise bush, your false deity as much as any real man would, I'm sorry. News corporations refuse me a voice as the publics, and have so for years to also our acclaimed scientists, political writers, mathematicians and historians, while Mr. bush as the super dumb anti-Christ of evil incarnate, demands openly in OUR public arena, I not be allowed to live my life in unity, as an individual god seeking a potential Heaven for myself singularly, doing my own thing naturally. Mr. bush demands by threat of murder, I relinquish my equal rights, to become his willing slave. Mr. bush demands I not be permitted to protect myself in a true democracy as Justice for all. (Mr. bush, you either understand us as fairly to be equals with justice as anyone, or your threatening our freedoms as a criminal terrorist without room for argument.) Mr. bush demands I fear his murder rampages against the innocent, as would be myself, still living to say, NEVER! Never would I lie to myself like a cowardly American soldier to bomb innocent villagers to waste billions, before killing tommy franks for ordering me to do so. Never would I lie to myself like a cowardly American soldier to bomb innocent people in Bagdad to kill people, before killing tommy franks, cheney, bush, rumsfeld, or even Mr. Powell if need be. Don't like Saddam? Well, talk to him openly about freedom for ourselves then. Talk to the people of Iraq, and on what we together, can do to make life better. What is it about the functioning government in Cuba, that could be made better as measured? Why not? Because then it would be understood, bush is a savage criminal, and incompetent as wrong and seriously evil to all of US. As he clearly knows nothing about Justice and freedom, or economics as he currently is destroying the economy of America, while cashing in our real lives creating hardship, as only ideology. I mean, removing the cash from our streets, while stealing billions for himself as a degenerate man! (Our wealth is not infinite, nor do the hungry, have magically, meals mysteriously appear in front of them.) He wasn't elected, falling short by more than 600,000 votes before demanding the halt to counting, and is a nazi murdering traitor who speaks only of his stupidity, while robbing America as our world, of Justice to be free and living godly.

(snp)

Thank you for everything,

Johnny wizard

--

(snp)

It's Nothing - Mr. bush and rumsfeld are traitors to every American, as they are both guilty of war crimes against humanity. Where are the American soldiers to arrest or kill them both as murderers trying to escape the wrath of the American Constitution's protection of the masses under Justice, that they are attempting to destroy as ignored against the interests of mankind? Again, bush had no evidence against Bin, for a crime he demands we not know the perpetrator of, by attempting to stop, or not address the criminal investigations completed already. With the corporated cultists cashing out hard working American tax payers by labeling us all, as not caring to be biased. Telling our soldiers to attack without thinking, the third world Taliban government for asking about evidence as a true American, Allah, Christ, or Buddha would, ending the heroin trade, and attempting with communications, something better for the people of Afghanistan. Mr. Mueller has informed us, as one more informed than any other who meets with George Tenet every day, the only evidence we have implicates bush and rumsfeld for 9/11, and soldiers have yet to stand for America to destroy bush and rumsfeld, the murdering bassturds desecrating our judicial process. Why? Nazi cowards, not willing to protect the American flag, while watching their own families be robbed of their life savings and pensions through Enron, and open Pentagon frauds, while bush, the anti-Christ, hopes soldiers will learn from the bankruptcy, for next time, while we, as humanity, watch the Republican Congress today, allow the thieves to escape, with, MAYBE, a fine, while walking away with billions stashed away secretly in the Cayman Islands, or left responsible for secret Army financing, like Thomas White, as their two timing Secretary. It's too bad we can't separate American soldiers, by who wish to uphold the American Constitution as Justice for all, and those sadistic savages like rumsfeld who enjoy murdering innocent people while stealing from everyone our humanity, then we would have a real war of good as powerful, against the extremely weak and pathetic illiterate nazi cult scum, eh? I mean, if you actually knew who the soldiers were as responsible for bombing villages in Afghanistan, and red cross units, literate tribal leaders, or having 40,000 surrendered given to be murdered, wouldn't you as a real American Patriot Soldier, just kill tommy franks, bush and rumsfeld the nazis without thinking twice? I mean, to be humane or godly? See my friends? We will see again, no traitor to America offer an actual public argument to their position of ourselves to not communicate freely with our facts, but will without reason, demand we not be able to truly, like CNN, MSNBC, CBS, Art Bell, Reston.com and the like, while attacking ourselves personally for demanding we no longer be murdered for the evil bushmob, who ignore our concerns as legitimate under universal law actually existing, as not heard from really dying, deprived equal say as the Bill of Rights still demands. See? American illiterate evil nazi scum, think the all mighty as this Creation will be made only to suffer and die as murdered by the weak, dispossessed and cowardly, so sharon the bigot racist parasite can rob and murder innocent persons as Catholics, Muslims, Atheists and Jews forever and ever, financed by corporated nazi cult Americans left in the dark until their bitter enlightenment, about who lives the airwave as true to be ourselves. Justice infinite as indivisible shall prevail as a Heaven or Hell, you decide. I am calling for the immediate imprisonment or death sentence, to the proven to be world terrorists without given argument against, who admittingly have committed the deliberate mass murders of US as innocent, sharon, bush, rumsfeld, and tommy franks. Forty dollars for bush and rumsfeld, ten for tommy franks, and the Jews of God's creation will wake I'm sure, to deal with the nazi bigot ariel sharon, without further going payment. They advocate as demons, enemies of US all, the murder of innocent people, of which we must no longer allow. I'm available for debate or interview, of which news corporations refuse to grant. Just as they do on every other serious life affirming issues. Our nations greatest, most popular scientific and political writers are barely, if never even acknowledged. Many have read my words, yet next to none argue in disagreement, but for insult lacking reason. Why? Because some people are just stupid, and as in open polite discourse are exposed to be carbon copy right wingers suffering under suggestion to do nothing to help themselves. Like, how does someone argue burned jet fuel smoldering, could reach a temperature of 2000 degrees Celsius, in an area of standard building construction not melting before steel would? Or, because someone commits a crime in New York, or did years ago because they were beaten down as deprived human rights and had all their property stolen, sharon can then excuse himself to murder anybody else he wishes, maybe hundreds or thousands more to steal their lives and prosperity? How does Mr. bush Jr., the anti-Christ, get away saying we're all against him discarding the rule of law to find ourselves not to be equals under God with his tyranny of injustice and slavery, that he expects every nation to suffer under in fear while he attempts to plunder and murder everyone as evil incarnate? Digesting fluoride for no other known or unknown reason to science kills us, and nobody else says different, so why must CNN insist we keep doing it by not covering the facts documented for decades? I say, who cares why right wingers want to destroy our eternal Universe as themselves unworthy, let's just stop doing it today okay? because it makes us look really really stupid to the other civilizations of our Universe that don't practice censorship of our advancements in science as know how. What an embarrassment. Why as so does CNN refuse all the other crimes committed by Republicans to go unheeded as recognized? Like the denial of equal rights to non-jews in Palestine? I don't know, let us just work to make our world a better place for all. I want my own show. Why does the American Coast to Coast radio network forbid all intelligent discussions to protect American values, as repeatedly offering no comment allowed to understand this dying bit? Scared of the Lord really getting angry?

--

In It for US

Your either with US as equals under a rule of law as Universal Justice, or your a mindless slave whore sacrificing your soul for bush, the anti-Christ, who will as he continues, stealing and murdering from our families without any good reason, or provocations as evil incarnate he is to US all. A murdering nazi demon of evilness never before known. As he as shown, he would steal from every American, Justice, Freedom, and Liberty, while only saying, no he's not, as who knows how many are illegally arrested as disappeared, and he funnels billions of real American worker tax dollars into criminal thefts through the Pentagon. The False Claims Act. Like he has polluted ourselves in Texas, as he directly supported the murder of tens of thousands in Afghanistan without evidence, stolen tens of billions from Americans for himself, and fought against smart and healthy universal heath care as educated, and continues to support the legal inaction against Enron, who fleeced any American pensions they could get a hold on, of which the biggest criminal in the Enron debacle, outside of Ken Lay is Thomas White, who he has made no indications of arresting, or even firing, as the Secretary of the Army. Mr. bush gave his buddy Krongard the right to murder any law abiding American citizen as soldier, and escape criminal conviction, a traitor to America is our Mr. bush jr., Constitutionally, plain and simple. A nazi warmonger, who wishes to murder millions with nuclear weapons, a savage, a monster. A demon who has placed in his secret administration, those responsible for the death squads of Nicaragua, and the shipments of cocaine into America, to increase crime against every community, while his supporters support the school of the Americas, by removing free speech from those who wish to point to those Republicans ultimately responsible for harbouring real terrorism, (Mr. bush Sr.) according to Sergant Chuck Couglin of the Milwaukee Sheriff's Department. He has also said he wishes no interest in stopping his increase in the heroin trade. He, as pure evil, who holds practically no deception to ourselves if you'd only listen, has destabilized the world in his commitment to the destruction of our legal due process, by suggesting his entourage, can not be found guilty of any crimes against our humanity, of which they spout like rumsfeld in silence to torture, and murder those known by all to have committed no offense, through now military dictatorship, of which, true Americans will not allow him to take US further, I will not stand for it, nor should you as a Patriot soldier protecting the flag. I demand again, the immediate arrest of bush and rumsfeld for crimes against humanity, in New York City and Afghanistan, or their rightful execution by all free thinkers in America who own firearms, and can read of our stories not present by the corporate establishment. Mr. bush and rumsfeld expect every single human on our planet to relinquish our rights as living human beings. Mr. bush had no qualms about doing business with the Taliban in August, if they would only, by bribe, collectively sacrifice their interests in serving for their country, as bush has done to America for his entire career degenerating. Mr. rumsfeld asked our living World for the murder of "Omar the Just", for the only reason of requesting evidence. Bin Laden, as we all remember, offered his arrest to authorities upon the showing of any evidence, for a crime he stated was no part of, including all the other baseless claims made by the Clinton administration, who too, could not arrest Bin Laden then either, when he sat in jail for 47 days uncharged waiting. Which is how we know again, Mr. bush is directly involved in NYC, as would too, as have to be, rumsfeld to let the towers fall, but too stupid evil they both are, to not know the wise intentions of America's founding fathers, or myself as the Messiah, Johnny Wizard. For as we knew, all the planted evidence and otherwise, that was publicly available, pointed only to bush and rumsfeld for not seeking who was responsible, only to leave blame quickly as not possible, on a Nation accused without evidence, that had a month prior been planned to rob and murder from for Enron was desperate to hide their crimes against every American dollar. All documented. Kill bush and rumsfeld on site American soldier, and be loved by all as Saviour.

--

A Better Way

(snp)

Mr. Mueller, the head of the FBI, who meets everyday with George Tenet, the head of the CIA, stated recently after reviewing his quoted statements stated, actually they as officers of our laws have no evidence whatsoever connecting anyone but the bushmob to the terrorist acts in New York City, testifiable through the public information given by ourselves, the DEA, the CIA, and the FBI in our fields, of which Mr. Mueller seems completely absent minded of publicly speaking anyway. Look see for yourself.

''In our investigation, we have not uncovered a single piece of paper -- either here in the United States or in the treasure trove of information that has turned up in Afghanistan and elsewhere -- that mentioned any aspect of the Sept. 11 plot,''

(snp)

(snp)

The Messiah vs. sharon, bush, and rumsfeld

(snp)

Mr. bush you nazi vermin, you attack my America, you attack US all. American soldiers will not sit back as cowards entirely, and watch you sacrifice our lives as worthless without meaning. I have spoken to the Secret Service in person, and all who read this can be assured, so has mr bush scumball jr. by the date this is posted, and as he continues to pretend to not have, only further shows his contempt for your life and Justice for our communities. For bush's contempt for the American constitution as Justice and freedom is ungodly to every proud American police officer and citizen the world over. Mr. bush must be arrested for his terrorist crimes in New York City immediately, for the evidence of his and rumsfeld's criminal behavior is overwhelmingly censored by CNN and the other corporate cult cogs, who refuse to protect Americans as ourselves, the dying community falling unheard from. The patriot act will be rescinded, unless anyone can actually provide a counter argument as to it's purpose other than to destroy our freedoms, while the bushmob continues to rifle our pocket books.

(snp)

Who is Who?

(snp)

Freedom is only garnered through Justice for all equally.

"Patriotism is the last refuge of a scoundrel" wrote Samuel Johnson, and he wasn't just mixing words. Patriotism is not about mindlessly as cult slaves obeying bush the unellected nazi fascist criminal dictator, it is about protecting freedom for all as democracy demands by law. Ours. Mr. bush has said that if we, as Nations, don't agree with himself as world dictator, removing the guiding principles of constitutional Justice as freedom for all instills, while actively destroying America and murdering innocent people for no crimes who struggle now only to survive from his criminal tirades, advocating torture while declaring wars against anyone poor and unrepresented, with a complete disrespect for all human life, and our courts of Law, has clearly stuck himself to be our enemy everywhere, as being evil personified, which inextricably demands his immediate incarceration for the crimes he is committing against ourselves as a true terrorist without question, no? The bushmob desecrate the ideals of freedom, Justice and democracy garnered by truth as our own being to be individuals, and is exalted by CNN claiming to be representing ourselves while watching us be robbed and murdered as stolen from openly. Mr. Turner, you have terribly disappointed our world in this great time of need for ourselves as humanity.

Again, all relevant evidence, circumstantial and otherwise, regarding the WTC terrorist act, points to the bushmob, and rumsfeld especially. (snpd) Flight 11, all ticket sales are accounted. How did terrorists board without purchasing tickets? No, the airline industry did not take the names off the lists on Sept. 11, as too on the 12th they confirmed so with a small correction, but if they had, how then would, or could, the desperate doubter explain strange flight 77 from the same company, which does leave room for terrorists to be on board with the given total. Oh... I think I know. Two flights had duped terrorists hired by the bush wrecked state department, explaining the State Department connected money transfer discovered by the good FBI to the head terrorist, Germany's Mr. Atta, unreported by the Commi Nazi Network of course, showing a belief on Atta's part, that he would not die with the top secret arrangement he had made with the bushmob privately, explaining why the bushmob had his passport in their possession secretly, and why Atta couldn't have checked in with baggage. (Ya right, he's gonna pack a jet fuel consumption calculator and a video titled, "How to fly a jumbo jet airliner in twenty minutes for dummies" left behind of all places in baggage, explaining the secret bushmob audio tape still to be never released where Atta is heard mumbling, "Jeeze, where's my lucky shirt?" and, "Does anybody here know who's flying this thing?") The $100,000 didn't go far, and Atta clearly wasn't a devote Muslim, as in the bar he drank vodkas and flashed a huge wad of hundreds and fifties to the manager, and everyone else in yelling distance, bragging how much the bushmob had paid him stupidly to do so, for a flight he couldn't possibly have boarded as a viable pilot or passenger. Also, why need carry his passport loosely as needing to remain unnoticed, if he didn't buy a ticket, nor planned to travel anywheres, if he somehow magically just appeared on the plane in mid-flight after an all night bender with hookers? Also, none of the four flights easily indicated that they had been highjacked, while the transponders were all turned off by code from inside the locked cockpits, at roughly the same time as if by automation, with flights not changing their flight course for as long as fifteen minutes, like no passenger ticketed terrorists aboard flight 11, ("Hey Atta! check out the view!", or "You left the manual where?", or "Gee, thank God you have the final draft, suicide letter still with you for when we burst into a fireball."), as too, the 200 mile precisely aligned trajectories, without HUD, do attest something not quite normal, according to experts in the Air Force with thousands of hours flight experience and some chaos theorized war gameroom background, and elsewhere, who know of bowling a perfect game while blindfolded, using a checker. Flight 77. The planted terrorists failed to highjack due to the fact, the plane was returned to control of the real pilot who managed to use communications after a fifteen minute fight for something. Conversations that the bushmob confiscated. For after 77 changed course in the dramatic after some struggle for the controls, it then returned to it's original flight path, and okayed, but, not for long, for now they knew inside information. "No, I wanna fly this plane according to procedure while you guys fight a fair three round fight." or "You say planes have actually flown into the WTC towers?" or "Let's just pretend we're the real pilots, and maybe no one will notice?" But shut off transponder only then? was it on again, or had it never been off before? If the terrorists were subdued, or gave up by showing their red bomb boxes only contained confetti, how do they so quickly take the pilots place, (who had just been last near for calls after returning to normal), to push the codes? This is why the bushmob took the tape. CNN tells us rumsfeld says the FAA didn't contact NORAD until 9:25, while at the same time, CNN also tells us controllers who handled 77, knew it had been highjacked at 8:46. Also, explaining the now no longer strangeness of why bush desperately ran to confiscate those airline videotapes of the passengers boarding flight, not thinking to know we now know who they all were. (Maybe things didn't go exactly according to his evil nazi plan?) Truly brave American soldiers would arrest bush and rumsfeld by the end of a loaded ready to fire rifle, and any other who stand to stop us from viewing our evidence available. Why, that's called obstructing Johnny Wizard. Also, consider this, the thought to necessitate the order of the terrorists to force passengers to use cell phones as secretly planned, two flights, (Time magazine Sept. 24 - Flight 93 "We've been highjacked. They're being nice.") but make no declarations on behalf of themselves leaving no point for departure? With a communication plan not controlled from the air perchance? Ah, but not on flight 11 or 175 where terrorists weren't present, as again, every passenger accounted, but no calls? Only one not talked about, because it doesn't fit with the bushmob lies. Flight attendant Sweeny was reported as the only one I am aware of to make a cell phone call over the entire hour on flight 11, or 175, to the ATC at Boston, giving seat numbers to highjackers that were not on board as registered ticket holders, (so how did she?) nor even sitting where Meuller lies, who in so doing, disputes she made the call to know factually. Makes no sense to me also, and CNN, we can be sure, will do nothing for the Americans who lost their lives over the senseless ignorance of their corporate cult status, that perpetrates this form of dim-wittedness without helping you by interviewing anybody involved in the investigations, to rather let the bushmob continue dictating unchallenged to murder more of us, for staying unawares of our silent screaming. hmm... Any unboarded tickets? Apparently so, for it was reported all purchased tickets were used but one. Another koinkydink regarding the hooting and hollaring, drinking and carousing in the strip bar the night before of the bushmob barkers, is that nobody would PURPOSEFULLY give their lives in a collective criminal operation for CASH payments through the State Department as to go gone dead broke next day, against living life's costly riches freely would they? Did Atta from Germany even attempt to give the 100k to his wife and children for safe keeping? Bingo. Also it has recently been revealed by India's officials, and Pakistan's Foreign Secretary, Niaz Naik, that the bushmob had contacted their governments in AUGUST as himself typically idiotic, as privately to public representatives in a unreported meeting in Berlin to state, he, as the anti-Christ, would slaughter the innocent people of Afghanistan's government, who had ended the heroin trade and were protecting the country while progressing towards equal rights for women,(We will sue CNN for every dollar Turner has.) making illegal, slaves and murder, by forming national laws that five years previous didn't exist, also making it safe to travel, and started opening schools for girls while being starved for doing so good for everyone. Why would bush the demon attempt to do so? To shore up corporate banker support for Enron, who had placed a 3 billion dollar investment in Dhabol Power Company, and needed liquefied natural gas in a big hurry, what with Qatar drying up, and the tripling in price of naphtha. Stuck no longer able to garner partnership with the present pipe deal contract offer for Afghanistan agreed to as well by tribal leaders who Tommy murdered, as too, India's insistence in not being ripped off any longer, by a company the entire nation learned easily to hate over the past decade, and the laundered employee pension money unretractable in the Cayman Islands proved to be of little use apparently, and of course most importantly, also the secretly known to fellow shyster cheney, impending criminal bankruptcy, and we must also not forget bush had excepted 2 million dollars in bribes from Ken Lay, who had his own late night office suite at the White House for their private encounters, so it has been kinda reported, but difficult to believe bush manages to whore so much, but understandable, what with the way he walks so funny. See, the Taliban had excepted a deal from Bridas, a pipeline offer to help rebuild the nation, while the bushmob just threatened to murder all their families for Enron's conspiracy tied to the Republican nazi regime. Enron could never obtain investors desperately needed, to attempt with capital, to hide their crimes against all the American people, without a binding contract, investors such as from the multi-billionaires in the post WWII charity organization, World Bank, of which as unocal, being typical Republican, only offered bribes to officials from Afghanistan to hurt their nation they, as the Taliban, truly believed in working for. As a another example where these nazi vermin relate their uselessness against us all from, Mr. phil gramm lobbied for slave labour at 10 cents an hour for America, while sneaking in a bill for California to have their electricity price quadrupled, for his relatively paultry personal check of one hundred thousand, while California citizens payed billions and billions as stolen from without police protection, as companies fell going bankrupt due to gramm's assault, leaving many out of work to get swindled even further by Republican corruptions that run rampant through the entire state in other places, without me there to bask on the beaches to give an occasional cameo appearance, while flexing my muscles to the tune of some free beer, a place to crash, and maybe pretzels, hint hint. Achem. On the morning of the fast paced Sept 11th, bush was aware of something special in NYC that he would comment on as asked SPECIFICALLY he stated while leaving his hotel room, on his way unswavered directly to hear about goats from school children by nine, as it was reported his comment to be so nationally, on ABC News with Peter Jennings reporting on the terrorist highjackings. While we now know according to the FAA's official report, that at 8:20, officials were made aware of the unprecedented emergency while channelling through authorities, (the bushmob as rotten rumsfeld through CNN speaks nothing about it saying, all the FAA employees are lying, and don't keep watch professionally) and according to the criminal indictment against the bushmob filed by Ilarion Bykov and Jared Israel available at www.emperors-clothes.com, the Secret Service are kept more informed than anyone concerned with bush's safety, so, you'd figure, would have made bush aware of all four flights, since he was already familiar with one important thing going on in NYC, that he would talk to the media about directly later as massed for it, right? (Perhaps someone should ask Andy?) Bush was also reported to receive a call in his motorcade about the horrific event, with him also confirming to witness the tragedy of flailing bodies from the epicenter of disaster, you know, the WTC towers, commercial airlines thing?, school television sets we presume existed that he left only a moment to thought, as he then quickly entered smiling nonchalantly, a different world stage, the class room unshaken, without thought to think he may have been confused earlier to then attempt seeking clarity, no, he sat for 25 minutes unalarmed, chit chatting like nothing was happening, just as we rehearse, and as disturbingly deceived evil as ever to be believed, as anti-Christ he is it would seem to be. He later after tinking tried as dumb as he is, to deflect his gruesome macabre conduct, by suggesting he had learned only of the doom just prior to entering the classroom, where he immediately without thought, quickly attributed the disasters to pilot error while making a funny, while completely dismissing his concern as not even present for the loss of innocent American lives, bankers even, (then, before, and now he'd even tell you unblinking, "What?"), just like the tens of thousands as children in Afghanistan, and the terrorist crimes he advocates in Palestine, as he then pressed on to more urgent matters regarding his press op cover up. Did you see his media reaction in front of the classroom, when he heard the news for the forth time officially that morning, as again, he even admitted to actually visually witnessing some of the devastation before that moment, and that only then, had it become a serious matter to change, or not change his demeanor? Stuck he was then, with no mind to ruse, er.. time to snooze, Arg! What was the cue? Errrch... If he moves with priority interest as concerned openly honest public figure, as he knows a legitimate President would have been to first learn of such carnage, THE MONTH BEFORE IN AUGUST, why not previous before he left his Hotel room with a television? Outside the Hotel? In the motorcade? With school staff as you'd figure would have been present too laughing, no? Instead he stayed as he had been to give no orders publicly, nor attempt to make public inqiries, but to listen with such unbelievable absolute devotion, equating a beautiful child's story, as if it were Jesus from the heavens himself, speaking directly on the living Nature of our Universe... Okay, maybe we won't be able to convict him on that, but, if that isn't worth enough salt to be considered newsworthy, how about when bush said he didn't hear of the towers until he was at the school building, nixing the recorded comment reported on by John Cochrane of ABC News with Peter Jennings, that bush made a noise saying that he was importantly aware of something in NYC to speak directly on later? Or how about at the memorial, when he publicly stated it would take two whole hours to read the names of those he would without thinking, murder as innocent for Enron he told India and Pakistan in August similarly, so he would just read the titles of companies to say Grace, then would press on to more urgent matters.

"Crime is terribly revealing. Try and vary your methods as you will, your tastes, your habits, your attitude of mind, and your soul is revealed by your actions." -

Agatha Christie

--

March 11, 2002 Too many loose ends... By Barrie Zwicker

... Yet at 6:30 the evening of September 11th NBC Nightly News, along with many outlets, reported: "It was after the attack on the Pentagon that the Air Force then decided to scramble F-16s out of the DC National Guard Andrews Air Force Base to fly ... a protective cover over Washington, D.C." ...

--

quote from U.S. Attorney General Ramsey Clark in a
public letter to Kofi and company

September 20, 2002

"A military attack on Iraq is obviously criminal; completely inconsistent with urgent needs of the Peoples of the United Nations; unjustifiable on any legal or moral ground; irrational in light of the known facts; out of proportion to other existing threats of war and violence; and a dangerous adventure risking continuing conflict throughout the region and far beyond for years to come. The most careful analysis must be made as to why the world is subjected to such threats of violence by its only superpower, which could so safely and importantly lead us on the road to peace, and how the UN can avoid the human tragedy of yet another major assault on Iraq and the powerful stimulus for retaliatory terrorism it would create."

I'M LOOKING TO BUY A FEW MIDLAND RADIOS
MODEL# 70-565B, OR 70-530A, OR 70-526A&B
THE RADIOS MUST BE CAPABLE OF GOING DOWN TO THE 430 MHz PORTION OF THE BAND.
MUST HAVE MICROPHONE AND MOUNTING BRACKETS.

IF YOU HAVE ANY OF THESE RIGS, EMAIL ME WITH THE CORRESPONDING DETAILS.

THANKS IN ADVANCE

I found a site the other night that showed the location of repeaters
in Alabama but I did not save it. Can anyone help.

Howdy, all, I'm Rick Garrett, N9GSU, from Muncie, Indiana.

I used to be a regular on this NG, but got tired of all the fighting, flaming, and trolling, and haven't been back for a couple of years.

So, a couple of weeks ago, I signed on, and have lurked since then..........and have been pleasantly surprised at how this group has changed!

My main interests are APRS, rag chewing, Skywarn, and getting new folks interested in the hobby.

I look forward to being part of this group again!

By the way, whatever happened to Burt, K1OIK? Is he still around?

73, Rick N9GSU

Amateur Radio Newsline™ Report 1326 - January 10, 2003

Amateur Radio Newsline report number 1326 with a release date of Friday, January 10, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio gets two new satellites and the F-C-C tells a radio club that it wont get involved in an internal club dispute. The details on Amateur Radio Newsline report number 1326 coming your way right now.

(Billboard Cart Here)

**
HAM RADIO IN SPACE: RUBIN-2 / SAFIR-M IN ORBIT

Two new ham radio satellites are in space. One is from Germany and the other from Saudi Arabia. Q-News Graham Kemp, VK4BB, has the details has the details on a German payload called SAFIR-M:

--
Audio Only Report. No text available. Hear it in MP3 at
http://www.arnewsline.org
--

More information is available i on the SAFIR-M website http://amend.gmxhome.de But be advised that it is in the German language. There is no English translation provided. (ANS, Q-News)

**

HAM RADIO IN SPACE: SAUDISAT 1C ALSO IN ORBIT

The other new satellite is called SaudiSat 3. Its also known as SaudiSat One C and now as SO-50 - its ham radio designation.

As it name implies, this is the third in the unique SaudiSat series. It was also on board the same Russian launcher that orbited SAFIR-M.

Accordiing to AMSAT North America, this latest bird in the SaudiSat series comes by way of the Space Research Institute of the King Abdulaziz City for Science and Technology. For ham radio operation it carries what amounts to closed but available on-demand cross-band F-M repeater. The input uplink is on 145.85 MHz. The output channel is 436.775 at 250 milliwats into a quarter wave antenna.

And like a growing number of terrestrial repeaters, this orbital one requitres use of an access tone. In the case of SaudiSat, that tone frequency is 67.0 Hertz.

And there is one other similarity to closed terrestrial repeaters. SaudiSat-1C also requires that a designated control operator activate it on each pass so that it can be used by the general ham radio community. (ANS)

**

THE 5 MEGS EXPERIMENT: ARRL SAYS ITS WAITING FOR A NEW BAND

The ARRL is out of the 5 Mhz experiment and is now hoping for for the creation of a new ham band. Amateur Radio Nerwsline’s Norm Seeley, KI7UP, has the rest of the story:

--

The ARRL has permitted its WA2XSY experimental license for 5 Mhz to expire on January 1st. The League says that it is now pinning its hopes on the FCC to establish a new ham band in that spectrum but admits that it is facing some stiff opposition.

An ARRL bulletin says that starting in January 1999, 15 Amateur Radio clubs and individual hams took part in the 5-Mhz experimental operation that basically concluded in 2002. Through these operations the ARRL says that it obtained sufficient information to justify its petition for creation of the new band.

Last May, the FCC proposed going along with the ARRL's request to create a new domestic secondary High Frequency allocation from 5.25 to 5.4 Mhz. But in August the National Telecommunications and Information Administration requested that the Commission not go forward with the proposal. The NTIA says that several government agencies with allocations in the proposed spectrum had expressed reservations about sharing the spectrum with hams.

But the ARRL is still very hopeful the new band can be created. In fact, it has been working with the government to resolve the impasse. Meantime, the FCC has yet to act on the 5 Mhz request.

For the Amateur Radio Newsline, I’m, Norm Seeley, KI7UP.

--

The ARRL says that the new allocation at 5 MHz is an urgent priority for Amateur Radfo. It says such an allocation would enhance emergency communication activities by filling a propagation gap that exists between the 80 and 40 meter bands. In the meantime, experimental operations on 5 MHz continue on a limited basis in the United Kingdom and in Canada. (ARRL)

**

RESCUE RADIO FOLLOW-UP: THE GUAM SUPER TYPHOON

Guam continues to recover from the super typhoon which hit last month. Amateur Radio Newsline’s David Black, KB4KCH, has the latest:

--

By far, the best source of information during and after the December 8th super typhoon that hit Guam has been Duncan Campbell, KF6ILA. Campbell lived through the storm and reported on it and the welfare of Guam's ham radio community through his postings to the QRZ.om website. In his latest report Campbell says that the focus has shifted to recovery from the giant storm.

Campbell says that utility services are slowly being restored. As his report was filed about 30 percent of the island had both electricity and water. He says that the electrical restoration is hampered by a lack of transformers on the island. A shipment is expected shortly.

More signs of recovery Schools were slated to re-open on January 6th. Three schools which are too damaged to reopen. These students will be bused to other schools which are open.

As to ham radio on the island. As reported earlier all of Guam's radio amateurs are safe. There was s damage to some homes due to windows being blown out but no homes were destroyed. And two members of the Marianas Amateur Radio Club radio reportedly rode out the storm in their boat moored in the harbor.

Campbell says that a pair of Guam's more senior hams were not able to get their antennas down in time. He explains that the younger operators usually take care of them before a typhoon when there is notice. This time the typhoon was being reported as missing Guam by 100 miles up to 12 hours prior to landfall. So their antennas were still up when the typhoon hit. Needless to say the antennas and towers were destroyed.

Having talked to these two, Campbell reports that they do not know when, if ever, they will be able to replace their antennas. But help may be on the way. The Marianas Amateur Radio Club is already in discussions to install some wire dipoles for the high frequencies and some copper J-Poles for 2 meters at their homes.

Finally, Campbell says that the Red Cross, Salvation Army and FEMA are doing an outstanding job here on the island. Though he hears that the national news outlets are not covering this disaster, he wants the world of Amateur Radio to know that Guam is not being neglected..

For the Amateur Radio Newsline, I'm David Black, KB4KCH.

--

According to Campbell, the Army field hospitals he reported having been flown in have now shut down and the medical professionals have now returned home. The hospitals have been stabilized with power and water, and the damage occurred has been patched, though final repairs are still months away.
(KF6ILA, ARNewsline™)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W5MCC New Orleans VHF Club 2 meter net heard Monday nights on their 146.86 MHz repeater.

(5 sec pause here)

**

ENFORCEMENT: ITS NOT OUR BUSINESS

If you are having a personal disagreement with a member of your radio club, don't bring it to the FCC. That's the message sent by the regulatory agency to a Texas group where it says that it will not iget involved. The agency's Daryl Duckworth, N-N-Zero-W, explains:

--

Duckworth:"The complaint of the Texas Soputhmost Amateur Radio Club concerning actions by a former trustee was dismissed. The club was told that the matter was Civil and best handled by the local courts."

--

By way of background in January of 2002 the San Benito, Texas, based filed a complaint with the FCC. It requested that the Commission issue a Cease and Desist Order to Thomas A. Tanner directing him to stop unauthorized operation of the club repeater. It also wanted him to remove his personal equipment from club property and discontinue unauthorized use of other club equipment.

But says the FCC says that setteling what amounts to interpersonal disputes is not within is jurisdiction or purview. Rather its a civil matter and not one that the Commission does not plan to pursue any further. (FCC, RAIN)

**

ENFORCEMENT: NO MUSIC ON 2 METERS

The FCC has told an California ham that he could face some strong punitive action. This, following allegations that he transmitted music in the two meter band.

The warning comes in a December 12th letter to Mark T. Sprague, KF6WAF of Antioch. In it the regulatory agency says that monitoring information indicates that on numerous occasions in October and November of 2002 that Sprague transmitted music on 146.415 MHz simplex and also failed to properly identify his station. The FCC says that direction finding bearings led them directly to Sprague's home.

The agency tells Sprague that these charges are violations of Sections 97.113 and 97.119 of the Amateur Service Rules. It adds that he could be subject to license revocation and suspension proceedings, as well as a monetary forfeiture or fine. (FCC)

**

ENFORCEMENT: STAY OFF 20 METERS

One last chance to straighten out your act or we we act against your ham license. Thats the jist of a warning from the FCC to a Michigan ham. Amateur Radio Newsline's Mert Garlick, N6AWE, takes an in-deoth look:

--

The threat of stern enforcement action comes in the form of a letter to to Michael E. Guernsey Sr., ND8V, of Parchment Michigan. Its from FCC rules enforcer Riley Hollingsworth, K4ZDH. In it, Hollingsworth says that his agency continues to receive complaints of Guernsey's alleged appropriation of certain frequencies and interference to certain operators who attempt to use them. Among the frequencies mentioned in Hollingsworth's letter are 14.262 and 14.275 Mhz - both in the 20 meter band.

And the FCC notes that this is not the first time that it has taken up enforcement issues to Guernsey. Hollingsworth letter reminds ND8V that the agency has contacted him before regarding such incidents. Specifically on November 14, 2000 and May 20, 2002. And after the November 2000 incident Guernsey's authority to operate below 30 MHz was removed for a period of nine months.

And says Hollingsworth, he is not going to warn Guernsey again. He tells ND8V that if it writes to him another time it will be to notify him that the FCC is taking punitive action. Hollingsworth says that future incidents of such operation -- even a single incident -- will result in a fine being issued and revocation proceedings against Guernsey's ham radio license being initiated. That says the FCC, is the way that it is.

For the Amateur Radio Newsline, I'm Mert Garlick, N6AWE.

--

Meantime, Hollingsworth has taken one step to defuse the overall problem. He has told Guernsey to stay off of the 20 Meter Amateur Band until the issues surrounding the allegations of his operation are resolved. (FCC)

**

ENFORCEMENT: HAM JAILED FOR SPYING STILL HOLDS HAM TICKET

A ham who is serving a life sentence for espionage still has his ticket. This even though he will probably never be permitted near a piece of ham gear again. Amateur Radio Newsline's Kenn Locke, N8PJN,   tells us why:

--

Remember Robert Hanssen the former F-B-I agent convicted last year of spying? If you do, you will also recall that he held the Amateur Radio service call sign K-9-Q-V-L.

Well guess what. He still does.

Contrary to what many hams thought would happen, the FCC has not acted to revoke his Amateur Service licenses. The reason? Most likely nobody has bothered to ask it to.

While Hanssen may have been one of the highest profile cases in 2002, the charges against him did not involve prosecution by the FCC. It was a matter for the Department of Justice and Federal Prosecutors. As such, its very unlikely that anyone in either agency sat down to write a letter to their counterparts at the FCC asking them to cancel Hanssen’s ham radio license.

The bottom line: Unless someone files a formal request, the chances are that Robert P. Hanssen will remain as K9QVL until his ticket expires. Maybe longer if he decides to try to renew it from his cell in the Federal Penitentiary where he will probably live out the rest of his natural life.

For the Amateur Radio Newsline, I’m Ken Locke, N8PJN.

--

Thanks Ken. (ARNewsline™)

**

REPEATER LISTINGS: ARRL SEEKS REPEATER LISTINGS FROM COORDINATORS

This note to frequency coordinators. The deadline for this year's submissions of listing for the 2003 ARRL Repeater Directory is Friday, February 7, 2003. As has been the case for many years, the ARRL only accepts listings from recognized frequency coordinators unless no coordinator exists in a specific region. For more information on how to list repeaters please contact Brennan Price, N4QX, at ARRL headquarters. His e-mail is n4qx@arrl.org. (Repeater Owners Remailer)

**

ARRL: LICENSE RENEWAL AND OTHER SERVICES TO NONMEMBERS

The ARRL is now providing F-C-C Amateur Radio license renewals, address changes and other license modification services to nonmembers. For a $12 fee, the League will renew a nonmember's Amateur Radio ticket within 90 days of expiration, file an application to change address or name or request issuance of a new sequential call sign.

For several years, the ARRL has been handling renewals, address and name changes and modifications free of charge for members. Nommembers were directed to the FCC's free Internet or hard-copy application options or to other providers of such services. (ARRL)

**

GOOD INFORMATION SOURCE: NEW RFR WEB SITE

Our friends over at the CGC Communicator report that RF Safety Solutions has a new web site dealing with that very subject.

As its name implies, RF Safety Solutions is a company that provides consulting for those concerned with human exposure to RF signals. It was founded in 2002 by Richard Strickland who is a well-known expert in the field of RF safety and who has developed RF safety programs and conducted training for a number of major wireless communications companies and broadcasters

The RF Safety Solutions web site covers RF safety reporting, safety programs and training. There is also a good overview of what RF radiation really is. Its really one of the best thought out places to learn about R-F safety. Look for it in cyberspace at www.rfsafetysolutions.com. (CGC)

**

NAMES IN THE NEWS: CHANGES AT THE CGC COMMUNICATOR

And speaking about the CGC Communicator, word of a major change at that broadcast industry publication. Editor - Publisher Bob Gonsett, W6VR, has announced that Steve Blodgett, W7RNA,
has assumed the helm as Letters Editor.

Formerlly WA7GFV, Steve Blodgett is well known to broadcasters nationwide. He holds an Adcanced class Amateur Radio license and has been actively engaged in broadcasting operations and engineering for nearly 35 years, with stations in Montana, Arizona, and California. For 14 years he worked as the Chief Engineer and Radio Engineering Manager with the late Gene Autry’s Golden West Broadcasters in Los Angeles. He also used to operate an on-line bullrtin board for Chapter 47 of the Society of Broadcast Engineers and served as chairman of the Southern California Frequency Coordinating Committe. Thats the group which handles broasdcast remote pick-up recommendations.

In making the announcement, Gonsett says that having Blodgett on board will allow him more time to concentrate on CGC's consultant radio engineering practice along with frequency and spectral monitoring services. It will also permit W6VR time to to pursue a number of new opportunities as well. (CGC)

**

FREE STUFF: WABA DIRECTORY ON THWE WEB

The Diamond DX Club reports that the new WABA or Worked Antarctic Bases Award Directory for 2003 is now available for free downloading. Its in Portable Document Format on the club's web site at www.ddxc.net. The new version includes a 12-page revised Antarctic bases listing with the latest corrections and a new column for Islands on the Air reference numbers. It also sports a a new section containing historical notes. Again that URL is www.ddxc.net. (Diamond DX Club)

**

BREAK 2

CHANGING OF THE GUARD: GRONK RADIO NETWORK FOUNDEER - SK

One of the pioneers of repeater interlinking has died. This, with word that Gary Belda, K6ENS, has become a silent key

According to a report from Bruce and Melanie Forestal -- thats WB6ARE and K5QQA -- Gary Belda was one of the principals behind the Gronk Radio Network. Gronk is one of the oldest 440 intertied remote base systems in the South-Westen United States and stretches the most of the Calidornia coastline.

As one of its archetects, Gary Belda among the berst liked hams in the world of F-M and repeaters.   He worked in the two-way radio industry for Advanced Electronics for many years before leaving to join the field of traffic control systems. He was an expert in the aera of two-way radio and always willing to lend a hand on a ham radio repeater project.

Belda died in whats described as an unfortunate accident possibly related to antenna work. No other details are available at this time. A memorial service was held for him on Thursday, January 9th, at the First United Methodist Church in Redondo Beach California. (W6KGB)

**

ON THE AIR: COMMEMORATING HISTORY

History is coming to the ham bands. This, with word from UT5UKY that special event station EM60USB will be active from January 23rd through February 2nd to commemorate the 60th anniversary of the Battle of Stalingrad.

The Battle of Stalingrad was one of the decisive World War II Russian victories. It stopped the German army’s southern advance and turned the tide of the war.

Now, 60 years later, ham radio will be an integral part of the commemoration of that historic event. And if you get to work EM6-0USB you are advised to QSL to UT5UKY either direct, or through the bureau. (UT5UKY)

**

INTERNATIONAL-CHINA: RADIO MAG LIFT TRAIN RUNS JAN 1

The world's first magnetic levitation or mag-lift passenger train began running in Shanghai China on January 1st. The radio controlled train reached 312 miles per hour in testing. In regular service it will carry passengers and freight at a top speed above 250 miles per hour between Pudong International Airport and Shanghai's financial district. The distance is 30 miles an the trip will take mere 7 minutes -- not even enough time to make a quick cell phone call. (Technology Online)

**

PROPAGATON ASSISTANCE: C6AFP BEACON MOVING

Steve Rutledge, N4JQQ, says that he plans to move the C6AFP beacon on 50.062 Mhz in the near future. It is currently located at Treasure Cay, Great Abaco, Bahamas in grid FL-16. It will be going to a new home on Green Turtle Cay, Bahamas which is about five miles away. This is another island, same grid. C6AGN has agreed to let Steve put the beacon up at his QTH. (VHF Reflector)

**

CONTESTING: LINDHOLM TO CQ WWW VHF CONTEST

Turning to on the air operations. Word that John Lindholm, W1XX is the new Director for the CQ World Wide VHF Contest. Lindholm replaces Gene Zimmerman, W3ZZ, who left to take over writing the World Above 50 Mhz column for QST magazine. (VHF Reflector)

**

DX

In DX, DK9GG and DJ4KW will be active as V31GW and V31YN from Belize until February 25th. On February 8th they will be joined by DL2SWW and DG2TM. The four plan to operate from NA-073 on the 21st through the 23rd of February. QSL direct to each operators home call. (DL2VFR)

And K9YNF reports that he will be active as K9YNF slash HR9 from Roatan Island. This, from January 11th to the 18th. He will operate SSB only on 14.260, 18.128, 24.950, 28.460 and 28.560 Mhz. This, plus or minus a kew kilohertz to compensate for any Q-R-M. QSL via his home call -- either direct or via the bureau. (425 DX)

**

THAT FINAL ITEM: DOGGIE TALK AND THE IG NOBEL AWARDS

And finally this week, word that an inter-species communications device has received special recognition. Amateur Radio Newsline’s producer Bill Pasternak, WA6ITF, has more:

--
No, we are not kidding. An inter-species communications apparatus -- as in a dog-to-person translator -- is one of the winners of the 2002 Ig Nobel Awards.

What are the Ig Noble awards you ask? They are a spoof of the famed Nobel Awards ceremony and are given annually at Harvard University to recognize achievements that cannot or should not ever be reproduced.

Winners are selected by a secret committee from thousands of nominations. Actual Nobel Laureates present the Ig Nobel’s at a ceremony where the winners are hailed with cheers and a flurry of paper airplanes. And if a recipient feels insulted or slighted by the award, it is withdrawn.

For 2002 those victorious included the people behind the definitive study on bellybutton lint and an inquiry into what arouses ostriches. But by far the dog to person translator was one of the most popular. Its works by listening to the tone of a dog's bark converting that data into an interpretation of the dogs mood.

The device is already on the market in Japan. An English language version called Bow-Wow-Lingual -- nope -- we are now kidding -- Bow-Wow-Lingual -- It may be on the market here in the U-S-A in about a year. And we thought that you’d want to know.

For the Amateur Radio Newsline, with my dog Daisy, I’m Bill Pasternak, WA6ITF.

--

Hmmmm. If it happens, we wonder what breed will be honored with an Ig Nobel for being the first to dog to get a ham radio license and make DXCC.

More about the Ig Nobel awards is in cyberspace at http://www.improb.com/ig/ig-top.html (Science Frontiers)

A licensed ham is required to transmit their call sign every ten
minutes, and is responsible for interference with other people. Most
have some awareness of detecting and eliminating RF interference.

It is also possible (maybe even likely) that this is not a ham, but a
CB operator using massively illegal power, which is emitting lots of
extra RF noise all over the spectrum. Many people with no knowledge of
electronics get into CB, and try to have the biggest illegal
amplifier. They have made the use of CB nearly impossible for the many
legitimate CB operators.

As a general rule, hams do not like being confused with CB operators.

You can contact the local office of the FCC, whatever they are
operating, and they can follow up with seizure of equipment and

```
serious fines, which might hurt them more than an ass whuppin, without
the legal consequences for you.

I really think this is a troll, ...but what the Hell.

From a legal stand point, you're pretty much stuck. The amp
manufacturer didn't do a good enough job bypassing the inputs and
outputs. I have a Fender Super Twin Reverb and it sets within 5 feet
of a 1500 watt RF amp. None of the stuff in here bothers it a bit.

Now as to the whuppin...you might get some temporary satisfaction, but
he/she will get the satisfaction of a monetary award and the thought
of your missing all those gigs while doing time for assault. <:-))

Just wait till you get a wireless network and someone goes on the air
running power on 2.3 Gigs next door.

Yuse electronic reverb instead of that stupid old tank reverb with springs.

Parliament.

This is an interesting idea, but would play havoc with existing allocations and band plans, many of which are part of internationally negotiated agreements.

For example, your proposal puts a new service right in the middle of the existing 2M amateur band in the US, Canada, and many other countries (144-148 mHz), which is different than the European 2M band of 144-146 mHz.

I don't have the entire list of allocations for Europe, but presumably there are already some radio services in the 146-148 range other than Ham or CB operation.

It takes many years to change these allocations even slightly, and involves government radio agencies, military forces, amateur radio organizations, commercial broadcasters, other commercial bandwidth users, etc. It's not that big a spectrum.

It also means that manufacturers would have to decide whether to make a unit which can only be sold to a limited market, as opposed to something that can be sold world-wide with minor firmware modifications.

We have something similar to that here in the states. It is MURS.

I have a group of Boy Scouts coming by next Thursday in the 5-5:30PM timeframe, for a demonstration of Amateur Radio. Any chance of getting one or more fellow hams to come up on 10 Meters for a quick demonstration? It would be much more interesting than just getting a 2 Meter sched. Anything closer than "5 Land" might be too close. If you are available during that time period, please drop a "direct" email. Thanks.

Our neighbors have an ongoing war with us for reasons that don't even make sense and aren't relevant here. Lately we have been having problems with our cordless phones. When we talk on the phone, we sometimes get loud clicking sounds that interfere with the conversation. The clicks are irregular and sound like someone keying in on a walkie-talkie but not saying anything. Last night, I was speaking to my father and the clicking began. When I mentioned that I wondered if my neighbor was somehow interfering with our phones and what a low-life I thought he was, the clicking suddenly increased in speed and volume to the point I had to hang up and call on a corded phone, after which I had no further problems. This tends to confirm my suspicions that the neighbors are behind the problem.

I've been told my neighbor has a scanner. I understand anyone can listen in on cordless phones using a scanner, but I don't understand how he could make the clicking sounds. Could you use the scanner to make the clicking sounds? I see no antenna for a ham radio. Could some other type of 900 mHz device, like a baby monitor, be tuned in so it would interfere with our phones? We are both on a "zero lot line" lot, which means the houses are only about 12' apart, so it wouldn't take much transmission power. If they are so bored that they want to listen to our conversations, I guess there is nothing I can do but switch to corded phones. However, interfering with my calls is really annoying. Is there any way to fight back?

Anyone have any ideas?

If you have an older/cheaper analog phone, regardless of frequency, they could monitor you and potentially interfere with you. Most common are the low band 46-49 Mhza phones, but 900 Mhz and even 2.4 Ghz analogs phones were made, which are not secure. Assuming you still want to use a cordless phone, best fix is to get a digital spread spectrum phone (might be called DSS, DSSS, etc.). These are available at WalMart, Home Depot, etc., and their prices have really dropped. They are fairly immune from interference, and to monitor them takes expensive equipment and some technical know-how. Good luck

Hi,
I bought a couple of these frs radios for my family who the rest are
not hams to run around with. When I turned the ctcss codes off, the
auto squelch does not kick in.  Does anyone know if there is a way to
up the squelch through either a keypad sequence or making an
adjustment on the board or maybe have a schematic? Reason that I ask
this is that I also have a couple of Motorolas that do not support
ctcss.

Well, I finally took the time to study for my technician license and I'll be taking the test tomorrow. If all goes well I should have my license sometime soon, which brings up the question of what radio I should purchase. I was hoping someone could help me out.

I live in an apartment, and while I do have access to the roof I doubt the landlord would appreciate a large antenna, I'm also planning on moving in the next year so I'm not that thrilled about spending a lot of time and money on a large installation. A small antenna would be OK though.

Since I drive around the San Francisco Bay Area quite a bit I'm thinking of starting out with a HT to use both at home and while travelling, I've been looking at the Kenwood TH-F6A in particular. I was hoping someone could give me some advice, would this be an OK first radio, in particular would it work well in a car (perhaps with a roof mounted magnetic antenna.) Also, what about at home? Would it work at all from inside without an external antenna? What about with an external antenna of some type?

I've also heard about devices that increase the power of HTs, can anyone give me sone advice on what I could do in this regard?

So my soon to be fellow hams, am I on the right track? Any advice before I shell out a bunch of cash would be greatly appreciated.

Thanks,
--alex

I would investigate a mobile rig for several reasons..
1. Much more power
2. Can use as a base rig as well
3. You will make many more contacts mobile with a mobile rig than a HT.
The antennas are not big and you should be able to use one that is not obvious

on an apt roof.

HAM Radio / Club-TV
Parabolic sponsors an upcoming monthly HAM TV magazine from Club-TV via Satellite

Test transmission February 9 2003 at 0900 UTC on Astra 1A. Frequency and pol. will be announced here later on.

The broadcasts will be announced here and they can be received off Astra 1A or Sirius 2 on 5 degrees East. In most parts of Northern Europe you will need a 1m Parabolic dish and a Universal LNB. Further out you need a slightly larger antenna.
We transmit SCPC SR 6667 FEC 1/2 Vpid 4130 Apid 4131 PCR 4130.

We ask for contribution of home made videos of reasonable quality showing any amateur radio activities. Please contact us if you have something to show all of Europe.

Amateur Radio Newsline™ Report 1327 – January 17, 2003

Amateur Radio Newsline report number 1327 with a release date of Friday, January 17, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Australian telecommunications regulators oppose the Amateur Radio fix for 40 meters and hams on Fiji provide aid in the wake of cyclone Ami. These stories are first on Amateur Radio Newsline report number 1327 coming your way right now!

(Billboard Cart Here)

**

SPECTRUM ISSUES: AUSTRALIAN REGULATORS FAVOR 40 METER STATUS QUO

A disagreement over the future of the 40 meter band between Australia’s national amateur radio society and that nations telecommunications regulators. The Australian Communications Authority -- the A.C.A. favors the status quo. The Wireless Institute of Australia says its time for a change. From Brisbane, Q-News Graham Kemp, VK4BB, picks up the story:

--

The 7 MHz issue. Currently A.C.A. is against the motion at WRC 2003 -- which is of course at variance with the current allocation in Australia. At present the A.C.A. are steadfast in their opposition to the motion notwithstanding numerous attempts at lobbying them. The WIA position is in support of the IARU motion and WIA will continue to lobby A.C.A. to support the full 300 kHz allocation at 7 MHz on a world wide basis.

WIA President Ernie has asked: "If anyone can think of any additional justification that we can provide to A.C.A. to make them change their minds please let the A.C.A. Liaison Committee know and we will try and push the matter with A.C.A. again".

--

What impact the A.C.A.’s stand will have on the outcome of WRC 2003 cannot be assessed at this time.

**

RESCUE RADIO: CYCLONE AMI HITS FIJI

A Cyclone named Ami has torn across parts of Fiji, destroying homes and unleashing floods across northern islands. And it appears that once aghain, Amateur Radio has come to the rescue, It all happened on January 14th. Amateur Radio Newsline's Jim Meachen, ZL2BHF, has what we know so far.

--

Packing sustained winds in excess of 90 miles per hour and gusts of 125 miles an hour, the Cyclone Ami whipped up mountainous seas, cut communications and left the tourist hub of Labasa, on the main northern island of Vanua Levu, under four feet of water. All normal lines of communications with Vanua Levu were cut at about 17:00 GMT as the storm approached. Vanua Levu is where a quarter of Fiji's 800,000 people live.

According to news reports, emergency officials did manage to restore partial communications with Labasa and the town of Savusavu late on Tuesday using Amateur Radios circuits. Over them they learned that Labasa was under four feet of water after a nearby river overfload its banks. Also that there had been extensive damage throughout the area.

But even these communications efforts were hampered by extensive flooding. Also, the extent of the involvement of hams is still unclear since news reports did not give the names or call signs of the operators handling the emergency operations.

Here in New Zealand the government has already sent an air force surveillance plane to assess damage. Another aircraft was scheduled to arrive in Fiji the same day and, carrying aid experts and some relief supplies.

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, reporting from Auckland, New Zealand.

--

The cyclone is the second to hit the South Pacific in as many weeks. Thousands of inhabitants of a remote part of the Solomon Islands chain northwest of Fiji survived powerful Cyclone Zoe, which hammered the area with 190 mph winds.

**

RESCUE RADIO: HAMS AID IN WAKE OF TYPHOON ZOE

And speaking of Cyclone Zoe, ham radio is helping in recovery efforts following that storm after it hit the Solomon Islands a few weeks ago. Jeramy Boot, G4NJH, is in Nottingham England has more:

--

Students and graduates of the Solomon Islands Amateur Radio Training School have been on the air from the capital Honiara in the wake of Cyclone Zoe.

The storm hit the islands of Tikopia and Anuta in the Solomon's remote Temotu Province last week. The amateurs are volunteers at the National Disaster Management Organisation and are providing assistance to the staff of three at NDMO HQ during the current state of disaster in the Solomons.

Using donated equipment received last year fromoverseas amateurs and CB operators, the first on the air was Moffet, H44MD. He was told that three 100-watt HF transceivers were donated by an American amateur and sent by air mail three weeks before the cyclone.

--

As we go to air, reports say that the Solomon Island radio school graduates are still providing post cyclone aid. (GB2RS)

**

COMMUNICATIONS LAW: BIG BROADCAST TOWER WIN IN NH

Back here in the United States, a big tower case win for a broadcaster could have a trickle-down effedt for ham radio. This, after the New Hampshire Supreme Court has rejectes a city's zoning ordinance limiting the height of new communication towers to 42 feet. It says that regulation conflicts with federal law.

The ruling clears the way for Koor Communication Inc. to obtain local construction permits to begin constructing broadcast towers for WQTH-AM in Lebanon, New Hampshire. According to Radio World Online, Koor Communications first filed for variances to the ordinance in 1999 seeking to construct four antennas to the height of 266 feet in accordance with its FCC license and Construction Permit. The broadcaster's attorneys argued that Lebanon's restrictions effectively prohibited the construction of new radio stations.

Koor Communication lost several lower court decisions. This lead to the appeal to the state's highest court. That court has now said the lower court findings were incorrect and it reversed their rulings. (CGC Commuinicator, RW-ONLINE)

**

ARRL: BOARD IS MEETING

The American Radio Relay League’s Board of Directors is holding its first meeting of 2003 as this newscast goes to air. For a full wrap-up on what actions the Diirectors might take, go to the news pages on the ARRL website. Its easy to find at www.arrl.org. (ARRL)

**

ENFORCEMENT: HAM JAILED FOR SPYING FOLLOW-UP

Two interesting follow-ups to last weeks story on convicted spy Robert Hanssen, K9QVL. The first came in a note from the FCC which takes issue with our account.

It says and we quote: "the assertion that we need a complaint to pull Hansen's ticket or anyone else's ticket is dead wrong." Endquote.

But thats all the spokesman says. No other information was provided.

The other item is even more interesting. After the story ran, we began getting reports that Hanssen's call had been deleted. We went over and checked the FCC's database. It was still there. It was also on the Buckmaster websire, but ther was a surrprise when you inputted the K9QVL call over on QRZ.com. It came back stating that the K9QVL listing was no longer in the QRZed database. (ARNewsline™)

**

ENFORCEMENT: FCC RESCINDS ND8V WARNING LETTER

The FCC has canceled its recent warning letter issued to Michael Gurnsey, ND8V, and has told the Parchment Michigan ham he can resume operation on the 20 meter band.

As reported last week, the agency's Riley Hollingswoth, K4ZDH, had written a very sternly worded letter to Gurnsey. It stated that it would initiate stern punitive action against him if it received any more complaints that he was appropriating certain frequencies on the 20 meter band. It also told him to stay off 2o meters until the issue could be resolved.

But on January 3rd the Hollingsworth wrote to ND8V once again. This time it told Gurnsey that he could disregard the warning letter and resume 20 meter operation. It also went on to thank him for his cooperation in resolving the matter. No further information was provided by the FCC. (FCC)

**

ENFORCEMENT: NY HAM FACING REVOCATION

The FCC has written to a New York city area ham telling him he may face license revocation proceedings. The Commission's Daryl Duckworth, NN0W, explains:

--

Duckworth: "A Warning Notice and Notice of Intention to Designate a Revocation and Suspension Proceeding was issued to Alexander Sandbrand N2NNU for operation outside of his Technician class priveleges on numerous occasions

and after warnings."
--

Sandbrand lives in Yonkers New York. That's a few miles due North of Manhattan. Back on August 17th of 2001 the FCC issued Sabndbrand a first Warning Notice regarding operation outside of his license privileges. The Commission says it now has information indicating that at least nine times since his receipt of that initial warning that Sandbrand operated out of band.

And in a related item, the ARRL Letter reports that Sandbrand called FCC rulers enforcer Riley Hollingsworth after receiving the first Warning Notice. He reportedly complained that it wasn't fair that he had to pass additional examination elements to operate on High Frequency phone. Hollingsworth supposedly told Sandbrand that if he wants to operate on H-F, he has to take the test like everybody else. (FCC, ARRL Letter)

**

RADIO LAW: TEEN ARRESTED AND CHARGED IN DIREC TV CASE

A 19-year-old college has been taken into custody on charges that he pilfered information about a new security system used by satellite broadcaster Direc TV and distributed it over the Internet. FBI agents in Los Angeles say that they arrested Igor Serebryany and have charged him with stealing information related to DirecTV's latest access cards. These are the access cards Direc TV uses to regulate what services its subscribers will receive.

According to several news reports, Serebryany who is identified as a University of Chicago student, allegedly took the information from a Los Angeles area law firm that was doing legal work for Direc TV. He ithen is supposed to have distributed it to web sites dedicated to the hacking of DirecTV's security systems.

According to the criminal complaint against Serebryany, DirecTV spent more than $25 million developing the high security "Period 4" card. This, after the three previous versions had been successfully hacked by pirates. Serebryany faces up to 10 years in prison, a fine, or both, if convicted. (Published news reports)

**

RADIO LAW: FCC SIMPLIFIES FILING PROCEEDURES WITH ECFS EXPRESS

The Federal Communications Commission has launched ECFS Express. This is a simplified version of its Electronic Comment Filing System or ECFS.

According to an FCC news release, ECFS Express is designed specifically with the consumer in mind. The FCC claims that it is easy to use, focuses on topics rather than docket numbers, and requires minimal input by consumers seeking to participate in the Commission's public rulemaking process.   People wishing to comment simply click on a topic, fill in their personal information, write their comments and hit "send."

To access ECFS Express, users need only click on the “File Comments” logo found on the front page of the FCC’s Web site at www.fcc.gov The original version of the Electronic Comment Filing System, which includes all docketed Commission proceedings is still at the FCC website as well. (FCC)

**

COMMUNICATIONS LAW: A WARNING TO DOMAIN NAME SELLERS

A warning to Internet domain-name sellers. Keep better track of your customers or Congress will be forced to step in.

The warning comes from California Representative Howard Berman. He claims that domain-name sellers have an obligation to keep accurate records of their customers to ensure they can be contacted if they are improperly using trademarked names or engaging in other illegal activity.

According to Berman. Internet users must provide a contact name, address and other information when they buy a domain name. But the Congressman says that few name sellers run checks to make sure that the contact information is accurate. Berman says that this lax oversight allows scam artists and cybersquatters looking to sell domain names to their rightful owners or others to hide their true identities. This he says, provides a barrier for law-enforcement officials investigating such crimes.

Berman says that he would like to see all the top-level domains start to implement these types of checks on their systems. He also warns that if self regulation does not work that Congress may have to step in. (Published news reports)

**

CONVENTIONS AND HAMFESTS: VIENNA VIRGINIA IN FEBRUARY

Turning to the hamfest and convenbtion scene, if you are in or near Vienna Virginia on Sunday, February 23rd, 2003, then plan to stop by the Vienna Wireless Society’s 27th annual Winterfest. The venue is the Northern Virginia Community College in Annandale. Look for lots of equipment along with helpful information on how to get started in the hobby. More information is in cyberspace at www.viennawireless.org (KG4OJT)

**

CONVENTIONS AND HAMFESTS: HAM-EX 2003 CANADA IN MARCH

A bit to the North, the Ham-Ex 2003 exposition is slated for March 22nd at the Brampton Fall Fairgrounds in Brampton, Ontario, Canada. Sponsored jointly by the Peel and Mississauga amasteur radio clubs the March 22nd event will feature manufacturers displays, equipment vendors, Canadian ham radio exams and everything that goes into a great hamferst or convention including a gala banquet and lots of prizes. For more information please visit the shows website. Its in cybersace at www.peelarc.org (press release)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE WAR ON TERRORISM: NYC REBUILDS WITH A NEW TV TOWER IN NEW JERSEY

A broadcast tower almost a half mile high to replace the structure lost when terrorists felled New York’s World Trade Center could rise across the Hudson river in New Jersey. This, as an alliance made up of eleven broadcasters release a report as to why they favor proposed site in Bayonne over one in Jersey City. Amateur Radio Newsline’s Bruce Tennant, K6PZW, has more:

--
In a 17-page letter to New Jersey's environmental commissioner, the broadcasting alliance says the new tower would restore quality television reception for about three quarters of a million people in the metropolitan area. This is especially important to the regions poor and elderly who cannot afford to pay for cable or satellite reception. And the alliance called the Bayonne site far superior in terms of size, security, environmental concerns, cost and construction timetables.

And the groups president, Edward Grebow said the $200 million project would also be a boon to construction workers in the region. He also noted that the city of Bayonne wants to make the tower a central element in plan to transform the location into an area of offices, homes, stores and marinas. In addition to its television antenna system, the alliance suggests that the structure might also be used for scientific studies. This could include long term investigations into weather, climate and air pollution.

If constructed the new tower would not only become the world's tallest free-standing structure. It would also be the worlds tallest broadcast tower built at near sea level. For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, reporting.
--

While New Jersey has the support of the regions broadcasts, other locations are still believed to be under consideration by local politicians and community leaders. (ARNewsline™ from listener reports)

**

EMERGING TECHNOLOGY: GENERATING ELECTRICITY WITH HOT AIR

Meantime, another would-be tallest man-made structure could soon be towering over the Australian outback. This, as part of a plan to capitalize on the global push for greater use of renewable energy.

By 2006, the Australian power company EnviroMission Ltd hopes to build a 3,300 foot high solar tower in southwest New South Wales state. The 200 megawatt solar generating station will cost nearly $563 million dallars to build and will be the width to a football field.

The technology behind its operation is very simple. The sun heats air under the tower's glass roof. As the hot air rises, a powerful updraft is also created by the tower that allows air to be continually sucked through 32 turbines, which spin to generate power.

EnviroMission hopes to begin construction on the solar tower before the end of the year. It says that it plans on generating enough electricity to supply 200,000 homes around the beginning of 2006.

Currently, the world's tallest free-standing structure is the Canadian National Tower in Toronto. Its about 1650 feet high. (W8HDU)

**

CHANGING OF THE GUARD: DON MACKAY, ZL3RW - S.K.

The changing of the guard in Amateur Radio continues. This, with word that NZART Honorary Life Member and Past President Don Mackay, ZL3RW has passed away.

MacKay died at his home in Christchurch on January 14th after a long illness. Among his many accomplishments was his work in the introduction of Amateur service repeaters to New Zealand. This, at a time when that nations Post Office was opposed to such operation.

ZL3RW used his experience in emergency communications to sway the agencys decision in favor of permitting repeater operation. For many years it was this aspect of Amateur Radio that ensured their continuation.

Don MacKay is survived by his sister Margaret. A service in celebration of his life was held Saturday January 18th in the city of Christchurch. (NZART)

**

HAM RADIO IN SPACE: NO PACKET TO THE ISS

Packet users are being requested to not send e-mail messages to the all ham crew on board the International Space Station at this time. This, according to the AMSAT News Sercice which reports that they are not answering e-mail, and are realkly not expected to do so in the near future. No specific reason was given, but according to news reopprts the current all ham crew is very busy with many non ham radio related on-orbit duties. (ARISS)

**

HAM RADIO IN SPACE: ISS ALABAMA EXHIBIT FEATURES HAM RADIO

Ham radio will play a part as the City of Mobile, Alabama is hosts a four month exhibit of the International Space Station. This at the new Science Exploreum building.

The exhibit consists of a full scale mockup of the main parts of the ISS along with other aspects of living and working in space. According to N4UXY the Mobile Amateur Radio Club " W4IAX " will host a ham radio station that will attempt to talk to the real space station durinvg the exposition. The club also plans to demonstrate other aspects of the Amateur radio to an expected 80,000 visitors.

The show began on January 9th and ends on April 5th. More information is on the web at www.exploreum.net (N4UXY)

**

CONTESTS: 2003 WINTER 6 METERS CONTEST

The 2003 winter 6 meter contest is will commence at 2300 U-T-C on Friday February 7th and conclude at 03:00 U-T-C on Saturday February 8th. The rules are very simple. Each in-country QSO is worth one point. Out of country contacts score as two points. Hawaii and Alaska count as separate nations in this one.

Scoreing is total Q-S-O points multiuplied by the number of grid squares worked. Entries go by e-mail to w4wrl@aol.com before March 15th. They can also be sent snail-mail to Wayne Lewis, 3338 South Cashur Drive, Florence, South Carolina, 29501. (VHF Reflector)

**

DX

In D-X, PA3GIO will be active as ZK2GI from Niue from about the 18th to 26th of January. He will operate SSB only with 100 watts and a dipole antenna. If you work him, Q-S-L as directed on the air.

Also, KM1E is active from the Bahamas as C6AGN. He’s on 160 through 6 meters from now through the 4th of March.

And lastly, some good news about famed D-X’er Ron Wright ZL1AMO who suffered collapsed lungs in late November. According to Judy Rausch, AA7UC, of the International D-X Network, Wright returned to his home on January 13th to complete his recocery. (AA7UC, INDEXA)

**

THAT FINAL ITEM: CELEBRATING A NEW LICENSE CLASS

And finally, a big success for a big operating event celebrating a new license. That’s the word out of the United Kingdom as reports on the first ever Foundation Class Q-S-O party begin to filter in. Again to England and GB2RS news presenter Jeramy Boot, G4NJH:.

--

The M3 'QSO Party' on 40 metres on the 1st of January was a huge success with hundreds of newly-licensed M3 amateurs and their friends wanting to take part. Richard Jolliffe, G3ZGC, said: "I planned just to join in but when I switched on there were two M3s looking for a net controller. So as one of the Newbury club's Foundation Licence instructors I volunteered.

The pile-up was certainly the largest I have ever heard and I had to go to letters in the suffix and ask for M3 Alfa stations and work through the alphabet. In two hours I worked 112. At least half as many again were 'gotaways'."

Richard added, "What was very noticeable was that the standard of operating was fantastic by the M3s. It was noticeable how appreciative most of them were at having passed their exams. Many messages of thanks were passed to their local clubs. An excellent event."

Douglas Nixon, M3BKC, was one of the numerous Foundation Licensees joining in the fun. He said, "Richard did a splendid job as net controller during the hectic conditions that followed at times during the next two hours. Roger, G4RUW, also from Newbury, took over at 1200, followed by John, G4TSN, from Nottingham. Many thanks to all concerned."

Jeramy Boot, G4NJH

--

Obviously, the concepts behind the U-K Foundation Class license are rock solid and it is most likely the way other nations will go as they seek too increase participation in the hobby. (GB2RS)

**

NEWSCAST CLOSE

Today I passed my Element 2 exam and finally achieved my goal of becoming a licensed amateur radio operator. Unfortunately, I am missing one of the key tools, a radio. At this point, my interest is in the 2 meter and 70 centimeter bands, since they seem to have the most activity in my area.

I realize there are a great deal of online retailers, such as HRO, AES, and Gigaparts. But, unfortunately, I have very limited funds at this point. So I am looking more towards used gear.

So I pose these questions to the group:

-What are some good resources for purchasing used radios?
-Is eBay a good resource?

Thanks in advance!

-Brian- (insert call sign here)

Congratulations Brian!! I wouldn't mess with Ebay, for what you are looking for. You can occasionally find some decent deals in the classifieds on www.qrz.com Good luck. With a NEW 2 meter radio averaging $110, you shouldn't have to pay a lot, so don't let em try to fool you! HRO and others were closing out the Yaesu 2600 for $109. You might see if they have any left. 73

Congrats on passing the test!

As 2M is very popular, you can find new units, handheld (HT) and mobile for not too much. The big manufacturers often have discounts or rebates set up for some models, and the retailers you mentioned can tell you about these. Until the end of last month, Yaesu had some great deals on the VX-150 2M HT for about $89, and the FT-2600 2M mobile for about $114. Dual band units will cost more, although less than the two equivalent single band units. Spend more now, save more later.

Some of these stores sell "open box" and used trade-in radios, there are "hamfests" (ham radio flea markets) and often in a radio club people sell stuff back and forth.

eBay rates a major caveat emptor.

Any time you are buying used equipment, you really should know how to test it, and what models have had problems, and so on.

Go to www.arrl.org and search for a local radio club. Many there will be happy to help you get started.

Happy trails,
Gary (net.yogi.bear)

Brian congrads on the new ticket.

Best bet for used gear is to check locally, ham club newsletters, Ham Store Bulletin boards, swap meets. Be sure to check out the radio in all respects. If in doubt ask an experienced buddy to help check out the radio.
Some older radios do not have CTCSS (PL) capability, a necessity in most areas.

I have bought on e-bay but only when I e-mail the seller and ask for his guarantee that the radio is operational in all respects and the photo given is the unit for sale -- not a catalog shot. I also ask for a money back guarantee. Beware of as-is sales.

On e-bay check the sellers ratings and past sales. These give a degree of confidence that the seller has auctioned in the past and would not jeopardize future sales by false statements.

Also try the swap pages at URL: http://ac6v.com/swap.htm

Here are some tips:

YOUR FIRST VHF/UHF RADIO

Typically the new licensee purchases a Handi-Talkie (HT) for VHF/UHF where they really will be using their first radio mostly in a mobile installation or home base station. A mobile rig can be easily switched back and forth between the vehicle and a base location and offers considerable advantages over an HT. Keep in mind that the VHF/UHF radios are for the most part line of sight transmission and reception. Repeaters can extend the range considerably. HF is the spectrum for long range skip communications.

HT's are low power (5 Watts or less) and most folks use battery power and thus constantly recharging batteries. Having two battery packs is almost a necessity. If an HT is frequently used for base station operation, consider using a DC power supply. Be aware that the standard battery chargers will not usually support transmitting (not enough capacity).

Many HT users with a stock rubber duck antenna are forced to use max power to access repeaters and the batteries drain quickly. Because of the poor performance of a rubber duck antenna, depending on their location, you can hear many HT's users barely getting into the repeater and frequently dropping out. Also HT's operating at max power can get quite hot and curtail long transmissions.

Stock HT antennas although convenient are very inefficient, performance can be greatly improved with better antennas. However adapting an HT to mobile or base use can present problems. The typical HT is designed for rubber duck operation. When you put on a good antenna, HT's can overload on strong signals and have severe intermod problems, especially in high RF environments like the big city.

This is not to bad-mouth the HT's, they are great for carrying in your shirt pocket or belt clip for pedestrian use, public relations activities and traveling light. Just be aware of their limitations and intended use. They certainly can be used for base and mobile applications, but better antennas and DC power sources are definitely something to consider.

A mobile radio on the other hand puts out up to 50 Watts, operates off of car DC power or a DC power supply at the base location and requires an antenna which typically is vastly superior to a rubber duck on an HT. Prices are about the same. So evaluate your needs and decide which starter radio you want. Many eventually end up with both mobile and HT rigs.

Consider your needs over a longer period of time. You may want a single band transceiver � typically 2 Meters, or for access to another popular band � a dual band 2M/440 transceiver. Some go full boat and get one of the newer multi-banders which variously cover 6M, 2M, 220 MHz, 440 MHz, and even cover the AM/FM broadcast bands as well as the 3-30 MHz HF bands for listening. HT examples are the Yaesu VX-5, VX-7, Kenwood TH-F6 as well as many others.

Which brand to buy? See eHam reviews, Mobiles, HT�s, VHF/UHF Omni Antennas, VHF/UHF Directional Antennas. URL: http://www.eham.net/reviews/

```

You've heard of pro-coders and no-coders. We all know the written test is so easy to pass. One can easily pass all three written tests without learning the material, due to the question pool format, and that the questions and answers are published.

An only-coder has no interest in the written material, just the code. The only coder is good with code, but has no knowledge of the material and does not want to learn the material. The only-coder takes pleasure in operating (contesting, DXing, collecting wallpaper, Morse code, etc.) but the written material is not interesting. Since the test is so easy, its is very possible to be proficient with the code, but not the material.

The only-coder may have then took the extra class test, just because it may have been so easy to add on, so why not?

I know there are only-coders out there. Some of them are in my local club. You may be proud of your Morse code accomplishment and had to suffer through the written to get it. Or there may be other reasons.

I would like to know if anyone would like to say they are one. You can give reasons for this as well.

I have found a local church youth group that is very interested in Amateur Radio they are in need of some used equipment they will pay shipping if someone has some equipment to donate to them. They have two licensed operators in their church who are going to volunteer their time.   thanks
James

You probably have a crappy guitar amp that you bought at a swap meet elsewhere in the trailer park at which you no doubt reside. Since the problem is undoubtably the prole-grade amp you bought, rather than the radio amateur's equipment, you are, quite simply, screwed. Dig it, man.

I doubt you are capable of seeing over your own no-doubt extra-large belly to give anyone else any kind of "whuppin" unless they are so slow that they let a lard-ass like you sit on them.

Not likely, chubbins.

    Listen Ham dork, I have a class A/B all tube amp from the early 70s.
Has more electronic mojo than your solid state CB toys ever will.
 Besides, I've already tracked the culprit down and guess what, I whupped
his ass.

Congratulations on your successful ass whuppin'.

Still curious whether the person causing the problem was a ham
(amateur radio operator with a license) or an illegal CB operator.
There is a big difference.

For someone who believes in ass whuppin' as the preferred method of
dispute resolution, you certainly don't mind insulting large numbers
of people.

Happy trails,
Gary (net.yogi.bear)

For the technician class license -- a no code is available.
Hams enter the hobby as Technicians by passing a 35-question multiple-choice examination. No Morse code test is required. The exam covers basic regulations, operating practices, and electronics theory, with a focus on VHF and UHF applications.

Technician Class operators are authorized to use all amateur VHF and UHF frequencies (all frequencies above 50 MHz). Technicians who pass a 5 WPM Morse code examination are entitled to limited power outputs on certain HF frequencies. "Technicians with HF" may operate on the 80, 40, and 15 meter bands using CW, and on the 10 meter band using CW, voice, and digital modes.

For the other classes of license - see URL:
http://www.arrl.org/FandES/ead/classes.html

Who's the Fool?

Our Mr. bush Jr. demands that he dictate who of US are evil without evidence?, You, a criminal being without public charges?, enslaved in the fear bush demands you bow to as a slave to himself being satan? I mean.. come on! Let's get real...

America's criminal plan boasts being irrationally proposed to terrorize our planet to fight injustice under bush's personal terms as a reject. Mr. bush and rotten rumsfeld ask Saddam to provide evidence that he isn't secretly, to have weapons hidden unaware. Huh? What does bush want? What could Iraq do in any context to please? See, if bush has no evidence to factually establish his accusation on behalf of ourselves, he would be denying Humanity equal rights as the law agrees upon for our judgments to measure. Even if Blix starting blatantly blushing about something he said he didn't see, killing innocent People still would not change the terrorist threat as alleged. If Saddam, and the rest of US are a secret threat unknown, how then, will that threat be defeated by stealing Iraqi oil reserves? If a single rocket launcher can take out a jet liner, and a bio-warfare lab can fit in a mid-sized truck, how then will setting up military dictatorships absent Justice for US people as wanting, stop someone from attacking the wrong People again in bush's new global tyranny?

We, as Humanity are not at war with ourselves against a third of Humanity as bush, rumsfeld, and ariel sharon keep telling US unquestioned, we are at war with the war mongering first degree murderers, who wish us further hardships and more bloodshed to steal our lives as worthless, without meaning, nor any God anywhere apparently. Corporate america demands our reflection be of blind faith in bush's criminality as a false deity to sacrifice our rights without opinion?! Jesus kerwillickers man, a fact is a fact Jack! Our Mr. bush wins the title of anti-Christ by his own free will from my conclusion as whomever, because bush manages to do as he does, without consulting US on our established public outrage with his flagrant disregard for our protection through laws as measured. Scientifically, mathematically, documented as recorded even completely confessed to by the WhiteHouse already, truth to all as witnessed factually. Just like we were in the Stone Age, Mesopotamia, Rome, or downtown Los Angeles the other day by loyal officers committed to the cause. A cause that is life regardless of how many corporations don't know of what is contained as the Constitution breathing. There is no room for debate, for we all honestly agree, bush and rumsfeld do not want to have actually arrested, the culprits responsible for murdering Americans during 9/11. General Ahmad funded Atta, worked with the bushmob strategy in development from the WhiteHouse, and also, negotiated the threats with the Taliban on the premise of criminal wrong doing against Allah, planned again, prior to 9/11 and confessed to as fully implemented by official bush reaction to the MSNBC's Revelation of,.. Top Secret Presidential Directive documents, originating from Condolezza's office all planned before hand as deliberated. (secret meeting) To invade Afghanistan. A public threat that was made earlier for cheney's Enron at official multi-national gatherings regarding a pipe line project worth billions going to the highest bidder. Not Enron. Enron, who was facing their massive CRIMINAL conspiracy of fraud against ALL American People as wage earners. I say end bush and rumsfeld, and for Tenant and Mueller, for just now, need to be quarantined for public trial regarding their belief system. Mr. bush really isn't America, America is America. People, as American, actually like the idea of apprehending the true 9/11 culprits. Thank you already very much for your input on the subject of Ourselves Mr. bush Jr. For why must we sacrifice ourselves under CNN's tyranny of censorship on our abilities, while in so doing, betray American soldiers and FBI officers as not worth the effort as materially relevant to our story agended? The official bush plot line of suffering God with injustice and slavery through ignorance of you being unfactored is silly stupid., without living representation? Who does CNN talk to, as included to be of themselves? Communication technology is what we're living here, and Justice is Our name. The principles of Justice are as simple as living to survive as a species, learning, one decision can have an ever better result in relation to another as civilizations even. A good way can have a better way and divine wisdom exists everywhere as all things being. As I outlawed in my paper titled "Valhalla", it wouldn't matter if even 99.9% of victimized Americans polled by CNN corporate america standards, actually, felt committed to end it all in sacrifice as cowards to bush as an American war criminal, they'd still be them. US as god's is only truly known power striving as of your own too as always, when recognizing equal rights for all serves all things best. Balanced as the relation is as just being. No life is separate from existence eternal. (Photon split) By not following crime scene evidence, how do we suppose we arrest ourselves then from being crime ridden?

These simple principles that enshrine all things in absolute wonder as eternity, are all anyone would need to exercise their Holy sacred "god-dumb", to effect positive change as a being progressing from some vantage through towards further achievements in uncovering mistakes. To know less about everything then when you still began. (These considerations are ultimately of illusion also.) With being of reality facing a real world sustainability struggle, like a body does, is to be concerned of Your living also, and so too being, is to care for others as would be of yourself understood by communication for comfort through Freedom as Justice for all as God is deserving our praise. Justice is critical for freedom to flourish throughout Nature as Creation's Creations Creating. (You know, killing innocent people to steal our money is just wrong all over, ask whomever.) Or not, and go extinct from failure to listen of indifference on the sacrifice of good citizens for bush as tyrant dictator, heroin pushing death squad runner, super evil war criminal. It's like this just can't be real. Have you ever felt like this was somebody else's bad dream too? I live loyal for being Universal, [I am but a desperate servant to serve for something greater than this hell hole we invented not knowing] while anti-American bushwhored soldiers are cowards, who would now expect to further watch their own family robbed then murdered by bush continuing, while as traitors to the Constitution, blame more of the CLAIMED INNOCENT with death squads and bombing runs for further bush takes as leader to none, but talentless savages rarely present in the few Soldiers I know of. How enslaved does bush take every Soldier Brave for? See?, that is a wager I wouldn't bet continually over and over like that, because it make's US look real bad as bush Jr.'s.. Now bush and rumfeld, with the most pugnacious audacity as contempt for every American Soldier's mind, dare as demons, to want sucker slap US again by suggesting the MURDER of millions more in sixty countries?, as the helplessly made unaware without any communication skills whatsoever?, to survive? Still?

Created through US as this Universe communicates is simply amazing, leaving nothing as absolute, but this life we all share as Universal. Your biggest certainty ever as never cast out of, is you are of the timeless Universe also, [Soul if you will], and now it means without me here today as consciously aware of all things grey, a call for your own will to help US alone to be a Savior for your own rights as being stupid like me also. I should now retire later. You can save Humanity for yourself really by coming down to reality. Don't ask me why, but, you are of Humanity also.

Gee, I hope we survive from the bushmob as the human species, for and then we can truly say, wow, we are really something as God thanks you for being just you! What an honor. Justice will prevail for ourselves as the worthy to demand it for Atheists. By God, we must, they are the most cleverests. As anyone would but be too stupid to ever rationally understand this actually. Big Bang? Ba ha ha.. ermm.(I could be wrong on that.) Maybe however, you are conversational also?

In this woken dream as you are alive still sleeping,

Johnny Wizard

Example: If you paid me a dollar for this paper, we could really go somewhere as investors. Hint hint.

--
All Wrapped Up

CBC as managed has deliberately with intent, worked to misinform and propagandize our community on what is as, documented provable fact, regarding Mr. bush's complicity to the murder of US as the innocent in New York City. CBC has refused to live up to our responsibility to protect our democracy, and in silence, has pirated our names to murder those understood to be innocent of the accused offence. CBC has refused to allow ourselves as the public to understand, Mr. bush forbade the FBI from pursuing bin Laden investigations, just prior to 9/11 with secret Presidential directive W199I (199I WF213589), which had John O'Neil, the anti-terrorism head for the FBI publicly protest by resigning over. This W199I directive was put into place after the administration had been warned by the BND, and several other legitimate intelligence agencies, of an impending terrorist plot involving the high-jacking of American airplanes to be used as weapons and flown into land marks. In addition to these unreported top priority political issues that stand to be true as documented factually, the bush administration had also secretly put together a sinister war strategy, that was revealed to ourselves as the public, by Canada's own Jim Miklaszewski at MSNBC, to have existed without any doubt as Presidential Directive documents, two days prior to 9/11 at the WhiteHouse. A planned strategy to invade specifically Afghanistan, by blaming bin Laden for a crime, but providing no evidence to back up the allegations. That's right. The super evil criminal bush dictatorship had a plan in place to not follow the actual evidence to arrest the true culprits for a crime that hadn't even yet taken place, but that they were prepared for to close investigations on, as an opportunity to invade specifically Afghanistan, propping up the Northern Alliance who still practice the barbarity of sharia law, with the bush bonuses of selling heroin to our world, and most importantly, building a liquefied natural gas pipe line for bush and his Enron friends, to rob even more further from us all. Legitimate FBI officers unrepresented by Mueller claim General Amad was the principle terrorist funder of Muhammad Atta, responsible for a wire transfer of $100,000, who, incidentally was in unusual meetings, the General was, with the bush administration a week prior to 9/11, who also not only participated in meetings with several top officials in the Senate Intelligence Committee, but also, was reported to participate in building the war strategy of invading Afghanistan, as the reported desperate excuse offered for the General being there just prior to 9/11, and also, was personally responsible for negotiating the non-surrender of bin Laden, of which the ISI claimed, the General advised the Taliban not to do so because, no evidence would be offered, nor public trial for an offence bin claimed he played no part of.

We are all in agreement, in truth we rise, evil is just the deceived disguised. Boo!

The case is wrapped up, and bush and rumsfeld need to be immediately arrested for 9/11, for murdering countless thousands for stolen gain, at the losses to our humanity, that show through every putrid utterance of scum bucket bush, as contempt for our living as humanity through Law. Where a person accused of a criminal offence without any evidence is clearly innocent. For why I ask you reader, would any unjustified leader of US people blame someone for a crime who wasn't linked to the offense, while working to close investigations, and not follow through with the ample clues to capture the true evil doers? Just how cowardly stupid can soldier families be taken without conviction as themselves worth fighting for?

Justice for all, and glory be to godly.

Johnny Wizard

RITTER PUTS HOLES IN CHENEY'S ALUMINUM TUBES STORY

Posted By: Rosalinda
Date: Tuesday, 10 September 2002, 11:50 a.m.

[source: CNN, Sept. 9]

RITTER PUTS HOLES IN CHENEY'S `ALUMINUM TUBES' STORY AND OTHER LEAKY EXCUSES. In an interview iwth CNN today, former UN Weapons Inspector Scott Ritter ridiculed the latest concoctions of the Mega crowd to justify an attack on Iraq. Excerpts follow:

PAULA ZAHN (CNN): I want to have, hear your reaction to the whole range of Bush Administration officials yesterday who said .. that Saddam Hussein has been trying to obtain materials to build nuclear weapons, particularly trying to buy thousands of aluminum pipes that could be used in the manufacture of a centrifuge and ultimately used to manufacture weapons.
What do you make of that?

RITTER: What an absurd statement. Thousands of aluminum pipes, and we're going to go to war over thousands of aluminum pipes? Even the IISS report that you cite says that if Iraq was to have trying to do uranium enrichment, it would take them many years before they could do it. This is patently ridiculous. These are aluminum pipes coming in for civilian use. They are not being transferred to a covert nuclear processing plant or any covert nuclear activity whatsoever.

But the best way to figure this out is to send the weapons inspectors in. If they, if the United States has this evidence that Iraq has these pipes, why not, heck, give me the data. I'll come to Iraq, hunt it down and we'll bring it to a close. That would save us going to war, killing thousands of people and destroying our reputation in the international community.
We cannot go to war because Vice President Cheney's worried about some aluminum pipes. This is ridiculous....

ZAHN: Let's talk more about what some say is the only independent voice in this whole argument, and that is the International Institute for Strategic Studies.... In this report, it suggests ... that Iraq could make a nuclear weapon in months if it had foreign help.

Let me read to you what the conclusion was, that, "War sanctions and inspections have reversed and retarded but not eliminated Iraq's nuclear, biological and chemical weapons and long range missile capabilities, nor removed Baghdad's enduring interest in developing these capabilities."

RITTER: Paula, what do we have here? Rhetoric? Where's the facts? "Enduring interest" in weapons capability? What does that mean? What evidence do they cite for this "enduring interest"? You know, ballistic missiles. They say he has 12. What, did they grow? Where are they? They didn't have 12 when I was a weapons inspector.

Chemical weapons? Biological weapons? They talk about bulk agent in terms of Iraq's biological weapons program. What bulk agent? Where did they make it? A bulk agent has a three-year lifetime in terms of storage in ideal conditions. The last time Iraq was known to have produced bulk agent was in 1990. That stuff, even if they held onto it, is no longer viable. So to have bulk agent today, Iraq would have had to reconstitute a manufacturing base in biological weapons. Where is it?

This report is absurd. It has zero factual basis. It's all rhetoric. It's all speculative and, frankly speaking, it's meaningless without, you know, with the sad exception that hawks in the Bush administration are going to point to this as justification for war....

ZAHN: What makes you think that if UN weapons inspectors went in now, after not being on the ground for four years, it would be any different than the last time around, when Richard Butler, who was the chief UN weapon inspector, said the Iraqis often moved stuff when they knew you guys were going to be on the ground?

RITTER: I had been there since 1991 working under Ralph Ekeus, when the vast majority of the actual disarmament took place. By the time Richard Butler came, we had already destroyed Iraq's weapons programs. We were hunting down for, you know, missing items, you know, a piece of metal here, some documents there.

And, yes, Iraq could have moved them, but this does not constitute a weapons program. It's illegal, and this is what inspectors need to do, come back here, finish the job so that Iraq can get on with rebuilding its economy, etc. But, you know, Richard Butler knows for darned sure that the Iraqis were not moving weapons from his weapons inspectors.

The weapons inspectors were trying to get into some of the most sensitive facilities in Iraq that dealt with presidential security. I was the guy leading these inspections and Richard knows that he allowed the United States to use my inspections to spy on Iraq, which is why they don't trust the inspection process.

So let's not bring up Richard Butler. Frankly speaking, he has no credibility on this issue.

ZAHN: I still don't understand why you think the inspections will be any different this time around. The administration seems convinced that if Iraq had nothing to hide, they wouldn't have broken all these UN regulations and they would have allowed inspectors in over the last four years.

RITTER: Come on, Paula, let's be fair. The administration knows that the Central Intelligence Agency used the weapons inspection program as a Trojan horse to insert intelligence collection capabilities to go after Saddam Hussein....

You know, I know that inspections did work. We achieved a 90 to 95 percent level of verified, absolutely certain accountability for Iraq's weapons program, including all the factories and associated production equipment. This is why I'm just amazed when I hear reports coming from the IISS that Iraq suddenly has the capability. Where did it come from? Did they suddenly grow factories? ...

... Let's get the inspectors back in, let's get them to find out what the ultimate disposition of these weapons programs are and if Iraq has no weapons of mass destruction program, thank goodness, we just diffused a war. And I think that's a good thing worth trying to do.

From the well recomended document:

US Intelligence and the Terrorists: Pre-9-11

... June 6, 2001. German intelligence warned CIA.

(A) The German intelligence agency, the BND, warned both the CIA and Israel that Middle Eastern terrorists were ``planning to hijack commercial aircraft to use as weapons to attack important symbols of American and Israeli culture.'' This intelligence reportedly came from Echelon, a high-tech electronic surveillance system used by the intelligence agencies of several nations to glean through electronic communications for certain keywords. It was first reported by the German daily newspaper, Frankfurter Algemeine Zeitung on September 13. Its sources were reportedly from the BND itself. (Gembeimdienste 6-6-2001; Stafford 9-13-2001; Ruppert 11-2-2001; Ruppert 11-27-2001; Ruppert 4-22-2002; Martin 1-5-2002; Martin 1-16-2002; Thomas 5-21-2002)

According to Gordon Thomas (5-21-2002) of Global - Intel, the original source of information actually came from Israeli Mossad agents operating in the U.S. who had infiltrated al Qaeda. According to his account the Mossad also informed British and Russian intelligence about the attacks, who then in turn notified the CIA. Thomas's sources are allegedly informants within the Mossad itself.

As of April 22, 2002, no challenges to this information has been reported. ...

Also, it has also been aledged that the German embassador Ischinger, On Monday 6, August, 2001, had met bush personally, and during that meeting, the Bundesamt fur Verfassungsschutz [German domestic secret service] and BND [Bundesnachreichtendienst, German foreign secret service] finding was once again reiterated in person.

!!!! NEWSFLASH !!!!

September 12, 2002 NewsNight with Arron Brown

Scott Ritter - "The job is to disarm Iraq, not to penetrate Iraq to take advantage of the unique access enjoyed by the inspectors to go after Saddam. The United States took advantage of the information we collected, and also used the weapon inspections as a Trojan horse, inserting a signals intelligence operation which was used to collect information about the security of Saddam in a manner that was totally inappropriate, and had nothing to do with disarming."

Richard Butler - "I was in meetings with United States officials. This isn't some great Revelation. Where I rejected what they proposed, on this ground, That my mandate was to seek to disarm Iraq. And were our program, to be used for other purposes, to seek to change the government in Iraq, or national purposes, the interests of the United States, then THAT WOULD HAVE VESICATED, SHREDDED, WHAT WE WERE ABOUT."

Scott Ritter - "On seven separate occasions from November 1997 to August 1998, with inspection proposals signed by Richard Butler, authorized to proceed in Iraq, the United States intervened to manipulate these inspections, stop them all together, to alter their timing, Richard Butler succeeded to this"

Mr. Butler, did not refute, with his repeated opportunity, Ritter's documented as fact, with the paper work to prove it, allegations of american corruption succeeding, in fact, repeatedly, Butler refused to answer the direct question, on weather, he, Mr. Butler, abdicated his responsibility to our world community, and sided instead to bow as a fascist coward to CRIMINAL american sabotage regarding the U.N. resolution inspection's process.

Gee, no wonder Saddam has concerns for his people...

A worthwhile note also, is during CNN new briefs on Saddam's recent comments, never once was it said, that Saddam alleges to our world, bush murdered New Yorkers for financial gain, as he did factually claim, and I do too, as the evidence is unmistakable. Mr. bush, the super evil anti-Christ, and too, Mr. rumsfeld, the sadistic nazi dumbfuk, must be immediately arrested, or executed by Patriot American Believers, so we may begin to get this PUBLIC court case regarding the facts on the mass murder of AMERICANS under way. I wanna lead the prosecutor's team!!! (I am now officially excepting book offers.)

Johnny Wizard Here To Tell It Like We Is

So, the bush regime knows that Saddam has no nukes, but as any person could, maybe at sometime in the future would target general populations, of which Saddam has stated to be rationally stupid, immoral and evil. A tactic that bush, as america, says without pause to reflect, would do so in our stolen names is plausible with him in power as a degenerate. The bush regime also thinks Saddam does indeed have biological weapons, and has so for decades but never used them, as the only affordable balance to the militarization of the region. Namely, to counter the Israeli government's corrupt political position of American funded bigotry and lawless behavior, on claims God gave them a right as criminals apparently, to deprive Christians a right to live justly, to own property, or use public roads even, and that most of Iraq should too, be stolen by force like hitler did, as hitler did measure also, all Jews, by the same level of intolerance, ignorance and barbarity sharon does of US as Palestinians, you know, Catholics, Muslims, Jews and Atheists, absent love for ourselves as understanding, godly, and principally innocent until proven otherwise. Mr. sharon is not Jewish, nor is anyone else allowed to practice as such in the Likud party. But anyway, Saddam is no Saint, however, no evidence exists that Saddam has ever used bio warfare weapons on his own people, while Our Mr. bush Jr., is documented factually, as a murdering demon of evilness clearly paraded before ourselves by corporate command, as a supposed representation of OUR civilization's true will. As Our Mr. bush Jr. works diligently to destroy our lives through fraudulent means, counting on US not trying to save Ourselves by following the truth to set US free. A repuglican who without laughing, demanded law enforcement agencies not follow the ample criminal evidence to arrest the true perpetrators of 9/11, but instead, urged the closing of investigations, while top secretly, implicated bin Laden without evidence he couldn't divulge, of which the British government ended up doing so for the love of our selves, comprising of only, general maybe if's, of which only could, can, and does, jeopardize bush, cheney and rumsfeld by taking such a secret, now public position against our interests to kill us as the innocent with. Which is truly why bush rumsfeld and cheney are warmongering as despicable savages. 5 billion dollars in humanitarian aid is being blocked by the bush regime to enter Iraq, like food and medicine. The bush regime demands children be starved and not receive treatments for ailments, such as aspirin for headaches, or as cancer from the devastation the families of Iraq are still suffering through, since the last time a bush's american criminal military force dumped tons of radioactive waste in the region, while murdering indiscriminately ourselves as anyone, because principally, toxic American soldiers, like the American people, hold the title of the highest illiteracy levels of the developing world, which brings them as consequence, the worst health care providers to themselves as discounted, corporately mandated as unworthy to understand their own behaviors, so they can be even further rooked as shysters. Over two million people have died directly because of American aggression against the practically defenseless in Iraq, who the bush regime even claims, have little of no power to change the political landscape, based in loose tribal ethics as protections, that has been as such, for approximately 4000 years. And as American traitor war criminal rumsfeld proclaimed, since american aggression has continued against Iraq over the last twelve years, so too, has their economy been devastated, and as consequence, the attraction to keep the more literate as wealth driven from remaining, has waned. But what can bush offer Iraq, indeed to our world my friends? Just murder US people for stolen cash profit, is clearly his only motivation, as a tyrant dictator far worse than Saddam has ever been. Mr. bush indicates he knows nothing of economics, or the important function of law to protect our societies, so what if he should kill Saddam, and maybe a million Iraqi people, then what? He hasn't thought that far, and clearly, due to his evilness we witness daily, couldn't care less. CNN and other corporate professionals refuse to tell the blood sucking, carcinogenic, corporate American real fast news blips, of causes they as a nation in total celebrated televised ignorance, have committed against the Iraqi struggling to survive People, and indeed around our world likewise. As was the bush regime's unreported support of the overthrow of democratically elected Chavez in Venezuela, who incidentally, as one of the very few, holds a perfect human rights record, unlike America, who is the only nation, the World Court has convicted by factual documented evidence, to be a terrorist state. There is no record of Saddam murdering millions of Iraqis, while targeting innocent children, but there is to the illegitimate bush family, and nazi soldier tommy franks intentions, the most despicable savage to ever don an American uniform, who would now have us all believe, such a evil strategy of criminal wrong doing, is the only option, to better the lives of those who barely survive from American oppression in Iraq as it is. What form of governance would bush be suggesting? Would it be like bush squandering almost 7 trillion dollars in bad business decisions for our futures as he has set forth for America already? Or maybe something like the new criminal heroin pushers in Afghanistan as foreigners? Costing the American nation, who holds the title of highest rates of human depravation in the industialized world, and highest percentage of imprisoned per populace in all recorded history, 5 billion dollars every month to prop up sales in narcotics, and terrorist handbooks. Where political opponents who criticize the Karazi regime are murdered, for factually claiming the political aims of Karazi are not representing US people as the children? Or as evil bush, who would boldly lie to the face of God, that there were no girl schools in Afghanistan under the Taliban, while secretly thanking sadistic scum bag American traitor, mass murdering savage, wimp ass drug dealing coward tommy franks, for specifically targeting those very schools, women reporters, Mosques, red cross units, literate tribal leaders, men with beards, and children, while labelling all of Our humanity who would fight against injustice his enemy? Or that bush would dare still attempt to get away undamaged by the real men of this world, to spout his venom hatred for humanity to what must be drugged out to be so cowardly American soldiers, by lying to US as the demon of pure evilness we all witnessed, that heroin cultivation wasn't factually outlawed by the Taliban officially following Allah, leaving no position as God's will to back track politically on later? American military analysts, including the CIA and former secretary of Defense, William Cohen, claim Iraq is no threat to it's neighbors, as so too, does no nation in the region support bush's warmongering. In Congressional hearings last week, former UN arms inspector Scott Ritter courageously stated what many Americans believe, but rarely if never mentioned by corporate news standards as the will of the people, "A handful of ideologues have hijacked the national security policy of the United States for their own ambitions." Ritter insisted Iraq was no threat to the U.S. or the Mideast, and later offered that cheney be forced by Americans on mass, to offer evidence to his bogus, make believe accusations, that he wishes to use to actually murder thousands, if not millions of US REAL PEOPLE. Our axis of evil, bush rumsfeld and cheney, do not want renewed inspections of Iraq, they only want war to murder ourselves, and to create instability in our world through fear to prevent their rightful capture for 9/11, while we all are expected to sit back as corporate standard fascist cowards, to pretend bush was actually elected as President in America, because actual poll counts were forbidden to be publicized, therefor, he may have won our approval to use nukes against anyone for whatever. With CNN, the Commie Nazi Network, telling us we as the civilized are also convicted to poll, that evidence is no longer a requirement to convince US who is criminally insane, in this nightmare of criminal bush family evilness, hell bent on destroying your world, and everything WE, as The People, have struggled so hard to protect. It would seem any world threat of terrorism, would be surely from a nation like bush's America. A cowardly nation that demands we as humanity, be deprived the guiding principles of Justice like they in weakness had abdicated as no longer their own as unfairly represented, leaving as slaves the bush regime to rob us all of our Freedoms, as a rule of Law instills such as in the Declaration of Independence, the Bill of Rights, and the American Constitution. All now trashed by Ashcroft, as clear criminal intent to obstruct Justice as the American dream for everyone.

E-mail this to somebody for Christ states,

yours truly,

Johnny Wizard

From below:

"Mr. bush you nazi vermin, you attack my America, you attack US all. American soldiers will not sit back as cowards entirely, and watch you sacrifice our lives as worthless without meaning."

I think I love you too much

Wow, your amazing! So, what your saying is bush the nazi tyrant, the unelected mass murdering fascist dictator, has no interest following the ample criminal leads, because they lead to him, rumsfeld, and cheney likely too, right? And, when that evil monster told us instead he would rely on secret evidence, but couldn't tell us why, as too the FBI or CIA, it turned out to be nothing but another wicked evil deception against the great American people, Tony Blair, bin Laden, and law enforcement officers everywhere, to even further give him cause to close investigations into 9/11 as Reuters told us, and rob directly from American soldier families, their lives, pensions, life savings, and blind faith, in bush, the false diety, super evil anti-Christ.

Johnny Wizard is my Hero.

Weak Pathetic Coward Nazi Bastards

American soldiers are weak pathetic coward nazi bastards. The recorded evidence stands before all of our humanity, while CNN silently pleads ignorance on what is clearly established as documented fact, regarding Mr. bush and rumsfelds' complicity to murdering thousands of American citizens, stealing from all Americans the principles of which the American flag once represented, now unprotected by corporate dictates. Encouraging American soldiers to further sacrifice their dying rights, to murder potentially hundreds of thousands more for bushs' nazi conquests against ourselves further unprotected by nazi traitors at blitzer's war room. ("War Room" is the term used by nazi CNN nosearch big pay do squat staff who routinely work to keep America uninformed with their secret from no one, refusals to protect Americans for the bush regime, like in the case of "The False Claims Act", or evidence requirement to convince US who is evil.) You do five minutes research on the Anthrax suspect, and you come up with Dr. Phillip Zack, but what does CNN do to protect the American people? Nothing but mention Hatfill, not even still a suspect according to REAL FBI sources, who, you'll notice, Mueller or Ashcroft never if ever mentions, like point number six of Coleen Rowley in Time regarding treason at the highest level. Mr. tommy franks, the nazi traitor heroin pusher, runs death squads in Afghanistan, executing countless children as our own, but what does CNN say on behalf of our families?

http://www.theithacajournal.com/news/stories/20020525/topstories/380284.html

Nothing, but to refuse a voice to those they know murdrered in their names as nazi facists, refusing to allow open honest discussions on the true political state of the Union. Publicly advocating to be accessories to the murder of ourselves, refusing to make any attempt to stop bush from continuing to murder their our own families, and stealing from our nations the concept of Justice for ourselves, (Never mind America's own life savings STILL sitting in the Cayman Islands. (Thomas White.)) while advocating even more murders and thefts against the innocent, because soldiers are too weak as colateral damaged disfunctional illiterates, to stand up proud for the American people as equals. Under the Bill of Rights, as justice for US all, truly brave and strong, as the saviours of ourselves to be free as individuals, humanity, WE will never surrender as slaves to the false diety, anti-Christ, Our Mr. bush Jr.. The lawless nazi facists mass murdering tyrants, Mr. bush, bogus cheney, and rumsfeld, are the ememies of America as the free world, who as WE, will no longer except lying down to the continuing corporate silence of surrender, to take us as dead and forgotten, as not worth our time of day, to stand for yourself, as a living breathing human.

Johnny has spoken to several hundred at CBC and CNN including the CEO's of both, regarding the evidence that no one has yet, suggested they find any contention with. Destroy bush and rumsfeld American Patriot Soldiers, and be loved by all as family.

---- Destroying the evil doers

I am reaching out to you regarding an extremely serious life and death, Heven or Hell kind of development, that I can only encourage you to investigate on your own to form your own conclusions, but firstly some background. As you should already be aware, NBC was recently provided top secret, presidential directive, war strategy documents, outlining a plan to invade Afghanistan, with a pre-requisite strategy, of blaming Bin Laden for a crime, but providing no evidence, existing as these documents did, two days prior to 9/11. When NBC contacted the WhiteHouse regarding these revelations, not only were they compelled to admit the paper work was legitimate, but, what can only best be described as pure evil stupidity disguised to nobody, confessed to fully implementing. That's right. Confessed to implementing a strategy that demands the bush regime not follow the actual criminal leads, to arrest the true perpetrators, for a crime that hadn't

even yet taken place, but that bush was prepared for, to gain access into Afghanistan for bush and his Enron friends to rob even more futher from US all. (According to the FBI and the CIA, al-Qaeda is headquartered in Saudi Arabia.) In addition to this, if you remember when bush told us he wasn't going to rely on the criminal evidence persay, but knew top secretly better than everybody else does, that for sure Bin Laden was guilty, while working to close 9/11 investigations and seizing as much evidence from law enforcement as possible?
Well, the British government, God love'em, has now made those documents public, and guess what? There is no evidence present in those papers, and the only security they seem to jeopardize, is that of our Mr. bush Jr.'s.
Also, the FBI now inform us, that bush passed secret directive, W199I, just prior to 9/11 forbidding law enforcement officers from pursuing Bin Laden and al-Qeida investigations, of which John O'Neil, head of investigations for the FBI resigned in disgust over, while also being informed by the BND (Germany's CIA), that on June, 6th, 2001, they contacted the bush regime stating that they were highly aware of a mossad al-Qeida terrorist plot, to highjack American airliners to be flown into land marks. You know... Satan forbid, bush would of been compelled to actually have to arrest Bin for a criminal offence, (as we do remember the Taliban offered.) thwarting his intentions, of watching Americans been murdered in the thousands, so he could then gain access into Afghanistan, prop up the northern alliance, who still practice Sharia law, with the bush bonuses of selling heroin, and most importantly, building this bush Enron LNG pipeline to rob even more further from US all. All these points stand as documented facts, not opinion, speculation, conjecture or theory. However, CNN's blitzer, the nazi sympathizing fascist coward, refuses to inform Americans about the bush regime stealing their livelihoods, while propagandizing the American public, that they instead, should as cowards, watch the bush regime murder millions more in their own names, while stealing pensions and life savings from their own families without legal representation. I call upon all peoples, to recognize CNN's refusal to live up to their responsibilities to protect the American flag, and upon all it represents, Freedom, as is, Justice for US all. Where a person accused of a criminal offence without evidence, is clearly innocent, and where real soldiers, would now fully support following the criminal leads, of which there is plenty, to arrest to true perpetrators, of the 9/11 attack upon our better judgement. How did al-Qaeda sabotage the moussaoui warrant? Mr. bush and rumsfeld must immediately be arrested, to face trial for crimes against our humanity, taken down by true American

Patriots, committed to democracy, and the protection of ourselves slaughtered by CNN as worthless on their alters of apathy, and misgivings about our winning this war for everyone.

I have personally contacted Daryn Kagan, Bill Hemmer, Sofia Choi, Arch Kennedy, Robin Meade, Paul C. Chambers, as well as several hundred others at CNN regarding the previous facts, over the last several days. So now when you hear them demon speak for their false deity, the anti-Christ, our Mr. bush Jr., in support of the further murder of those they understand clearly to be innocent of the accused offence, while remaining unbiased, in support of not apprehending Mr. bush Jr. for murdering some many American citizens, know then, who are true American Patriot flag wavers, and who would watch US be robbed and murdered by the bush regime, and not raise objections on behalf of US humans, left unrepresented as unworthy of protection.

---- What do you know?

Hi everyone, so, what do we know? Mr. bush made plans to attack Afghanistan just prior to 9/11, for not signing a contract with Unocal, which would have given Enron access to LNG. For without, they as members of the bushmob, would face their impending criminal bankruptcy, revealing they were stealing from any as all Americans, their life savings. Without the illegal war against the struggling to be better Taliban, the bushmob would have been exposed without fear by America, and soon, we would have all faced a bright new day understanding further, the importance of Justice for humanity as ourselves deserving not to be robbed from.

None of the evidence indicated Afghanistan, and by bush running without judgement with his plan made prior, showed a willingness to not apprehend the true culprits, while warmongering a fury in bigoted corporate America, to attack our humanity without thinking, or understanding the reasons why the American Constitution holds still respect, for it's wisdom granting protections to the people as we are, individuals with rights to be represented as equals under the law, in defence against the evils of humanity, of which, our Mr. bush willingly as a demon, works to destroy US as the too weak and cowardly as terrified to know better to speak up for themselves rightly.

We now have learned just recently by NBC, there was a thought out, secretly planned arangement two days prior to 9/11 regarding the Taliban being asked to hand over Bin without any evidence, knowing full well, that under such an agreement, the Taliban, believing in God and finding a Justice system through communicating, as they had during the Clinton Administration, would refuse rightly again, outlining the anti-Christ's entry to commit crimes against our humanity, with a plan that didn't need ajusting to falsely implicate the innocent of our world as Bin still is. Then Mr. rumsfeld. Mr. rumsfeld, the murdering nazi savage, on the one hand, told us the Taliban would execute their own men for leaving the fight to protect our world from heroin, and on the other hand, says they need with everyone else to be murdered without any questions asked. Ever I guess rumsfeld the dumbfuck figured. (Forgive my language Mr. Brown, but I'm supposed to set a few bad examples.) As an evil bush mobster, he's incompetent, like really dumb, and a mass murdering savage criminal, unable to cover his treason against the American people in New York City, now trying to bribe America's commanding officers to sell out American interests like tommy franks. We are all wondering just what are the percentages in the American forces regarding the protection of America, the Nation? Or will they be like the northern alliance still as ignorant and evil to rob and murder further from our humanity, Justice, freedom, and liberty? Americans, like our corporate news services in Canada also, are expected to not report the murder of ourselves in Afghanistan, excusing their contempt for themselves as God, to name ourselves, demonized willingly trying to take you to sacifice your rights as censored for bush to steal from our families escaping prosecution. I call news agencies, who as individuals, see no responsibility to ourselves as community. I recieve only refusals as excuses to deny ourselves equal access. Why? They, like deer caught in the headlights, or swimming in the, it feels so good to be taken banker advertising, leave us to only death to others they see not as themselves, be it thousands or millions, than allow me to enter as simply a concerned man named John to speak factually as documented, calling for the immediate arrest of bush and rumsfeld the murderers, to escape further bloodshed. Or, I'm baselessly insulted without argument, ouch, or dismissed as alarmist for screaming for the stopping of the murder of US as really dying, while my, how am I going to survive job prospects go vanishing, because of my excellent research abilities on behalf of the humans.

CBC in Washington just refuses to report as Canadians.

Figuring what? If they just leave me to go it alone, It'll be left looking only stupid? Mankind? Those that struggle to stop me from speaking truly, do so almost always without stated reason, while advocating, you, my reader, to sit back and watch others sitting back like would be yourself without thinking, to be robbed your freedoms as earnings by the bushmob shysters. Check out the advertised to be a public bulletin board at reston.com, post something critical of the nazi, our Mr. bush jr., if there is something not yet removed by the censor, to witness for yourself, what it means as american, to sacrifice your soul for evil. The corporate cult professionals expect us general masses to be sacrificed for bush, the evil anti-Christ. This is why again, I call on the rare truly brave and strong soldiers in America, for America, The People, in this trying time, to take down bush and rumsfeld who are escaping the criminal arrests as our top suspects for 9/11, otherwise, as they are, they will continue in corporate bred fear against ourselves destroying American values like legal due process, indeed our world's freedoms, while advocating huge thefts and wars against us as innocent paying, or disspossesed as unrepresented by the corporate establishment of ignorance and greed. How do American soldiers feel about sacrificing their lives to sell heroin, and steal oil, to likely pollute the region as Dutch shell would as they do murder civilian protestors with Tony in Britian harboring them? Killing for the World Bank who will pocket the paid expenses while indebting the impoverished nation? As death squads against freedom as cowards? You'd think if they were going to kill anyone in Afghanistan, it would be the terrorist leader, heroin pusher, tommy franks and his northern alliance business partner mercenaries, like the brave Taliban would have to protect us innocent all over the world, no? The truth is in while the cowards pretend. You know Dad, I'm beginning to suspect american nazis on our planet, don't actually know us too well as the humans yet...

Wide Open

All American people, police officers and soldiers hear this out please. Mr. Mueller has shown no commitment to represent the FBI. He has made no responsible public mention of the investigations regarding General Ahmed, and his connection to Mr. Atta, nor Odigo's two hour warning. He has not mentioned the investigations regarding the Israeli spy ring done by the FBI, and it has been only FOX News, the DEA, and their spokesperson Rogenc Waite, who have been able to get around Mr. Mueller's contemptuous silence for America, while bushmobster Susan Dryden, states we are all an urban myth. The FAA, NORAD (Canada's arm), Mike Vreeland, the CIA even, and several responsible military and civilian air traffic controllers, and a great many others disagree with CNN's refusal to mention our public statements against bush and rumsfeld's contentions. Never mind Police Commissioner Bernard Kerik who was handed Atta's passport by someone not named yet, of which Kerik stated "Apparently, it must have fallen into the air just as the crash occurred, surviving the almost 1000 degree heat of the fire, then came across a strong wind to blow it several blocks away." With loose papers between the pages of the passport even surviving the gusts. Now we witness the corporate cultists, desperate to contain us with the magic bullet theorists, we're expected to believe 2000 degrees actually is the only way possible, as impossible to prove scientifically. Also remember, the buildings weight were bore by interconnecting columns of steel through a central core design named "tube within a tube", not like a simple toothpick project laid out by fancy computer grapics, that neglect the actual blue print designs, as thought through since before the Roman Empire. If still so though, how then can the desperate doubters explain building Seven, or maybe Six, not struck by planes, but fell just the same without melted bricks?, of glass? As also reported, Atta actually taking the time to pack, yes that's right, pack his suicide letter is too stupid for even the average American intellect. Nevermind the sneaky suspected terrorists arguing over a parking space restricted at the airport yelling. Or, Mr. Mueller's ATM picture of a 'highjacker' who was already dead while the picture was supposedly taken. Hmmm... dead men as the terrorists named Mohammad or something like that.. Jesus! Then finding out according to James Woods, the double agent actor, bush's Mueller had secretly, only two officers responsible for following more than 30,000 selective as important leads over a crime of such magnitude. Bing bing bing bing bing bing bing bing bing bing bing bing bing bing.. Hey... Did you hear that? We see the weakness of the many stuck as bushmobsters, like possibly completely innocent Myers, and his inability as cowardice to speak out regarding his political position as responsible to America, likewise as so many others, showing no concern for the nation as US people. Typical of a usual ignorant fascist right winger sellout like bush has been his entire career to his barely living self of evilness never before witnessed. And, I could go on for twenty more pages on the motives, Enron, and the proven to be criminals at the Pentagon, with the official corporate news story failing the simplest of scrutinies.

Reminder: first tower was struck at 8:45, second, 9:03.

Airports were closed at 9:17, but the soon to be shot down flight 93 calls in at 9:50 apparently according to rumsfeld, asking for permission to do a u-turn, fly east an hour and a half, to land in WASHINGTON? (two planes don't seem to have highjackers on them, and I guess the plan got messed with the remotes somehow.) While the Bin Laden family is preparing to leave America at bush's request, to escape any questioning, regarding the soon to be blamed Holy man Bin Laden, without evidence by the Washington Post in the late edition of Sept. 11th, by the surprisingly thoughtful monster henry kissinger, while CNN reports a story unbiasedly in the forth party apparently, (heard it from a friend who heard it from a friend...) of a call just received to their private newsroom from somebody somewhere to whomever, about friendly, er.. no mean Muslims on board, pre-activating pay phone services without doing so, or so we can only guess, a falsehood truly painful to relay completely. Mr. bush and rumsfeld killed those good Americans in New York, and must not under any circumstances be allowed to continue as escaped leaving the scene, to repeat offend against ourselves, who under these circumstances, must not be taken as granted by Chris at MSNBC. I have repeatedly offered my position of responsible debate with any corporate cultists, that refuse to represent our democracies being toppled into lawless dictatorship. Why does corporate America refuse to report on elected Congressman Kucinich? Again, Mr. bush and rumsfeld need to be immediately arrested or executed as traitors by the brave and true, strong and righteous. We need to seize all available evidence that Mr. Mueller has stolen, like airport video tapes, as well as recordings done from within the airliners. Or provide me, Mr. death, to testify to the recorded gruesomeness as unbearable. Anyone in the bushmob who stands in our way to do so, must as will be also found guilty of treason by all the loyal American people. I call on all police agencies, ball clubs, loggers, swank hotel clerks and the PTA, to pull together under this banner, and make the world something better for everyone, before getting back to wrestling amongst ourselves over what have you. Mr. bush's evil is very real, in this time I, as a strange voice from the wilderness, who does not make your decisions to do the right things for yourself, plead for you to do so as you should. Get off your ass. I mean, who and for what are our soldiers still killing people for in Afghanistan? The heroin dealing puppet government of foreigners with the World Bank are in place losers, and do I understand they have already spent near a 100 million dollars of ours on things like 3 million school text books for practical terrorism from the eighties, while leaving so called heroin addict alliance forces happy to oblige without 'official' pay checks. CBC in Canada shamed the world by running a propaganda piece on school funding, but neglected to mention the 'new' books, just like the 'old' books came from the bushmobsters again, also with CBC 'pretending' to not know that the Taliban had begun girl schools in Afghanistan, a story that had already been almost correctly covered by the Washington Post, amazingly about a month ago, albeit, without the girl schools element, but Jeeze, the truth seems to be finding it's way, despite the tommy franks grouped with the northern alliance targeting youths who can read as the enemy Taliban right? Mr. bush displays a hatred expressed against our entire human race as himself, to kill us all truly as his position, that he in self contempt, refuses to acknowledge, while we further fall dying unjustly, for who I ask you? Mr. bush has actually publicly positioned himself to state he does not support effective treatments for cancer. Why? Because there is no money or ours as tax payers to steal from. Deception is an element of all living truth, and evil secretly is just being openly stupid like bush is, (you can't pretend insight as wisdom truly), leaving the biggest secret being, here is but only one, you too, as we all share nothing as no secret in silence as a reflection of all living dreams. GOD IS AMAZING. There is no spoken answer to the question of a mystery asking as forever endlessly, as life could be unbelievably fantastic at a level of real world sustainability, but you know what my friends? Nobody at corporate mind control seems to care, but only to say how wrong we all are on everything, by people who do not know any better for trying to do nothing. Do not know any better. No argument, no science, no reason, just almost as robots working for the death machines in cowardice and self loathing against ourselves not represented. I, as the make believe Creator, attempting to represent freedom of will eternal, can't help hate and despise bush, your false deity as much as any real man would, I'm sorry. News corporations refuse me a voice as the publics, and have so for years to also our acclaimed scientists, political writers, mathematicians and historians, while Mr. bush as the super dumb anti-Christ of evil incarnate, demands openly in OUR public arena, I not be allowed to live my life in unity, as an individual god seeking a potential Heaven for myself singularly, doing my own thing naturally. Mr. bush demands by threat of murder, I relinquish my equal rights, to become his willing slave. Mr. bush demands I not be permitted to protect myself in a true democracy as Justice for all. (Mr. bush, you either understand us as fairly to be equals with justice as anyone, or your threatening our freedoms as a criminal terrorist without room for argument.) Mr. bush demands I fear his murder rampages against the innocent, as would be myself, still living to say, NEVER! Never would I lie to myself like a cowardly American soldier to bomb innocent villagers to waste billions, before killing tommy franks for ordering me to do so. Never would I lie to myself like a cowardly American soldier to bomb innocent people in Bagdad to kill people, before killing tommy franks, cheney, bush, rumsfeld, or even Mr. Powell if need be. Don't like Saddam? Well, talk to him openly about freedom for ourselves then. Talk to the people of Iraq, and on what we together, can do to make life better. What is it about the functioning government in Cuba, that could be made better as measured? Why not? Because then it would be understood, bush is a savage criminal, and incompetent as wrong and seriously evil to all of US. As he clearly knows nothing about Justice and freedom, or economics as he currently is destroying the economy of America, while cashing in our real lives creating hardship, as only ideology. I mean, removing the cash from our streets, while stealing billions for himself as a degenerate man! (Our wealth is not infinite, nor do the hungry, have magically, meals mysteriously appear in front of them.) He wasn't elected, falling short by more than 600,000 votes before demanding the halt to counting, and is a nazi murdering traitor who speaks only of his stupidity, while robbing America as our world, of Justice to be free and living godly.

(snp)

Thank you for everything,

Johnny wizard

(snpd)

American Corporate Bleeds the humans!

Mr. tommy franks was asked, "At the end of a month, now, what can we show that says, `Hey, we're winning?'", tommy franks the nazi heroin pusher replied, "Our job has to do with terrorist organizations.." Right. Our humanity will not rest until tommy franks the terrorist leader stands open public trial as fair in a real Democracy for crimes against humanity, or his death sentence committed to by every real American Patriot who believes in Justice, as freedom for US humans. If Bin was the wanted culprit, why didn't bush's Pentagon of criminals and fraud artists just arrest him? Mr. tommy franks targets almost entirely civilian targets like reporters, tribal leaders, teachers and students, while calling us all al-Qaida. (Peter Jennings recently discussing the UN report of the nazi forces intent to continue murdering intelligent young students, (Taliban is Arabic for student) committed by the druggie northern alliance as their nospeak procedures, while being thanked by Mr. franks as the nazi sadistic savage he is cloaked in corporate censorship. Like bush's business partners have done in other countries around the world, seeking out the literate as educated to be murdered, so the rest will be compelled like they do mindlessly in America, to give as beaten slaves to bush the evil anti-Christ, their false deity, who is openly robbing ALL Americans to actual gravely death in his evilness as opportunity, leveraging the moment with a huge America pays, cash grab tax give away, while corporate news machines don't say it's unpatriotic to question the American interests being lost to the extremely weak murdering bushmob dictatorship of liars and cheats, as treasonists without argument, again. Al-Qaida is the group of which the American repuglicans have stated no actual criminal evidence against to convict in a actual Court of defence as our own. The al-Qaida, who's public political stance is almost entirely focused on documented as proven criminal repuglican nazi terrorist atrocities against innocent civilians never granted corporate interviews, while CNN now reports they, the al-Qaida, not only committed a terrorist act in the Philippines against civilians, but would actually take credit for something they have repeatedly condemned as seriously dumb and evil against God, like repuglicans advocate straight faced as normal everyday, praising Israel's condemnation of US Christians not allowed to own property, nor equal representation in their bogus law rooms. (Or praising China's human right oppressors, while sanctioning Cuba for doing more for human rights than any other nation, and having a better educational and health care system than corporate America has ever dreamed of publicly.) A few years back, a nazi Isaeli soldier strangled to death three Lebanon Jews, plead guilty, and served two months behind a locked door. As well, nazi Israeli soldiers have been ordered to break the bones of youths who throw rocks at invading tanks, of which in Canada, we've witnessed on actual film. And too, the criminal theft of everything you own by simply not being classified jewish, is a terrorist horror that happens almost daily, that CNN refuses to acknowledge to happen as the cause to begin with. (Frontline however, did do a documentary that I believe has never been re-aired to my knowledge.) What would it be to ban Jews from owning anything as earned, and to criminalize them for Just being so stupid? To see what CNN censors yourself in Canada, would easily compel you to have arrested, the nazi Israeli leadership and maybe Ted Turner as the criminals they are to themselves clearly funded by repuglicans. Explaining hitlers too easy rise to power, against those known at the time to have committed the biblical sin of charging interest against Christ's better judgement, showing no interest in themselves as living community! Nazis. I've written about easily defending effective approaches to cancer treatments, progressive tax systems, and free trade that isn't paid in hidden corporate criminal us human subsidies, and do the corporate news profesionals think we're newsworthy to make of ourselves a better world for anyone? Mr. franks knows practically first hand there is no evidence for 9/11 to the Taliban or Bin according to Mr. Mueller who meets daily with George Tenet, and that rumsfeld and bush killed Americans in New York City, according to everyone familiar with the facts gone unreported as not important to working harder, American civilians who pay and pay and pay with their lives falling silenced. Mr. franks the anti-American traitor does nothing to protect American interests as soldiers families, while murdering, what must now total near 100,000 men women and children on the brink of starvation. Who again, have committed no crimes by just being born to survive. But, if they would be like bush, rumsfeld, sharon, and tommy franks, their surviving relatives would take it out on the easy prey, likewise guilty American civilians and police officers who have been robbed and deprived of Constitutional Justice, Freedom as Liberty in corporate America, and would cheer only witnessed on extremely wealthy corporate owned private news channels, damn right! Right? Right unheard 200,000 marching protestors? VLT petition signers demanding 100% payouts? Right book wormers? Right freedom fighters? Again, why am I not addressed by OUR corporate news media, but only to profess to my truthfulness as ourselves as one concerned legitimately without contention practically through usenet? This paper too, I assure you, I have mailed to cnn@cnn.com, and crossfire@cnn.com.

It's Nothing Mr. bush and rumsfeld are traitors to every American, as they are both guilty of war crimes against humanity. Where are the American soldiers to arrest or kill them both as murderers trying to escape the wrath of the American Constitution's protection of the masses under Justice, that they are attempting to destroy as ignored against the interests of mankind? Again, bush had no evidence against Bin, for a crime he demands we not know the perpetrator of, by attempting to stop, or not address the criminal investigations completed already. With the corporated cultists cashing out hard working American tax payers by labeling us all, as not caring to be biased. Telling our soldiers to attack without thinking, the third world Taliban government for asking about evidence as a true American, Allah, Christ, or Buddha would, ending the heroin trade, and attempting with communications, something better for the people of Afghanistan. Mr. Mueller has informed us, as one more informed than any other who meets with George Tenet every day, the only evidence we have implicates bush and rumsfeld for 9/11, and soldiers have yet to stand for America to destroy bush and rumsfeld, the murdering bastards desecrating our judicial process. Why? Nazi cowards, not willing to protect the American flag, while watching their own families be robbed of their life savings and pensions through Enron, and open Pentagon frauds, while bush, the anti-Christ, hopes soldiers will learn from the bankruptcy, for next time, while we, as humanity, watch the repuglican Congress today, allow the thieves to escape, with, MAYBE, a fine, while walking away with billions stashed away secretly in the Cayman Islands, or left responsible for secret Army financing, like Thomas White, as their two timing Secretary. It's too bad we can't separate American soldiers, by who wish to uphold the American Constitution as Justice for all, and those sadistic savages like rumsfeld who enjoy murdering innocent people while stealing from everyone our humanity, then we would have a real war of good as powerful, against the extremely weak and pathetic illiterate nazi cult scum, eh? I mean, if you actually knew who the soldiers were as responsible for bombing villages in Afghanistan, and red cross units, literate tribal leaders, or having

40,000 surrendered given to be murdered, wouldn't you as a real American Patriot Soldier, just kill tommy franks, bush and rumsfeld the nazis without thinking twice? I mean, to be humane or godly? See my friends? We will see again, no traitor to America offer an actual public argument to their position of ourselves to not communicate freely with our facts, but will without reason, demand we not be able to truly, like CNN, MSNBC, CBS, Art Bell, Reston.com and the like, while attacking ourselves personally for demanding we no longer be murdered for the evil bushmob, who ignore our concerns as legitimate under universal law actually existing, as not heard from really dying, deprived equal say as the Bill of Rights still demands. See? American illiterate evil nazi scum, think the all mighty as this Creation will be made only to suffer and die as murdered by the weak, dispossessed and cowardly, so sharon the bigot racist parasite can rob and murder innocent persons as Catholics, Muslims, Atheists and Jews forever and ever, financed by corporated nazi cult Americans left in the dark until their bitter enlightenment, about who lives the airwave as true to be ourselves. Justice infinite as indivisible shall prevail as a Heaven or Hell, you decide. I am calling for the immediate imprisonment or death sentence, to the proven to be world terrorists without given argument against, who admittingly have committed the deliberate mass murders of US as innocent, sharon, bush, rumsfeld, and tommy franks. Forty dollars for bush and rumsfeld, ten for tommy franks, and the Jews of God's creation will wake I'm sure, to deal with the nazi bigot ariel sharon, without further going payment. They advocate as demons, enemies of US all, the murder of innocent people, of which we must no longer allow. I'm available for debate or interview, of which news corporations refuse to grant. Just as they do on every other serious life affirming issues. Our nations greatest, most popular scientific and political writers are barely, if never even acknowledged. Many have read my words, yet next to none argue in disagreement, but for insult lacking reason. Why? Because some people are just stupid, and as in open polite discourse are exposed to be carbon copy right wingers suffering under suggestion to do nothing to help themselves. Like, how does someone argue burned jet fuel smoldering, could reach a temperature of 2000 degrees Celsius, in an area of standard building construction not melting before steel would? Or, because someone commits a crime in New York, or did years ago because they were beaten down as deprived human rights and had all their property stolen, sharon can then excuse himself to murder anybody else he wishes, maybe hundreds or thousands more to steal their lives and prosperity? How does Mr. bush jr., the anti-Christ, get away saying we're all against him discarding the rule of law to find ourselves not to be equals under God with his tyranny of injustice and slavery, that he expects every nation to suffer under in fear while he attempts to plunder and murder everyone as evil incarnate? Digesting fluoride for no other known or unknown reason to science kills us, and nobody else says different, so why must CNN insist we keep doing it by not covering the facts documented for decades? I say, who cares why right wingers want to destroy our eternal Universe as themselves unworthy, let's just stop doing it today okay? because it makes us look really really stupid to the other civilizations of our Universe that don't practice censorship of our advancements in science as know how. What an embarrassment. Why as so does CNN refuse all the other crimes committed by repuglicans to go unheeded as recognized? Like the denial of equal rights to non-jews in Palestine? I don't know, let us just work to make our world a better place for all. I want my own show. Why does the American Coast to Coast radio network forbid all intelligent discussions to protect American values, as repeatedly offering no comment allowed to understand this dying bit? Scared of the Lord really getting angry?

In It for US

Your either with US as equals under a rule of law as Universal Justice, or your a mindless slave whore sacrificing your soul for bush, the anti-Christ, who will as he continues, stealing and murdering from our families without any good reason, or provocations as evil incarnate he is to US all. A murdering nazi demon of evilness never before known. As he as shown, he would steal from every American, Justice, Freedom, and Liberty, while only saying, no he's not, as who knows how many are illegally arrested as disappeared, and he funnels billions of real American worker tax dollars into criminal thefts through the Pentagon. The False Claims Act. Like he has polluted ourselves in Texas, as he directly supported the murder of tens of thousands in Afghanistan without evidence, stolen tens of billions from Americans for himself, and fought against smart and healthy universal heath care as educated, and continues to support the legal inaction against Enron, who fleeced any American pensions they could get a hold on, of which the biggest criminal in the Enron debacle, outside of Ken Lay is Thomas White, who he has made no indications of arresting, or even firing, as the Secretary of the Army. Mr. bush gave his buddy Krongard the right to murder any law abiding American citizen as soldier, and escape criminal conviction, a traitor to America is our Mr. bush jr., Constitutionally, plain and simple. A nazi warmonger, who wishes to murder millions with nuclear weapons, a savage, a monster. A demon who has placed in his secret administration, those responsible for the death squads of Nicaragua, and the shipments of cocaine into America, to increase crime against every community, while his supporters support the school of the Americas, by removing free speech from those who wish to point to those repuglicans ultimately responsible for harbouring real terrorism, (Mr. bush Sr.) according to Sergant Chuck Couglin of the Milwaukee Sheriff's Department. He has also said he wishes no interest in stopping his increase in the heroin trade. He, as pure evil, who holds practically no deception to ourselves if you'd only listen, has destabilized the world in his commitment to the destruction of our legal due process, by suggesting his entourage, can not be found guilty of any crimes against our humanity, of which they spout like rumsfeld in silence to torture, and murder those known by all to have committed no offense, through now military dictatorship, of which, true Americans will not allow him to take US further, I will not stand for it, nor should you as a Patriot soldier protecting the flag. I demand again, the immediate arrest of bush and rumsfeld for crimes against humanity, in New York City and Afghanistan, or their rightful execution by all free thinkers in America who own firearms, and can read of our stories not present by the corporate establishment. Mr. bush and rumsfeld expect every single human on our planet to relinquish our rights as living human beings. Mr. bush had no qualms about doing business with the Taliban in August, if they would only, by bribe, collectively sacrifice their interests in serving for their country, as bush has done to America for his entire career degenerating. Mr. rumsfeld asked our living World for the murder of "Omar the Just", for the only reason of requesting evidence. Bin Laden, as we all remember, offered his arrest to authorities upon the showing of any evidence, for a crime he stated was no part of, including all the other baseless claims made by the Clinton administration, who too, could not arrest Bin Laden then either, when he sat in jail for 47 days uncharged waiting. Which is how we know again, Mr. bush is directly involved in NYC, as would too, as have to be, rumsfeld to let the towers fall, but too stupid evil they both are, to not know the wise intentions of America's founding fathers, or myself as the Messiah, Johnny Wizard. For as we knew, all the planted evidence and otherwise, that was publicly available, pointed only to bush and rumsfeld for not seeking who was responsible, only to leave blame quickly as not possible, on a Nation accused without evidence, that had a month prior been planned to rob and murder from for Enron was desperate to hide their crimes against every American dollar. All documented. Kill bush and rumsfeld on site American soldier, and be loved by all as Saviour.

---- A Better Way

Again, we see, corporate America holding no responsibility to the atrocities committed in their own names, while infering they represent ourselves as civilized. Do they address our concerns with rational arguments for funding murders of ourselves as clearly innocent, trying to survive in peace by Justice? No. Mr. sharon, the nazi parasite, told the UN, if any investigations are done with Israeli soldiers, he has demanded none be able to testify in confidence, as he insits by threat to demand his SS officers to be present for every interview, while government officials in Israel have stated in government they have evidence of the nazi troops filling trucks with dead civilians to be buried in Israeli territory. While Peter Bouckaert, from Human Rights Watch in New York, states he sees no more that 22 civilian deaths, caused by 200 missles, and the blowing up of hundreds of buildings occupied and otherwise, unending helicopter machine gun straffing, houses destroyed while families were inside, something like over a hundred ambulances, bodies in the sewers, with a totalitarian nazi government of terrorists, that forbid anyone from entering or exiting the crimes scenes. What are you Peter, maybe you know something the rest of our world doesn't? Now sharon and bush as the terrorists they are with ample evidence, state a nation as people terrorized should go to war against the nations which perpetrate terrorist crimes willfully. But, I ask as the most powerful individual in this Universe as Christ, should I therefor kill police officers in America, and slaughter thousands of innocent civilians for funding the criminal acts of sharon, and the wanton destruction of human rights as Justice for all around our world? No, god damn it, I just demand the immediate arrest or execution of the terrorists, bush, rumsfeld, tommy, and sharon, for attempting still to escape our judical process, while taking the nation of America, indeed our world, for granted as themselves. The evidence speaks for ourselves, and stands irrespective of my personal opinion. Steel just doesn't melt at 815 degrees, but glass and brick does near 2000, though doesn't weight any more than it would luke warm. Atta couldn't have been on board flight 11 with checked luggage as the 'official' CNN unbiased story tells US of a world crime hidden of errors. There was, as is no evidence linking Bin to 9/11, but for a hokey tape found later after the evil slaughter started, a tape that is proven false already, as it seems he would still be left handed, wearing his wedding ring, and the argument he had cosmetic surgery and gained a hundred pounds for the filming, then went back to how he was quickly before then after again, seems just... well.. seems highly unlikely. (But surprisingly to the dim-witted bigot right winger contingent, actually wouldn't reason to matter.) The FAA has contradicted rumsfeld at the crucial contacts, including North America's NORAD, the FBI, the CIA, and to make things even more unbelievable, the DEA has even made pronouncements as Patriot American. While CNN acts as traitors to the American value of Justice for all, by refusing to report on anything relevant. Biological weapon systems are really evil man. There is no effective use in ANY WAR but for to slaughter ourselves as innocent bystanders. (Just spectulating mind you, but, maybe this explains why so many, like almost every mad scientist involved in the field of bio-war around the world, have recently been murdered since I made the scene.) Only bush, the anti-Christ, still stands as evil incarnate advocating using such horrors against ourselves, instead of weeding his evil intent out as a demon to every human of our humanity. I offer myself to any debate through corporate news channels, of which they decide we are unworthy to defend from any angle. (Like Fluoride, Dutch shell, Monsanto, lottery revenues, private banking of public currency, cancer treatments, and repuglican scammers of America's birth right.) Protending that we are not actually being robbed and murdered by the bushmob. Americans who watch CNN we can be sure are deeply ignorant, as the station routinely propagandizes Americans, with massive sharon is normal coverage, so they can be robbed by the bushmob of their life savings and now freedoms, as the American Consitution is being trashed as unprotected as a valueless hemp product. American soldiers are too cowardly to protect American interests as their own families. Like the bushmob partner's theft of billions through Enron, of which in Congressional hearings, nobody wanted to know the pension money is still sitting in the Cayman Islands, ready to be returned to the helpless victims, like an American soldier's family being deemed by Congress, as unimportant to their standard of living. No care right nazi soldier? Just murder innocent third worlders to tell your mother how much you care so for her? While the war criminals, working for Dutch shell, heroin dealers, and the monsters from Iran-contra, rumsfeld and tommy, the nazi fucks, search the third world for people who speak outrage against corporate America funding our deaths by murder through censorship. While I sit here writing as Johnny, waiting for a corporate proffesional to deem me worth topicing on as unstoppable sweet goodness. Look, read of our no counter opinion critics in google 'groups', who publicly call themselves morons or traitors willingly. Spooky dumb I'll tell ya. What a terrible waste of time is going. I'll remind you, this Israeli nazi government of injustice as inequality, is the same that called Nelson Mandella a terrorist, and as their disease spreads further across our lands, they continue to demand Christians and Atheists be not allowed to own property as unbelievers, and also be murdered if sharon should fancy to kill more Jews anywhere, like recently again he did more than likely, smiling his usual madman way, while knowing people are murdered for his repuglican tax give away. Mr. sharon tells us almost on a daily basis, with CNN always prepard to film it, he has no respect for God, nor human life as YOUR own. Jewboy. He bombs villages to kill who he knows to be people! Like bush demands of America today, to have Americans robbed or prosecuted with death sentences requiring no evidence. (It's a secret he tell us!) Americans are dumb to not stand strong for themselves as a once great nation, eh? Instead, as cowards, they steal from us all, our humanity, for repuglican bribe through payments made by the blood of our own families. Explaining why America has the worst health care system of the developed world, and indeed too, an educational system that promotes it's own devaluation. Not teaching the values of compassion for themselves as caring community, that comes at free of charges to be a living human. A democracy suiting the interests in doing for others to seek helping for ourselves as independent, is to become rich in happiness with little work and much play time snoozing. A dream of which on this planet, seems unrealistic as almost unatainable. No, instead, the American value system is based like the anti-Christ bush or sharon's career, how much can you lie, cheat, murder and steal from others for, to measure yourself worthless without stolen dollars? I suggest after we convict bush for the terrorist acts in New York City, we give the billions he's stolen from Americans, to a legitimate government of Justice through equality in Afghanistan and Palestine. We are all the Palestinians being counted without value by corporate dictates ignoring the human subsidies. The Truth is Marching On We continue to witness the American corporate news degenerates refusing to report on the 200 missiles fired into Jenin, the attack on hospitals, police, education and health organizations, along with ambulances. While now getting us ready to except nazi sharon's evilness like he's something close to human. Arafat in Arabic and English has explained with intelligent reason, using terror tactics against innocent Jews, suits not the means of US being murdered as civilians with nazi gestapo excuses, perpetrated everyday against our interest by America's corporate elites, who are only so, by robbing and killing ourselves through censorship. While sharon's anti-Semite parasitic disease forbids all Christians from owning property, of whom as Americans, fund to murder and steal from us as believers. The recent corporate approved news story is that sharon nazi soldiers, who after slaughtering hundreds of innocent civilians state, there only sorry for killing a woman and her two children mistaken for terrorists. But what of the hundreds of other murder victims, and the destruction of government facilities and media outlets? While all the while stealing and pillaging from a people deprived of Justice? No comment, no coverage, no excuses, sharon must diet! Mr. bush, the anti-Christ, has murdered thousands of New Yorkers, and has stolen billions from every American with criminal frauds going undetested by corporate standards. Mr. Dick Armey, as the official leader of the repuglican party, is a bigot as is a functional illiterate, and also supports genocide apparently of us Catholics, Muslims, Jews, and Atheists he wishes to see deprived human rights he vocalized. True, America has the lowest literacy rate of all developed countries, but Christ can't repuglicans at least find a traitor to our humanity capable of pretending to be otherwise? Nope, impossible. CNN demands WE, as humanity, have no rights to know who was responsible for the terrorist acts in New York City, to further sacrifice our lives for their pay bonuses from the traitors in the bushmob and Ted Turner, to steal further from YOUR life and family, while propagandizing our world with their terrorist propaganda, like Bin was threatening to nuke America, while they sit smiling, advocating the murder of those who the entire world understands with the facts as innocent of the crime they accuse ourselves of unbiasedly, as never heard from to speak in defense for ourselves. Email this document to your favorite corporate news office to confirm for yourself why they refuse to ever interview, or hire our world's most popular prolific political writers. Mr. rumsfeld the evil traitor nazi bigot fuck, advocates the murder of those known by all to be innocent, the Taliban, who only several months previous to 9/11 were given 47 million for farmers, and praised for opening girl schools, doing our world so well in only five years regarding heroin, and moving their nation towards a better future for women, albeit slowly in their state of starvation, while also being open to communications, communications that is obvious to everyone, what the bushmob with CNN destest as a method of our self awareness, and potentials for a better future for us all. Like those who demand I be forbidden to defend myself with written word, because I'm so brilliantly alive, by exposing the evil of which is Mr. bush alone, depraved. Just as Art Bell will censor any true American who talks on protecting American values like to protect Americans from being robbed and murdered from. Bigotry reins in corporate news America, while they watch the Constitution and the Bill of Rights go undefended by themselves without care to represent the interests of America being discounted as valued investment. No one has disagreed with our wanting for Justice, though the corporate cultists suggest we have no rights to defend ourselves, call them up and ask them to be ourselves, CJOB for example as the advertised corporate voice of Winnipeg. Not one god has disagreed with my stance on the immediate arrest or execution of bush, rumsfeld, or sharon, but for in mindless ignorance holding opinions based in bigoted propaganda, as not documented or recorded substantiated facts. Only the nazi ariel sharon believes in murdering innocent people as a terrorist he admits to us all publicly, while Arafat sees the flaw in reason as not suiting to fit for any peace for our communities. How can killing, torturing, and destroying the homes of innocent civilians be considered anything but, terrorism? More than 300 buildings and 2000 homes? The death count could be thousands. Mr. bush, the anti-Christ himself, stated he personally as evil personified didn't need evidence to know Bin was guilty, and therefor bush could murder tens of thousands in Afghanistan for a crime he and rumsfeld are responsible for, to steal from us all, the right to freedom, justice, and liberty. But I am not a coward as a True Patriot to my Humanity Mr. bush, and we'll destroy you myself for being a demon of hatred against our God of love, peace, and understanding. Mr. Mueller, the head of the FBI, who meets everyday with George Tenet, the head of the CIA, stated recently after reviewing his quoted statements stated, actually they as officers of our laws have no evidence whatsoever connecting anyone but the bushmob to the terrorist acts in New York City, testifiable through the public information given by ourselves, the DEA, the CIA, and the FBI in our fields, of which Mr. Mueller seems completely absent minded of publicly speaking anyway. Look see for yourself.

''In our investigation, we have not uncovered a single piece of paper -- either here in the United States or in the treasure trove of information that has turned up in Afghanistan and elsewhere -- that mentioned any aspect of the Sept. 11 plot,'' Gee Mr. Mueller haven't you heard of Mike Vreeland with court documents dated and everything? The 61 page DEA report talking about film taken of the Sears tower? Or how about Odigo? Maybe writing done by myself, Johnny Wizard, the Son of Man, two weeks prior? How about the film footage the Japanese have regarding an American missile? Have you seen it? Our RCMP have. How about the ten or so FBI officers now testifing against your athourity to act on behalf of America, due to their attempts to warn Americans before hand, to only do silenced by the bushmob with threats of incarcerations? Is not the stealing of evidence by bush and two bogus FBI badge carriers worthy of your attention? What about the 'put options'? Who shot down flight 93? There can not be five terrorists aboard flight eleven, indicating the tampering of evidence by the two bushmob investigators day one into the investigations. How did Atta miracle sprint back and forth from one side of the Airport to the other, (to check his packed bag of party crackers), without being captured on the cameras, even for a flight he wouldn't have boarded without his passport? Are these not aspects of imformation regarding the Sept. 11 plot? What about eight or more of your suspects being alive and well? As pilots? Who came up with your bullshit story Mr. Mueller? How is it possible to believe bush the war monger's position against Bin without evidence then, doesn't implicate himself and rumsfeld directly as nazi vermin, the most horrendous evil the world has ever witnessed my friends? Hmmm... Kill the terrorist traitors, bush and rumsfeld American Patriot Soldiers. Every country but corporatized America, including every human rights group condemns Mr. sharon as a nazi demon, while bush and his degenerates talk as if there is an argument to be made politely, but so only when we, as civilized are silenced from communicating as if never heard from. Look, all the evidence is in, bush and rumsfeld killed Americans in New York City to impede the impending criminal bankruptcy of Enron, who in August, had Ken Lay frantic and the bushmob threatening to bomb Afghanistan if the Taliban rufused to except repuglican bribes, desperate to give access to run the generators at the bushmob's Enron power plant in India through Unocal, worthless otherwise, and without war would have rightly condemned the bushmob as thieves to every American pension holder and otherwise. American news agencies do everything they can as traitors to American values by silencing any concern that brings reason to our interests, fearing their exposure to be what they is, cowards as nazi sympathizers like Art Bell while leaving us all to die as murdered by the extremely weak and pathetic bush, rumsfeld and sharons with nuclear weapons, the demon monsters, that we must squash as gnats as the living people of this world who hold justice to be of ourselves. I will not sacrifice my soul, this planet, our universe, so bush can steal my life and destroy our worlds in his own contempt for living as himself, pure evil scum. A sell out of evilness against our humanity never before seen in our history is the anti-Christ, our Mr. bush jr.. Mr. bush the terrorist, tells us he wants to kill innocent people while he steals our money, while advocating the support to those who deal cocaine and heroin, and who finance death squads. Kill the traitors bush, rumsfeld, and sharon for mass murders in New York City, Afghanistan, and Palestine American Patriot Soldier, baker, Police officer, truck driver, biker, janitor, and Insurance salesman, as US, the tax payers. ----------- CNN now tells us, without any room for question, nor discussion, the sooty fires at the WTC towers reached 2000 degrees? Place an iron nail above a unsmoldering soot free, oxygen a plenty, Roman candle for some time, (tricky), and see, wow, like magic, the steel doesn't melt even placed directly in the white zone for hours on end. CNN is refusing to stand with our widely understood science, and the FBI in our made public investigations regarding the anthrax from Fort Detrick, and Dr. Philip Zack, (not Muslim), who was caught on video tape entering the only secured storage facility of our world for the Anthrax strain. Anthrax, that Barbera Hatch Rosenberg, of the Federation of American Scientists, who through genetic analysis confirmed, was the Ames strain, identical to the stocks of where Dr. Zack was caught lurking red handed. But no, CBS is able to report that nothing of this is going on presently. We all know bush and rumsfeld hold no responibility to ourselves as humanity to find the true culprits for 9/11, because their both evil murdering nazi facists as traitors to us all, unAmerican, ungodly and scumballs. Mr. bush the anti-American dictator, has criminally stolen over 60 billion American worker tax dollars so far, (and like Enron), from every soldier's grandmother, and sees no other purpose in his hellish dark shallow existence, but to see more suffer for his contempt for ourselves living to be free of his tyranny. Explaining why they neither, bush nor rumsfeld, address my made public, world wide military alegations of their murdering criminal actions, of which to the common man they are both to be found guilty of, and as they both continue to do not so in their own defence of which they have none, goes for to show further, they rob and kill US humans by ignoring our strengths and convictions, like WE don't truly exist, to hide their lies as being cowards, and pathetically weak as individuals, traitors, who will be brought down by the full extent of the rage in which we possess against themselves as guilty of continuing crimes against our freedom to remain democracies.

The Messiah vs. sharon, bush, and rumsfeld

Look, anti-God sharon says his troops need reasurences that the world community through the UN, US, will not criminally charge them for mass murders by hating Jews to be peaceful. Mr. sharon's evilness works to undermine the Israeli people, and props up the terrorist threat, by not arresting criminal sadistic nazi savages like sharon is to us all, an advocate of world crimes against ourselves, trying to be Just like God would, but the news corporations refuse me to be adressed as one with something to defend.

Jesus Christ! Terrorist nazi sharon must be arrested or executed today by the Jews, so does Johnny demand also immediately against the American traitors, bush and rumsfeld for 9/11. Look, if a terrorist crime occurs in New York City, and I say it was secretly committed by a Christian, can I then murder Christian bankers and their families anywhere openly, or steal money from everyone but who I label Jewish, and then escape unarrested, on hopes to increase repuglican corporate bleeding of the masses unheard from? America's corporate cultists, who would report themselves to be unbiased and inhuman, do so by practicing censorship of us screaming for Justice. CNN refuses to report on 9/11 like rational living humans. CNN refuses to report the criminal murders and thefts perpetrated by sharon's nazi regime like rational living humans. CNN refuses to report on the world wide outrage against Israel's anti-semitism like rational living humans. Palestinians are Catholics Muslims Jews, and Atheists. Mr. sharon's government has advocated the murder of those to be known innocent, of which as nazis, pursecute a people who are being openly robbed of their livelyhoods. Because sharon is a nazi terrorist who murders and steals from innocent people willingly, can I then kill or criminally steal from any Jews indiscriminately? When sharon's nazi soldiers would approach YOUR house, or perhaps Chris Mathews' house, and then steal all his families possessions with American tax payed for ammunitions, and then send him to live in a bombed refugee camp with only his shirt on his back, or a bullet in his ass, deprived all legal recourse by a regime that states no belief in Justice for any community as a true democracy would be, would Chris still blame his criminal assault on Arafat's lack of complete control over the solar winds near Jupiter? The Israel Balfour agreement of 1947, demands no criminal displacement of Palestinians. Abraham wasn't just Jewish, and he wasn't just a Muslim, he is a holy man named Abraham, fond of growing hemp. The Book of Daniel states to publicly advocate, as a political body, a transgression against Johnny's Dad, G-D, a transgression against the will of Allah and Buddah, ie: "thou shall not murder, plunder, and steal from US individually as innocent", will cause the forfeiture of the then politically represented as evil parasitic nazi scum, like bigot sharon bush and rumsfeld are illegitimate, as bush was unelected, revealed in this light as today to be against all of US as humanity capable of using communicated reason as intelligent enough to not commit ourselves to funding suicide as a species. Leaving the mass murders, sharon, bush, tommy franks, and rumsfeld, no longer as never baring a rightful claim of equality within OUR living universe of democracies, that without argued contention, exposes the nature of their criminal evilness against yourself as any reader truly. Mr. bush, rumsfeld and sharon would steal from any of our families, as they do to every American today, and murder us as unworthy to themselves, like in New York City, unruling our Laws against such atrocities, that WE WILL NOT ALLOW THEM TO ESCAPE FROM. The MEN of this world will no longer except our families to lie down to die as murdered cowards. The bushmob and sharon have forbidden the UN to count US as dead innocent bodies recently murdered in Palestine, while spouting there are no such casualties to be seen presently. (Why then would they make the effort I ask you to think?) As a Jew, the Messiah orders you to kill sharon, bush and rumsfeld on site for committing mass murders attempting to escape our wrath, that they still wish to continue against ourselves as innocent being silenced by corporate censorship. Any Jew, who after reading this, refuses to protect our great God from murder rampages, by not killing the nazi terrorist sharon who has escaped his rightful prison sentence, will suffer in contempt for God as themselves in hell damned forever, probably. I'll see to it myself, maybe. After the American funded nazi sharon troops executed well over 500 civilians, lined up police officers then shot them dead too as our law providers, including demolishing homes with US people still inside, shooting indiscriminately at everyone, bush the anti-Christ called his role model sharon a man of peace, while getting ready to murder potentially millions more in Iraq and elsewhere, to thwart our demands for his, rumsfeld, and tommy franks immediate war crime arrests or military executions, God help us please. Mr. sharon is a terrorist, who advoates as a repuglican funded terrorist leader, the murder of an oppressed people being robbed of Justice. Hitler murdered people under the same unchallenged argument, measuring all persons worth not as individuals with equal living rights, while preying upon those too weak to know better. That is US out there being murdered in Afghanistan by nazi troops while stolen openly from in America, while corporatized CNN people refuse to inform the public on the American drug lord robber barons bush and rumsfeld, the weak and pathetic evil nazi fucks. There were only two so called 'bushmob assigned' FBI officers investigating the crime leads of 9/11, so now reported by James Woods, the insider actor, gone reborn Christian vampire. Mr. bush and rumsfeld committed themselves to the terrorist acts of 9/11, by both playing their demon parts in covering up the criminal investigations as traitors to every true American soldier, police officer, and fire fighter committed to OUR humanity, AMERICA, Justice, the Nation, The People, the Constitution, Freedom! God Bless America Mr. bush and rumsfeld need to be immediately arrested as traitors for the terrorist acts of 9/11, or to be executed by true American patriots, who believe in Justice for all. We all are painfully aware of corporate America's refusal to report on the relevant FBI, CIA, and DEA investigations, and too, the irrationality of the bushmob's contentions, while forbidding all democratically elected officials from viewing the evidence that they have confiscated, only to thwart our struggles for freedom as legitimate democracies being toppled into dictatorship. In the essay "Muslims suspend the laws of physics" by J. McMichael, we are reminded that not only were the WTC towers built with what architects call a "tube within a tube" design, where the central spindle interconnects iron columns that bare the weight of the buildings, relatively untouched by the explosions, but that steel doesn't start melting until it reaches a temperature of 1538 degrees Celsius, and that burning jet full maxes out at 900. Then there is the fact it took the first tower 104 minutes to fall, and the second, which was struck nearly at the corner, only a mear 47 minutes. Both collapsing with the disintergration of concrete, indicating explosive demolition charges. Also, why would a would be terrorist group of flunky pilots, work diligently to steal ID's of only actual accomplished professional pilots, who we now know to actually be alive as not involved as the bushmob still insists in evil stupidity? Read essay, "Alleged hijackers - Alive and Well." What purpose would the bushmob have to seize as much of the evidence possible and the attempt to stop all the criminal investigations regarding 9/11, but to implicate his and rumsfeld's guilt of treason?

Mr. bush you nazi vermin, you attack my America, you attack US all. American soldiers will not sit back as cowards entirely, and watch you sacrifice our lives as worthless without meaning. I have spoken to the Secret

Service in person, and all who read this can be assured, so has mr bush scumball jr. by the date this is posted, and as he continues to pretend to not have, only further shows his contempt for your life and Justice for our communities. For bush's contempt for the American constitution as Justice and freedom is ungodly to every proud American police officer and citizen the world over. Mr. bush must be arrested for his terrorist crimes in New York City immediately, for the evidence of his and rumsfeld's criminal behavior is overwhelmingly censored by CNN and the other corporate cult cogs, who refuse to protect Americans as ourselves, the dying community falling unheard from. The patriot act will be rescinded, unless anyone can actually provide a counter argument as to it's purpose other than to destroy our freedoms, while the bushmob continues to rifle our pocket books. Who is Who? Hello all. I am a challenger to the corporate establishment of terror, perpetrated by censorship against what is understood by many. Reason is based in relationship to truth, as the absolute is in relation to the infinite. Some ideas are more powerful than others. It is this power of wisdom that corporate automatons like Art bell and Chris Mathews, (suffering from suggestive states of unawareness), who work tirelessly to deny ourselves open communications to save ourselves. Here is an example. Mr. sharon the corporate American funded terrorist, steals people's property, actively with intent murders innocent police officers trying to protect our communities with a rule of law, as well as civilians he argues to murder as a bigot nazi racist. Arafat doesn't support vocally as a public leader, stealing pillaging or murdering anyone of us. Palestinians, as the Children of Israel, are Catholics, Muslims, Jews, and Atheists. Nowhere in any Jewish teaching does it condone blatant crimes against ourselves as God through humanity. Mr. sharon condones the crimes he says he condemns, but as extreme evil is, doesn't understand why killing innocent people as a terrorist is wrong as against God, the Torra of Moses, or that he should be immediately incarcerated for first degree murders, or executed by the real Jews for our own salvation. Mr. bush's nazi America has attempted to refuse the UN to count the dead innocent bodies. All the arguments I've heard through CNN for those who support his criminal actions replayed every day are seriously absent reason as right wing fascist nazis always have been as are so revealed to be in the light of understandings. If someone commits a crime in Nevada, and unfortunately gets away unapprehended, does that mean, as bush or Art Bell from Parump, and sharon would suggest through corporate censorship, we should fund the execution of our police officers? Should bush be allowed to steal all of Art Bell's property, especially if Art Bell wasn't involved in anyway to the criminal matter in question linked only secretly to bush jr? Mr. sharon supporters would say yes, and would kill anyone, because by and large, their mostly weak and pathetic as criminals, as many proud self labeled repuglicans are, and so is why, they in silencing us, steal our freedoms by oppressing ourselves, believing they have gained by making the rest of everyone else lose to their ungodly like character. Art Bell recently advocated world wide on radio, the procedures of the nazi concetration camps as something American soldiers as all militaries should do to their own spouses and families as us victims silenced with Art's cooperation, and as a coward nazi sympathizer, always censors callers who talk truly about Israel, Afghanistan, or the bushmob. Hiding from nobody, he is witnessed deplorable, and a disgrace to all of humanity when advocating the murder of those he knows to be innocent. Why? Because he knows his political position of silence falls as fearfull and ignorant by voiced reason, so he sides to oppress all instead of looking not to, refusing to face his responsibility as a real human being who wouldn't act the way he does inattentively. Art Bell is a favorite to bigots and racists like himself represented, because he'll let them talk about killing and warring endlessly. He's received almost every paper I've written, and still espouses to kill the innocent people in America, Afghanistan and in Palestine through his deliberate denunciation of every plead for Justice and reason as another opportunity for him to oh so disgustingly, shut down US callers as all listen to his contempt for ourselves as humanity struggling to survive his silence but for to plead, "what is truth?", then to hang up on the one answering. Christians are forbidden to own property in Israel. What kind of unequal tyranny based on bigotry is that? CNN tells us without any room for question, that the murderous nazi dogs sharon orders to murder us as people, must be thought of as our law of the land who are unbiased in American tanks attacking civilians, while Art Bell denies the voices of those falling dead as murdered by his own inaction destroying our souls. Sadly, Art Bell is the best thing on the corporatized radio media, and too, will receive this letter, and likely choose to do nothing on behalf of ourselves suffering for his power trip. The Hamas is an American tax funded terrorist group, who received much of their start up funding from the nazis collaborators in the Israeli government, a right wing political group established in the eighties, on hopes to divide the Palestinian peoples complete support for the PLO, so to further bleed American tax payers dead. This is why Israeli nazi soldiers break Hamas leaders out of jails,

or release them as netanyaoo did, but target specifically police officers, as too, women and children. Mr. sharon, like bush, doesn't care who he murders, as long as they believe they benefit from killing your family, and can get away with it by censorship with Art Bell and CNN's help, they as demons will continue to do so against you, as our humanity continues to suffer for not allowing me as John to speak in challenge freely under the banner of Justice as public representative to make most Americans look really inept and stupid politically, because for the most part, you are. Why is it that CNN won't allow me, or Arafat, or any historian to vocalize these well documented facts to Americans, allowing them an opportunity to think on behalf of themselves, but provide the proud war criminal nazi sharon all the space to spout unchallenged as a unarrested mass murderer, who has been convicted by his own government for crimes against humanity? Why? To continue stealing and murdering ourselves, so Larry, Art Bell, and Arron can get big fat pastries soaked in our blood. Mr. bush the terrorist is a thief and murderer, who's con game as the anti-Christ, is a crime against all of life as our nature. What has bush ever done in his entire career for the public's interest? Outside of poisoning, robbing, and murdering Americans. Tick tick tick... I told you, Mr. bush is evil incarnate.
But, mr. bush has claimed that if I as an individual in Canada disagree with himself disgarding our universal Justice system, he will choose as he has, to be all our enemy while murdering ourselves. Mr. bush has pitted himself against humanity as all our Nature, by demanding by threat we relinquish our rights as equal human beings absent Justice for all eternally. Mr. bush the savage and criminal is no diety, nor of a Christ mentality, and certainly has no more rights to life than any one of us others do who he works to steal from. With a little luck Mr. rumsfeld the rotten, the American Dream murdering nazi savage, was reported recently to state yet again, that mindless American soldiers don't want to take prisoners, only murder them, or by leaving savage lawless heroin dealers to do so. Prisoners as innocent police officers who were protecting their communities to the best of their growing better as the third world abilities. Did you hear? The nazi american troops will not, as they haven't, be providing any security to the area, but to guard workers who are putting in bush jr.'s 'export only' oil pipelines already, robbing all of Afghanistan openly, how deceived does bush think you are to be? Gee eh? Mr. bush threatens to kill the innocent people of Afghanistan in August because they refused to take bribes like a repuglican, and insisted on making the better choice on behalf of their nation. Then 9/11. Mr

bush doesn't want anyone to see the evidence that implicates himself and rotten rumsfeld, (the Enron share holder), almost entirely all evidence available, then tells us as the anti-Christ, we don't need any evidence, for we know without thinking who is responsible under his criminal dictatorship absent Justice Infinite. The Taliban, er.. no, the al-Qaida, er.. no, just any civilians. Who is an al-Qaida? Do they walk around with a neon sign above their head? No, all I know for sure is their primary political position: american corporations shouldn't be allowed to fund military dictatorships, while murdering enslaved innocent civilians stealing our livelihoods. Who believes they should be murdered for holding such a thought? Tommy franks does. Tommy franks who targets almost entirely unarmed civilians, poor people, women children he don't care, would tell you, as he has on CNN, he doesn't know why, only but that he actually enjoys murdering practically defenceless people by the tens of thousands as a serial murderer while not following any rules of Law, making him believe he's actually human, when I personally would slay him today as a monster happilly, as would any other real man of hounor and dignity. He tells us he wants to go into Pakistan to bomb civilians that he suspects, without any evidence, to be worth murdering, because he thinks it makes him oh so fucking powerful. Tens dollars Canadian I'm offering for his immediate death sentence to face the criminal convictions he thinks WE'LL let him continue getting away with while we all fall down dead, deprived, unheard from. But shoot, American soldiers refuse to put their lives on the line to protect freedom for Americans, and instead, side to murder and steal from the desperately poor and near starving, killing on behalf of Dutch shell(unocal-contra), which explains why they're so fucking stupid, as dim-witted repuglicans, as the American nation's tax paying public is being robbed left, right, and center as to what they really kill ourselves for. Cowards. Can they defend themselves with reason for being so evil? No. Can they tell us how they live with themselves knowing that Mr. Atta received 100k as terrorist funding from bush friends at the State Department? No. Can they tell us why they refuse to protect the never till now heard from GOOD CIA officers who uncovered bush buddy Krongard's direct connection to having prior knowledge of the towers falling? No. How about fellow American Navy Lieutenant Mike Vreeland? Are they willing to protect a fellow officer, a true living American patriot, brave and strong, who reports in Canada that the bushmob knew of the terrorist acts of NYC, in August? (Mike reported in AUGUST to authorities and reporters in CANADA as an employee (documented as proven) under rumsfeld. No they can't. How about protecting employees at the FAA, as too, at several American Air Force Bases? No, they'd turn against their own brothers, to leave them die as murdered. Why? Because they are cowards I tell you, and pathetic to all who know the facts they hide from regarding bush's criminal escapades, and my simple wanting as a human being to be addressed by the public news corporations. Like why wouldn't CNN dissprove my world wide statements I've made to all military officers, on the demanding conviction of bush and rumsefeld? Huh? So, instead of standing proud under God as true men, protecting the American flag as Justice and Freedom it once did represent symbolically, they advocate the censorship of our truth to be spoken, (wanna be, bank cult CNN members giving their life savings to Enron) the destruction of the American Constitution, the murdering of individuals fighting for Justice, and stealing poor boy Johnny's Amiga computers even, working to deny freedom from themselves as all others they leave US undefended until now, because real American and Canadian soldiers, brave RCMP and too, all local police detachments, as sparse and rare as we are, who can almost read and otherwise, are starting to get really hurt feelings over bush, rumsfeld, and tommy not thinking we're prepared to defend our OWN families against nazis who wish to deprive our humanity of our humanity, still bound by Law to protect our freedoms to do or die. Those three bastards need to be immediately arrested, tried and convicted, or shot smiling as traitors to America who in whole as ourselves, are stilling with an anger growing focused as unfearful and ready to demand, at the very least, an oportunity to allow me to face any polite debate on OUR CNN television airwaves, (bush you traitor nazi murdering savage, face me), regarding these important, why are we murdering innocent people, issues. Mr. sharon the parasite, advocates stealing peoples property, kills police officers and civilians willingly as a demon leader hell bound, funded by the American tax payer. Would you support something that would take your house and all your property, and then send you to live in a camp deprived equals rights as a human being? A Catholic? Chris Mathews and all CNN staff would willingly, and then would blame Arafat for it because he was unable to stop a crime in New York City. Hey Chris, CNN? Why don't we just blame bush for all the crimes that take place in the world, because we all know as it is, bush doesn't do anything for the American people, but deprive ourselves liberty, freedom and Justice directly on purpose. It would seem Chris would likely support the execution of bush, now that he publicly thinks about it in these real word terms, eh? Well, we can be almost certain the MSNBC censors will surely censor this paper as not read by us masses, so please, help yourselves by breaking this through to the other side, to demand our voices heard across the great divide. You either support Justice for ourselves as freedom to be, or your going straight to hell without your own liberty. You think I, as Johnny, am joking about this?

Those who have nothing to hide, hide nothing.

This paper outlines the direct connection of the bushmob to Enron's desperate need of a contract for LNG, as an attempt to escape a criminal bankruptcy. Freedom is only garnered through Justice for all equally

Nobody deserves to be murdered, but a murderer escaping to recommit

"Patriotism is the last refuge of a scoundrel" wrote Samuel Johnson, and he wasn't just mixing words. Patriotism is not about mindlessly as cult slaves obeying bush the unellected nazi fascist criminal dictator, it is about protecting freedom for all as democracy demands by law. Ours. Mr. bush has said that if we, as Nations, don't agree with himself as world dictator, removing the guiding principles of constitutional Justice as freedom for all instills, while actively destroying America and murdering innocent people for no crimes who struggle now only to survive from his criminal tirades, advocating torture while declaring wars against anyone poor and unrepresented, with a complete disrespect for all human life, and our courts of Law, has clearly stuck himself to be our enemy everywhere, as being evil personified, which inextricably demands his immediate incarceration for the crimes he is committing against ourselves as a true terrorist without question, no? The bushmob desecrate the ideals of freedom, Justice and democracy garnered by truth as our own being to be individuals, and is exalted by CNN claiming to be representing ourselves while watching us be robbed and murdered as stolen from openly. Mr. Turner, you have terribly disappointed our world in this great time of need for ourselves as humanity.

Again, all relevant evidence, circumstantial and otherwise, regarding the WTC terrorist act, points to the bushmob, and rumsfeld especially. Flight 11, all ticket sales are accounted. How did terrorists board without purchasing tickets? No, the airline industry did not take the names off the lists on Sept. 11, as too on the 12th they confirmed so with a small correction, but if they had, how then would, or could, the desperate doubter explain strange flight 77 from the same company, which does leave room for terrorists to be on board with the given total. Oh... I think I know. Two flights had duped terrorists hired by the bush wrecked state department, explaining the State Department connected money transfer discovered by the good FBI to the head terrorist, Germany's Mr. Atta, unreported by the Commi Nazi Network of course, showing a belief on Atta's part, that he would not die with the top secret arrangement he had made with the bushmob privately, explaining why the bushmob had his passport in their possession secretly, and why Atta couldn't have checked in with baggage. (Ya right, he's gonna pack a jet fuel consumption calculator and a video titled, "How to fly a jumbo jet airliner in twenty minutes for dummies" left behind of all places in baggage, explaining the secret bushmob audio tape still to be never released where Atta is heard mumbling, "Jeeze, where's my lucky shirt?" and, "Does anybody here know who's flying this thing?") The $100,000 didn't go far, and Atta clearly wasn't a devote Muslim, as in the bar he drank vodkas and flashed a huge wad of hundreds and fifties to the manager, and everyone else in yelling distance, bragging how much the bushmob had paid him stupidly to do so, for a flight he couldn't possibly have boarded as a viable pilot or passenger. Also, why need carry his passport loosely as needing to remain unnoticed, if he didn't buy a ticket, nor planned to travel anywheres, if he somehow magically just appeared on the plane in mid-flight after an all night bender with hookers? Also, none of the four flights easily indicated that they had been highjacked, while the transponders were all turned off by code from inside the locked cockpits, at roughly the same time as if by automation, with flights not changing their flight course for as long as fifteen minutes, like no passenger ticketed terrorists aboard flight 11, ("Hey Atta! check out the view!", or "You left the manual where?", or "Gee, thank God you have the final draft, suicide letter still with you for when we burst into a fireball."), as too, the 200 mile precisely aligned trajectories, without HUD, do attest something not quite normal, according to experts in the Air Force with thousands of hours flight experience and some chaos theorized war gameroom background, and elsewhere, who know of bowling a perfect game while blindfolded, using a checker. Flight 77. The planted terrorists failed to highjack due to the fact, the plane was returned to control of the real pilot who managed to use communications after a fifteen minute fight for something. Conversations that the bushmob confiscated. For after 77 changed course in the dramatic after some struggle for the controls, it then returned to it's original flight path, and okayed, but, not for long, for now they knew inside information.

"No, I wanna fly this plane according to procedure while you guys fight a fair three round fight." or "You say planes have actually flown into the WTC towers?" or "Let's just pretend we're the real pilots, and maybe no one will notice?" But shut off transponder only then? was it on again, or had it never been off before? If the terrorists were subdued, or gave up by showing their red bomb boxes only contained confetti, how do they so quickly take the pilots place, (who had just been last near for calls after returning to normal), to push the codes? This is why the bushmob took the tape. CNN tells us rumsfeld says the FAA didn't contact NORAD until 9:25, while at the same time, CNN also tells us controllers who handled 77, knew it had been highjacked at 8:46. Also, explaining the now no longer strangeness of why bush desperately ran to confiscate those airline videotapes of the passengers boarding flight, not thinking to know we now know who they all were. (Maybe things didn't go exactly according to his evil nazi plan?) Truly brave American soldiers would arrest bush and rumsfeld by the end of a loaded ready to fire rifle, and any other who stand to stop us from viewing our evidence available. Why, that's called obstructing Johnny Wizard. Also, consider this, the thought to necessitate the order of the terrorists to force passengers to use cell phones as secretly planned, two flights, (Time magazine Sept. 24 - Flight 93 "We've been highjacked. They're being nice.") but make no declarations on behalf of themselves leaving no point for departure? With a communication plan not controlled from the air perchance? Ah, but not on flight 11 or 175 where terrorists weren't present, as again, every passenger accounted, but no calls? Only one not talked about, because it doesn't fit with the bushmob lies. Flight attendant Sweeny was reported as the only one I am aware of to make a cell phone call over the entire hour on flight 11, or 175, to the ATC at Boston, giving seat numbers to highjackers that were not on board as registered ticket holders, (so how did she?) nor even sitting where Meuller lies, who in so doing, disputes she made the call to know factually. Makes no sense to me also, and CNN, we can be sure, will do nothing for the Americans who lost their lives over the senseless ignorance of their corporate cult status, that perpetrates this form of dim-wittedness without helping you by interviewing anybody involved in the investigations, to rather let the bushmob continue dictating unchallenged to murder more of us, for staying unawares of our silent screaming. hmm... Any unboarded tickets? Apparently so, for it was reported all purchased tickets were used but one. Another koinkydink regarding the hooting and hollaring, drinking and carousing in the strip bar the night before of the bushmob barkers, is that nobody would PURPOSEFULLY give their lives in a collective criminal operation for CASH payments through the State Department as to go gone dead broke next day, against living life's costly riches freely would they? Did Atta from Germany even attempt to give the 100k to his wife and children for safe keeping? Bingo. Also it has recently been revealed by India's officials, and Pakistan's Foreign Secretary, Niaz Naik, that the bushmob had contacted their governments in AUGUST as himself typically idiotic, as privately to public representatives in a unreported meeting in Berlin to state, he, as the anti-Christ, would slaughter the innocent people of Afghanistan's government, who had ended the heroin trade and were protecting the country while progressing towards equal rights for women,(We will sue CNN for every dollar Turner has.) making illegal, slaves and murder, by forming national laws that five years previous didn't exist, also making it safe to travel, and started opening schools for girls while being starved for doing so good for everyone. Why would bush the demon attempt to do so? To shore up corporate banker support for Enron, who had placed a 3 billion dollar investment in Dhabol Power Company, and needed liquefied natural gas in a big hurry, what with Qatar drying up, and the tripling in price of naphtha. Stuck no longer able to garner partnership with the present pipe deal contract offer for Afghanistan agreed to as well by tribal leaders who Tommy murdered, as too, India's insistence in not being ripped off any longer, by a company the entire nation learned easily to hate over the past decade, and the laundered employee pension money unretractable in the Cayman Islands proved to be of little use apparently, and of course most importantly, also the secretly known to fellow shyster cheney, impending criminal bankruptcy, and we must also not forget bush had excepted 2 million dollars in bribes from Ken Lay, who had his own late night office suite at the White House for their private encounters, so it has been kinda reported, but difficult to believe bush manages to whore so much, but understandable, what with the way he walks so funny. See, the Taliban had excepted a deal from Bridas, a pipeline offer to help rebuild the nation, while the bushmob just threatened to murder all their families for Enron's conspiracy tied to the repuglican nazi regime. Enron could never obtain investors desperately needed, to attempt with capital, to hide their crimes against all the American people, without a binding contract, investors such as from the multi-billionaires in the post WWII charity organization, World Bank, of which as unocal, being typical repuglican, only offered bribes to officials from Afghanistan to hurt their nation they, as the

Taliban, truly believed in working for. As a another example where these nazi vermin relate their uselessness against us all from, Mr. phil gramm lobbied for slave labour at 10 cents an hour for America, while sneaking in a bill for California to have their electricity price quadrupled, for his relatively paultry personal check of one hundred thousand, while California citizens payed billions and billions as stolen from without police protection, as companies fell going bankrupt due to gramm's assault, leaving many out of work to get swindled even further by repuglican corruptions that run rampant through the entire state in other places, without me there to bask on the beaches to give an occasional cameo appearance, while flexing my muscles to the tune of some free beer, a place to crash, and maybe pretzels, hint hint. Achem. On the morning of the fast paced Sept 11th, bush was aware of something special in NYC that he would comment on as asked SPECIFICALLY he stated while leaving his hotel room, on his way unswavered directly to hear about goats from school children by nine, as it was reported his comment to be so nationally, on ABC News with Peter Jennings reporting on the terrorist highjackings. While we now know according to the FAA's official report, that at 8:20, officials were made aware of the unprecedented emergency while channelling through authorities, (the bushmob as rotten rumsfeld through CNN speaks nothing about it saying, all the FAA employees are lying, and don't keep watch professionally) and according to the criminal indictment against the bushmob filed by Ilarion Bykov and Jared Israel available at www.emperors-clothes.com, the Secret Service are kept more informed than anyone concerned with bush's safety, so, you'd figure, would have made bush aware of all four flights, since he was already familiar with one important thing going on in NYC, that he would talk to the media about directly later as massed for it, right? (Perhaps someone should ask Andy?) Bush was also reported to receive a call in his motorcade about the horrific event, with him also confirming to witness the tragedy of flailing bodies from the epicenter of disaster, you know, the WTC towers, commercial airlines thing?, school television sets we presume existed that he left only a moment to thought, as he then quickly entered smiling nonchalantly, a different world stage, the class room unshaken, without thought to think he may have been confused earlier to then attempt seeking clarity, no, he sat for 25 minutes unalarmed, chit chatting like nothing was happening, just as we rehearse, and as disturbingly deceived evil as ever to be believed, as anti-Christ he is it would seem to be. He later after tinking tried as dumb as he is, to deflect his gruesome macabre conduct, by suggesting he had learned only of the doom just prior to entering the classroom, where he immediately without thought, quickly attributed the disasters to pilot error while making a funny, while completely dismissing his concern as not even present for the loss of innocent American lives, bankers even, (then, before, and now he'd even tell you unblinking, "What?"), just like the tens of thousands as children in Afghanistan, and the terrorist crimes he advocates in Palestine, as he then pressed on to more urgent matters regarding his press op cover up. Did you see his media reaction in front of the classroom, when he heard the news for the forth time officially that morning, as again, he even admitted to actually visually witnessing some of the devastation before that moment, and that only then, had it become a serious matter to change, or not change his demeanor? Stuck he was then, with no mind to ruse, er.. time to snooze, Arg! What was the cue? Errrch... If he moves with priority interest as concerned openly honest public figure, as he knows a legitimate President would have been to first learn of such carnage, THE MONTH BEFORE IN AUGUST, why not previous before he left his Hotel room with a television? Outside the Hotel? In the motorcade? With school staff as you'd figure would have been present too laughing, no? Instead he stayed as he had been to give no orders publicly, nor attempt to make public inqiries, but to listen with such unbelievable absolute devotion, equating a beautiful child's story, as if it were Jesus from the heavens himself, speaking directly on the living Nature of our Universe... Okay, maybe we won't be able to convict him on that, but, if that isn't worth enough salt to be considered newsworthy, how about when bush said he didn't hear of the towers until he was at the school building, nixing the recorded comment reported on by John Cochrane of ABC News with Peter Jennings, that bush made a noise saying that he was importantly aware of something in NYC to speak directly on later? Or how about at the memorial, when he publicly stated it would take two whole hours to read the names of those he would without thinking, murder as innocent for Enron he told India and Pakistan in August similarly, so he would just read the titles of companies to say Grace, then would press on to more urgent matters.

"Crime is terribly revealing. Try and vary your methods as you will, your tastes, your habits, your attitude of mind, and your soul is revealed by your actions." - Agatha Christie

-----

March 11, 2002 Too many loose ends... By Barrie Zwicker

... Yet at 6:30 the evening of September 11th NBC Nightly News, along with many outlets, reported: "It was after the attack on the Pentagon that the Air Force then decided to scramble F-16s out of the DC National Guard Andrews Air Force Base to fly ... a protective cover over Washington, D.C." ...

Joint Chiefs of Staff, General Richard Myers testified to the Senate Armed Service Committee of Sept. 13th, that no fighter planes had been launched until after the Pentagon was hit. CBS reported the next day, three days after the event took place, that everyone in the media and government as Myers, who of all would surely know as much as anyone with the paper work he had to prove it, including also highly respected employees at Andrews Air Force Base, and at New Jersey, were all lying without explanation nor reason to, and that at 8:44 two F-15s scrambled from Otis Air National Guard Base on Cape Cod, and were racing to New York at less than 300mph, below 20% throttle, to arrive way too late from over a hundred miles away, making the 'official' CNN story implausible. Although, the FAA has stated that it, as required by statute, and rehearsed for decades as practiced, drilled, and executed flawlessly, alerted military authorities in Colorado, throwing the command to rumsfeld's chain at the first sign of a possible high jacking, and did not sit staring at radar for 29 minutes, then yet again for another 20 twiddling through the manuals as bush would have us believe without suggesting. The attackers clearly did not act alone, as rumsfeld fights to threaten us with murder to think anything but his assuredness of who are the evildoers without evidence available to us all as facts to speak for ourselves, which to the trained observer, incriminates himself as suspect on the purpose. (None of even the how would anyone know who 'suspects' without having purchased tickets, are al-Qaida, nor from Afghanistan, according also to the FBI's Mr. Mueller, who in his knowledge of evidence as it pertains to criminal conviction required for our civilization stated, only "one --->--- OR ---<--- more" might.) Showing a cowardly fear nullifying judicial procedure, by swaying the numbed corporate automatons to think likely as machines, while not searching nor speaking to give reprimands for correction, which would be done as normal, if rumsfeld wasn't directly responsible for the crimes himself as nazi traitor. Why else? Because real soldiers as American employed at Air Force Bases have whispered behind our locked corporate news doors, with no place to speak openly as national, being corporate news is taking none of our phone calls, as Americans are generally broadcasted to be illiterate and cowardly because generally they seem to be that way actually, as I too, still haven't been addressed as someone with something to say by our professional, they know us better than ourselves, news standards. However, I am presently working desperately with many at CBC for an up coming let's slam Johnny documentary, or possibly even a legitimate news story, and others in the alternative media are slowly opening up channels of communication by returning my phone calls, of which, you as well, could do the same in our name. The universe is turning, take hold somewhere. As I was saying, real soldiers as American employed at Air Force Bases have stated without an ability to be wide open, leaving this point very difficult to confirm as of yet on our part, without jeopardizing ourselves as dazed and confused hopelessly lost nowhere. Example, our media giants we all suffer without answering any of our important questions, airwave savvy broadcasters such as Myers, rumsfeld, Mueller, Ashcroft, Chris,

Arron's -Exclusive Private DumbDumb Club - Arron's

[cnn]

shrub, and the overwhelming cowardice of others to spread this document to feed newspapers, soldiers, and law enforcement officers everywhere, enemy or otherwise, that has so far, found no rebuttals regarding the evidence before us, and rational for Justice to be served as a protection for our freedoms we must struggle to maintain always forever. That stand down orders forbidding any military aircraft taking flight for defensive measures were given out verbally right after the first airliner hit the tower. Mr. rumsfeld and bush's immediate public explanation to us meetin like this', given to surviving American families of murdered police officers, fire fighters, and soldiers everywhere, leaves us by their continuing silence of no statement to counter this extremely serious accusation that demands resolution either way immediately, (or both their right deserts by watering frauds), found recently at a very popular respected web site or two, would make one heck of a NRA town hall gatherin, eh gentlemen? Now, back to Myers in a later different congressional flub. (That I would sight if I could, but a small miraculously unawares group, holding our title of RCMP, has seized property of my own such as computer equipment without officially charging me for writing truthfully, that I've always freely publicly admitted to doing privately through all local news media outlets here in Winnipeg, (that give me next to nothing as political coverage for being critical, scientific, and possessing elementary math skills such as addition and division regarding our public ad revenues) several legitimate newspapers across Canada, and as a secret to themselves even group, only two officers seemed vaguely familiar with deductive reasoning, along with our actual history as humanity, that they had spent two months with overtime pay researching only on how to use Google apparently, are presently pouring through Amiga Basics as we speak, looking not for my well documented claims they balked in secret terror to tell me it wasn't about them as individuals to answer, but to threaten my freedom with their excitement about the prospect to find personal works to use against myself to this world I call home. In darkness they claimed they would not be individually involved professing from somewhere if asked by another playing evil against the wall, and therefor as anyone could be entrapped as victim, would get Johnny on a indefinite termed mental health care rap for being intelligence, they would try, to publicly accuse myself lacking hounor and character, on behalf of the secret service good cop bad cop Don jokingly told me for life, as trapped helpless supporters of cop killers and lottery scammers stealing from our grandparents, just ignoring their jobs, our lives, my written words, that do largely include, my publicly made requests to protect our communities as legal bound claims based in our criminal codes as Constitutional, who as themselves will attempt to stand publicly not to bring attention if afforded the effort of public accusation against myself, pretending to be us they'd suppose eventually, captured in our public arena against me as unworthy. Standing otherwise to Lord over us against themselves. Truth, Justice, freedom and liberty destroy ignorance as injustice, slavery and oppression, like it or not, here come's Johnny with no lawyer. If a murderer is on the loose recommitting, do we not use the required force to stop the transgressor from re-offending? The media is our messenger. Anyway, (Jeepers, I sure can go on eh?) as I was saying, Myers later in another committee addressing the timeline specifically, stated something like:

Oh, I don't know any longer, now that the professional news corporations are dictating our existence without my records, and our democratic governmental testimonies, left me thinking to not bring anything with me as required this time, sorry, no, actually, I forgot why I came here today. Is it over now?

(snpd)

Here I am,

Johnny Wizard

> RITTER PUTS HOLES IN CHENEY'S ALUMINUM TUBES STORY
>=20
> Posted By: Rosalinda
> Date: Tuesday, 10 September 2002, 11:50 a.m.
>=20
> [source: CNN, Sept. 9]
>=20
> RITTER PUTS HOLES IN CHENEY'S `ALUMINUM TUBES' STORY AND
> OTHER LEAKY EXCUSES. In an interview iwth CNN today, former UN
> Weapons Inspector Scott Ritter ridiculed the latest concoctions
> of the Mega crowd to justify an attack on Iraq. Excerpts follow:
>=20
> PAULA ZAHN (CNN): I want to have, hear your reaction to the
> whole range of Bush Administration officials yesterday who said
> .. that Saddam Hussein has been trying to obtain materials to
> build nuclear weapons, particularly trying to buy thousands of
> aluminum pipes that could be used in the manufacture of a
```

> centrifuge and ultimately used to manufacture weapons.
> What do you make of that?
>=20
> RITTER: What an absurd statement. Thousands of aluminum
> pipes, and we're going to go to war over thousands of aluminum
> pipes? Even the IISS report that you cite says that if Iraq was
> to have trying to do uranium enrichment, it would take them many
> years before they could do it. This is patently ridiculous. These
> are aluminum pipes coming in for civilian use. They are not being
> transferred to a covert nuclear processing plant or any covert
> nuclear activity whatsoever.
>=20
> But the best way to figure this out is to send the weapons
> inspectors in. If they, if the United States has this evidence
> that Iraq has these pipes, why not, heck, give me the data. I'll
> come to Iraq, hunt it down and we'll bring it to a close. That
> would save us going to war, killing thousands of people and
> destroying our reputation in the international community.
> We cannot go to war because Vice President Cheney's worried
> about some aluminum pipes. This is ridiculous....
>=20
> ZAHN: Let's talk more about what some say is the only
> independent voice in this whole argument, and that is the
> International Institute for Strategic Studies.... In this report,
> it suggests ... that Iraq could make a nuclear weapon in months
> if it had foreign help.
>=20
> Let me read to you what the conclusion was, that, "War
> sanctions and inspections have reversed and retarded but not
> eliminated Iraq's nuclear, biological and chemical weapons and
> long range missile capabilities, nor removed Baghdad's enduring
> interest in developing these capabilities."
>=20
> RITTER: Paula, what do we have here? Rhetoric? Where's the
> facts? "Enduring interest" in weapons capability? What does that
> mean? What evidence do they cite for this "enduring interest"?
> You know, ballistic missiles. They say he has 12. What, did they
> grow? Where are they? They didn't have 12 when I was a weapons
> inspector.
>=20
> Chemical weapons? Biological weapons? They talk about bulk
> agent in terms of Iraq's biological weapons program. What bulk
> agent? Where did they make it? A bulk agent has a three-year
> lifetime in terms of storage in ideal conditions. The last time
> Iraq was known to have produced bulk agent was in 1990. That
> stuff, even if they held onto it, is no longer viable. So to have
> bulk agent today, Iraq would have had to reconstitute a
> manufacturing base in biological weapons. Where is it?
>=20
> This report is absurd. It has zero factual basis. It's all

> in the Bush administration are going to point to this as

> justification for war....
>=20
> ZAHN: What makes you think that if UN weapons inspectors
> went in now, after not being on the ground for four years, it
> would be any different than the last time around, when Richard
> Butler, who was the chief UN weapon inspector, said the Iraqis
> often moved stuff when they knew you guys were going to be on the
> ground?
>=20
> RITTER: I had been there since 1991 working under Ralph
> Ekeus, when the vast majority of the actual disarmament took
> place. By the time Richard Butler came, we had already destroyed
> Iraq's weapons programs. We were hunting down for, you know,
> missing items, you know, a piece of metal here, some documents
> there.
>=20
> And, yes, Iraq could have moved them, but this does not
> constitute a weapons program. It's illegal, and this is what
> inspectors need to do, come back here, finish the job so that
> Iraq can get on with rebuilding its economy, etc. But, you know,
> Richard Butler knows for darned sure that the Iraqis were not
> moving weapons from his weapons inspectors.
>=20
> The weapons inspectors were trying to get into some of the
> most sensitive facilities in Iraq that dealt with presidential
> security. I was the guy leading these inspections and Richard
> knows that he allowed the United States to use my inspections to
> spy on Iraq, which is why they don't trust the inspection
> process.
>=20
> So let's not bring up Richard Butler. Frankly speaking, he
> has no credibility on this issue.
>=20
> ZAHN: I still don't understand why you think the inspections
> will be any different this time around. The administration seems
> convinced that if Iraq had nothing to hide, they wouldn't have
> broken all these UN regulations and they would have allowed
> inspectors in over the last four years.
>=20
> RITTER: Come on, Paula, let's be fair. The administration
> knows that the Central Intelligence Agency used the weapons
> inspection program as a Trojan horse to insert intelligence
> collection capabilities to go after Saddam Hussein....
>=20
> You know, I know that inspections did work. We achieved a 90
> to 95 percent level of verified, absolutely certain
> accountability for Iraq's weapons program, including all the
> factories and associated production equipment. This is why I'm
> just amazed when I hear reports coming from the IISS that Iraq
> suddenly has the capability. Where did it come from? Did they
> suddenly grow factories? ...
>=20
> ... Let's get the inspectors back in, let's get them to

> find out what the ultimate disposition of these weapons programs
> are and if Iraq has no weapons of mass destruction program, thank
> goodness, we just diffused a war. And I think that's a good thing
> worth trying to do.
>=20
> ---------
>=20
> From the well recomended document:
>=20
>=20
> US Intelligence and the Terrorists: Pre-9-11
>=20
>=20
> ... June 6, 2001. German intelligence warned CIA.
>=20
> (A) The German intelligence agency, the BND, warned both
> the CIA and Israel that Middle Eastern terrorists were
> ``planning to hijack commercial aircraft to use as
> weapons to attack important symbols of American and
> Israeli culture.'' This intelligence reportedly came
> from Echelon, a high-tech electronic surveillance system
> used by the intelligence agencies of several nations to
> glean through electronic communications for certain
> keywords. It was first reported by the German daily
> newspaper, Frankfurter Algemeine Zeitung on September
> 13. Its sources were reportedly from the BND itself.
> (Gembeimdienste 6-6-2001; Stafford 9-13-2001; Ruppert
> 11-2-2001; Ruppert 11-27-2001; Ruppert 4-22-2002; Martin
> 1-5-2002; Martin 1-16-2002; Thomas 5-21-2002)
>=20
> According to Gordon Thomas (5-21-2002) of Global -
> Intel, the original source of information actually came
> from Israeli Mossad agents operating in the U.S. who
> had infiltrated al Qaeda. According to his account the
> Mossad also informed British and Russian intelligence
> about the attacks, who then in turn notified the CIA.
> Thomas's sources are allegedly informants within the
> Mossad itself.
>=20
> As of April 22, 2002, no challenges to this information
> has been reported. ...
>=20
> ------
> Also, it has also been aledged that the German
> embassador Ischinger, On Monday 6, August, 2001, had met
> bush personally, and during that meeting, the Bundesamt
> fur Verfassungsschutz [German domestic secret service]
> and BND [Bundesnachreichtendienst, German foreign secret
> service] finding was once again reiterated in person.

>=20
> ! ! ! ! N E W S F L A S H ! ! ! !

>=20
> September 12, 2002 NewsNight with Arron Brown
>=20
> Scott Ritter - "The job is to disarm Iraq, not to
> penetrate Iraq to take advantage of the unique access
> enjoyed by the inspectors to go after Saddam. The
> United States took advantage of the information we
> collected, and also used the weapon inspections as a
> Trojan horse, inserting a signals intelligence operation
> which was used to collect information about the security
> of Saddam in a manner that was totally inappropriate,
> and had nothing to do with disarming."
>=20
> Richard Butler - "I was in meetings with United States
> officials. This isn't some great Revelation. Where I
> rejected what they proposed, on this ground, That my
> mandate was to seek to disarm Iraq. And were our
> program, to be used for other purposes, to seek to
> change the government in Iraq, or national purposes, the
> interests of the United States, then THAT WOULD HAVE
> VESICATED, SHREDDED, WHAT WE WERE ABOUT."
>=20
> Scott Ritter - "On seven separate occasions from
> November 1997 to August 1998, with inspection proposals
> signed by Richard Butler, authorized to proceed in Iraq,
> the United States intervened to manipulate these
> inspections, stop them all together, to alter their
> timing, Richard Butler succeeded to this"
>=20
> Mr. Butler, did not refute, with his repeated
> opportunity, Ritter's documented as fact, with the paper
> work to prove it, allegations of american corruption
> succeeding, in fact, repeatedly, Butler refused to
> answer the direct question, on weather, he, Mr. Butler,
> abdicated his responsibility to our world community, and
> sided instead to bow as a fascist coward to CRIMINAL
> american sabotage regarding the U.N. resolution
> inspection's process.
>=20
> Gee, no wonder Saddam has concerns for his people...
>=20
> A worthwhile note also, is during CNN new briefs on
> Saddam's recent comments, never once was it said, that
> Saddam alleges to our world, bush murdered New Yorkers
> for financial gain, as he did factually claim, and I do
> too, as the evidence is unmistakable. Mr. bush, the
> super evil anti-Christ, and too, Mr. rumsfeld, the
> sadistic nazi dumbfuk, must be immediately arrested, or
> executed by Patriot American Believers, so we may begin
> to get this PUBLIC court case regarding the facts on the
> mass murder of AMERICANS under way. I wanna lead the
> prosecutor's team!!! (I am now officially excepting
> book offers.)

>=20
> ----------
>=20
> Johnny Wizard Here To Tell It Like We Is
>=20
> So, the bush regime knows that Saddam has no nukes, but
> as any person could, maybe at sometime in the future
> would target general populations, of which Saddam has
> stated to be rationally stupid, immoral and evil. A
> tactic that bush, as america, says without pause to
> reflect, would do so in our stolen names is plausible
> with him in power as a degenerate. The bush regime also
> thinks Saddam does indeed have biological weapons, and
> has so for decades but never used them, as the only
> affordable balance to the militarization of the region.
> Namely, to counter the Israeli government's corrupt
> political position of American funded bigotry and
> lawless behavior, on claims God gave them a right as
> criminals apparently, to deprive Christians a right to
> live justly, to own property, or use public roads even,
> and that most of Iraq should too, be stolen by force
> like hitler did, as hitler did measure also, all Jews,
> by the same level of intolerance, ignorance and
> barbarity sharon does of US as Palestinians, you know,
> Catholics, Muslims, Jews and Atheists, absent love for
> ourselves as understanding, godly, and principally
> innocent until proven otherwise. Mr. sharon is not
> Jewish, nor is anyone else allowed to practice as such
> in the Likud party. But anyway, Saddam is no Saint,
> however, no evidence exists that Saddam has ever used
> bio warfare weapons on his own people, while Our Mr.
> bush Jr., is documented factually, as a murdering demon
> of evilness clearly paraded before ourselves by
> corporate command, as a supposed representation of OUR
> civilization's true will. As Our Mr. bush Jr. works
> diligently to destroy our lives through fraudulent
> means, counting on US not trying to save Ourselves by
> following the truth to set US free. A repuglican who
> without laughing, demanded law enforcement agencies not
> follow the ample criminal evidence to arrest the true
> perpetrators of 9/11, but instead, urged the closing of
> investigations, while top secretly, implicated bin Laden
> without evidence he couldn't divulge, of which the
> British government ended up doing so for the love of our
> selves, comprising of only, general maybe if's, of which
> only could, can, and does, jeopardize bush, cheney and
> rumsfeld by taking such a secret, now public position
> against our interests to kill us as the innocent with.
> Which is truly why bush rumsfeld and cheney are
> warmongering as despicable savages. 5 billion dollars
> in humanitarian aid is being blocked by the bush regime
> to enter Iraq, like food and medicine. The bush regime
> demands children be starved and not receive treatments

> for ailments, such as aspirin for headaches, or as
> cancer from the devastation the families of Iraq are
> still suffering through, since the last time a bush's
> american criminal military force dumped tons of
> radioactive waste in the region, while murdering
> indiscriminately ourselves as anyone, because
> principally, toxic American soldiers, like the American
> people, hold the title of the highest illiteracy levels
> of the developing world, which brings them as
> consequence, the worst health care providers to
> themselves as discounted, corporately mandated as
> unworthy to understand their own behaviors, so they can
> be even further rooked as shysters. Over two million
> people have died directly because of American aggression
> against the practically defenseless in Iraq, who the
> bush regime even claims, have little of no power to
> change the political landscape, based in loose tribal
> ethics as protections, that has been as such, for
> approximately 4000 years. And as American traitor war
> criminal rumsfeld proclaimed, since american aggression
> has continued against Iraq over the last twelve years,
> so too, has their economy been devastated, and as
> consequence, the attraction to keep the more literate as
> wealth driven from remaining, has waned. But what can
> bush offer Iraq, indeed to our world my friends? Just
> murder US people for stolen cash profit, is clearly his
> only motivation, as a tyrant dictator far worse than
> Saddam has ever been. Mr. bush indicates he knows
> nothing of economics, or the important function of law
> to protect our societies, so what if he should kill
> Saddam, and maybe a million Iraqi people, then what? He
> hasn't thought that far, and clearly, due to his
> evilness we witness daily, couldn't care less. CNN and

> I am reaching out to you regarding an extremely serious
> life and death, Heven or Hell kind of development, that
> I can only encourage you to investigate on your own to
> form your own conclusions, but firstly some background.
> As you should already be aware, NBC was recently
> provided top secret, presidential directive, war
> strategy documents, outlining a plan to invade
> Afghanistan, with a pre-requisite strategy, of blaming
> Bin Laden for a crime, but providing no evidence,
> existing as these documents did, two days prior to 9/11.
> When NBC contacted the WhiteHouse regarding these
> revelations, not only were they compelled to admit the
> paper work was legitimate, but, what can only best be
> described as pure evil stupidity disguised to nobody,
> confessed to fully implementing. That's right.
> Confessed to implementing a strategy that demands the
> bush regime not follow the actual criminal leads, to
> arrest the true perpetrators, for a crime that hadn't
> even yet taken place, but that bush was prepared for, to
> gain access into Afghanistan for bush and his Enron
> friends to rob even more futher from US all. (According
> to the FBI and the CIA, al-Qaeda is headquartered in
> Saudi Arabia.) In addition to this, if you remember when
> bush told us he wasn't going to rely on the criminal
> evidence persay, but knew top secretly better than
> everybody else does, that for sure Bin Laden was guilty,
> while working to close 9/11 investigations and seizing
> as much evidence from law enforcement as possible?
> Well, the British government, God love'em, has now made
> those documents public, and guess what? There is no
> evidence present in those papers, and the only security
> they seem to jeopardize, is that of our Mr. bush Jr.'s.
> Also, the FBI now inform us, that bush passed secret
> directive, W199I, just prior to 9/11 forbidding law

> enforcement officers from pursuing Bin Laden and
> al-Qeida investigations, of which John O'Neil, head of
> investigations for the FBI resigned in disgust over,
> while also being informed by the BND (Germany's CIA),
> that on June, 6th, 2001, they contacted the bush regime
> stating that they were highly aware of a mossad al-Qeida
> terrorist plot, to highjack American airliners to be
> flown into land marks. You know... Satan forbid, bush
> would of been compelled to actually have to arrest Bin
> for a criminal offence, (as we do remember the Taliban
> offered.) thwarting his intentions, of watching
> Americans been murdered in the thousands, so he could
> then gain access into Afghanistan, prop up the northern
> alliance, who still practice Sharia law, with the bush
> bonuses of selling heroin, and most importantly,
> building this bush Enron LNG pipeline to rob even more
> further from US all. All these points stand as
> documented facts, not opinion, speculation, conjecture
> or theory. However, CNN's blitzer, the nazi
> sympathizing fascist coward, refuses to inform Americans
> about the bush regime stealing their livelihoods, while
> propagandizing the American public, that they instead,
> should as cowards, watch the bush regime murder millions
> more in their own names, while stealing pensions and

> more that 22 civilian deaths, caused by 200 missles, and
> the blowing up of hundreds of buildings occupied and
> otherwise, unending helicopter machine gun straffing,
> houses destroyed while families were inside, something
> like over a hundred ambulances, bodies in the sewers,
> with a totalitarian nazi government of terrorists, that
> forbid anyone from entering or exiting the crimes
> scenes. What are you Peter, maybe you know something
> the rest of our world doesn't? Now sharon and
> bush as the terrorists they are with ample evidence,
> state a nation as people terrorized should go to war
> against the nations which perpetrate terrorist crimes
> willfully. But, I ask as the most powerful individual
> in this Universe as Christ, should I therefor kill
> police officers in America, and slaughter thousands of
> innocent civilians for funding the criminal acts of
> sharon, and the wanton destruction of human rights as
> Justice for all around our world? No, god damn it, I
> just demand the immediate arrest or execution of the
> terrorists, bush, rumsfeld, tommy, and sharon, for
> attempting still to escape our judical process, while
> taking the nation of America, indeed our world, for
> granted as themselves. The evidence speaks for
> ourselves, and stands irrespective of my personal
> opinion. Steel just doesn't melt at 815 degrees, but
> glass and brick does near 2000, though doesn't weight
> any more than it would luke warm. Atta couldn't have
> been on board flight 11 with checked luggage as the
> 'official' CNN unbiased story tells US of a world crime
> hidden of errors. There was, as is no evidence linking
> Bin to 9/11, but for a hokey tape found later after the
> evil slaughter started, a tape that is proven false
> already, as it seems he would still be left handed,
> wearing his wedding ring, and the argument he had
> cosmetic surgery and gained a hundred pounds for the
> filming, then went back to how he was quickly before
> then after again, seems just... well.. seems highly

> unlikely. (But surprisingly to the dim-witted bigot
> right winger contingent, actually wouldn't reason to
> matter.) The FAA has contradicted rumsfeld at the
> crucial contacts, including North America's NORAD, the
> FBI, the CIA, and to make things even more unbelievable,
> the DEA has even made pronouncements as Patriot
> American. While CNN acts as traitors to the American
> value of Justice for all, by refusing to report on
> anything relevant. Biological weapon systems are really
> evil man. There is no effective use in ANY WAR but for
> to slaughter ourselves as innocent bystanders. (Just
> spectulating mind you, but, maybe this explains why so
> many, like almost every mad scientist involved in the
> field of bio-war around the world, have recently been
> murdered since I made the scene.) Only bush, the
> anti-Christ, still stands as evil incarnate advocating
> using such horrors against ourselves, instead of weeding
> his evil intent out as a demon to every human of our
> humanity. I offer myself to any debate through
> corporate news channels, of which they decide we are
> unworthy to defend from any angle. (Like Fluoride,
> Dutch shell, Monsanto, lottery revenues, private banking
> of public currency, cancer treatments, and repuglican
> scammers of America's birth right.) Protending that we
> are not actually being robbed and murdered by the
> bushmob. Americans who watch CNN we can be sure are
> deeply ignorant, as the station routinely propagandizes
> Americans, with massive sharon is normal coverage, so
> they can be robbed by the bushmob of their life savings
> and now freedoms, as the American Consitution is being
> trashed as unprotected as a valueless hemp product.
> American soldiers are too cowardly to protect American
> interests as their own families. Like the bushmob
> partner's theft of billions through Enron, of which in
> Congressional hearings, nobody wanted to know the
> pension money is still sitting in the Cayman Islands,
> ready to be returned to the helpless victims, like an
> American soldier's family being deemed by Congress, as
> unimportant to their standard of living. No care right
> nazi soldier? Just murder innocent third worlders to
> tell your mother how much you care so for her? While
> the war criminals, working for Dutch shell, heroin
> dealers, and the monsters from Iran-contra, rumsfeld and
> tommy, the nazi fucks, search the third world for people
> who speak outrage against corporate America funding our
> deaths by murder through censorship. While I sit here
> writing as Johnny, waiting for a corporate proffesional
> to deem me worth topicing on as unstoppable sweet
> goodness. Look, read of our no counter opinion critics
> in google 'groups', who publicly call themselves morons
> or traitors willingly. Spooky dumb I'll tell ya. What
> a terrible waste of time is going. I'll remind you,
> this Israeli nazi government of injustice as inequality,

> is the same that called Nelson Mandella a terrorist, and
> as their disease spreads further across our lands, they
> continue to demand Christians and Atheists be not
> allowed to own property as unbelievers, and also be
> murdered if sharon should fancy to kill more Jews
> anywhere, like recently again he did more than likely,
> smiling his usual madman way, while knowing people are
> murdered for his repuglican tax give away. Mr. sharon
> tells us almost on a daily basis, with CNN always
> prepard to film it, he has no respect for God, nor human
> life as YOUR own. Jewboy. He bombs villages to kill
> who he knows to be people! Like bush demands of America
> today, to have Americans robbed or prosecuted with death
> sentences requiring no evidence. (It's a secret he tell
> us!) Americans are dumb to not stand strong for
> themselves as a once great nation, eh? Instead, as
> cowards, they steal from us all, our humanity, for
> repuglican bribe through payments made by the blood of
> our own families. Explaining why America has the worst
> health care system of the developed world, and indeed
> too, an educational system that promotes it's own
> devaluation. Not teaching the values of compassion for
> themselves as caring community, that comes at free of
> charges to be a living human. A democracy suiting the
> interests in doing for others to seek helping for
> ourselves as independent, is to become rich in happiness
> with little work and much play time snoozing. A dream
> of which on this planet, seems unrealistic as almost
> unatainable. No, instead, the American value system is
> based like the anti-Christ bush or sharon's career, how
> much can you lie, cheat, murder and steal from others
> for, to measure yourself worthless without stolen
> dollars? I suggest after we convict bush for the
> terrorist acts in New York City, we give the billions
> he's stolen from Americans, to a legitimate government
> of Justice through equality in Afghanistan and
> Palestine. We are all the Palestinians being counted
> without value by corporate dictates ignoring the human
> subsidies. The Truth is Marching On We continue to
> witness the American corporate news degenerates refusing
> to report on the 200 missiles fired into Jenin, the
> attack on hospitals, police, education and health
> organizations, along with ambulances. While now getting
> us ready to except nazi sharon's evilness like he's
> something close to human. Arafat in Arabic and English
> has explained with intelligent reason, using terror
> tactics against innocent Jews, suits not the means of US
> being murdered as civilians with nazi gestapo excuses,
> perpetrated everyday against our interest by America's
> corporate elites, who are only so, by robbing and
> killing ourselves through censorship. While sharon's
> anti-Semite parasitic disease forbids all Christians
> from owning property, of whom as Americans, fund to

> murder and steal from us as believers. The recent
> corporate approved news story is that sharon nazi
> soldiers, who after slaughtering hundreds of innocent
> civilians state, there only sorry for killing a woman
> and her two children mistaken for terrorists. But what
> of the hundreds of other murder victims, and the
> destruction of government facilities and media outlets?
> While all the while stealing and pillaging from a people
> deprived of Justice? No comment, no coverage, no
> excuses, sharon must diet! Mr. bush, the anti-Christ,
> has murdered thousands of New Yorkers, and has stolen
> billions from every American with criminal frauds going
> undetested by corporate standards. Mr. Dick Armey, as
> the official leader of the repuglican party, is a bigot
> as is a functional illiterate, and also supports
> genocide apparently of us Catholics, Muslims, Jews, and
> Atheists he wishes to see deprived human rights he
> vocalized. True, America has the lowest literacy rate
> of all developed countries, but Christ can't repuglicans
> at least find a traitor to our humanity capable of
> pretending to be otherwise? Nope, impossible. CNN
> demands WE, as humanity, have no rights to know who was
> responsible for the terrorist acts in New York City, to
> further sacrifice our lives for their pay bonuses from
> the traitors in the bushmob and Ted Turner, to steal
> further from YOUR life and family, while propagandizing
> our world with their terrorist propaganda, like Bin was
> threatening to nuke America, while they sit smiling,
> advocating the murder of those who the entire world
> understands with the facts as innocent of the crime they
> accuse ourselves of unbiasedly, as never heard from to
> speak in defense for ourselves. Email this document to
> your favorite corporate news office to confirm for
> yourself why they refuse to ever interview, or hire our
> world's most popular prolific political writers. Mr.
> rumsfeld the evil traitor nazi bigot fuck, advocates the
> murder of those known by all to be innocent, the
> Taliban, who only several months previous to 9/11 were
> given 47 million for farmers, and praised for opening
> girl schools, doing our world so well in only five years
> regarding heroin, and moving their nation towards a
> better future for women, albeit slowly in their state of
> starvation, while also being open to communications,
> communications that is obvious to everyone, what the
> bushmob with CNN destest as a method of our self
> awareness, and potentials for a better future for us
> all. Like those who demand I be forbidden to defend
> myself with written word, because I'm so brilliantly
> alive, by exposing the evil of which is Mr. bush alone,
> depraved. Just as Art Bell will censor any true
> American who talks on protecting American values like to
> protect Americans from being robbed and murdered from.
> Bigotry reins in corporate news America, while they

> watch the Constitution and the Bill of Rights go
> undefended by themselves without care to represent the
> interests of America being discounted as valued
> investment. No one has disagreed with our wanting for
> Justice, though the corporate cultists suggest we have
> no rights to defend ourselves, call them up and ask them
> to be ourselves, CJOB for example as the advertised
> corporate voice of Winnipeg. Not one god has disagreed
> with my stance on the immediate arrest or execution of
> bush, rumsfeld, or sharon, but for in mindless ignorance
> holding opinions based in bigoted propaganda, as not
> documented or recorded substantiated facts. Only the
> nazi ariel sharon believes in murdering innocent people
> as a terrorist he admits to us all publicly, while
> Arafat sees the flaw in reason as not suiting to fit for
> any peace for our communities. How can killing,
> torturing, and destroying the homes of innocent
> civilians be considered anything but, terrorism? More
> than 300 buildings and 2000 homes? The death count
> could be thousands. Mr. bush, the anti-Christ himself,
> stated he personally as evil personified didn't need
> evidence to know Bin was guilty, and therefor bush could
> murder tens of thousands in Afghanistan for a crime he
> and rumsfeld are responsible for, to steal from us all,
> the right to freedom, justice, and liberty. But I am
> not a coward as a True Patriot to my Humanity Mr. bush,
> and we'll destroy you myself for being a demon of hatred
> against our God of love, peace, and understanding. Mr.
> Mueller, the head of the FBI, who meets everyday with
> George Tenet, the head of the CIA, stated recently after
> reviewing his quoted statements stated, actually they as
> officers of our laws have no evidence whatsoever
> connecting anyone but the bushmob to the terrorist acts
> in New York City, testifiable through the public
> information given by ourselves, the DEA, the CIA, and
> the FBI in our fields, of which Mr. Mueller seems
> completely absent minded of publicly speaking anyway.
> Look see for yourself.
>=20
> ''In our investigation, we have not uncovered a single
> piece of paper -- either here in the United States or in
> the treasure trove of information that has turned up in
> Afghanistan and elsewhere -- that mentioned any aspect
> of the Sept. 11 plot,''
>=20
> Gee Mr. Mueller haven't you heard of Mike Vreeland with
> court documents dated and everything? The 61 page DEA
> report talking about film taken of the Sears tower? Or
> how about Odigo? Maybe writing done by myself, Johnny
> Wizard, the Son of Man, two weeks prior? How about the
> film footage the Japanese have regarding an American
> missile? Have you seen it? Our RCMP have. How about
> the ten or so FBI officers now testifing against your

> athourity to act on behalf of America, due to their
> attempts to warn Americans before hand, to only do
> silenced by the bushmob with threats of incarcerations?
> Is not the stealing of evidence by bush and two bogus
> FBI badge carriers worthy of your attention? What about
> the 'put options'? Who shot down flight 93? There can
> not be five terrorists aboard flight eleven, indicating
> the tampering of evidence by the two bushmob
> investigators day one into the investigations. How did
> Atta miracle sprint back and forth from one side of the
> Airport to the other, (to check his packed bag of party
> crackers), without being captured on the cameras, even
> for a flight he wouldn't have boarded without his
> passport? Are these not aspects of imformation
> regarding the Sept. 11 plot? What about eight or more
> of your suspects being alive and well? As pilots? Who
> came up with your bullshit story Mr. Mueller? How is
> it possible to believe bush the war monger's position
> against Bin without evidence then, doesn't implicate
> himself and rumsfeld directly as nazi vermin, the most
> horrendous evil the world has ever witnessed my friends?
> Hmmm... Kill the terrorist traitors, bush and rumsfeld
> American Patriot Soldiers. Every country but
> corporatized America, including every human rights group
> condemns Mr. sharon as a nazi demon, while bush and his
> degenerates talk as if there is an argument to be made
> politely, but so only when we, as civilized are silenced
> from communicating as if never heard from. Look, all
> the evidence is in, bush and rumsfeld killed Americans
> in New York City to impede the impending criminal
> bankruptcy of Enron, who in August, had Ken Lay frantic
> and the bushmob threatening to bomb Afghanistan if the
> Taliban rufused to except repuglican bribes, desperate
> to give access to run the generators at the bushmob's
> Enron power plant in India through Unocal, worthless
> otherwise, and without war would have rightly condemned
> the bushmob as thieves to every American pension holder
> and otherwise. American news agencies do everything
> they can as traitors to American values by silencing any
> concern that brings reason to our interests, fearing
> their exposure to be what they is, cowards as nazi
> sympathizers like Art Bell while leaving us all to die
> as murdered by the extremely weak and pathetic bush,
> rumsfeld and sharons with nuclear weapons, the demon
> monsters, that we must squash as gnats as the living
> people of this world who hold justice to be of
> ourselves. I will not sacrifice my soul, this planet,
> our universe, so bush can steal my life and destroy our
> worlds in his own contempt for living as himself, pure
> evil scum. A sell out of evilness against our humanity
> never before seen in our history is the anti-Christ, our
> Mr. bush jr.. Mr. bush the terrorist, tells us he
> wants to kill innocent people while he steals our money,

> while advocating the support to those who deal cocaine
> and heroin, and who finance death squads. Kill the
> traitors bush, rumsfeld, and sharon for mass murders in
> New York City, Afghanistan, and Palestine American
> Patriot Soldier, baker, Police officer, truck driver,
> biker, janitor, and Insurance salesman, as US, the tax
> payers. ----------- CNN now tells us, without any room
> for question, nor discussion, the sooty fires at the WTC
> towers reached 2000 degrees? Place an iron nail above a
> unsmoldering soot free, oxygen a plenty, Roman candle
> for some time, (tricky), and see, wow, like magic, the
> steel doesn't melt even placed directly in the white
> zone for hours on end. CNN is refusing to stand with
> our widely understood science, and the FBI in our made
> public investigations regarding the anthrax from Fort
> Detrick, and Dr. Philip Zack, (not Muslim), who was
> caught on video tape entering the only secured storage
> facility of our world for the Anthrax strain. Anthrax,
> that Barbera Hatch Rosenberg, of the Federation of
> American Scientists, who through genetic analysis
> confirmed, was the Ames strain, identical to the stocks
> of where Dr. Zack was caught lurking red handed. But
> no, CBS is able to report that nothing of this is going
> on presently. We all know bush and rumsfeld hold no
> responibility to ourselves as humanity to find the true
> culprits for 9/11, because their both evil murdering
> nazi facists as traitors to us all, unAmerican, ungodly
> and scumballs. Mr. bush the anti-American dictator,
> has criminally stolen over 60 billion American worker
> tax dollars so far, (and like Enron), from every
> soldier's grandmother, and sees no other purpose in his
> hellish dark shallow existence, but to see more suffer
> for his contempt for ourselves living to be free of his
> tyranny. Explaining why they neither, bush nor
> rumsfeld, address my made public, world wide military
> alegations of their murdering criminal actions, of which
> to the common man they are both to be found guilty of,
> and as they both continue to do not so in their own
> defence of which they have none, goes for to show
> further, they rob and kill US humans by ignoring our
> strengths and convictions, like WE don't truly exist, to
> hide their lies as being cowards, and pathetically weak
> as individuals, traitors, who will be brought down by
> the full extent of the rage in which we possess against
> themselves as guilty of continuing crimes against our
> freedom to remain democracies.
>=20
> The Messiah vs. sharon, bush, and rumsfeld
>=20
> Look, anti-God sharon says his troops need reasurences
> that the world community through the UN, US, will not
> criminally charge them for mass murders by hating Jews
> to be peaceful. Mr. sharon's evilness works to

> undermine the Israeli people, and props up the terrorist
> threat, by not arresting criminal sadistic nazi savages
> like sharon is to us all, an advocate of world crimes
> against ourselves, trying to be Just like God would, but
> the news corporations refuse me to be adressed as one
> with something to defend.
>=20
> Jesus Christ! Terrorist nazi sharon must be arrested or
> executed today by the Jews, so does Johnny demand also
> immediately against the American traitors, bush and
> rumsfeld for 9/11. Look, if a terrorist crime occurs in
> New York City, and I say it was secretly committed by a
> Christian, can I then murder Christian bankers and their
> families anywhere openly, or steal money from everyone
> but who I label Jewish, and then escape unarrested, on
> hopes to increase repuglican corporate bleeding of the
> masses unheard from? America's corporate cultists, who
> would report themselves to be unbiased and inhuman, do
> so by practicing censorship of us screaming for Justice.
> CNN refuses to report on 9/11 like rational living
> humans. CNN refuses to report the criminal murders and
> thefts perpetrated by sharon's nazi regime like rational
> living humans. CNN refuses to report on the world wide
> outrage against Israel's anti-semitism like rational
> living humans. Palestinians are Catholics Muslims Jews,
> and Atheists. Mr. sharon's government has advocated
> the murder of those to be known innocent, of which as
> nazis, pursecute a people who are being openly robbed of
> their livelyhoods. Because sharon is a nazi terrorist
> who murders and steals from innocent people willingly,
> can I then kill or criminally steal from any Jews
> indiscriminately? When sharon's nazi soldiers would
> approach YOUR house, or perhaps Chris Mathews' house,
> and then steal all his families possessions with
> American tax payed for ammunitions, and then send him to
> live in a bombed refugee camp with only his shirt on his
> back, or a bullet in his ass, deprived all legal
> recourse by a regime that states no belief in Justice
> for any community as a true democracy would be, would
> Chris still blame his criminal assault on Arafat's lack
> of complete control over the solar winds near Jupiter?
> The Israel Balfour agreement of 1947, demands no
> criminal displacement of Palestinians. Abraham wasn't
> just Jewish, and he wasn't just a Muslim, he is a holy
> man named Abraham, fond of growing hemp. The Book of
> Daniel states to publicly advocate, as a political body,
> a transgression against Johnny's Dad, G-D, a
> transgression against the will of Allah and Buddah, ie:
> "thou shall not murder, plunder, and steal from US
> individually as innocent", will cause the forfeiture of
> the then politically represented as evil parasitic nazi
> scum, like bigot sharon bush and rumsfeld are
> illegitimate, as bush was unelected, revealed in this

> light as today to be against all of US as humanity
> capable of using communicated reason as intelligent
> enough to not commit ourselves to funding suicide as a
> species. Leaving the mass murders, sharon, bush, tommy
> franks, and rumsfeld, no longer as never baring a
> rightful claim of equality within OUR living universe of
> democracies, that without argued contention, exposes the
> nature of their criminal evilness against yourself as
> any reader truly. Mr. bush, rumsfeld and sharon would
> steal from any of our families, as they do to every
> American today, and murder us as unworthy to themselves,
> like in New York City, unruling our Laws against such
> atrocities, that WE WILL NOT ALLOW THEM TO ESCAPE FROM.
> The MEN of this world will no longer except our families
> to lie down to die as murdered cowards. The bushmob and
> sharon have forbidden the UN to count US as dead
> innocent bodies recently murdered in Palestine, while
> spouting there are no such casualties to be seen
> presently. (Why then would they make the effort I ask
> you to think?) As a Jew, the Messiah orders you to kill
> sharon, bush and rumsfeld on site for committing mass
> murders attempting to escape our wrath, that they still
> wish to continue against ourselves as innocent being
> silenced by corporate censorship. Any Jew, who after
> reading this, refuses to protect our great God from
> murder rampages, by not killing the nazi terrorist
> sharon who has escaped his rightful prison sentence,
> will suffer in contempt for God as themselves in hell
> damned forever, probably. I'll see to it myself, maybe.
> After the American funded nazi sharon troops executed
> well over 500 civilians, lined up police officers then
> shot them dead too as our law providers, including
> demolishing homes with US people still inside, shooting
> indiscriminately at everyone, bush the anti-Christ
> called his role model sharon a man of peace, while
> getting ready to murder potentially millions more in
> Iraq and elsewhere, to thwart our demands for his,
> rumsfeld, and tommy franks immediate war crime arrests
> or military executions, God help us please. Mr. sharon
> is a terrorist, who advoates as a repuglican funded
> terrorist leader, the murder of an oppressed people
> being robbed of Justice. Hitler murdered people under
> the same unchallenged argument, measuring all persons
> worth not as individuals with equal living rights, while
> preying upon those too weak to know better. That is US
> out there being murdered in Afghanistan by nazi troops
> while stolen openly from in America, while corporatized
> CNN people refuse to inform the public on the American
> drug lord robber barons bush and rumsfeld, the weak and
> pathetic evil nazi fucks. There were only two so called
> 'bushmob assigned' FBI officers investigating the crime
> leads of 9/11, so now reported by James Woods, the
> insider actor, gone reborn Christian vampire. Mr. bush

> and rumsfeld committed themselves to the terrorist acts
> of 9/11, by both playing their demon parts in covering
> up the criminal investigations as traitors to every true
> American soldier, police officer, and fire fighter
> committed to OUR humanity, AMERICA, Justice, the Nation,
> The People, the Constitution, Freedom! God Bless
> America Mr. bush and rumsfeld need to be immediately
> arrested as traitors for the terrorist acts of 9/11, or
> to be executed by true American patriots, who believe in
> Justice for all. We all are painfully aware of
> corporate America's refusal to report on the relevant
> FBI, CIA, and DEA investigations, and too, the
> irrationality of the bushmob's contentions, while
> forbidding all democratically elected officials from
> viewing the evidence that they have confiscated, only to
> thwart our struggles for freedom as legitimate
> democracies being toppled into dictatorship. In the
> essay "Muslims suspend the laws of physics" by J.
> McMichael, we are reminded that not only were the WTC
> towers built with what architects call a "tube within a
> tube" design, where the central spindle interconnects
> iron columns that bare the weight of the buildings,
> relatively untouched by the explosions, but that steel
> doesn't start melting until it reaches a temperature of
> 1538 degrees Celsius, and that burning jet full maxes
> out at 900. Then there is the fact it took the first
> tower 104 minutes to fall, and the second, which was
> struck nearly at the corner, only a mear 47 minutes.
> Both collapsing with the disintergration of concrete,
> indicating explosive demolition charges. Also, why
> would a would be terrorist group of flunky pilots, work
> diligently to steal ID's of only actual accomplished
> professional pilots, who we now know to actually be
> alive as not involved as the bushmob still insists in
> evil stupidity? Read essay, "Alleged hijackers - Alive
> and Well." What purpose would the bushmob have to seize
> as much of the evidence possible and the attempt to stop
> all the criminal investigations regarding 9/11, but to
> implicate his and rumsfeld's guilt of treason?
>=20
> Mr. bush you nazi vermin, you attack my America, you
> attack US all. American soldiers will not sit back as
> cowards entirely, and watch you sacrifice our lives as
> worthless without meaning. I have spoken to the Secret
> Service in person, and all who read this can be assured,
> so has mr bush scumball jr. by the date this is posted,
> and as he continues to pretend to not have, only further
> shows his contempt for your life and Justice for our
> communities. For bush's contempt for the American
> constitution as Justice and freedom is ungodly to every
> proud American police officer and citizen the world
> over. Mr. bush must be arrested for his terrorist
> crimes in New York City immediately, for the evidence of

> his and rumsfeld's criminal behavior is overwhelmingly
> censored by CNN and the other corporate cult cogs, who
> refuse to protect Americans as ourselves, the dying
> community falling unheard from. The patriot act will be
> rescinded, unless anyone can actually provide a counter
> argument as to it's purpose other than to destroy our
> freedoms, while the bushmob continues to rifle our
> pocket books. Who is Who? Hello all. I am a
> challenger to the corporate establishment of terror,
> perpetrated by censorship against what is understood by
> many. Reason is based in relationship to truth, as the
> absolute is in relation to the infinite. Some ideas are
> more powerful than others. It is this power of wisdom
> that corporate automatons like Art bell and Chris
> Mathews, (suffering from suggestive states of
> unawareness), who work tirelessly to deny ourselves open
> communications to save ourselves. Here is an example.
> Mr. sharon the corporate American funded terrorist,
> steals people's property, actively with intent murders
> innocent police officers trying to protect our
> communities with a rule of law, as well as civilians he
> argues to murder as a bigot nazi racist. Arafat doesn't
> support vocally as a public leader, stealing pillaging
> or murdering anyone of us. Palestinians, as the
> Children of Israel, are Catholics, Muslims, Jews, and
> Atheists. Nowhere in any Jewish teaching does it
> condone blatant crimes against ourselves as God through
> humanity. Mr. sharon condones the crimes he says he
> condemns, but as extreme evil is, doesn't understand why
> killing innocent people as a terrorist is wrong as
> against God, the Torra of Moses, or that he should be
> immediately incarcerated for first degree murders, or
> executed by the real Jews for our own salvation. Mr.
> bush's nazi America has attempted to refuse the UN to
> count the dead innocent bodies. All the arguments I've
> heard through CNN for those who support his criminal
> actions replayed every day are seriously absent reason
> as right wing fascist nazis always have been as are so
> revealed to be in the light of understandings. If
> someone commits a crime in Nevada, and unfortunately
> gets away unapprehended, does that mean, as bush or Art
> Bell from Parump, and sharon would suggest through
> corporate censorship, we should fund the execution of
> our police officers? Should bush be allowed to steal
> all of Art Bell's property, especially if Art Bell
> wasn't involved in anyway to the criminal matter in
> question linked only secretly to bush jr? Mr. sharon
> supporters would say yes, and would kill anyone, because
> by and large, their mostly weak and pathetic as
> criminals, as many proud self labeled repuglicans are,
> and so is why, they in silencing us, steal our freedoms
> by oppressing ourselves, believing they have gained by
> making the rest of everyone else lose to their ungodly

> like character. Art Bell recently advocated world wide
> on radio, the procedures of the nazi concetration camps
> as something American soldiers as all militaries should
> do to their own spouses and families as us victims
> silenced with Art's cooperation, and as a coward nazi
> sympathizer, always censors callers who talk truly about
> Israel, Afghanistan, or the bushmob. Hiding from
> nobody, he is witnessed deplorable, and a disgrace to
> all of humanity when advocating the murder of those he
> knows to be innocent. Why? Because he knows his
> political position of silence falls as fearfull and
> ignorant by voiced reason, so he sides to oppress all
> instead of looking not to, refusing to face his
> responsibility as a real human being who wouldn't act
> the way he does inattentively. Art Bell is a favorite
> to bigots and racists like himself represented, because
> he'll let them talk about killing and warring endlessly.
> He's received almost every paper I've written, and still
> espouses to kill the innocent people in America,
> Afghanistan and in Palestine through his deliberate
> denunciation of every plead for Justice and reason as
> another opportunity for him to oh so disgustingly, shut
> down US callers as all listen to his contempt for
> ourselves as humanity struggling to survive his silence
> but for to plead, "what is truth?", then to hang up on
> the one answering. Christians are forbidden to own
> property in Israel. What kind of unequal tyranny based
> on bigotry is that? CNN tells us without any room for
> question, that the murderous nazi dogs sharon orders to
> murder us as people, must be thought of as our law of
> the land who are unbiased in American tanks attacking
> civilians, while Art Bell denies the voices of those
> falling dead as murdered by his own inaction destroying
> our souls. Sadly, Art Bell is the best thing on the
> corporatized radio media, and too, will receive this
> letter, and likely choose to do nothing on behalf of
> ourselves suffering for his power trip. The Hamas is an
> American tax funded terrorist group, who received much
> of their start up funding from the nazis collaborators
> in the Israeli government, a right wing political group
> established in the eighties, on hopes to divide the
> Palestinian peoples complete support for the PLO, so to
> further bleed American tax payers dead. This is why
> Israeli nazi soldiers break Hamas leaders out of jails,
> or release them as netanyaoo did, but target
> specifically police officers, as too, women and
> children. Mr. sharon, like bush, doesn't care who he
> murders, as long as they believe they benefit from
> killing your family, and can get away with it by
> censorship with Art Bell and CNN's help, they as demons
> will continue to do so against you, as our humanity
> continues to suffer for not allowing me as John to speak
> in challenge freely under the banner of Justice as

> public representative to make most Americans look really
> inept and stupid politically, because for the most part,
> you are. Why is it that CNN won't allow me, or Arafat,
> or any historian to vocalize these well documented facts
> to Americans, allowing them an opportunity to think on
> behalf of themselves, but provide the proud war criminal
> nazi sharon all the space to spout unchallenged as a
> unarrested mass murderer, who has been convicted by his
> own government for crimes against humanity? Why? To
> continue stealing and murdering ourselves, so Larry, Art
> Bell, and Arron can get big fat pastries soaked in our
> blood. Mr. bush the terrorist is a thief and murderer,
> who's con game as the anti-Christ, is a crime against
> all of life as our nature. What has bush ever done in
> his entire career for the public's interest? Outside of
> poisoning, robbing, and murdering Americans. Tick tick
> tick... I told you, Mr. bush is evil incarnate.
> But, mr. bush has claimed that if I as an
> individual in Canada disagree with himself disgarding
> our universal Justice system, he will choose as he has,
> to be all our enemy while murdering ourselves. Mr.
> bush has pitted himself against humanity as all our
> Nature, by demanding by threat we relinquish our rights
> as equal human beings absent Justice for all eternally.
> Mr. bush the savage and criminal is no diety, nor of a
> Christ mentality, and certainly has no more rights to
> life than any one of us others do who he works to steal
> from. With a little luck Mr. rumsfeld the
> rotten, the American Dream murdering nazi savage, was
> reported recently to state yet again, that mindless
> American soldiers don't want to take prisoners, only
> murder them, or by leaving savage lawless heroin dealers
> to do so. Prisoners as innocent police officers who
> were protecting their communities to the best of their
> growing better as the third world abilities. Did you
> hear? The nazi american troops will not, as they
> haven't, be providing any security to the area, but to
> guard workers who are putting in bush jr.'s 'export
> only' oil pipelines already, robbing all of Afghanistan
> openly, how deceived does bush think you are to be? Gee
> eh? Mr. bush threatens to kill the innocent people of
> Afghanistan in August because they refused to take
> bribes like a repuglican, and insisted on making the
> better choice on behalf of their nation. Then 9/11. Mr
> bush doesn't want anyone to see the evidence that
> implicates himself and rotten rumsfeld, (the Enron share
> holder), almost entirely all evidence available, then
> tells us as the anti-Christ, we don't need any evidence,
> for we know without thinking who is responsible under
> his criminal dictatorship absent Justice Infinite. The
> Taliban, er.. no, the al-Qaida, er.. no, just any
> civilians. Who is an al-Qaida? Do they walk around
> with a neon sign above their head? No, all I know for

> sure is their primary political position: american
> corporations shouldn't be allowed to fund military
> dictatorships, while murdering enslaved innocent
> civilians stealing our livelihoods. Who believes they
> should be murdered for holding such a thought? Tommy
> franks does. Tommy franks who targets almost entirely
> unarmed civilians, poor people, women children he don't
> care, would tell you, as he has on CNN, he doesn't know
> why, only but that he actually enjoys murdering
> practically defenceless people by the tens of thousands
> as a serial murderer while not following any rules of
> Law, making him believe he's actually human, when I
> personally would slay him today as a monster happilly,
> as would any other real man of hounor and dignity. He
> tells us he wants to go into Pakistan to bomb civilians
> that he suspects, without any evidence, to be worth
> murdering, because he thinks it makes him oh so fucking
> powerful. Tens dollars Canadian I'm offering for his
> immediate death sentence to face the criminal
> convictions he thinks WE'LL let him continue getting
> away with while we all fall down dead, deprived, unheard
> from. But shoot, American soldiers refuse to put their
> lives on the line to protect freedom for Americans, and
> instead, side to murder and steal from the desperately
> poor and near starving, killing on behalf of Dutch
> shell(unocal-contra), which explains why they're so
> fucking stupid, as dim-witted repuglicans, as the
> American nation's tax paying public is being robbed
> left, right, and center as to what they really kill
> ourselves for. Cowards. Can they defend themselves
> with reason for being so evil? No. Can they tell us
> how they live with themselves knowing that Mr. Atta
> received 100k as terrorist funding from bush friends at
> the State Department? No. Can they tell us why they
> refuse to protect the never till now heard from GOOD CIA
> officers who uncovered bush buddy Krongard's direct
> connection to having prior knowledge of the towers
> falling? No. How about fellow American Navy Lieutenant
> Mike Vreeland? Are they willing to protect a fellow
> officer, a true living American patriot, brave and
> strong, who reports in Canada that the bushmob knew of
> the terrorist acts of NYC, in August? (Mike reported in
> AUGUST to authorities and reporters in CANADA as an
> employee (documented as proven) under rumsfeld. No they
> can't. How about protecting employees at the FAA, as
> too, at several American Air Force Bases? No, they'd
> turn against their own brothers, to leave them die as
> murdered. Why? Because they are cowards I tell you,
> and pathetic to all who know the facts they hide from
> regarding bush's criminal escapades, and my simple
> wanting as a human being to be addressed by the public
> news corporations. Like why wouldn't CNN dissprove my
> world wide statements I've made to all military

```
> officers, on the demanding conviction of bush and
> rumsefeld? Huh? So, instead of standing proud under
> God as true men, protecting the American flag as Justice
> and Freedom it once did represent symbolically, they
> advocate the censorship of our truth to be spoken,
> (wanna be, bank cult CNN members giving their life
> savings to Enron) the destruction of the American
> Constitution, the murdering of individuals fighting for
> Justice, and stealing poor boy Johnny's Amiga computers
> even, working to deny freedom from themselves as all
> others they leave US undefended until now, because real
> American and Canadian soldiers, brave RCMP and too, all
> local police detachments, as sparse and rare as we are,
> who can almost read and otherwise, are starting to get
> really hurt feelings over bush, rumsfeld, and tommy not
> thinking we're prepared to defend our OWN families
> against nazis who wish to deprive our humanity of our
> humanity, still bound by Law to protect our freedoms to
> do or die. Those three bastards need to be immediately
> arrested, tried and convicted, or shot smiling as
> traitors to America who in whole as ourselves, are
> stilling with an anger growing focused as unfearful and
> ready to demand, at the very least, an oportunity to
> allow me to face any polite debate on OUR CNN television
> airwaves, (bush you traitor nazi murdering savage, face
> me), regarding these important, why are we murdering
> innocent people, issues. Mr. sharon the parasite,
> advocates stealing peoples property, kills police
> officers and civilians willingly as a demon leader hell
> bound, funded by the American tax payer. Would you
> support something that would take your house and all
> your property, and then send you to live in a camp
> deprived equals rights as a human being? A Catholic?
> Chris Mathews and all CNN staff would willingly, and
> then would blame Arafat for it because he was unable to
> stop a crime in New York City. Hey Chris, CNN? Why
> don't we just blame bush for all the crimes that take
> place in the world, because we all know as it is, bush
> doesn't do anything for the American people, but deprive
> ourselves liberty, freedom and Justice directly on
> purpose. It would seem Chris would likely support the
> execution of bush, now that he publicly thinks about it
> in these real word terms, eh? Well, we can be almost
> certain the MSNBC censors will surely censor this paper
> as not read by us masses, so please, help yourselves by
> breaking this through to the other side, to demand our
> voices heard across the great divide. You either

> investigations, to rather let the bushmob continue
> dictating unchallenged to murder more of us, for staying
> unawares of our silent screaming. hmm... Any unboarded
> tickets? Apparently so, for it was reported all
> purchased tickets were used but one. Another koinkydink
> regarding the hooting and hollaring, drinking and
> carousing in the strip bar the night before of the
> bushmob barkers, is that nobody would PURPOSEFULLY give
> their lives in a collective criminal operation for CASH
> payments through the State Department as to go gone dead
> broke next day, against living life's costly riches
> freely would they? Did Atta from Germany even attempt
> to give the 100k to his wife and children for safe
> keeping? Bingo. Also it has recently been revealed by
> India's officials, and Pakistan's Foreign Secretary,
> Niaz Naik, that the bushmob had contacted their

> governments in AUGUST as himself typically idiotic, as
> privately to public representatives in a unreported
> meeting in Berlin to state, he, as the anti-Christ,
> would slaughter the innocent people of Afghanistan's
> government, who had ended the heroin trade and were
> protecting the country while progressing towards equal
> rights for women,(We will sue CNN for every dollar
> Turner has.) making illegal, slaves and murder, by
> forming national laws that five years previous didn't
> exist, also making it safe to travel, and started
> opening schools for girls while being starved for doing
> so good for everyone. Why would bush the demon attempt
> to do so? To shore up corporate banker support for
> Enron, who had placed a 3 billion dollar investment in
> Dhabol Power Company, and needed liquefied natural gas
> in a big hurry, what with Qatar drying up, and the
> tripling in price of naphtha. Stuck no longer able to
> garner partnership with the present pipe deal contract
> offer for Afghanistan agreed to as well by tribal
> leaders who Tommy murdered, as too, India's insistence
> in not being ripped off any longer, by a company the
> entire nation learned easily to hate over the past
> decade, and the laundered employee pension money
> unretractable in the Cayman Islands proved to be of
> little use apparently, and of course most importantly,
> also the secretly known to fellow shyster cheney,
> impending criminal bankruptcy, and we must also not
> forget bush had excepted 2 million dollars in bribes
> from Ken Lay, who had his own late night office suite at
> the White House for their private encounters, so it has
> been kinda reported, but difficult to believe bush
> manages to whore so much, but understandable, what with
> the way he walks so funny. See, the Taliban had
> excepted a deal from Bridas, a pipeline offer to help
> rebuild the nation, while the bushmob just threatened to
> murder all their families for Enron's conspiracy tied to
> the repuglican nazi regime. Enron could never obtain
> investors desperately needed, to attempt with capital,
> to hide their crimes against all the American people,
> without a binding contract, investors such as from the
> multi-billionaires in the post WWII charity
> organization, World Bank, of which as unocal, being
> typical repuglican, only offered bribes to officials
> from Afghanistan to hurt their nation they, as the
> Taliban, truly believed in working for. As a another
> example where these nazi vermin relate their uselessness
> against us all from, Mr. phil gramm lobbied for slave
> labour at 10 cents an hour for America, while sneaking
> in a bill for California to have their electricity price
> quadrupled, for his relatively paultry personal check of
> one hundred thousand, while California citizens payed
> billions and billions as stolen from without police
> protection, as companies fell going bankrupt due to

> gramm's assault, leaving many out of work to get
> swindled even further by repuglican corruptions that run
> rampant through the entire state in other places,
> without me there to bask on the beaches to give an
> occasional cameo appearance, while flexing my muscles to
> the tune of some free beer, a place to crash, and maybe
> pretzels, hint hint. Achem. On the morning of the fast
> paced Sept 11th, bush was aware of something special in
> NYC that he would comment on as asked SPECIFICALLY he
> stated while leaving his hotel room, on his way
> unswavered directly to hear about goats from school
> children by nine, as it was reported his comment to be
> so nationally, on ABC News with Peter Jennings reporting
> on the terrorist highjackings. While we now know
> according to the FAA's official report, that at 8:20,
> officials were made aware of the unprecedented emergency
> while channelling through authorities, (the bushmob as
> rotten rumsfeld through CNN speaks nothing about it
> saying, all the FAA employees are lying, and don't keep
> watch professionally) and according to the criminal
> indictment against the bushmob filed by Ilarion Bykov
> and Jared Israel available at www.emperors-clothes.com,
> the Secret Service are kept more informed than anyone
> concerned with bush's safety, so, you'd figure, would
> have made bush aware of all four flights, since he was
> already familiar with one important thing going on in
> NYC, that he would talk to the media about directly
> later as massed for it, right? (Perhaps someone should
> ask Andy?) Bush was also reported to receive a call in
> his motorcade about the horrific event, with him also
> confirming to witness the tragedy of flailing bodies
> from the epicenter of disaster, you know, the WTC
> towers, commercial airlines thing?, school television
> sets we presume existed that he left only a moment to
> thought, as he then quickly entered smiling
> nonchalantly, a different world stage, the class room
> unshaken, without thought to think he may have been
> confused earlier to then attempt seeking clarity, no, he
> sat for 25 minutes unalarmed, chit chatting like nothing
> was happening, just as we rehearse, and as disturbingly
> deceived evil as ever to be believed, as anti-Christ he
> is it would seem to be. He later after tinking tried as
> dumb as he is, to deflect his gruesome macabre conduct,
> by suggesting he had learned only of the doom just prior
> to entering the classroom, where he immediately without
> thought, quickly attributed the disasters to pilot error
> while making a funny, while completely dismissing his
> concern as not even present for the loss of innocent
> American lives, bankers even, (then, before, and now
> he'd even tell you unblinking, "What?"), just like the
> tens of thousands as children in Afghanistan, and the
> terrorist crimes he advocates in Palestine, as he then
> pressed on to more urgent matters regarding his press op

> cover up. Did you see his media reaction in front of
> the classroom, when he heard the news for the forth time
> officially that morning, as again, he even admitted to
> actually visually witnessing some of the devastation
> before that moment, and that only then, had it become a
> serious matter to change, or not change his demeanor?
> Stuck he was then, with no mind to ruse, er.. time to
> snooze, Arg! What was the cue? Errrch... If he moves
> with priority interest as concerned openly honest public
> figure, as he knows a legitimate President would have
> been to first learn of such carnage, THE MONTH BEFORE IN
> AUGUST, why not previous before he left his Hotel room
> with a television? Outside the Hotel? In the
> motorcade? With school staff as you'd figure would have
> been present too laughing, no? Instead he stayed as he
> had been to give no orders publicly, nor attempt to make
> public inqiries, but to listen with such unbelievable
> absolute devotion, equating a beautiful child's story,
> as if it were Jesus from the heavens himself, speaking
> directly on the living Nature of our Universe... Okay,
> maybe we won't be able to convict him on that, but, if
> that isn't worth enough salt to be considered
> newsworthy, how about when bush said he didn't hear of
> the towers until he was at the school building, nixing
> the recorded comment reported on by John Cochrane of ABC
> News with Peter Jennings, that bush made a noise saying
> that he was importantly aware of something in NYC to
> speak directly on later? Or how about at the memorial,
> when he publicly stated it would take two whole hours to
> read the names of those he would without thinking,
> murder as innocent for Enron he told India and Pakistan
> in August similarly, so he would just read the titles of
> companies to say Grace, then would press on to more
> urgent matters.

My first radio and still my best after 15 years is a radio shack HTX 202 for vhf and HTX 10 for hf. I havew kenwood Icoms and alinco but for a beginner I would suggest a radio shack of your choice.

Alex wrote:

In looking for HTs and mobiles, I looked at the radioshack.com www site and
only saw 1 radio, the HTX-420.  Does anyone know if Radio Shack is still
making and selling other amateur radios?

I would like some amatuer radio operators opinion as to what they think
is the very best vhf/uhf outdoor antenna for the money. Only other
criteria is that it takes up a minimal amount of space, and easy to set
up.
As soon as weather gets a little warmer, i want to set up an antenna
outside bedroom window on the balcony.
Thanks in advance for your replies.

I recently bought the Realistic Pro--95--1000 channel , trunk--tracking
scanner , and im very pleased with it-----having that many channels is a
luxury---also nice to monitor State Police on the 800 band. Also, many
other nice features.
I would like to hear from other pro--95 owners as to your opinions of
this scanner.
Hopefully, you bought yours  while they we on sale for $149.00, like i
did.

Take a good look at the Arrowantenna dual band J-pole. Tidy, little space, very effective, extremely sturdy (built to and have survived many a Wyoming winter) and the cost point is rather surprising.

GIFS?!?!?!

So, what was the story. Was the offender another Ham dork or an
illegal CB-er?

Most people's problems with the code stem from trying to learn it too fast without sufficient drilling before they move on to each new letter. The average person needs about 30 hours of study and practice on the code to hit 5 wpm. Now this is an average. Some will take longer and some will take less.

I would have won money on that one.

For the record, hams are not pleased by the illegal CB operators who put out hundreds of watts when they are supposed to put no more than 5 watts to the antenna.

Also, many of those illegally modifying equipment or building linear amps have no clue about properly building RF electronics to not radiate excessively on other frequencies.

Many hams learn how to communicate to the other side of the world using less than 5 watts, although they are allowed far more power legally. This requires more skill than blasting out 500 watts to talk to someone 20 miles away.

Your CB blasting neighbor could be reported to the FCC. They don't always follow up quickly, but when they do follow through on a case like that, the fines can be significant.

Now that it turned out that hams had nothing to do with your problem,
are hams still "dorks"?

Happy trails,
Gary (net.yogi.bear)

My Icom IC-229H suddenly stopped transmitting. It looks like it is still transmitting, it keys up and it is still pulling in 10 amps from the power supply so where is all that power going? RF output is nothing. Any ideas?

Thanks,
John N7MTB

All one needs to form an opinion for this question is attend the Ham
Fest at the NC State Fair grounds.

If you look on the FCC ULS database (or one of the mirrored sites like
ARRL or QRZ), you will see many Novice and Advanced licensees,
including those who have renewed recently.

The Tech Plus disappeared into Tech, but anyone who has that, or a
Tech with proof of passing the code test, will have what were Tech
Plus privileges.

I was under the impression....under the new structure, NO ONE loses
privileges, but an Advanced renewal would show as General..BUT no lose of
Advanced privileges. Is this true?

No, it will still show as an Advanced.

The only tickets that will show a different description than before are the
Tech Plus ones. Even though they will still have all their HF privileges,

their new tickets will only say Technician.

Ok Dee.....thanks. We have no need for all of these different classes! It
should be like it was in the 30s..ONE license. They got rid of some
confusion in 2000, but it is still ridiculous!

Especially since, in the eyes of some, your Extra ticket only counts
for real if you got it before a certain date.

And I don't just mean Spring 2000.

Happy trails,
Gary (net.yogi.bear)

Oh yeah....many oldtimers will admit.........."we only tolerate you guys"!
Where is the dividing line though. I was licensed way before the codeless
Tech! Lots of attitudes out there, aren't in the postive spirit of the
hobby!

Well I did think that 5 classes was too many but I think one is too few. Three seems just about right.

With only one class, you either have to make everyone take a test that is too hard (i.e. something that combines all the material from Tech through Extra) or a test that is too simple. Either will generate a lot of problems for ham radio. The one that is too hard will keep a lot of good people out. The one that is too simple will result in significant number of people who will not value their license since the work to get it was minimal.

People value what they have to work for but do not take care of what they are simply given. And the principle of working harder and getting more for it is part of the good old American dream. Yes I know it doesn't always work that way in life (been there, done that) but most people do end up better off when they work harder.

You didn't miss much. A beginner's puzzle from an idiot. YOu probably didn't get it because the nerk posted it in HTML and your newsreader wisely refuses to read it. Mine unfortunately does not so I had to sit and wait for tha damn thing to come up before killfiling the ass who sent it.

I agree, it is not in the welcoming, mentoring/elmering spirit of
amateur radio.

There are many "cut-off dates" in the minds of those who feel that new
hams are not as good as they are, generally some time after THEY got
THEIR ticket.

But they are fading away, and are not the future of ham radio. Keep in
mind that about 1/2 of the currently licensed US hams are "no code
Techs", and probably a higher proportion of the active ones.

It's never like it was in the "good old days". But everyone has a
choice whether to be part of the "good new days" or to complaint about
inevitable changes.

Some aspects and modes of amateur radio are less popular, some are
more popular. The spirit of amateur radio still exists, it just looks
different now.

Happy trails,
Gary (net.yogi.bear)

Too often, individuals like N3CVJ and private companies and government officials either see themselves as some type watchdog or are merely seeking to expand their power over others or financial gain. These scurvy folk are willing to sacrifice anyone's or everyone's freedom in order to do so, yours, mine, all of ours. Such Power-trippers are not new to this world or to our country but the patriots and people with common sense who share a dedication to preserving our individual freedoms see the reality of the actions of the power trippers and in effect are not swayed by them. ��It is the desperate individual or when fear abounds, when these scurvy few will find an opportunity to play on our fears....what follows is an attempt to instill ideas, notions, policies, false promises and practices that threaten our freedoms.� People like N3CVJ see this as an opportunity to rationalize their actions as protective and morally correct. The weak swallow the bait. N3CVJ is of the mindset that our country will become as the middle east with bombs in the street..he has on several occasion manifested his paranoid irrational growing fear of anarchy. Power trippers attempt to take such a fear and use it to offer or implement techniques that could be used to monitor everyone or assume that if one chooses to exercise their right to be free from intrusion and the right to be left alone, they must have something to hide. The John Birch Society sang the same song,as well as a few other extremist organizations that seek to erode our constitution. Dave has argued that if one has nothing to hide, one shouldn't care if someone knows everything about you.� Dave misses all points.� His method is not about guilt or innocence.� It's about control that he lacks and sorely wants. It's about relinquishing that control to those like him who wish to control you.� It's a scientific proven fact, and many folks throughout history have employed it: When one knows everything about you, one can learn to control you.� Lastly, Daveys argument assumes those who have your information will protect you and your freedom and never cause you any harm and that government will protect you and your freedom without question or hesitance and any person who would sacrifice that protection must be guilty of some act. Such assumptions are ludicrous, grandiose, illogical, and downright dangerous. To hear them from an amateur radio operator is truly frightening.

My son, KB3GTJ (11 years), is working with me on CW to upgrade his
Tech license to Tech Plus.

I've been told that the "Plus" part only holds, along with the HF
privilages, for 1 year. Is this true?

Your renewed license class will be Advanced. No new Advanced licenses
are being issued, but the Advanced Class does still exist for those
who are currently licensed as such.

No his Technician HF privileges are permanent as long as he does not allow his Technician license to lapse. However if he wants to upgrade to General without retaking the CW test, he must do so within 1 year. For upgrade purposes, the CSCE is only good for one year.

Since the FCC will not be maintaining info on which Technicians do or do not have HF privileges (i.e. passed the code), keep the CSCE stored in a safe place. Make some copies and also save them.

Dee Flint, N8UZE

Folks,
I'm a brand new ham -- I received my license a couple of months ago -- and I'd like to hear your thoughts regarding Amateur Radio's future. I've looked through a few of the 720 posts at rec.radio.amateur.misc on the subject and read an article at http://www.hamradio-online.com/1997/feb/opinion.html about it. I realize this is a huge, multi-faceted subject that already has had much written about it, but I'd nonetheless like to hear what are the trends as of 2003 on this subject.

From everything I've read, it seems to me that the central question is what can be done generate interest? I'll answer it from my perspective, but I'm (unfortunately) pretty sure that I'm an anomally in the world of (formerly) non-hams. I was a communications officer in a Coast Guard reserve unit that operated in a similar environment to many field Army units. Since the USCG doesn't have a field communications training program similar to what one finds in the Army, I had to learn it all on my own. I discovered that I really enjoyed the formidable challenge (formidable to me anyway who had no formal training) of establishing and maintaining reliable radio links through all-weather conditions. After a friend turned me on to "Now You're Talking", I realized that the Ham community has been doing this sort of thing for decades, and decided to pursue the FCC Technician ticket to begin to fill in my knowledge gaps.

Now, I should also mention that I worked for a large urban newspaper's New Media Engineering group which was responsible to keep the paper's website's UNIX and Windows systems and applications running. As you might expect, the group was staffed with engineers who loved technology. One engineer even toyed with a low-power radio station of some sort (I have no idea what it was or if it was even legal) to enable him to hear his MP3s within a couple of blocks of his home. These guys would be natural candidates in my mind for amateur radio if they were able to use it to tie their personal non-commercial systems into WANs, 'Airport'-type wireless hubs, etc. that do more than simply send text messages. I know that the idea of playing with antennas, etc. appealed to them because they expressed great interest in what I was doing when I told them about rigging antennas, running radios, etc. during my military reserve weekend. In their situations, however, I don't see them as being interested in a computing+radio hobby that wasn't able to easily deliver high data throughput in a wireless application.

In the current state of the amateur licensing structure, I also don't see them as being particular interested in pursuing anything beyond an FCC

Technician (or future equivalent) license since I know for a fact they won't see the point in learning Morse. In my case, I'll probably suffer through it (and never use it after I get my upgrade licenses) because I like the novelty of HF and look forward to learn to work on those bands and -- more importantly to me -- learn how to build antennas that will work on them.

I'm also interested in the comment in the article about software-defined radios and their future in amateur radio. I know from my military experience, that these sorts of radios are indeed the future and am curious to know what current amateur equipment vendors are thinking about such technology in future product offerings.

In case I'm misunderstood here, I'm not trying to stir up the proverbial hornet's nest in any of this. I genuinely want to know as an enthusiastic new entrant to the amateur community where it's going from this point and if, as the doom-and-gloomers have stated, amateur radio's days are numbered by competition, etc. if drastic (or not-so-drastic as the case may be) changes are not made on a number of fronts.

Thanks,
Brian, KD7TAE

Okay, that's great news!

My son has a way to go before he's going to want to put the work in to passing the General. But he'll get his milage out of the CW privilages.

Thanks very much for the clarification.

Sincerely,

David Kleber, KB3FXI

Could you please cite the program by name? Post something like this without telling us what the program is like a girl who's all catty during a date, but only offers you a handshake at the end of the evening.

Are you ready to finally get that HAM Radio license that you always wanted? Maybe you need to upgrade that license?

Take a FREE Online HAM Radio practice exam and see if your ready. You can take the exam as often as you like and best of all, IT'S FREE.

www.qsl.net/n4rpd N4RPD's HAM Radio Website has a practice exam for all the current license classes. A new exam is generated every time you visit too.

Good luck and 73,
Rob N4RPD

PA-SitRep (Pennsylvania Situation Report) is developing
a group of PA-SitRep Contacts, most of whom (27 so far)
are Amateur Radio Operators. We are currently seeking
additional Amateur Radio volunteers.

PA-SitRep Contacts are asked to monitor emergency
situations from their local areas and post emergency
situation reports to the PA-SitRep Discussion e-mail
list which is used, in part, for monitoring developing
emergency situations. If warranted, PA-SitRep
Administrators move the emergency situation reports
to our main emergency alert PA-SitRep list where the
alert is distributed to over 500 subscribers throughout
the state of Pennsylvania.

Our ultimate goal with PA-SitRep is to build a significant enough network of Contacts throughout Pennsylvania in order to provide timely and accurate emergency situation reports, free of charge, to those subscribed to our emergency alert e-mail distribution lists.

In addition to providing the situation reports for our own emergency alert lists, the eventual long-term goal of PA-SitRep is to provide rapid emergency situation reporting service, free of charge, to any interested served agencies, much in the same way that SKYWARN provides weather situation reports for the National Weather Service.

If you're interested in volunteering as a PA-SitRep Contact, or have any questions regarding PA-SitRep, please drop me a line at owner@pa-nospamsitrep.com (remove "nospam" from the address).

Or visit the website to learn more:
http://www.pa-sitrep.com

Bayonne, NJ is being proposed as the new site for a 2000' TV tower to
replace the one that once sat atop the WTC. What effect will this have
on HAMS in the immediate area? Will this really "mess up" the 2 meter
band in the area?

The other possible site is in Jersey City near the Liberty Science
Center.

If they follow proper procedure as far as spurious emissions, no. I
live near two large broadcast transmitters west of Boston, and have
noted no trouble on 2M.

Actually, if your ham club asks nicely, you might be able to put your
repeater transmitter up on their tower.

Happy trails,
Gary (net.yogi.bear)

Steve About QSL TNX and QSL PSE -- Assume it is your QSL card:
When you send yours as a reply to one you received -- check or circle QSL

TNX (Thanks) so they don't send another.

When you send your card and desire a card from the other station circle or check QSL PSE (Please)

Assume you are looking at a card you just got in the mail:
If it is checked or circled QSL TNX   -- they have your card
If is checked QSL PSE --- they would like to get your card

The reason for all this is big active DX stations, contest stations, or USA stations in a low population state --- get thousands of cards and have sent thousands as well, so you do them a big favor by stating QSL TNX and QSL PSE so they know what bucket to put it in   "Done" bucket or "To be Sent" bucket. Wyoming has about 1500 hams TOTAL and the active ones get 1000+ requests for Worked All States (WAS)

And you can imagine how many QSL requests Armenia gets for DXCC

All in my book DX101x

Good QSLing

P.S the guy in Wyoming or Armenia who gets 1000+ cards per year (month ?)
CAN NOT AFFORD THE POSTAGE -- so if you QSL direct -- ask USA stations if
they want QSL mutual,   QSL - SAE,   or   QSL SASE ????

For DX I always send return postage either IRCs or Green Stamps.

--
I Doubt, Therefore I Might Be
73 From AC6V, who is QBF most of the time !!

Hi all,

It seems that the number of projects on my homepages has been increasing over the years, so now there is a HUGE library of electronic, radio and antenna circuits and designs.

My homepage URL: http://w1.859.telia.com/~u85920178
Visitors ccts: http://hem.spray.se/lythall
My PDF library: http://hem.passagen.se/sm0vpo

Projects include:
LW/MW/SW AM transmitter - play oldies on antique sets
LW/MW Reflex receiver - Oroginally used germanium!
V7B FM 88-108MHz TX - 400mW with possibility to synthesize
EPROMS - Store/play analogue AF waveforms - from WAVE file
UGLY Construction - A good RF prototype method
On-Line calculators - see "RF Calculators" (+booze and Osc)
Radio Control of models - proportional circuits
Antennas suitable for balcony and restricted spaces
Loop and frame antennas
Radio path loss calulations
+ loads more.

BR from Harry

Attention collectors. No matter how complete your collection, the odds are you don't have a Motorola HT-100. these were among the first surveillance radios. Circuit-wise the radios are very much like the HT-220 without the final transmitter stage. I have a UHF, A VHF, and an empty shell in brand-new NOS condition. The radios have both rubber duck and telescoping antennas. The operating radios are already on ham simplex frequiencies.

If you're interested DON'T hit reply. Please respond to mikebogen@earthlink.com

Hi!

There is a new realtime psk31 monitor available at
http://www.hamradio-portal.com/psk !

Watch propagation or your own signal on 20m at 14.070 Mhz !

Please use on the JAVA Applet below the RED color checkbox to get a zoom to

14.070 and don�t mind about the right scale ! If you use the red checkbox
you�re defently

on 14.070 Mhz.

This monitoring is available 24h every day...ocator is JO31SQ / Germany

Have fun !

Andre

i want to install a small outdoor antenna so as to boost the range of my W/T.

i have some basic understanding of radio (cargo pilot), and some electronics.

how do i construct the antenna? is it a single conductor? i peeled off the back cover of mu W/T and there's just a simple axial wound coil with a short straight tip.

i guess i can handle the actual nuts & bolts well enough (installing an antenna jack into the case, etc.), but feel i need help in specifics.

thanks

```

On Tue, 24 Dec 2002 16:20:23 GMT, "George R. Gonzalez"
<grg2@attbi.com> opined thusly:

>If those are bipolar transistors, that would explain the poor dips.
>
>You need a tube or FET in the oscillator signal to get a good dip.

Thanks. I note that in the handbook it says that they are "PNP type alloy-junction germanium transistors" whatever they are. The oscillator stage uses a "PNP MESA type germanium transistor" - again not a type I'm familiar with.
Something's definitely amiss with it anyway, since (when used as a relative FSM) the tx's antenna needs to be practically physically coupled to the meter's sensor coil!

>Try the ARRL handbook, they used to have a FET dipper in there.

I have one to hand and will have a gander. In the meanwhile, if anyone's got a suitable device to suggest, I'd be interested to hear.

>to improve sensitivity?

Changing the transistors is most unlikely to produce any improvement,
assuming they are not faulty. To take advantage of modern devices, a
total re-design would be required.

Long leads are needed on geraniums. Try soldering them with short
leads and they're dead.

I gather from the info given that the two transistors are part of the post processing of the "grid dip". Germanium alloy transistors had Ft's way too low to be usable at 260 MHz. I would guess that your active element would be a 6CW4 or some other such tube. If my guess is correct, then replacing the transistors can be done, but would probably not fix your problem adequately. You would be better off taking the advise given you already from others and try and salvage what you can from the present grid dipper, such as the case, meter, supply, etc.

Good luck and happy trails.

I'd bet that the active RF device is a tunnel diode. I recall that Heathkit
offered a "Tunnel-dipper" in the '80s, and it had a bad reputation because
of the low level of RF it emitted.

Hi,
     I am quite new to this group.

     I am interested in knowing how do we measure the average noise
figure of a receiver ( Over a band of frequencies -> Average), if
analog IF is available and if only digital output is available.

 TIA
Madhukar B R

Are you ready to finally get that HAM Radio license that you always wanted?
Maybe you need to upgrade that license?

Take a FREE Online HAM Radio practice exam and see if your ready.  You can
take the exam as often as you like and best of all, IT'S FREE.

www.qsl.net/n4rpd N4RPD's HAM Radio Website has a practice exam for all the
current license classes.  A new exam is generated every time you visit too.

Good luck and 73,
Rob N4RPD

Amateur Radio Newsline™ Report 1323 – December 20, 2002

Amateur Radio Newsline report number 1323 with a release date of Friday, December 20, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Newfoundland joins the 5 megs experiment and Guam’s ham radio community is reported safe following a super typhoon. Find out more on Amateur Radio Newsline report number 1323 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO TECHNOLOGY: NEWFOUNDLAND JOINS 5 MEGS EXPERIMENT

The 5 megs experiment is growing once again. This, as hams in Newfoundland come on board to try their hand at propagation on what may wind up as a future ham radio band. Jeramy Boot, G4NJH, reports from Nottingham in the U-K:

--
VO1MRC, the Marconi Radio Club of Newfoundland club station, has received experimental authorization to transmit CW and upper sideband on seven spot frequencies around 5.3MHz for three four-day periods.

The next session is from the 20th to 23rd of December inclusive and the frequencies that VO1MRC can use are 5260, 5269, 5280, 5290, 5319, 5329 and 5400kHz. The experiment is to look at the differences in ground wave and sky wave propagation on 3.5, 5.3 and 7mhz.

Jeramy Boot, G4NJH.
--

The original 5 megs experiment began several months ago in the UK. It required British hams to get special temporary authority to use the band. The experiment proved so popular and so many hams applied that British telecommunications regulators had to put further permits on hold until they could reassess the impact to the band. (GB2RS)

**

RESCUE RADIO: SUPER-TYPHOON HITS GUAM - HAMS AFE AND OPERATING

Reports over a popular ham radio website that the territory of Guam was hit by a "Super Typhoon" on Sunday December 8th. And while no stations from Guam have been heard here in the United States, reports over the Internet say that everyone is O-K. We have more in this report:

--
Duncan Campbell, KF6ILA portable KH2 lives on Guam. He says over the QRZ website that the typhoon packed sustained winds of 160 miles per hour with gusts topping 190 miles per hour.

News reports pick up from there. They say that the storm damaged much of the island's infrastructure including electrical power and knocked out wired and cellular telephone service. And Campbell’s posting adds that along with the loss of electricity and water, the port of Guam was the scene of a major fire that destroyed the reserve tanks of fuel used across the island. The blaze started during the storm and the island is now low on gasoline. He says that the sale of the remaining fuel is restricted to emergency vehicles only.

With the clean up now underway the good news is that all the Amateur radio operators on Guam are believed to be safe. Campbell says that several hams are known to have lost their antenna systems and the islands only repeater was also blown off the air. This, the result of the collapse of a nearby cellular telephone tower striking it as it fell.

KF6ILA says that some hams are already back on the air handling post storm related communications. All operation is on the high frequency bands centered near 14.310, 21.375 and 28.520 MHz. Another frequency -- 7.085 MHz is supposed to be used for emergencies but so far no stations have been heard.

By Sunday December 15th, Andersen Air Force Base and part of hotel row in the town of Tumon had power restored. But news reports say that other parts of Guam could remain blacked out for a fairly long time. And even though its almost two weeks since the storm hit, if you hear ongoing emergency or storm related communications please give it priority over any other use you might have for the frequency.

For the Amateur Radio Newsline, I’m Graham Kemp, VK4BB, of Q-News Australia.

--

A little more information comes from the Guam Pacific Daily News. It says that that the Red Cross and Salvation Army are on Guam providing post typhoon relief. Also, that the Red Cross service center has already processed over 200 requests for disaster assistance.

Meantime, another poster to QRZed says that he arrived in port at Guam on December 14th. N6HPX says that the repeater is back up and operating on 146.91 MHz, but there is nobody on the air using it. (QRZ, Q-News, others)

**

RESCUE RADIO: NEW SALVATION ARMY STATION

Speaking about the Salvation Army, word that it and the Oklahoma City Autopatch Association hosted the grand opening of the Salvation Army Emergency Communication Center. It took place in Oklahoma on Saturday, December 14th. The new center is located at the Salvation Army Citadel on SE 44th Street in Oklahoma City.

Frank McCollum, N5FM, the station trustee, held the first net from the new facility at 9 am. McCollum helped to establish the first station in 1986, at The Salvation Army's Arkansas Oklahoma and Divisional Headquarters where it remained until two years ago.

The new station features very modern gear. It is designed to allow multiple High Frequency, VHF and UHF stations to provide ongoing communications services at the same time. (WA6LBU)

**

ENFORCEMENT: FCC CLEARS CT TESTING

Turning to enforcement news, the FCC has closed the books on its audit of a Connecticut VE testing session. The good news is that no violations of any rules were uncovered. The FCC's Daryl Duckworth, NN0W, explains:

--

Duckworth: "The Enforcement Bureau has informed the ARRL that it has concluded its audit of the Trumbull Connecticut test session of May 10 2001 and found no wrong doing by the VE's. The Bureau cautioned the ARRL however, that when the number of VE's exceeds the number of test candidates, control and supervision of a test session is more complicated."

--

The FCC says that all ten V-E's did follow proper procedures while administering the exam. It also thanked them for their cooperation in resolving the matter. (FCC, RAIN)

SPECTRUM ISSUES: REVISED 6 METER BANDPLAN IN SERA TERRITORY

The South Eastern Repeater Association's Repeater Journal says that there is a revised 6 meter bandplan in place for repeater operation in states that it oversees. Under the new plan the 15 repeater pairs using 2.51 MHz offset have been eliminated. This is because the outputs of the 2.51 MHz spaced repeater pairs fell on the 20 Kilohertz spaced channels from 53.71 to 53.99 MHz.

The South East Repeater Association says its goal is to simplify the bandplan for 6 meters. The revised plan calls for 15 repeater pairs using 500 kHz offset and 20 kHz spacing with outputs from 51.70 to 52.92 MHz and 39 channel pairs using 1 MHz offsets and 20 kHz spacing outputting between 52.01 to 53.99 MHz. The few repeaters originally coordinated using the 2.51 MHz offset are being grandfathered and allowed to continue operation under the old system.

The South Eastern Repeater Association is one of the nations largest all-volunteer repeater councils. It provides coordination services for repeaters in Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, Virginia and West Virginia. (SERA Journal)

**

SPECTRUM ISSUES: ADDITIONAL BANDS FOR UNLICENSED DEVICES

The FCC says that it is seeking comments on the possibility of permitting unlicensed transmitters to operate in additional parts of the electromagnetic spectrum. According to Bob Gonsett’s CGC Communicator, the regulatory agency specifically wants comments on the feasibility of allowing unlicensed devices to operate in the TV broadcast spectrum.

But that’s not all. CGC says that the Commission is also looking for comments on the feasibility of permitting unlicensed devices to operate in other bands and at power levels higher than other unlicensed transmitters. The FCC believes that advances in computer technology make it possible to design equipment that could monitor the spectrum to detect frequencies already in use. This says the FCC would ensure that transmissions only occur on open frequencies. So far, no Amateur Radio service frequencies have been specifically targeted by the proposal.

More on this issue is on the FCC website at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-229400A1.doc (CGC Communicator)

**

SPECTRUM ISSUES: NEW BANDS FOR EMERGING TECHNOLOGY

Also from the CGC Communicator comes word that the FCC has allocated 90 MHz of spectrum for advanced wireless services. The bands in question are from 1710 to 1755 MHz and from 2110 to 2155 MHz.

The FCC indicates that this spectrum could be used by current cellular and PCS licensees to expand their capacity by offering wireless voice and data services such as 3 G. Or it might be used by others to support the development of entirely new applications that are distinct from existing offerings. Either way, the FCC is seeking comments on licensing, technical, and operational rules.

More is on the web at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-228237A1.doc (CGC Communicator)

**

NAMES IN THE NEWS: ROCK STAR GIVES MAJOR DONATION TO ARRL BIG PROJECT

Some good news on the ham radio education front. The ARRL Letter says that rock entertainer Joe Walsh, WB6ACU, has made a major contribution to ARRL's Education and Technology Fund.

According to the Leagues Chief Development Officer Mary Hobart, K1MMH, the significant gift through the Joseph F. Walsh Foundation. Hobart says that it will fund an additional eight pilot schools in the ARRL Education and Technology Program.

Walsh is best-known as a guitarist, vocalist and songwriter with The Eagles and The James Gang. He has been an active Amateur Radio operator for more than 37 years, is an avid collector of vintage radio gear and a longtime friend of Heil Sound's Bob Heil, K9EID.

The amount of Walsh's donation was not made public. An up-close and personal profile of WB6ACU appeared in the November issue of C-Q Magazine. (ARRL)

**

NAMES IN THE NEWS: REPEATER COORDINATION PIONEER NAMED NEVADA SM

A ham who helped to pioneer repeater frequency coordination in Southern California has been named as the new ARRL Nevada Section Manager. Amateur Radio Newsline has a look at Dick Flanagan, W6OLD.

--

Dick Flanagan, W6OLD, is replacing Jan Welsh, NK7N as Nevada Section Manager. According to an ARRL release, Flanagan, a resident of Minden Nevada was the recipient of the ARRL 2000 Excellence in Recruiting Award and was active in the successful effort to secure an Amateur Radio antenna bill in Nevada. But long before that -- back in the early 1970's, W6OLD started his ham radio political career while still a resident of Los Angeles California.

It was in 1971 that W6OLD helped to create the famed Southern California Repeater Association or SCRA. He also served several terms of office with that group. And it was during his tenure that SCRA pioneered many innovations in the area of repeater coordination and dealing with the FCC on repeater related issues. And under Flanagan's leadership the SCRA worked out a frequency sharing scheme with Baja California Mexico that still remains in force -- essentially as negotiated -- more than two decades later.

Since moving to Nevada W6OLD has held a number of positions in the ARRL Field Organization. This includes ARRL Official Observer, Official Emergency Station and ARRL VEC volunteer examiner. Most recently he has also been serving as an assistant Section Manager.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The ARRL says that Welsh is stepping down at the end of the year for personal reasons. (ARRL, SCRA Archives)

**

RADIO PUBLICATIONS: WRTH 2003 NOW AVAILABLE

The new 2003 edition of the World Radio and T-Handbook is now available. Better known as WRTH, the latest edition contains the details of most broadcast entities plus details of transmissions made in the English, French, German, Spanish and Portuguese languages. To find out more, take your web browser to www.wrth.org   (WRTH)

**

RADIO REMEMBERS: STAMP COLLECTING OPERATORS

The Radio Stamp Operators Group reminds us that a year ago, on November 15, 2001, the Japanese Postal Service released an 80-yen postage stamp honoring the 50th anniversary of commercial radio and TV in that country. The stamps depict the images of the microphone used when commercial radio broadcasting began, the first monochrome television camera used for commercial television broadcasting, and at television set up for street viewing. More information on radio stamp collecting is on yahoogroups at radiostamps@yahoogroups.com (RSG)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

THE ARNEWSLINE SUPPORT FUND REPORT WITH N6TCQ

Ladies and gentlemen, the administrator of the Amateur Radio Newsline support fund, Andy Jarema, N6TCQ:

--
With the holiday season upon us, I need to ask you to add one more name to your gift list. Of course I'm referring to Amateur Radio Newsline.

Without going into a bunch of numbers that will bore you, let's just say that we will end the year with a deficit and it will grow in months to come. That is unless you, the Amateur Radio Newsline listener step up to help.

What we need is immediate support so we can pay the back bills and ongoing support to prevent any back bills. And only you can make it so.

Remember, Amateur Radio Newsline is a federal 501 (C)(3) not for profit orporation and donations to it are tax deductable. This is an excellent way to do some end-of-year "window dressing" on your personal or club's taxable income.

The address is the Amateur Radio Newsline Support Fund, Post Office Box 660937, Arcadia California. The zipcode is 91066.

If you missed that address don't worry. It will be repeated in the close of this weeks report.

Andy Jarema, N6TCQ

--

Thanks Andy. (ARNewsline Support Fund)

**

EMERGING TECHNOLOGY: BOSTON TV STATION DISRUPTS POLICE SYSTEM

A Boston-area TV station's new 24-hour-a-day digital transmitter is disrupting Camden County New Jersey police communications over 100 miles away. Amateur Radio Newsline's Ken Locke, N8PJN, fills us in:

--

The South Jersey Courier-Post newspaper says that twice last summer, the new digital transmitter used by WCVB in Boston Massachusettes interfered with field communications to Camden County's communications headquarters in the town of Lindenwold. The town's leaders want the problem to go away.

By way of background, WCVB began broadcasting its Federally mandated digital television signal on Channel 20 in 1998. But the problem in the currently shared 506 through 512 megahertz band did not show up in Southern New Jersey until this year. In January WCVB began full time, round-the-clock digital programming. A summertime conditon hams call tropospheric ducting is being tabed as the cause of the interference.

A duct acts kind of like an R-F tunnel from one geographic area to another. This one is putting South Jersey in Boston's back yard and vice versa during the warmer months of the year.

Engineers seem to agree that the police or the television station will have to move frequency. The big question is which one will make the change. New Jersey Congressman Rob Andrews met with county representatives and is now working to arrange a meeting between them and the FCC in Washington. They want the station to move.

But some consultants and communications lawyers feel it will be the county thats told to change frequency. They say that broadcasting is mandated the spectrum on a primay basis.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN.

--

The bottom line. This one looks as if it could become a political football for the FCC. (South Jersey Courier-Post , Portland SBE, KB4KCH, others)

**

HAM RADIO IN SPACE: SPACE STATION ACTION PLAN APPROVED

The leaders of the five space agencies that are partners in the International Space Station have approved a new operating plan for the orbital outpost. Meeting in Tokyo Japan, the group has approved. Among the more important items to Amateur Radio is increasing the number of permanent crew members so that research projects can proceed more swiftly. More people on-board the ISS means an increased chance or QSO's.
Right now, with limited crew resources of three Astronauts research takes a back seat to construction aimed at completing the orbital station. By 2006 that number is expected to at least double if a method of emergency evacuation can first be worked out. The current escape vehicle which is mandatory to ISS crew deployment can carry only three. (Adapted from published news reports)

**

INTERNATIONAL - CANADA: ONTARIO SM RE-ELECTED

On the International scene, Radio Amateurs of Canada reports that Robert McKenzie, V-E-3-S-J-Q has been re-elected Section Manage of the Canadian Province of Ontario. His next two-year term begins on March 1st.. McKenzie ran unopposed eliminating the need for a balloted election. (RAC)

**

INTERNATIONAL-CANADA: LICENSING RECORD UPDATE

Records maintained by Industry Canada and Radio Amateurs of Canada show that the Canadian callsign database is becoming corrupted by inaccurate information. Radio Amateurs of Canada says that one of the prime reasons for this is the failure of some Canadian Radio Amateurs to advise the licensing authority of address changes.

The rules in Canada that the holder of an Amateur Radio Operator Certificate shall notify the Department within thirty days with respect to a change of mailing address. Unfortunately, this does not appear to be happening in all cases. (RAC)

**

INTERNATIONAL - SOUTH KOREA: INVESTING IN THE WWW

South Korean telephone companies plan to invest the equivalent of $10.9 billion in U-S dollars in broadband networks by 2005. This, as a growing number of people in that nation demand access to high-speed Internet services.

In making the announcement South Korea's Ministry of Information and Communication did not provide breakdowns of the investment plans. It did note that South Korea boasts having the world's highest Internet penetration with more than one fifth of the population having access to high-speed Internet services. (News release)

**

HAM TESTING - SOUTH AFRICA: ZS EXAM SUCCESS

And talk about high exam scores. The South African Radio League has announced that during the October 2002 Radio Amateur Examinations that four candidates achieved the first place in the test. SARL says that each of these applicants emerged with an average of 99% in the overall exam. (SARL)

**

INTERNATIONAL – UK: FOUNDATION LICENSE PARTY

The United Kingdom plans to celebrate the first year of its new Foundation Class license with a big on-the-air QSO Party. The Foundation License for 'QSO Party' for M-3 prefix licensees and their friends on the 1st of January 2003 from 10:00 and 15:00UTC. Operations will be on 40 meters around 7.070 MHz, plus or minus any QRM. (RSGB)

**

DX

In DX, word of a new station on from the Sudan. His name is Marco. His call sign is ST1MN, and he is reportedly will be active on all of the High Frequency bands through the end of June 2003. (RSGB)

Also, VK8AN will be active as 4W6AN from Dili, East Timor. This, from around the 19th of December through the end of the year. Due to limited notice he will only be running about 15 watts to a dipole or groundplane antenna. QSL only via VK4AAR. (Via e-mail)

**

THAT FINAL ITEM: THAT FINAL ITEM: STAR TREK -- HERE WE COME

And finally this week a story about the ultimate form of communication. About sending yourself electronically to anyplace you might want to go. Bill Pasternak, WA6ITF, has the far out story of science fiction on its way to becoming science fact:

--

As incredible as it may seem, a Star Trek like transporter may be a step closer to reality. This, after physicists in Denmark make two samples of trillions of atoms interact at some distance.

The experiment involved a science called quantum entanglement. This is a mysterious theory of a controlled spiraling of two or more particles without any physical contact. Scientists say that these entangled states are needed for quantum computing and for teleportation.

Before the team at the University of Aarhus made its breakthrough other scientists had successfully developed entangled states of a few atoms. But the scientists in Denmark have now done it with very large numbers.

At the moment nobody is about to teleport anyone, anywhere. But the research, which was reported in the science magazine Nature makes the idea of instantly transporting an object from one place to another less far fetched.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF.
--

We know you are waiting for the obvious tag line, so we won’t disappoint you. If all goes well, maybe the term “Beam me up - Scotty” will be reality in our great, great, great grandchildrens lifetime. The only question is whether or not a 5 word per minute code test will be required to “communicate” using that rather exotic mode. (Future Technology)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Amateur Radio Newsline™ Report 1324 – December 27, 2002

Amateur Radio Newsline report number 1324 with a release date of Friday, December 27, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio responds to a Southern California gas leak and interference issues are front and center with the FCC. These stories and more come your way on Amateur Radio Newsline report number 1324 beginning right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAMS RESPOND TO SOCAL GAS LEAK

Ham radio is there to provide communications as a gas leak hits Huntington Beach California. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the rest:

--

Glorria Morrison, KE6ATG, is the Huntington Beach California Fire Department Emergency Services Coordinator. She was in the process of briefing the new Police Chief, Kenneth Small, on routine procedures on Wednesday, December 11th when the meeting was interrupted by a report of a natural gas leak. Nine fire companies were assigned to the incident. Public Works and Police Department personnel were also sent to the scene.

First order of business -- a near-by 55-unit apartment complex had to be evacuated. Fire Battalion Chief Jacques Pelletier requested that a Care and Reception Center be set up for displaced resident. Huntington Beach RACES was soon activated. It established a net and began logging-in availability of members for the response. 20 RACES made themselves available.

Meanwhile, a call was made to the Community Emergency Response Team Shelter Leader to activate five volunteers for service at the Care and Reception Center location. Tim Sawyer, WD6AWP, acted as net control operator. Huntington Beach RACES Chief Radio Officer Steven Graboff, W6GOS, responded to provide Amateur Radio, cell phone, Red Cross and fire radio communications. Other RACES operators were deployed to the Emergency Operations Center and the Fire Incident Command post at the gas leak scene.

Within 90 minutes the incident was over. The shelter was closed down and the residents went home. No injuries to the firefighters or the RACES volunteers were reported.

For the Amateur Radio Newsline, I'm Bruce Tennant., K6PZW, in Los Angeles.

--

RACES communications was utilized exclusively throughout this event because the city's cellular telephone system was not working at the time. (KH6WZ)

**

RESCUE RADIO: ARES ASSISTS FOLLOWING MISSISSIPPI TWISTER

The ARRL Letter says that Amateur Radio Emergency Service teams from Jackson and Meridian Mississippi converged on the tiny community of Newton last week. This, to provide emergency communication following a devastating tornado on Thursday, December 19th.

The mid-day twister struck a Wal-Mart filled with holiday shoppers, blowing out the front windows and collapsing part of the roof. The tornado also damaged a furniture factory. According to news accounts, some 70 people were hurt, but no one was killed. Property damage in the town was said to have been widespread, and Governor Ronnie Musgrove has declared a state of emergency in Newton.

According to Mississippi Section Manager Malcolm Keown, W5XX, about a dozen amateurs from the Metro Jackson ARES and the Lauderdale County ARES groups turned out. They took turns supporting relief agencies in Newton which has no ARES organization of its own.

Keown said the ARES teams helped the Red Cross with damage assessment and with shelter communication. Hams also assisted the Salvation Army and the Southern Baptist Men's Kitchen canteen operations as well as making themselves available to local emergency management officials.

In the tornado's immediate aftermath, telephone service and electrical power were out in much of the town of nearly 4000 and in surrounding Newton County. (ARRL)

**

RESCUE RADIO: GUAM SUPERTYPHON - THE AFTERMATH

An update on the recovery effort on Guam following a typhoon that hit the island on December 8th. As reported last week, the giant storm packed sustained winds of 160 miles per hour. It damaged much of the island's infrastructure knocking out electrical power and all telephone service. Now the inhabitants of Guam are slowly digging out. We have this report:

--

By far the best source of what happened during and after the typhoon has been Duncan Campbell, KF6ILA portable KH2. He lives on Guam and survived the storm. He has also been posting regular updates to the QRZ.com website.

Campbell gives a reason why one key Guam station was off the air. He says that on Wednesday December 11th the high frequency ham station on the Naval Station from where he was operating was ordered to shut down because fuel to run generators that supply electricity was running low. The supply of fuel

returned to normal on December 17th. Also, water and power is now back on at his home and there is some telephone service but long distance is still spotty, but life is stating to get back to normal.
One thing KF6ILA does not cover in his QRZ.com posts is why most other Guam based stations have been off the air since the typhoon hit. But news video from the island pretty well covers that. The pictures show that the devastation was very wide spread. Its more than likely that antennas simply got blown away.
As far as medical services Campbell says that a military Field hospital from San Diego has been set up outside of Guam Memorial Hospital. He says its here to relieve the strain on both of Guam's regular hospitals. Both were damaged in the typhoon.
Finally, Campbell says that that he is now back at work and that there is a lot of post typhoon restoration taking place. That added to the times when the high frequency bands are open to the U-S mainland means that he has not been able to keep scheduled contacts.

Reporting from Auckland New Zealand, I’m Jim Meachen, ZL2BHF, for the Amateur Radio Newsline.
--

Another ham on Guam -- Don Palko, N7GZA -- adds to the story. He says that he was with KF6ILA when he was trying to maintain communications with the mainland U-S. He says hat it was Campbell hat brought Guam’s one and only 2 meter repeater back on the air. He adds that the American Red Cross is on scene to help with the recovery and they have brought ham radio operators with them. (KF6LIA, N7GZA via QRZ.COM)

**

Break 1

Wishing you the very best of seasons greetings from the United States of America. We are the Amateur Radio Newsline, heard on bulletin stations around the world including the 145.600 MHz repeater serving the city of Durban South Africa.

(5 sec pause here)

**

ENFORCEMENT: OLD PROBLEM - NEW SOLUTION?

The FCC is using a new diplomacy to deal with an old problem. Its telling a repeater owner that he will be held responsible if an unlicensed individual is relayed over his system. Amateur Radio Newsline’s David Black, KB4KCH, has the details:

--
Wayne Curley, WA6NRB, of Montrose, California finds himself receiving an interesting warning letter from the FCC. Curley operates a popular repeater serving the Los Angeles area. It's on that repeater where the Commission

alleges that Richard Burton, the former WB6JAC, has been appearing.

Burton and the FCC have a long history. Burton is a former ham who had his license revoked back in 19-81. The following year, he was convicted on four counts of transmitting without a license and two counts of making obscene transmissions.

That conviction got him sentenced to 8 years in a federal prison. But the judge then suspended all but the first six moths. Burton appealed. The Ninth District Court of Appeals threw out his obscenity convictions but let stand the charges of operating without a license. But it doesn't end there.

The Commission says that Burton transmitted without a license while on probation in 1984, 1990 and again in 1992. After a second conviction, he was fined $2000 and received a year's probation. On his third unlicensed operation conviction, he was sentenced to serve 7 months in prison and do a year on probation.

In 1992, Burton decides to try and get his ham license reinstated. The FCC says no. So he waits four years. In 1996, he passes a Technician class exam. Burton is issued the call sign KG6GKS but that license grant is short lived. As soon as the Commission realizes that the new license has gone to Burton, it sets the license aside, putting Burton off the air again, at least as a Commission licensee.

In may of 2,000, another federal grand jury indicts Burton for operating without a license. He's arrested that August. In January of 2001, Burton agrees to serve three months in jail. He does his prison time at a federal detention center near Fort Worth, Texas. Burton is also placed on one year's probation following his release -- and he's ordered to undergo psychological counseling.

Now, the FCC says that Burton is back on the air again, this time, using Wayne Curley's Los Angeles repeater. And it appears that--this time--the FCC has decided to simply give him no place to operate by holding Curley, as repeater operator, responsible for letting Burton's unlicensed signal to be relayed.

On December 4th, the FCC issued a Warning Notice to Curley. The letter reminds Curley that a repeater licensee is responsible for continuing violations of Commission rules. And it tells Curley that enforcement action against him may result if he fails to prevent violations from occurring over his repeater. The FCC says this could include fines, license suspension or even revocation if Curley fails to act.

But the FCC also gives Curley some advice. It tells him he has several options available to prevent recurring and deliberate violations of FCC rules from taking place on his repeater. This includes locking rules violators out...or using access tones...or even limiting the repeater's operation.

But the Commission also adds a warning. If he is not able to do this, the FCC says, Curley must take his repeater off the air.

For the Amateur Radio Newsline, I'm David Black, KB4KCH.

--

As we go to air its not known what enforcement action the FCC might be planning to take directly against the ex-WB6JAC. (FCC with background from ARNewsline and Westlink Radio Archive)

**

ENFORCEMENT: YOU CANT OPERATE - YOU AGREED TO A SUSPENSION

The FCC’s Enforcement Bureau has issued a warning notice to Cornwall Chan, W3CI, of Dresher Pennsylvania regarding operation on a 2 meter repeater back in November. The reason: Chan is not supposed to be on the air.

You may recall that W3CI had forfeited his license back to the Commission for a period of three years. This, in settlement of an earlier enforcement action regarding repeater interference.

Chan is supposed to stay off the air until September of 2003. The FCC says that if he shows up again before that date it will take further enforcement action against him. The FCC adds that in view of the alleged violation of its agreement with Chan that it has now dismissed his request to have his suspension period shortened. (FCC)

**

ENFORCEMENT: SORRY -- THATS NOT REPEATER INTERFERENCE

The FCC says that the signal being heard by another Ohio ham cannot be considered as interference because the ham is listening from far to high of a location. Commission spokesman Daryl Duckworth, NN0W, explains the situation and why the agency declined to get involved:

--
Duckworth: “The complaint of Kim Lozier, N8ZW, of Portsmith Ohio was dismissed. Lozier complained about what he perceived as interference from the KF8HL repeater. Our letter pointed out that Lozier was listening from an 800 foot altitude and that merely hearing another repeater with no disabling interference was sharing -- not interference, and that frequency coordination is not necessarily exclusive use.”

--

In a related matter a petition for reconsideration from the KF8HL repeater group in West Virginia was also dismissed as untimely. That petition had sought reversal of an earlier Enforcement Bureau ruling that KF8HL was an uncoordinated repeater and had the primary responsibility -- but not the sole responsibility to prevent interference to the KC8FKP system located near Portsmith Ohio. (FCC, RAIN)

**

CONVENTIONS AND HAMFESTS: RILEY AT FROSTFEST 2003

The FCC’s chief ham radio rules enforcer, Riley Hollingsworth, K4ZDH, will be the keynote speaker at the Richmond Virginia FrostFest 2003. The FrostFest is February 9, 2003 in Richmond, Virginia. The venue is the Showplace center. For information please visit www.frostfest.com on the World Wide Web.   (W4PW)

**

AWARDS: WILL THERE BE A WAS A-M?

Amateur Radio Newsline’s Paul Courson, WA3VJB, reports that the ARRL has promised to consider a proposal for special recognition of full carrier Amplitude Modulation. This, as part of efforts by promoters of the mode to earn the popular Worked All States or WAS award.

The proposal for a WAS AM was jointly developed by Pete Markavage WA2CWA and Mark Bell, K3ZX. League staffers have told the two that the idea will be considered at an ARRL Membership Services Committee meeting in January.

Several stateside hams have indicated they have achieved or are close to achieving WAS AM by working stations on popular AM gathering points on 160, 75 and 40 meters. More information is on the web at www.amwindow.org (WA3VJB)

**

SPECIAL EVENT STATION: A CELEBRATION OF KIDS DAY

Its a special event station to help celebrate one of the most important events in the ham radio calendar. K1D will be on the air through January 5th to celebrate the January 4th Kid's Day operating event. That’s the twice a year outing where hams are encouraged to open their hearts and their stations to youngsters nationwide.

As to K1D, that station is special in several ways. Even the call signs of the people operating are in the spirit of the event -- W1DAD and K1MOM who in real life Peter and Jeanne Schipelliti.

So keep an ear open for K1D and if you work Peter or Jeanne, QSL to 7 Dearborn Ridge Rd, Atkinson, New Hampshire 03811. More on Kids Day is on line at www.arrl.org. (News release)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

NAMES IN THE NEWS: ZL1AMO CONTINUES HIS RECOVERY

I’m Ken Locke, N8PJN, with an update on the recovery of famed D-X’er Ron Wriight, ZL1AMO.

Judy Roush, AA7UC of the International DX Association has some positive news this week. While Wright is still in medical isolation and continues to fight the E-S-B-L infection, he is improving. Intravenous feeding has been discontinued and ZL1AMO is now eating solid food.

Rousch says that Wright is still weak but he is able to communicate. In fact, he’s doing so with his family using a mobile phone. And Roush says that Wright is anxious to resume his ham radio activities as soon as he has recovered. In fact, he continues to ask the family if they are receiving e-mails from the amateur radio community.

Meantime, the International DX Association reports that the ZL1AMO Air Ambulance Fund is within $5,000 of reaching its $20,000 goal. The fund was started to assist Wright in paying the fee to bring him home from Fiji where he was when he took ill. Funds received so far have been forwarded to the air ambulance account in New Zealand.

For the Amateur Radio Newsline, I’m Ken Locke, N8PJN. (INDEXA)

**

RADIO LAW: HACKER PHONE FREEKS PALO ALTO

The city of East Palo Alto California is stuck with a thirty thousand dollar telephone bill thanks to an alleged hacker. ATT says that the intruders were able to infiltrate the city's phone system last July. Over a five day period numerous long distance calls were placed to the Philippines.

East Palo Alto's typical monthly phone bill is about ten thousand dollars. In July, it was 40-thousand. ATT offered to reduce the total amount by about $10,000 but said that East Palo Alto was responsible for the rest. The city says it has no intention to pay the additional charges. (Published news report)

**

EMERGING TECHNOLOGY: MORE PEOPLE CARRYING CELLPHONES THAN EVER BEFORE

A survey by a telecommunications firm reports that over half of the overall nations population living in major metropolitan areas now own mobile phones and subscribe to service. This, according to ongoing measurements performed by Telephia Incorporated in 44 markets.

Telephia says that while the average penetration rate was at 51 percent, a handful of cities had penetration rates in excess of 60 percent. Some of the cities mentioned are in Greenville, South Cariolina with 68 percent, Atlanta with 67% and 63 percent in Orlando, Florida.

Telephia adds that recent results from an Attitude and Behavior Survey found the percentage of frequent wireless callers increased from 38 percent last year to 48 percent this year. Also that overall wireless service satisfaction increased significantly over 2002. (Telephia release)

**

INTERNATIONAL-AUSTRALIA: NEW SHORTWAVE CENTER OPENED

A new $6 million dollar radio Voice of International Asia broadcast center has been officially opened on Australia's Sunshine Coast. This, by the man behind the project - multi millionaire Bob Edmiston - of the U-K. The studio originates mainly programming for transmission on shortwave. It uses the former Radio Australia transmitters near Darwin in VK8 and the footprint covers one-third of the globe. (Q-News)

**

INTERNATIONAL - THE AMERICAS: ANOTHER LOOK AT BROADBAND

Proposed U.S. government policies could harm competition in the broadband Internet and affect international e-commerce. This says the Consumer Federation of America could result in reducing market choices and driving up monthly fees for users who want high-speed Internet access.

The FCC ruled in March that cable providers do not have to share their systems or provide open access for competing Internet services. The agency is currently reassessing its line-sharing rules for local-phone giants like Verizon Communications and SBC. (Published reports)

**

DX

In D-X, five Chillian stations will be active as CE6M from Mocha Island from January 15th to the 18th. They plan to operate 160 through 10 meters on SSB and CW. Q-S-L to P.O.Box 591, Temuco, Chile. (425 DX)

QRZ-DX reports that someone pirated the call sign 9S1X and used it to operate 80 metres on December 13th. No other information is available at this time. (QRZ-DX)

And, W8GEX and WZ8D will be active as N8Z from St. Croix, in the Virgin Islands through January 8th. They will be at the home of WP2Z and will operate on 6 to 160 meters. QSL direct to WZ8D. (GB2RS)

Lastly, Q-News reports that the P29BPL, the six meter beacon in Papua New Guinea is on the air, but with reduced power and a lower antenna location. This is reported to be a preliminary test to make sure there is no interference to TV receivers located nearby. (Q-News)

**

THAT FINAL ITEM: IN MEMORY OF ROGER MC CARTHY KD6CC

And for our last item of the year we have a tribute. A special remembrance of one ham for another. It was our Support Fund Administrator Andy Jarema, N6TCQ, who brought this very special remembrance to our attention. We feel it is fitting that he share it with you as well.

--

Normally when you hear my voice its to ask for donations. Not this time. This time I want to share something with you. Actually, its the note that accompanied a donation that we received last June. It was only a few lines but it really tugged at our hearts. See what it does to yours.

The note came from Rob Sweet, KG6DKW, not far from my home in Arcadia California. Here’s what it said:

“Thank you for providing Amateur Radio Newsline. Enclosed you will find a donation in the amount of $50. I would like to make this donation in memory of Silent Key KD6CC, Roger McCarthy, who was killed in a motorcycle accident on May 31st 2002. I never met Roger in real-life, but enjoyed talking with him on the 2 meter band, and exchanging pictures with him on slow-scan TV.”

How do you respond to a note like that? After you wipe away the tears, what do you say?

We talked about it for several months and finally realized that what you do is to help keep Roger McCarthy’s ham radio spirit alive. That’s what Rob Sweet, KG6DKW, wants to do.

So Roger -- this one is for you. This week we dedicate the final Amateur Radio Newsline report of 2002 to the spirit of the ham radio fellowship that you created while you were here among us.

Like Rob, we never met KD6CC, but we wish we had. He sure sound like the kind of ham radio neighbor any of us would be proud to have living next door. May he rest in peace on the other side of the great Ethereal Abyss and may the light of Amateur Radio friendship that he kindled -- live on in 2003 -- and forever.

In Arcadia California, I’m Andy Jarema, N6TCQ.

--

Thank you Andy.

**

NEWSCAST CLOSE

And for this week, and this year, that’s all from the Amateur Radio Newsline. Our e-mail address is newsline@arnewsline.org. On Fri, 27 Dec 2002 04:15:14 GMT, norway@passport.ca (David Snowdon)
opined thusly:

>>I gather from the info given that the two transistors are part of the post
>>processing of the "grid dip". Germanium alloy transistors had Ft's way
>>too low to be usable at 260 MHz. I would guess that your active element
>>would be a 6CW4 or some other such tube. If my guess is correct, then
>>replacing the transistors can be done, but would probably not fix your
>>problem adequately. You would be better off taking the advise given you
>>already from others and try and salvage what you can from the present grid
>>dipper, such as the case, meter, supply, etc.

I shall do so, thanks. Having compared the remarks on this group with
an inspection of the internals leaves me with two inescapable
conclusions: the circuitry and components are *crap*; the hardware is,
OTOH, first class so it's a case of ripping out the guts and starting
again with an up-to-date circuit. Thanks, chaps.

A freind of mine asked me to look into whether he'd be eligible for the 'instant' General upgrade. He says he's not sure when his original call was issued, but thinks it was very near the cutoff date.... He WAS N8JWJ. Does anyone know how to find out if he's eligible (and prove it?)? He's a tech+, but is sure he took the full General written when that was given for upgrade to Tech in the early 80's. I suppose I'd need an old call book or something to prove it?

The cutoff is March 1987. Yes you need some kind of proof such as a copy of the Tech license itself that he had on or before that time or an old call book. I believe there are sites on the internet that you can order a fax copy of old callbook pages but don't happen to know that they are.

From the ARRL Page - URL: http://www.arrl.org/news/restructuring/faq.html

4. I got my Technician license under the old system prior to March 21, 1987, and I now hold a Tech Plus license as a result. I understand that I'm now eligible to upgrade to General without having to take an additional examination. Is this correct?

Yes. Holders of a pre-March 21, 1987, Technician class license or CSCE who now hold at least a Technician license may claim credit for a new General class license after April 15, 2000, without additional testing. This is because under the old system, the written examination for Technician and General class was identical; the only difference was that Technicians had to pass a 5 WPM Morse code test, while Generals had to pass a 13 WPM Morse code test. The upgrade is not automatic, however. You will have to apply through a Volunteer Examiner test session, complete Form 605, attach documentary proof of having completed the requirements for a Technician license prior to March 21, 1987, and pay an application fee, if any, to the VEC involved.

MORE INFO there as to presenting proof

> p.

I think that you are absolutely right in your conclusions. However, it is abundently clear that there should be a new and better way of doing this function without too much expense. The original design used an oscillator and it was coupled loosely to an other circuit which should be "tuned" to the same frequency of the measuring instrument. A "dip" in grid current would indicate this resonance and give you an idea as to where the external circuit was tuned. The idea is sound, but I believe the implementation to be faulty in that the circuit be measured would pull the test instrument off freq. rendering the reading off by the length of the pull. If the field being used for measurement could be gauged and the absorbsion of same be measured with no change in its forced frequency, then this would be useful. An instrument to be used to fit all loads doesn't seem very practical here. I believe a design to fit a particular range of loads makes more sense. Okay design engineers, the problem is now crudely stated. I guess now the title of the original post will be very precise, save the reference to the tube element now not very likely to be used in the design.

Happy Thoughts,

Steve WB4CZR

Yes, but a fact of life. If people can cheat, some will. I feel sorry
for these losers, but I can't control it and know it.

Why would it hurt so badly to take the exam again? Reviewing the theory
and regs is not difficult and the 5 wpm test is so simple it's
ridiculous. I hate CW and think code is a big waste of time, but that's
the hoop you have to hop through and at 5 wpm, you can look up the
letters. Can you have a crib sheet for morse with you in the exam? :-)

Steve WB4CZR

Actually, a GDO is an extremely valuable lab tool, but it not considered a precision instrument. It only gives indications of where resonances occur so you can investigate further. One of the significant advantages is finding unexpected resonances that can affect circuit behavior.

At resonance, the external circuit reflects a resistive component to the oscillator tank, which reduces the Q but has little effect on the frequency. Reducing the Q reduces the voltage across the tank, and is indicated by the dip in the output voltage. Probably the biggest effect on the tank frequency comes from adding stray capacity to ground and setting up circulating currents in nearby metal. These effects can tend to cancel each other, depending on how the coil is wound and its orientation to the circuit under test.

Once a resonance is located, you can reduce the coupling error to a minimum to improve the frequency accuracy, and add an external counter such as the Radio Shack Frequency Counter, P/N 22-305, to eliminate the dial calibration error.

Adding a headphone to the GDO can help locate parasitic oscillations that are within the frequency range of the GDO. These can be difficult to locate, since they may be above the bandpass of your scope, and the added load of a scope probe can kill the oscillation.

Mike

No, with *loose* coupling and the GDO tuned for minimum grid current,
there is no pulling. The circuits are synchronous.

Emergency Situation Report Group for Pennsylvanians

PA-SitRep is a free, 100% non-commercial, non-profit, emergency communications related web site and emergency alert e-mail list. The PA-SitRep list is free of charge and we currently have 500 subscribers, many of whom monitor the list via SMS (short message service) capable cell phones.

We are developing a group of PA-SitRep Contacts, most of whom (27 so far) are Amateur Radio Operators and we are currently seeking as many volunteers as possible.

PA-SitRep Contacts submit their contact information which is posted on the PA-SitRep Contact page (http://www.pa-sitrep.com/contact.htm) and are asked to post emergency situation reports from their area to the PA-SitRep e-mail list we use to monitor developing situations. If warranted, PA-SitRep Administrators move the sitreps to our main list of over 500 subscribers.

Our ultimate goal with PA-SitRep is to build a significant enough network of Contacts throughout Pennsylvania in order to provide timely and accurate emergency situation reports, free of charge, to those subscribed to our e-mail alert list.

In addition to providing the situation reports for the PA-SitRep list, our eventual long-term goal is to provide situation reporting service, free of charge, to any interested served agencies, much in the same way that SKYWARN provides weather situation reports for their served agency, the National Weather Service.

If you're interested in volunteering as a PA-SitRep Contact, or have any questions regarding PA-SitRep, please drop me a line at owner@pa-sitrep.com.

Or visit the website to learn more:
http://www.pa-sitrep.com

Thanks. We'll look forward to hearing from you.

Very loose I would imagine and probably not a dramatic effect to note.

it is better to use a signal generator with a coax cable to a probe
consisting of 2-5 turns dependent on frequency, and measure the
voltage drop on the output from signal generator when 'dip' occurs.
You could also use a potmeter to vary the impedance between the
generator and voltage detector with coaxcable

It was described in QST May 1986
Hayward "Simplified Scalar Network Analyzer" p.14-20
     (with attachments for various measurements)
     (Feedback Aug p.40)
"Beyond the dipper(using signal generator) W7ZOI QST"

Just keep the HP651B for the purpose since it is easier with a
continous variable generator than a thumbweel tuned SG.

Very interesting, Jan. Did the authors mention any problems with
reflections on the coax due to the mismatched termination?

Mike
